Earlier to this, the various businesses in this building included Dalgety and Co, horse bazaar (1940); Gardner Bros, farm and station / produce merchants (1930-1920); WA Fruit and Produce Markets (1915); Intercolonial Horse Bazaar (1908-1910). Before 1908 the numbering was different again; it is likely the place was No. 198. No businesses are listed until 1910.The 1982 the building was Century Motors (See State Library photo 311302PD) and in 1985 it was Choi's Inn, a Chinese Restaurant (State Library photo 313776PD), adjacent to the newly built Gateway to Chung Wah Lane, with another Chinese Restaurant, Sun Wah, on the east of the gateway.
The building is a two storey commercial brick building with rendered details including parapet, a prominent triangular pediment and rendered horizontal bands. It has six arched windows in pairs. There is a loss of original detail to ground level façade, but the upper floor is intact. The ornate Chinese lanterns at first floor level are not original.
At 2021, the building is still a Chinese restaurant.

WESTERN AUSTRALIAN HISTORIC THEME

3. Occupations - 308 Commercial services and industries

AUSTRALIAN HISTORIC THEME

HISTORY

In 1900 the Perth City Council serviced residences with a pan collection system for outside toilets. in 1903 plans were developed by the State Government to form a deep sewerage system for Perth. One problem with this system was the creation of hydrogen sulphide gases in the pipes which needed to be vented so oxygen could enter the pipes. In 1911 the ventilating shaft was built on Cook Street, Arthur Street and Royal Street. The disconnection of the sewer vents is unknown, however in the opinion of Water Corporation the changes to the system between the 1950s and 1970s led to many vents being unnecessary.

STATEMENT OF SIGNIFICANCE

The place provides rare evidence of the earliest establishment of a deep sewerage system for Perth (operational from 1911), a significant milestone in the development of Perth as a modern city.
The place is a surviving c.1911-1930 sewerage ventilation shaft, a once-common piece of infrastructure that appears to have largely been removed and/or forgotten across the country.
The place is a representative example of the standard natural ventilation shafts erected for the Perth and Fremantle sewerage systems from 1911 to 1930, when decorative but functional cast iron work was used for these items of public infrastructure.

HISTORY

Victorian Gardens is a site with cultural significance for Nyoongar people, situated over the Registered Aboriginal Site (ID3694) 'Claisebrook Camp' a recognised camp and water source. The site is protected under the 'Aboriginal Heritage Act 1972.' Early town plans shows that Government Gardens was set out on the eastern end, around Claisebrook and Matagarup. It was reported in 1877 that the Governor, Sir William Robinson "had a strong opinion in favour of the establishment of Botanical Gardens in Perth, and fixed upon Victoria Park as their site… the citizens were delighted at the idea of the removal of the stigma of our being the only Australian colony without such a place of resort. A gardener was employed to lay out the grounds, a lodge built, and a carriage road made. But, alas for the gardens, Governor Ord comes upon the scene, and I now hear that a sum of £200 is to be spent, after which the Park is to be handed over to the tender mercies of that august body the City Council, who, from lack of funds will doubtless allow the Park to return to its original state of bush."(The Western Australian Times, 27 August 1878 p 2. http://nla.gov.au/nla.news-article2979734)Within six months it was reported that Victoria Park was a waste ground consisting of: "two little mounds by the side of the river and which are divided from each other by a small gully. The one mound is composed of white sand and is entirely destitute of vegetation, with the exception of two stunted raspberry jam trees, the other mound has the appearance of being a deserted brick field and has on it no vegetation whatever. The grounds are entered from the road by a carriage drive which winds round the sandhill. About twenty yards from the road the sandhill abruptly dips towards the river, and between the hill, or rather mound, and the river is a strip of ground about

half an acre in extent laid down with couch grass. Here the 'Park' assumes a more cheerful appearance. On the edge of the hill are four or five red gum saplings, while on the grass plot below are three aged trunks of trees, four stunted aloes, five geraniums in kerosene pots, two rustic seats, one rustic table, and one dilapidated arbor frame. The Park here has very much the appearance of a humble tea garden which at one time enjoyed a little custom, but which has been given up owing to the death of the proprietor or the greater attractions of younger rivals. But - to call such a place a "Park" is simply to provoke ridicule." (The Herald, 22 February 1879 p 2. http://nla.gov.au/nla.news-article110471417)The Botanical Gardens were established at Stirling Gardens, and seemingly Victoria Park became neglected. In the 1890s, thousands of loads of loam were carted from the old mulberry plantation and Victoria Park to create Queen's Gardens, which was formed out of the former Government Brickfields.

The site of the former Victoria Park then served as the City Council's plant nursery. (Sunday Times, 27 Sep 1925, p. 10. http://nla.gov.au/nla.news-article58225739) The location was the Claisebrook Camp site for Whadjuk Nyoongar and other Aboriginals visiting Perth during the time when the City imposed a Prohibited Area over the City. Much of East Perth was outside of the curfew boundary, and thus became a haven for Aboriginal people in the period 1927-1954. Victoria Gardens comprises of many mature trees, some of which were planted in the late 1880s. These trees including Norfolk Island pine, Bunya pine, London Plane trees and a Southern Mahogany (Woolly Butt), survived many years as the park transitioned from a long forgotten and neglected public garden surrounded by the light industrial precinct, through to the redevelopment and transformation of the park in the 1990s.By 1996 the site was rehabilitated as part of the successful East Perth redevelopment project, and a dedication ceremony was part of a carnival held in the gardens to celebrate. Richard Lewis, WA Planning Minister in 1996 said Victoria Gardens 'would be an enduring asset for the City and its people.' In addition he paid tribute to the close association of Aboriginal people with the river at East Perth, describing Victoria Gardens as 'a place of plenty' and 'where they did not go hungry or thirsty or wander aimlessly in search of a place to camp.' (https://www.mediastatements.wa.gov.au/Pages/Court/1996/04/Victoria-Gardens-(East-Perth)-dedicated-to-City-of-Perth.aspx)A series of significant artworks have been incorporated during the gardens' redevelopment. The artwork found in Victoria Gardens includes six items from the East Perth Art trail. Three of these 6 celebrate the Indigenous history and culture of the area including: • 'Charnock Woman' by Jenny Dawson, Sandra Hill and Miv Egan, a 25 metre pavement mosaic that tells the Bibbulmun Dreamtime story of the evil Charnock Woman who used her hair to trap children.• Illa Kuri, by Toogarr Morrison a winding pathway along the while riverbank that describes the chain of lakes and wetlands that stretched across the landscape before the city was built.• Yoondoorup Boorna, by Alma Toomath, an old river gum, that had to be removed for the East Perth Redevelopment, and was treated and returned to the site at the request of the Nyoongar people. There is also 14-metre-long niche wall mural in the limestone colonnade beside the Claisebrook Cove by Joanna Lefroy Capelle which depicts the history and development of East Perth. Another feature is a limestone lookout, the Observatory, which represents the six Nyoongar communities that lived on the edge of the Swan River.

Further enriching the cultural heritage value of the Victoria Gardens is the resident population of Quenda or Southern Brown Bandicoots. These medium sized ground dwelling marsupials are living and successfully breeding in Victoria Gardens less than 2km from the Perth CBD.

Heritage Place Record Form

For Adoption

STATEMENT OF SIGNIFICANCE

The place sits over an Aboriginal Registered site 'Claisebrook Camp' and has high cultural heritage value to the Whadjuk Nyoongar people.
The place has historic value for its origins as a public park created in the 1870s and while neglected and used for a short time for the City's plant nursery in the intervening years, it has been revitalised in the 1990s to its original purpose.
The place has historic and aesthetic value for the mature trees that have survived since the c. 1880s.
The place provides amenity, an environment for native animals, and is valued by the local community.

HISTORY

The East Perth Primary School was constructed in 1895. In 1902 a separate Infants School Building was constructed which had one classroom, hall, teachers' room, hat room and verandah. An additional classroom was built in 1905, and again in 1912. The school was altered again in 1927 to incorporate Household Management.

The building was subsequently used as a centre for Aboriginal Youth known as Jack Davis Centre. The house adjacent (demolished) was used as an Aboriginal Centre for many years associated with Moore River Aboriginal Settlement.

HISTORY

Although East Perth was included on the plan for Perth from earliest colonial surveys, the area remained substantially undeveloped until the period of expansion that accompanied the gold rush. Part of the area had also been designated for cemetery purposes, and from the 1860s East Perth developed as an industrial area when brickworks were established in the area. Later an abattoir and the gas works were amongst the industries established. The presence of industries provided employment but also reduced the general attractiveness of the area for residential purposes. The location where the building was erected was a mix of early twentieth century housing and industry. In the mid-late 1970s the government proposed a new office headquarters for the Education Department. From 1979-1982 the building was constructed to a design by Cameron Chisholm and Nicol architects. This building became popularly known as ‘Silver City’ due to its appearance.

HISTORY

The building was constructed in 1937 by the Colonial Mutual Life Assurance Society. The design was prepared by Melbourne architects Hennessy, Hennessy and Company with Perth architect Reginald Summerhayes. The construction of the Lawson Flats was a key part of an intensive building program which signalled that the building industry in Perth had recovered from the economic depression in the first half of the 1930s. The building included a restaurant, laundry and caretaker's flat on the ground floor. The Perth Club was located on the first and second floors, which was then occupied by the Karrakatta Club, a private women's club. The other floors comprised of residential flats.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement and mobility - 111 Depression and boom
3. Occupations - 306 Domestic activities

AUSTRALIAN HISTORIC THEME

4. Building Perth (Settlements & Cities) - 4.1.3 Learning to live with property booms and busts
4. Building Perth (Settlements & Cities) - 4.1.5 Developing city centres
8. Developing Perth's Cultural Life - 8.10 Pursuing excellence in the arts and sciences
8. Developing Perth's Cultural Life - 8.10.4 Building and designing fine buildings
8. Developing Perth's Cultural Life - 8.13 Living in cities and suburb

STATEMENT OF SIGNIFICANCE

The place is a rare example in Perth of a late 1930s, multi-storey, inner-city residential development.
The place is a fine example of Inter-War Commercial Palazzo style.
The massive, grand, form of the place is a city landmark, and specifically makes an important contribution to the streetscape of Sherwood Court and The Esplanade.
The apartment building is valued by the community for the prestigious calibre and diversity of its occupants.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The place is a rare example in Perth of a late 1930s, multi-storey, inner-city residential development.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

The apartment building is valued by the community for the prestigious calibre and diversity of its occupants.

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place is a fine example of Inter-War Commercial Palazzo style. The massive, grand, form of the place is a city landmark, and specifically makes an important contribution to the streetscape of Sherwood Court and The Esplanade.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement
HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision-making body is relevant

CONDITION AND AUTHENTICITY

Condition	Good
Building Fabric Authenticity	High level of authenticity as the building retains original external and internal detailing.

CLASSIFICATION OF SIGNIFICANCE

Exceptional – Category 1 - Essential to the heritage of the locality. Rare or outstanding example.

Physical Description	

The bronze statue of Alexander Forrest is larger than life-size, the original clay model was reported to be 6ft 10 inches in height. The statue is mounted on a pedestal of Donnybrook Stone with the whole measuring approximately 5127mm. The pedestal is square in shape (approx 1700mm) with classic derived decorative motifs to the cornice and base. The inscription states: This monument was erected by his friends/in memory of Alexander Forrest/C.M.G., M.L.A., JP/Born near Bunbury 22nd September 1849/Died at Perth 20th June 1901/Aged 51 years/he was the first explorer of the Kimberley District, North West Australia/and represented that district in Parliament/for 14 years to the time of his death./He was second in command of two exploring expeditions from Perth to Adelaide/1870 and 1874/He was mayor of the City of Perth for 6 years/from 1892 to1895 and from 1897 to 1900/He was the generous friend of many.

HISTORY

Alexander Forrest was a prominent explorer, investor and politician, and younger brother of Sir John Forrest, Premier and Colonial Treasurer of Western Australia from 1891-1901. Although a robust man physically he died at the relatively young age of 51 years following complications arising from kidney problems. Forrest was well regarded by his friends and associates who established a committee to raise funds for a memorial in his honour. A decision was made to manufacture the memorial locally with the work being undertaken locally by Wilson Grey and Co. The firm employed sculptor Pietro Porcelli of Fremantle to produce the statue of Forrest which was then sent to Italy for bronze casting. The memorial was originally erected on the corner of St Georges

Terrace and Milligan Street and unveiled by the Premier Walter James on August 28, 1903. It was relocated to the present site in September 1916.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement and mobility - 105 Exploration and surveying
4. Social and civic activities - 407 Cultural activities
6. People - 605 Famous and infamous people

AUSTRALIAN HISTORIC THEME

4. Building Perth (Settlements & Cities) - 4.6 Remembering significant phases in the development settlements, towns and cities
7. Governing - 7.6.1 Developing local government authorities
7. Governing - 7.7.1 Providing services
8. Developing Perth's Cultural Life - 8.1.3 Developing public parks and gardens
8. Developing Perth's Cultural Life - 8.7 Honouring achievement
8. Developing Perth's Cultural Life - 8.10.4 Creating visual arts

STATEMENT OF SIGNIFICANCE

The place is an excellent example of public sculpture and portrays Alexander Forrest CMG, MLC and MLA, prominent Western Australian explorer, politician, investor, and Mayor of Perth, in his role as explorer and surveyor.
The place was crafted by Pietro Porcelli R.A, the foremost sculptor in Western Australia in the first decades of the twentieth century and is regarded as one of his finest works.
The place was the first public commemorative statue erected in Perth, the first public statue in the State in commemoration of an individual born in Western Australia, and Porcelli's first public sculpture in the State.
The place is a landmark, occupying the corner of St. George's Terrace and Barrack Street at the entrance to Stirling Gardens and is an integral part of the predominantly government and civic domain roughly bounded by Barrack, Pier and Hay Streets, and Riverside Drive.

HISTORY

The building was constructed in 1973 to a design by Jeffery Howlett and Don Bailey. The design was a result of a competition which was intended to design a new Town Hall which didn't eventuate. A new concert hall was required to replace the Capitol Theatre which was sold in 1966 and was the home of WA Symphony Orchestra. The design by Howlett and Bailey were commissioned to design the Concert Hall building. The building was opened in 1973. The Concert Hall was awarded the Concrete Institute of Australia Excellence in Concrete Award for its use of off-form concrete. In addition, the innovative use of white cement provides an interesting quality of light.

WESTERN AUSTRALIAN HISTORIC THEME

1. Settlement & Mobility - 104 Land allocation and subdivision
1. Settlement & Mobility - 108 Government Policy
3. Occupations - 307 Intellectual activities, arts & crafts
4. Social & Civic Activity - 407 Cultural activities

8. Developing Perth's Cultural Life - 8.10.4 Designing and building fine buildings
8. Developing Perth's Cultural Life - 8.10.5 Advancing knowledge in science & technology

STATEMENT OF SIGNIFICANCE

The place has provided Perth and Western Australia with a performance venue of international standard since 1973, allowing the State to host events it could not otherwise have experienced. The place is highly valued for these social and cultural associations.
The place is a fine example of Late Twentieth-Century Stripped Classical style because of its expression of symmetrical composition, strong horizontal roof element and peristyle like colonnade. These attributes reinforce a sense of occasion appropriate for a modern, civic building.
The place demonstrates technical achievement in the fine acoustic qualities of the auditorium, which are recognised and appreciated by performers and patrons; since the place opened in 1973, it has been the principal performing venue for the West Australian Symphony Orchestra.
The place demonstrates an achievement in construction technology recognised by an award from the Concrete Institute of Australia and expresses fine aesthetic qualities in the colour and texture of the principal building material.
The place is closely associated with architects Jeffrey Howlett and Don Bailey, who designed the place after winning the original design competition for a Town Hall and auditorium in 1961.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place has provided Perth and Western Australia with a performance venue of international standard since 1973, allowing the State to host events it could not otherwise have experienced. The place is highly valued for these social and cultural associations.

Other Associations	

HISTORY

This building was constructed next to the original Government House (1834) which was demolished during the 1880's. Soon after completion of the new building, extensive alterations were carried out to suit the requirements of the new Governor. Major additions were constructed in 1898, these included a dining room, supper room and billiard room. During World War 11 Government House was used as government offices.

STATEMENT OF SIGNIFICANCE

The place is of exceptional cultural heritage significance for its historical and ongoing role as part of the administrative centre for Western Australia, its essential contributions to the story of governance of the State, and as the continuing official residence of the Governor.
The place is exceptionally aesthetically pleasing for its eclectic and unique architectural style in its extensive garden setting.
The place is significant for its associations with prominent visitors to the State as the Governor receives guests including visiting royalty, Heads of State, and other official dignitaries.
The place is associated with the Engineers' Department who were responsible for both convict and colonial works, and represents the first important colonial building to be completed by the Public Works Department which was created in 1863.The place contains extensive archaeological deposits and features, including those relating to the former Government House building, with the potential to reveal much about early colonial life, garden design and philosophy, and the many prominent individuals associated with the place.
The place is a landmark and makes a striking contribution to the streetscape of the State's capital city.
The place is important as a reflection of the historical development of the city centre and its place within the large government domain originally set aside in 1829.The place is significant for the physical evidence within its curtilage for existing landscape forms that can be traced back to the original topography at the time of European settlement.
The place holds a high degree of social significance for the people of Western Australia for its important historical associations, high aesthetic value, its ongoing use for community events, and its contribution to the community's sense of place, as well as being an important tourist attraction.

Architectural Style 2 Specific	
Archaeology	
Physical Description	

The ballroom is a three-level building constructed of stone and banded brick walls and is covered with a clay tiled roof. Its basic accommodation consists of an entry hall leading into the ballroom which incorporates an upper level gallery, and with a supper room of corresponding size at the lower level. The place includes the ballroom, dining room and other miscellaneous facilities sited adjacent to and within the same grounds as Government House.

Walls 1 Material	Brick - Face
Walls 2 Material	
Roof Material	Metal
Architect	Hilson Beasley (Ballroom); J M Grainger
Builder	
Other Associations	

HISTORY

This building was constructed next to the original Government House (1834) which was demolished during the 1880's. Soon after completion of the new building, extensive alterations were carried out to suit the requirements of the new governor. Major additions were constructed in 1898, these included a dining room, supper room and billiard room. During World War II Government House was used as government offices.

STATEMENT OF SIGNIFICANCE

The place was designed by H Beasley during J Grainger's term as Principal Government Architect, in the style of free classicism.
The place has historical significance as the building was completed and officially opened on June 22, 1899 on the occasion of the anniversary of the Queen's accession and the visit of the Admiral Commanding-In-Chief.
The place is of social significance as it has always been a venue for most important functions entertaining distinguished visitors.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place has historical significance as the building was completed and officially opened on June 22 1899 on the occasion of the anniversary of the Queen's accession and the visit of the Admiral Commanding-In-Chief.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

The place is of social significance as it has always been a venue for most important functions entertaining distinguished visitors.

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place was designed by H Beasley during J Grainger's term as Principal Government Architect, in the style of Free Classicism.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The place was designed by H Beasley during J Grainger's term as Principal Government Architect, in the style of Free Classicism.

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

Multi-storey office building of curtain wall construction with sun shading expression on the building facade.

Walls 1 Material	Glass
Walls 2 Material	Metal
Roof Material	Concrete
Architect	City of Perth; Geoff Howlett & Don Bailey
Builder	
Other Associations	

HISTORY

Howlett and Bailey designed the building which was a result of a competition in 1960. The building was designed to accommodate City of Perth administration offices on the first seven floors, the eighth floor held the Lord Mayor's office and reception areas, the ninth floor held the Council Chamber and meeting rooms and the tenth floor held dining rooms. Between 1997 and 1999 the building was extensively refurbished including asbestos removal, internal refit, changes to the forecourt and an underground car park.

STATEMENT OF SIGNIFICANCE

The place demonstrates a high quality of Modernist architectural design and detailing, commensurate with its image as Perth's Civic Administrative Centre, and is a rare intact example of an early 1960s modernist office building in Perth.
The place demonstrates architectural innovation in its reduction of structure and simplicity of form, transparent cladding and consistent use of refined minimalist detailing.
The place reinforces the continuous development of the site as part of the central precinct for State and Local Government in Perth and reflects the growth of the City and corresponding Council administration.
The place is associated with the VII British Empire and Commonwealth Games, epitomising the forward-looking aspirations of the Perth community at the beginning of the 1960s.The place is the first building incorporating window walling to be erected in Perth.
At the time of construction, the extensive use of contemporary building materials, in particular the complete double glazing of the exterior, glass mosaic tiles, and internal use of crafted timber veneers, publicly promoted a new level of contemporary design in Western Australia.
The place is an important part of the streetscape of St Georges Terrace, and a city landmark.

STATEMENT OF SIGNIFICANCE

The place makes a vital contribution to the community's sense of place and sense of identity for the roles and functions it has fulfilled in the cultural, educational, scientific, recreational and social life of the people of Perth and of Western Australia, including its importance to the community as a publicly accessible green space offering respite and connection to country in the city centre.
The place demonstrates the resilience of the Whadjuk Nyoongar who retain their strong connection to country, culture and people through the cultural process of 'caring for country' that has continued for thousands of years. The significance of the place is demonstrated through the stories of Fanny Balbuk, who was a descendent of Yellagonga, the traditional owner at the time of colonisation; and the relationship of the place and its surrounding waterways as the host for the Waugal that is time immemorial.
The place was central to the colonial government operations, housing the governor's camp for Captain James Stirling, his wife Ellen and their children from August 1829, followed by a temporary government house building and a parade ground in 1832, before being proclaimed as part of the Public Garden in Stirling Square in June 1845.
In conjunction with the adjacent Council House Gardens, it remains an integral component of the historic civic precinct in the centre of Perth, that also includes Government House, Government House Gardens, Old Courthouse, Supreme Court, Supreme Court Gardens, Weld Club, the State Buildings and St George's Cathedral, which along with Council House surrounds Stirling Gardens.
The clearing of Stirling Square in 1839 by Aboriginal people under the direction of a police constable is an early example of the colonial government's use of Aboriginal labour for the construction of public works in Western Australia.
It demonstrates the role of Aboriginal people in building the colony's infrastructure, predominately through forced labour, before the introduction of imported convict labour into the colony.
It is the western half of Stirling Square, which once housed the nucleus of government scientific institutions, including meteorological, zoological and botanical functions, until the establishment of the Perth Observatory in 1897, Perth Zoo in 1898 and the Kings Park Botanic Gardens in 1965, respectively. Meteorological readings were continued in the gardens well into the twentieth century.
It is the remaining half of the first public garden in Perth, which was amongst the earliest in Australia. Its aspirations, which closely followed the opening of public gardens elsewhere in the world, were never fully realised due to a persistent lack of funding and the erosion of its land area and outlook over time. Nevertheless, it has survived gracefully into the twenty first century with its original purpose of offering an attractive garden for public respite intact and many of its historical plantings still extant.
It has been the focus of public fundraising activities to ensure its survival both through the provision of musical and artistic entertainment and philanthropic donations, the most notable being those of Henry Trigg, S. Browning and Charles McNess.
The tangible evidence of these activities is no longer readily apparent as the bandstands, the 1860s Norfolk Island Pine trees, the Browning Fountain and the McNess Memorial have all been removed from the gardens over time.
While the perimeter fencing, flower beds, associated garden structures and the geometric layout dating from the nineteenth century is no longer extant, the central path remains and the eclectic collection of mature plantings set as individual elements amongst open lawns ensures that the gardenesque style remains the dominant design intent.
It retains variations of the later interventions, influenced by the picturesque style, intended to soften the design intent through curved paths and more densely planted garden beds, as well as many of the paradise style plantings which were distinctive to public gardens in Western Australia in the early twentieth century.

HISTORY

This is the earliest Presbyterian Church in Perth. It was designed in late Gothic Revival style. The building contributes greatly to a precinct of Victorian buildings of the Colonial establishment era in Perth. In 1915, in celebration of the successful founding of the only Presbyterian school for girls Presbyterian Ladies College, the Founders planted an acorn which has, over the past 100 years, grown into a small oak tree. The tree was planted by significant people to Perth's educational, institutional and religious history, including the Moderator and elders of the Presbyterian Church. With Australia at war, and halfway through the disastrous Gallipoli campaign, it was an unusual time to start a school. This can be explained by the fact that Rev Dods, the Moderator of the Presbyterian Church in WA, could send his two sons to Scotch College but there was no Presbyterian counterpart to which he could send his daughter, Christina (12 in 1915). With a plan to buy Ormiston College from the Wilson sisters who established it in 1907, he gathered a group of Church elders, Presbyterian ministers, leading businessmen and Scotch College's headmaster and Chair of Council, and on 19 August 1915, in the vestry at St Andrew's, they formally made the decision to establish a Presbyterian school for girls.
The Government House botanist has determined that the tree is descended from those growing in Government House gardens or otherwise is one of the original accords brought to WA by the WA's first government botanist, James Drummond in 1829.

STATEMENT OF SIGNIFICANCE

The place is historically important as the principal place of worship of the Presbyterian congregation in Perth and was the focus of Presbyterian activity in Perth for much of the twentieth century.
The place contributes to the streetscape of St. Georges Terrace as the south-eastern extension of the Central Government Precinct and is a minor landmark within the precinct.
The site of the place is of historical significance as the former location of the cottage of Dr. Collie, the Colonial Surgeon, which was demolished to build the church.
The place is a fine example of the work of the architect James Hine.

Physical Description	

Church Hall constructed of brick masonry with piers with a dominant pitched roof with parapet gable.

Walls 1 Material	Brick - Face
Walls 2 Material	
Roof Material	Stone - Slate
Architect	G Herbert Parry
Builder	
Other Associations	

HISTORY

The Hall was designed by G. Herbert Perry, son of former Bishop Perry also designed the pulpit and memorial paneling in the north transept of St. George's Cathedral. In 1929 George Temple Poole stated " The Burt Memorial Hall with the south-east transept and tower of St. George's Cathedral makes a very congruous design." The Hall is designed on two levels with the undercroft level related to the footpath and an intermediate level of steps leading to the Cathedral transept.

8. Developing Perth's Cultural Life - 8.6 Worshipping
8. Developing Perth's Cultural Life - 8.8 Remembering the fallen

STATEMENT OF SIGNIFICANCE

The place is a fine example of Inter-War Gothic architecture, with the upper hall and main stair being excellent examples of the style.
The place is an important component of a civic precinct that includes Perth Town Hall on the corner of Barrack and Hay streets, Treasury Buildings, St. George's Cathedral, The Deanery, St. Andrew's Church, Council House, the old Court House, Stirling Gardens, Government House, the Supreme Court and gardens, The Weld Club, The Esplanade, and Barrack Square.
The place is a rare example in Western Australia of a war memorial funded by private individuals and taking the form of a church hall.
The place was gifted to the Anglican Diocese by Septimus Burt,prominent politician, lawyer and pastoralist, and Louisa Burt as a memorial to two of the Burts' sons who died during World War I.
The place is a fine example of the work of architect George Herbert Parry.

NATURE OF SIGNIFICANCE

Physical Description	

Saint George's Cathedral is a timber vaulted brick, limestone and jarrah timber church in the Victorian Academic Gothic Style. It has a steeply pitched roof originally covered with slate but was changed to tiles in the 1950's because of leaks. The building has a central nave with two aisles and a shallow transept with a dorcas window in the south transept. The Cathedral has a rose window in the western termination as well as various memorial windows inserted since construction.
The bricks were made locally laid in English bond, with a identical coarse above the windows on the western face. There is a miniature colonnade in base relief above the western entrance and alternating stone and brick work decoration on the north window.
Federation Gothic Cathedral with masonry walls, buttresses, articulated pointed arched windows and steeply pitched roof with parapet gable.
For a detailed description please refer to File No 1.45/2 City of Perth Planning Department Heritage Places if required.

HISTORY

In 1878 a design for the new Cathedral was commissioned after the second Bishop of Perth, the Right Reverend Henry Hutton Parry established a building committee. The first design was rejected and a commission was given to Edmund Blacket "the pre-eminent architect of his age in NSW". He designed what was considered a modest but elegant Cathedral in the fashionable Victorian Academic Gothic style. However Edmund never saw this

Cathedral completed as he died in 1883. His son Cyril was invited to complete the Cathedral, which he accepted. The construction began on 1st October 1879, the foundation stone was laid by the Governor, Sir William Robinson on 2 November 1880. The building construction was slow, with work halting due to lack of funds. The Cathedral was completed in August 1888 though the east window arrived eleven months after the consecration, which was on 15 November 1888 and in 1892 further memorial windows were installed in the north side. In 1902, a square bell tower was designed by the Western Australian architect, J. Talbot Hobbs, with construction being completed on 22 January 1903 when the tower and bells were dedicated to Queen Victoria. In 1906, an English iron work altar serene was erected as a memorial. In 1909 on 22 March the high altar was presented as a gift in memory of Sir Archibald Burt and Lady Burt. In 1919 the soldiers memorial chapel was conceived in lieu of the planned chapter house.
Throughout the Cathedral's life there have been a few more, though minor, additions as memorials to people associated with its history. Additional pipe work and a new tonal scheme was completed on the organ in 1959. Further details refer to File No1.45/2 City of Perth Planning Department Heritage Places. In 1968 the Meckering Earthquake shook the Cathedral with an estimated $90,000 being needed for structural repairs. On 6 September 1974 the bell tower had become unstable.
A Restoration Appeal was commenced in April 1975 leading to the bells being rehung on 21 January 1976. In Consultation with the architectural practice Duncan, Stephen and Mercer restoration continued on the structural part of the Cathedral in time for its centenary celebration in 1988. From 1983-1993 a new organ was proposed and worked towards as the original gallery space was designed too small for an organ to be adequate for the size of the Cathedral. In 1993 a new organ was designed and builder Knud Smenge, under the supervision of Dr Christopher Deanery, installed in a new organ loft in the western termination of the nave.

HISTORY

The building was constructed in 1859 for the first Dean of Perth George Purves Pownall as a residence and office. He was the Dean of Saint Georges Cathedral. The site of The Deanery was formerly the old Perth Gaol before it was moved to James Street. At the time St Georges Terrace was the location of the houses of prominent people. The building was designed by Richard Roach Jewell and was constructed by former convicts who had earnt their ticket of leave and could obtain work. The Deanery was the residence of the Dean for 90 years until 1953. It was then used as office space for church officials. The building has been restored over time.

STATEMENT OF SIGNIFICANCE

The place is sited on the corner of Pier Street and St. Georges Terrace, next to Saint George's Cathedral and is part of the significant townscape setting of St. Georges Terrace.
The place is an important component in the stock of colonial architecture of Perth.
The place has a close association with Richard Roach Jewell, who was responsible for the design of a large number of public buildings in this period.
The place is held in high regard by the members of the Perth community as an aesthetically unusual piece of convict architecture.
The place is one of a small group of convict built buildings extant in central Perth and illustrates the character of the mid-nineteenth century colonial townscape of Perth prior to the gold rushes, much of which was demolished or altered in the subsequent boom period of the 1890s.

Other Associations	

HISTORY

The building was constructed circa 1887 and the upper floors added in 1927 and 1939.
In 1927 alterations and additions to the Royal Bank Chambers were carried out for the E.S & A Bank including a new facade and additions.
In 1938 extra floors were added and the facade modified. A new floor was added in 1955 and the building was altered and refurbished by the Public Works Department in 1978.
In 1996 the building was taken over by the Western Australian Club which was located in the building until 2007 when it changed ownership.

8. Developing Perth's Cultural Life - 8.10.4 Designing and building fine buildings

STATEMENT OF SIGNIFICANCE

The place is associated with the development of St George's Terrace as a focus of banking and commerce in Perth.
The place is important for the scale and balance of its architectural detailing, together with the gracious ambience of the reception hall.
The place contributes to the St Georges Terrace streetscape because its style and design are typical of a major banking institution from the late nineteenth century to inter-war period. This building relates to the WA Trustees Building and the West Australian Newspaper group to the west and to buildings from the same period in adjacent Howard Street.
The place is associated with several prominent Western Australian architectural firms. It was designed by Wright and Patterson in 1887, and Hobbs, Smith and Forbes and Oldham, Boas and Ednie-Brown were responsible for subsequent works carried out in 1927 and 1939 respectively.
Since 1995, the place has been owned and occupied by the Western Australian Club (Inc.) which, since its establishment in 1893, has been associated with some of the most prominent Western Australia businessmen and politicians, and with significant contributions to Western Australia's development. This Club was also the first in the State to admit women as full members with voting rights.
The place is representative of inter-war bank buildings in that the facade is still intact and the banking chamber survives.

HISTORY

The site of the Palace Hotel was the site of the first licensed premises in the Swan River Colony. The licensed premises operated on the site from 1829 until 1981. The site was also the location for the first masonic lodge in the Colony established c 1845. The Palace Hotel was built in 1895 and is representative of a period of great development and growth in Western Australia during and after the Gold Boom years of the C19. The recent developments on the site are a reminder of the economic boom of the 1980's The Palace Hotel was extensively altered by Bond Corporation in the 1980's. Internally the building was altered to construct the adjacent tower block. The facade was largely reconstructed and retained by architects Cameron Chisholm and Nicol. For complete history of the Palace Hotel and subsequent development issues refer COP Heritage Places File 1.36/108. The Palace Hotel has been associated with the official, business and social life of Perth for over 70 years and occupies a special place in the hearts not only of Perth but of people of Western Australia as a whole The site on which the Palace Hotel stands has been occupied continuously by a hotel building for over 140

years- firstly by Leaders Hotel then the Freemason's. The Palace Hotel was built for John de Baun who was attracted to Australia from the United States as a young man by the mining boom and erected notable hotel buildings in Salvation, Broken Hill and Kalgoorlie before purchasing the old Freemason's Hotel in Perth 1894. The Palace was designed befitting city at this period. When opened in 1895 it was considered without peer in Australia.

STATEMENT OF SIGNIFICANCE

The place is a rare example of an extremely opulent Federation Free Classical style hotel building. The place has landmark value due to its elegant style and prominent corner location.
The place is a tangible reminder of the wealth, prosperity and resultant growth of Western Australia during the 1890s gold boom years and as such contributes to the community's sense of place.
The development which occurred on the site in more recent times is a reminder of Western Australia's economic boom and optimism of the 1980s.
The National Trust of Western Australia were instrumental in agitating for the retention of the Hotel's fabric from the mid-1970s.
The Palace Hotel debate was a major issue which influenced the introduction of heritage legislation in Western Australia in 1990.
The place was the subject of the first granting of a bonus plot ratio by the City of Perth, which allowed for the retention of the Hotel building in the development of the Tower. The place was also the subject of the first heritage agreement in the State.
The place is associated with the 1890s gold boom entrepreneur, John De Baun, for whom the place was built. It was designed by architects Porter and Thomas. It is also associated with 1980s entrepreneur Alan Bond and the architectural firm of Cameron Chisholm and Nichol.
The place is located on the site of the first licensed premises in the colony which was established in 1829, and on the site of the first masonic lodge, which was established c. 1845.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

HISTORY

Building constructed in the 1930's as the offices of the West Australian Newspaper - the modern heir to the first newspaper in the state, the Swan River Gazette. The offices played a role in the commercial life of St. George's Terrace until the transfer of the newspaper offices out of the city in the 1980's.
In 1829 regulations required owners of town lots in St. George's Terrace to built houses worth 200 pounds whilst building elsewhere could be built costing 100 pounds. This helped establish St. George's Terrace as the premier address in the city. The street became the home of a number of Perth's prominent citizens and was characterised by large, often two storey, homes. Whilst other areas of the city tended to redevelop during the gold rush period around the turn of the century, St. George's Terrace remained substantially intact.
Development that did occur included the construction of new government buildings in the area at the end of Barrack Street which was designated for this purpose from 1829.
The expansion of commerce and trade in the inter-war period led to considerable redevelopment of St. George's Terrace and the construction of several new business house and commercial premises. By this period doctors and dentists rooms were to be found in some of the stately homes predominantly on the north western part of the Terrace.
(Extracted from M. Pitt Morrison and J. White in C.T Stannage, A New History of Western Australia; U.W.A.

1981)
Awarded in 1938 a bronze medal for Street Architecture by the Royal Institute of British Architects.
Refer to Perth Girl's School (Police Traffic Headquarters) Conservation Plan February 1997 (Palassis)

4. Building Settlements, Town and Cities - 4.1.5 Developing city centres

STATEMENT OF SIGNIFICANCE

The place is of historic and social significance for its association with the state's major newspaper The West Australian, heir to the first newspaper the Swan River Gazette.
The building is of aesthetic significance as an example of Inter-War commercial architecture and as part of St Georges Terrace street scene. Architecturally the buildings are important (both externally and internally) as examples of styles used for prestigious commercial office buildings in the Inter-War period. The facades have considerable townscape value as this building relates strongly to the WA Trustee building and the Royal Insurance building in terms of style, scale and colour.
The Newspaper House WA along with the Trustee building and the Royal Insurance building represent the last remaining streetscape of pre-Second World War buildings in St Georges Terrace. In terms of scale and form they are typical of the terrace over a very long period of time, 1890's to the 1950's.

Architectural Style 1 Specific	Gothic
Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

The building forms a prominent landmark in the principal city thorough fare providing a strong aesthetic contribution to the city townscape and is an important grouping of heritage buildings.
The technical school building is constructed on three levels but because of the ground slope away from the street, presents to the street as a two storey, red brick building of mainly functional character set on a limestone base.
The dominant feature is a four-level castellated entrance tower designed to be the central focus of a conventionally symmetrical design. The main entrance from the terrace is vis a short flight of steps and a round arched doorway with the words "Technical School" carved in the stone lintel. Above the doorway is a curved bay to the first floor of the tower, which is crowned with battlements and angled octagonal turrets. In the event the right-hand wing, which was intended to replace the old Perth Boys School building (1852) was never built and the tower marks the eastern end of the building abutting the earlier structure.

HISTORY

Historic site of Reverleys Mill. Perth Town Lots 15 and 16, which in the early years of the colony was a holding of Henry Willey Reveley, Civil Engineer to the Swan River Colony, and the site of his watermill, one of the earliest mills in the Colony. The mill was spring fed and was linked by a mill race down Bazaar Terrace (now Mounts Bay Road), along the Perth foreshore. Perth Technical College Annexe was designed by government architect Hillson Beasley and built in 1910. The building was opened by His Excellency the Governor, Sir Gerald Strickland on 19 April 1910. The building has historic associations with Perth Boys School (1853) which was used for technical education from 1900. Beasley intended to demolish the Perth Boys School and extend the Technical College with the construction of a symmetrical wing. This never eventuated. The building is

related in style to other educational buildings including Claremont Technical College (1902) and St. Georges College (1929). The college was threatened with demolition the 1980's but saved largely through community protest led by Jean Jenkins (later Democrat Senator).

WESTERN AUSTRALIAN HISTORIC THEME

HISTORY

Perth Boys School was completed in 1854 and is the oldest government school in WA. The building was extended in 1860 with the construction of a gallery. In 1865 the southern wing was added and in 1868 the northern wing was constructed. In 1897 the boy's school was moved to a new site between James and Roe Streets and the building was taken over by the Perth Technical College. The building is currently used by the National Trust of Australia (WA).

8. Developing Perth's Cultural Life - 8.13 Living in cities and suburbs

STATEMENT OF SIGNIFICANCE

The place comprises well designed examples of Victorian Academic Gothic style building, exhibiting a high standard of traditional craftsmanship and an understanding of the Gothic design ethos.
The place is one of the oldest extant government school buildings in the state and a rare example of the practise of designing educational buildings along the lines of a traditional Gothic church.
The place is a rare and striking remnant of Victorian era building along St Georges Terrace that demonstrates the development of this street in the Nineteenth and Twentieth centuries from colonial outpost to the central administrative and commercial hub of the state.
The place demonstrates the development of the government provision of education, both elementary and technical, which was a reflection of the government's overall development in the Nineteenth and Twentieth centuries.
The place demonstrates the development of heritage consciousness in the state, both buildings spared from demolition and redeveloped to serve new purposes through the activism of the National Trust (Western Australia).Old Perth Boys School was designed by Superintendent of Public Works Richard Roach Jewell, who is similarly responsible for a number of civic buildings in Perth and Fremantle.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place demonstrates the development of the government provision of education, both elementary and technical, which was a reflection of the government's overall development in the Nineteenth and Twentieth centuries.
The place demonstrates the development of heritage consciousness in the state, both buildings spared from demolition and redeveloped to serve new purposes through the activism of the National Trust (Western Australia).

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The place is one of the oldest extant government school buildings in the state and a rare example of the practise of designing educational buildings along the lines of a traditional Gothic church.
The place is a rare and striking remnant of Victorian era building along St Georges Terrace that demonstrates the development of this street in the Nineteenth and Twentieth centuries from colonial outpost to the central administrative and commercial hub of the state.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place comprises well designed examples of Victorian Academic Gothic style building, exhibiting a high standard of traditional craftsmanship and an understanding of the Gothic design ethos.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

Old Perth Boys School was designed by Superintendent of Public Works Richard Roach Jewell, who is similarly responsible for a number of civic buildings in Perth and Fremantle.

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision-making body is relevant

CONDITION AND AUTHENTICITY

Condition	Very Good
Building Fabric Authenticity	Medium level of authenticity as it is substantially intact. Restored by the National Trust.

CLASSIFICATION OF SIGNIFICANCE

Exceptional – Category 1 - Essential to the heritage of the locality. Rare or outstanding example.

Archaeology	
Physical Description	

Handmade brick building with decorative brickwork, pointed arches and battlement parapet.
The Cloisters is a two-storey brick building constructed in the Victorian Tudor style and employs carefully detailed diapered brickwork, string courses and crenellations. The building is well proportioned and feature the judicious use of different coloured bricks to form decorative elements. The impression is one of solidity, of well-defined form and imposing authority.

HISTORY

The Cloisters was built by the first Anglican Bishop of Perth - Bishop Hale, in 1858, as a secondary school in Perth for boys. Called the Perth Church of England Collegiate School, the school was important source of secondary education in the colony and it attracted wealthy young men as pupils. The initial enrolment of The Cloisters was twenty-three pupils and during the first years, educated many of the young men who would become the colony's leading citizens in the first years of responsible government. Due to the growth of Perth and the subsequent Elementary Education Act the Cloisters became a Girls school as the boys moved to a larger building. In 1879-80 the Cloisters continued to expand with a double school room with a teacher’s room and dormitories above, dining room and servants quarters. In the late 1890's the growth in Government-funded schooling and the diminished number of private pupils, caused the school to close. The building was then divided in half and rented out as private residences. Between 1904-1918 the eastern half was used as a boarding house and the western half as a theological college, then the whole building was used as a hostel for the newly established University of Western Australia. In 1931 The Cloisters was damaged by fire and 2,000 pounds spent of alterations. From 1958-mid 1960's, The Cloisters was used as guest house until plans to demolish the building to redevelop the site to provide funds for Guildford Grammar School and Christchurch Grammar. However due to a conservation campaign in 1966-67 the property owners negotiated a higher plot

ratio for the development behind the building. This negotiation also included the restoration and adaptation of the building for professional and banking offices.

WESTERN AUSTRALIAN HISTORIC THEME

STATEMENT OF SIGNIFICANCE

The place has a close association with Bishop Blagdon Hale and the establishment of secondary education in Western Australia.
The place was the first purpose-built secondary school in Western Australia.
It is a fine example of the Victorian Tudor style of architecture, demonstrating a sensitive use of local materials.
It is a fine example of the buildings designed by Richard Roach Jewell, an important colonial architect.
It is one of a small number of remaining convict-built colonial buildings of the mid-nineteenth century.
The retention and conservation of the place was significant in the development of conservation awareness in the state.
The place is a landmark in the central Perth business district.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place was the first purpose-built secondary school in Western Australia.
The retention and conservation of the place was significant in the development of conservation awareness in the state.

HISTORY

This Port Jackson fig tree has had a long history of association with the growing City of Perth. It is an indigenous Australian Plant and in 1887 was given as a small tree to the newly arrived family of Mr and Mrs William Stephen's who lived for a time in the cloisters. The tree and adjoining cloisters buildings have been preserved by the owners of Mt Newman House as part of Perth's heritage. Plaque at the base of the tree.

HISTORY

In 1856 Bishop Hale, Perth's first Anglican Bishop, purchased five allotments on St Georges Terrace to build a residence for himself and his family. Hale favoured this location because the large grounds and natural spring that flowed all year round. There were also some buildings on the site which could be utilised and incorporated into his residence.
Hale built several buildings on the Bishop's See out of his own income including the Bishop's House.
In 1875 Bishop Hale handed over all his Perth properties to the Perth Diocesan Trustees, leaving Western Australia to take up his appointment as Bishop of Brisbane. After his departure other buildings built included the St Georges House.
Heritage Council Assessment 1998.

8. Developing Perth's Cultural Life - 8.10.4 Designing and building fine buildings
8. Developing Perth's Cultural Life - 8.13 Living in cities and suburbs

STATEMENT OF SIGNIFICANCE

The place is a fine example of the Federation Queen Anne style and is an important example of the work of John Talbot Hobbs - one of the key practitioners of this style in Western Australia.
The place is associated with the Perth Diocesan Trust of the Anglican Church and characterises the pre-eminence of the Anglican Church in Western Australia for many years.
The place is a tangible reminder of the former residential nature of development on St George's Terrace of which this place is the only remaining element.
The place has landmark qualities derived from its prominent corner location near the head of St George's Terrace.
The place was saved from demolition by Lord Alistair McAlpine (property developer, treasurer of Britain's Conservative Party and Chairman of St George's Investments (ACP)).
The place is in good condition as a result of extensive restoration, and whilst its authenticity is somewhat reduced, it exhibits aesthetic characteristics valued by the community.

7. Governing - 7.6.12 Conserving Australia's heritage
7. Governing - 7.7.1 Providing for common defence
8. Developing Perth's Cultural Life - 8.10.4 Designing and building fine buildings

STATEMENT OF SIGNIFICANCE

The place is of historic significance because it was erected to house soldiers of the Enrolled Pensioner Force who remained on military duty after the Imperial Government removed the regular troops in 1868.
The place has social significance for the community that opposed the demolition of the Barracks as a result of the Freeway network. It is a symbol of the growing awareness of the value of buildings of cultural heritage significance in Perth in the 1960s.
The place has historic value for its association with transportation of convicts and their Enrolled Pensioner Guards, for whom it was built.
The place is a major landmark that has visually terminated views to the west of St George's Terrace, Perth's premier business street from 1868 to the present.
The place is associated with some of the most influential public architects in the Colonial Government including James Manning and Richard Roach Jewell.
The place is a rare surviving example of Victorian Tudor architecture in Western Australia and exhibits several stylistic elements characteristic of this building type.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place is of historic significance because it was erected to house soldiers of the Enrolled Pensioner Force who remained on military duty after the Imperial Government removed the regular troops in 1868.
The place has historic value for its association with transportation of convicts and their Enrolled Pensioner Guards, for whom it was built.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The place is a rare surviving example of Victorian Tudor architecture in Western Australia and exhibits several stylistic elements characteristic of this building type.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

The place has social significance for the community that opposed the demolition of the Barracks as a result of the Freeway network. It is a symbol of the growing awareness of the value of buildings of cultural heritage significance in Perth in the 1960s.

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place is a major landmark that has visually terminated views to the west of St George's Terrace, Perth's premier business street from 1868 to the present.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The place is associated with some of the most influential public architects in the Colonial Government including James Manning and Richard Roach Jewell.

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision-making body is relevant

CONDITION AND AUTHENTICITY

Condition	Fair
Building Fabric Authenticity	Medium level of authenticity. Remnant of original Pensioner Barracks complex.

CLASSIFICATION OF SIGNIFICANCE

Exceptional – Category 1 - Essential to the heritage of the locality. Rare or outstanding example.

HISTORY

A government decision in favour of a university for Western Australia was made in 1901, however a shortage of funds prevented it being established until 1913. The University Endowment Bill in 1903 allowed for land to be set aside for the future.
The first location was a temporary one in Irwin Street, Perth, in a weatherboard building. The first Chancellor was John Winthrop Hackett.
In 1921 Crawley was chosen as the permanent site for UWA. The Irwin Street building was relocated there in 1932.The foundation stone for the Hackett Memorial Buildings was laid in 1929. They form the focal point and symbolic landmark of UWA.
The place was awarded 1969 RAIA Bronze Medal. The architect was R. J. Ferguson.

Physical Description	

Four storey Stripped Classical building, with use of symmetry, strongly repetitive columns and carefully considered proportions. From the Great Court it has an ordered, precise, static and monumental appearance, provided by the width of the gallery on the first floor giving depth to the elevation. The four sides form a pattern of structure, fascia and curtain wall with additional horizontal and vertical emphases provided by the solids and voids and light and shade. Internal alterations were carried out in 1986. For more detail see AHC documentation.

Major design influence attributed to Oliver Dowell and George Munns. Sunken Gardens was originally a sand pit excavated during construction of the Hackett Memorial Buildings. Terraced steps look down over a level circular grassed area as a stage. A memorial sundial and seat were erected behind the stage area in honour of E Shann, Foundation Professor of history and economics.

Physical Description	

Hackett Hall is a single storey building enclosing Whitfield Court on the east and is linked by archways to Winthrop Hall. Winthrop Hall is on a central axis of the group and uses materials but on a monumental scale to dominate the composition. The tower is a landmark on the campus and is seen from Stirling Highway. The walls are a composite construction of limestone facing over brick. The base of the walls consist of sawn ashlar stone with channelled joints. The tops are rusticated and picked and laid in square, course and specked rubble.

HISTORY

A government decision in favour of a university for Western Australia was made in 1901, however a shortage of funds prevented it being established until 1913. The University Endowment Bill in 1903 allowed for land to be set aside for the future. The first location was a temporary one in Irwin Street, Perth, in a weatherboard building. The first Chancellor was John Winthrop Hackett. In 1921 Crawley was chosen as the permanent site for UWA. The Irwin Street building was relocated there in 1932.
The foundation stone for the Hackett Memorial Buildings was laid in 1929. They form the focal point and symbolic landmark of UWA. Hackett Hall was designed for the use of the student body. It was conceived as a two-storey building to balance the composition around the central court but the ground floor was built and completed in 1931. The original accommodation comprised a billiard room, games room and men's common room in the south-west wing adjoining Winthrop Hall. The central wing, behind the arcading, contained to the south: a shop; Principal and secretary's offices; boardroom; women's reading and writing rooms; and, to the north, the women's common room, locker room and lavatories. To the north, the dining rooms were divided in

two by accordion doors, with duplicate men's and women's cafeteria and general servery and kitchen backing them up. Further north, there was a kitchen yard, stores room and staff cloak rooms. In 1946, minor alterations to the kitchen and servery were carried out and in 1961, a new wing designed by Marshall Clifton was erected to the east to create a central courtyard. The 1961/62 extensions are easily identifiable and respect the building line and colour and texture. Until the mid-1970s the arrangement of the original rooms was substantially intact, with similar uses but, since this time, a number of changes have been made to meet the changing requirements of the Student Guild. Hackett Hall is still used by the student body, and the dining room is still in use, although no longer segregated.

WESTERN AUSTRALIAN HISTORIC THEME

8. Developing Perth's Cultural Life - 8.7 Honouring achievement
8. Developing Perth's Cultural Life - 8.10 Pursuing excellence in the arts & sciences
8. Developing Perth's Cultural Life - 8.10.4 Designing & building fine buildings

STATEMENT OF SIGNIFICANCE

The individual buildings are planned as an integrated piece of civic design which set the standard for the rest of the campus; the design of the buildings had a profound influence on Western Australian architecture in the 1930s.
The place has a long association with tertiary education in Western Australia, and close association with prominent figures in the development of the institution.
The place is held in high esteem by the University and the wider community. Winthrop Hall continues to play the traditional role as the ceremonial hall and, with the Tower, remains the focal point and symbol of the University.
The Sunken Garden (1930), although not part of the original design of the place, is historically linked to its construction. It has significance as part of the University grounds.
The Bookshop (1962) has moderate significance as a building designed by Marshall Clifton to blend with Hackett Memorial Buildings.
However, in the contribution it makes to the north-east continuation and definition of Whitfeld Court, it has a high degree of significance.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The Sunken Garden (1930), although not part of the original design of the place, is historically linked to its construction. It has significance as part of the University grounds.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

The place is held in high esteem by the University and the wider community. Winthrop Hall continues to play the traditional role as the ceremonial hall and, with the Tower, remains the focal point and symbol of the University.

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

Hackett Memorial Buildings, comprising Administration Building, Hackett Hall, and Winthrop Hall, a group of composite limestone and brick structures with tiled roof and colonnade details in donnybrook stone, including the Tower and the Great Gateway, and enclosing Whitfeld Court.
The individual buildings are planned as an integrated piece of civic design which set the standard for the rest of the campus; the design of the buildings had a profound influence on Western Australian architecture in the 1930s.The Bookshop (1962) has moderate significance as a building designed by Marshall Clifton to blend with Hackett Memorial Buildings. However, in the contribution it makes to the north-east continuation and definition of Whitfeld Court, it has a high degree of significance.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The place has a long association with tertiary education in Western Australia, and close association with prominent figures in the development of the institution.

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision-making body is relevant

Shenton House (Crawley Park House) is a two-level former house, originally constructed in stages with the architectural details representative of the time of the particular addition. A single level verandah extends around the east and part of the south sides of the building. Substantial modifications have been carried out, generally in the 20th century during University use of the building. The original farm elements and the extensive landscape to the east have been transformed.

HISTORY

The property where Shenton House is currently located was allocated to Captain Mark Currie in 1829 who established a farm. In 1831 Henry Sutherland acquired it and named it Crawley Park after his mother Maria Crawley. The house, Crawley Park House, was constructed in 1846.
In 1875 George Shenton (junior) purchased the property, as well as neighbouring properties to create Shenton Estate. It was extended over time to include tennis courts and a golf course. Many social get togethers were held at the property during George Shenton's residency.
The State Government purchased the property in 1910 after George Shenton's death as the government had a policy to acquire land along the river foreshore for public recreation.
In 1911 the University of Western Australia was incorporated and Crawley Park was chosen as the permanent location of the campus for the University in 1914.
Shenton House housed the Faculty of Engineering, from 1914 to 1960. The name Shenton House was informally used for Crawley Park House and was formerly adopted by the University Senate in 1963.In 1988 the Centre for Aboriginal Programmes (now School of Indigenous Studies) moved into the building. In 1997 it was used for the University Chaplaincy.

WESTERN AUSTRALIAN HISTORIC THEME

Physical Description	

The Stirling Street façade is symmetrical with Classical motifs such as pediments. The bricks have been rendered and painted. It has decorative mouldings around the four windows which extend to the pediment on the far left and right windows. The decorative elements have been painted a blue colour to contrast with the yellow paint of the rest of the façade.
The main front door opens to a long hallway which leads to the rear of the building. The floor of the hallway has been carpeted over timber floorboards. Rooms are located on each side of the hallway. The ceiling is high with little decoration. There have been some modifications to this interior space.

HISTORY

The “Metropolitan Coffee Palace” operated from 18 Stirling Street from 1897 to 1939/1940 according to the Wise’s Post Office Directories. The business was one of 5 in Perth in 1897.
Coffee houses were first established in London in the mid 1600s as a place where all classes of men could meet and share ideas. Coffee palaces became popular in Australia in the 1880s as an alternative to hotels serving alcohol which was in response to the worldwide temperance movement which advocated against the consumption of alcohol. They were advertised as upholding family values and had accommodation which catered to families. Advertising included cheap but good food cooked on the premises, games and newspapers for patrons.
As a result of the gold rushes in Victoria, New South Wales and later Western Australia there was increased prosperity which led to more development and visitors to the capital cities. The Perth train station opened in 1881 with the completion of the Eastern railway from Guildford to Fremantle. The location of the train station

influenced the establishment of hotels and retail businesses within walking distance which influenced the location of the Metropolitan Coffee Palace. It was frequently advertised in the Kalgoorlie and Coolgardie newspapers for visitors to Perth. Its location within minutes' walk of the train station was a feature of the advertising. An article in The West Australian on 3 July 1897 noted that the proprietor Mr W Thomas wanted people to know that the building is comfortable. In 1932 it was advertised as "good accommodation for visitors including families." The business had many proprietors and from 1897 to 1909 this changed yearly. The proprietors with the longest tenancies were from 1909 to 1914 and 1921 to 1927.
There is little information about the internal configuration of the rooms while the coffee palace was in operation. Newspaper articles which report on the sale of the building give some information on the number of rooms available to rent at the property. In 1929 the building was sold and comprised of 32 rooms. This was a slight reduction to the 40 rooms plus billiard room which was reported in 1905.
In 1905 there were 12 coffee palaces in Perth, including another at 31 Stirling Street. By 1920 this had dropped to eight. The Brittania Hotel, 245-265 William Street and Grand Central Hotel, 379 Wellington Street are two buildings still extant which were used as coffee palaces in Perth. The Grand Central hotel has been significantly modified over time. These buildings, as well as other examples in Fremantle are similar in style to 18 Stirling Street as they have a plain façade in the Classical style. Several other coffee palaces were located on Wellington Street such as the Rechabite and Victoria coffee palaces.
In December 1939 The West Australian newspaper reported that the (G.L.E.) Grand Lodge of England Club Royal Ancient Order of Buffaloes were located at 18 Stirling Street. Also known as Royal Antediluvian Order of Buffaloes. This is a men's club that provides aid to its members, their families and other charitable organisations.
The Post Office Directory lists the Department of the Army as the occupant of the building. It was used for this purpose until at least 1949 when the available Post Office Directory records end. After World War Two the Royal Antediluvian Order of Buffaloes may have reoccupied the building as captions of photos taken in the early 1980s refer to this use. In 1990 the building was renamed The Coffee Palace and was the location of The Multicultural Shared Workspace Inc. Today some rooms are tenanted with alternative health professionals.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic Settlement and Mobility – 104 Land allocation and subdivision
3. Occupations – 308 Commercial services and industries

AUSTRALIAN HISTORIC THEME

3. Developing Local, Regional and National Economies - 3.19 Marketing and retailing
3. Developing Local, Regional and National Economies - 3.22 Lodging people
4. Building Settlements, Town and Cities - 4.1.5 Developing city centres

STATEMENT OF SIGNIFICANCE

The place has some aesthetic value as an example of the Federation Free Classical style which has had few alterations
The place has historic value for its association with the development of hotels and retail businesses around Perth train station.
The place has historic value as an example of a coffee palace which provided an alternative accommodation to public houses that served alcohol.
The place is a rare extant example of a coffee house in Perth which has had little alterations over time. It also provides evidence of the expectations of rental accommodation in the late 1890s as shown in the size of the rooms.
The place is representative of the architecture of the late 1890s.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place has historic significance for its association of the development of businesses around the Perth train station.
The place has historic value as an example of a coffee palace which provided an alternative accommodation to public houses that served alcohol.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The place is a rare extant example of a coffee house in Perth which has had little alterations over time. It also provides evidence of the expectations of rental accommodation in the late 1890s as shown in the size of the rooms.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The place is representative of the architecture of the late 1890s.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place has aesthetic significance as an example of the Federation Free Classical style.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

HISTORY

The area to the north of Perth (now known as Northbridge) was valued by the Whadjuk Nyoongar for its low lying and swampy lakes system, which provided abundant resources. After colonisation, this land was not settled as quickly as drier areas on the ridge of Perth. In 1854 some of the swampy land to the north of Perth was drained producing fertile land for farming. As the population grew during the convict era of the 1850s the land was subdivided into allotments circa 1860 and taken up by discharged soldiers, artisans and small landholders. The area at this period was characterised by small cottages and businesses.
In 1881 the railway from Fremantle to Guildford was opened and became the main transport route. From that period commerce and trade tended to focus on smaller commercial enterprises and manufacturing to the north. It was less fashionable to live north of the railway line, however the area was close to the city and during the 1890s and early 1900s was substantially redeveloped with further subdivision of lots and mixed residential and commercial development. This was an immediate response to the tripling of the State's population in the recent decade due to the gold boom, and a pressing demand for affordable accommodation.
The Post Office Directory lists four houses numbering 65-73 Stirling Street built by 1900, with the corner shop added by 1901. The numbering changed to 55-63 in 1908.The Metropolitan Water Supply Survey plan dated 1948 (Cons 4156/59 State Records Office of WA) shows a row of five terraces, with the corner one (No. 55) being a shop with cellar, and with no setback, unlike Nos. 57, 59, 61 and 63.In 1999 the place was used for artists and musicians and the existing street facade 'reinforced the bohemian image of the area'. (1999 Draft

MHI) The 1999 draft also states that the site is also believed to contain remnants of buildings dating from the 1860s or 1870s prior to the gold boom. (This would need to be confirmed by a full heritage assessment.)
At 2021, the place is a hostel called The Hive. Prior to this it was called Mad Cat Backpackers. The place has been considerably altered but is still readable from the street as a row of five, two storey terraces with a former shopfront on the corner.

WESTERN AUSTRALIAN HISTORIC THEME

3. Occupations - 306 Domestic activities

AUSTRALIAN HISTORIC THEME

3. Developing Perth's (Local, Regional & National) Economies - 3.19 Marketing & retailing
4. Building Settlements, Town and Cities - 4.1.3 Learning to live with property booms & busts
4. Building Settlements, Town and Cities - 4.1.5 Developing city centres
4.Building Perth (Settlements & Cities) - 4.6 Remembering significant phases in the development of Perth centres

STATEMENT OF SIGNIFICANCE

The place is representative of the housing built in Perth at the turn of the century to cope with the increased population during the gold boom.
The terraces have historic significance as a row of Federation Free Classical two storey residences and a corner shop dating from 1900.
The change of use for a hostel is in-keeping with the place's history of residential use.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The terraces have historic significance as a row of Federation Free Classical two storey residences and a corner shop dating from 1900.
The change of use for a hostel is in-keeping with the place's history of residential use.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The place is representative of the housing built in Perth at the turn of the century to cope with the increased population during the gold boom.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Good
Building Fabric Authenticity	Altered from the original. Medium.

CLASSIFICATION OF SIGNIFICANCE

Some/moderate – Category 3 - Contributes to the heritage of the locality.

HISTORY

(Extracted from M. Pitt Morrison and J. White in C.T. Stannage, A New History of Western Australia; U.W.A. 1981 and Michael Bosworth, Thematic Historical framework, City of Perth Unpub. 1995).
The area to the north of Perth (now known as Northbridge) was valued by the Whadjuk Nyoongar for its low lying and swampy lakes system, which provided abundant resources. After colonisation, this land was not settled as quickly as drier areas on the ridge of Perth. In 1854 some of the swampy land to the north of Perth was drained producing fertile land for farming. As the population grew during the convict era of the 1850s the land was subdivided into allotments circa 1860 and taken up by discharged soldiers, artisans and small landholders. The area at this period was characterised by small cottages and businesses.
In 1881 the railway from Fremantle to Guildford was opened and became the main transport route. From that period commerce and trade tended to focus on smaller commercial enterprises and manufacturing to the north. It was less fashionable to live north of the railway line, however the area was close to the city and during the 1890s and early 1900s was substantially redeveloped with further subdivision of lots and mixed residential and commercial development. This was an immediate response to the tripling of the State's population in the recent decade due to the gold boom, and a pressing demand for affordable accommodation.
The Post Office Directory lists 'Jenkinson Flats' from 1939.The Metropolitan Water Supply Survey plan dated 1948 shows the building footprint much as it is today.

At 2021 the building is a backpackers, and photos online show that it seems to have little original fabric internally.

WESTERN AUSTRALIAN HISTORIC THEME

HISTORY

From the 1930s in East Perth and Perth, development pressure was seen along the river when a trend towards inner-city flat development gained momentum. By the 1950s, southern and East Perth continued as a desirable and popular place for high-density, inner-city residences.
The Langley Park flats, built along Terrace Road to cater to young office workers, are a prime example of the post-war investment in flat construction that occurred after the lifting of wartime housing controls.
There was a total of 21 blocks of flats in Goderich, Forrest and Hill Streets, Burt Way and Terrace Road by the early to mid-fifties.
The Metropolitan Water Supply Survey plan dated 1954 shows that the flats at Nos. 114 and 126 were constructed by then, and in between them was vacant land. Aerial photos show that by 1965 the flats at Nos. 118, 120, 122 and 124 had also been built.

HISTORY

From the 1930s in East Perth and Perth, development pressure was seen along the river when a trend towards inner-city flat development gained momentum. By the 1950s, southern and East Perth continued as a desirable and popular place for high-density, inner-city residences.
The Langley Park flats, built along Terrace Road to cater to young office workers, are a prime example of the post-war investment in flat construction that occurred after the lifting of wartime housing controls. There was a total of 21 blocks of flats in Goderich, Forrest and Hill Streets, Burt Way and Terrace Road by the early to mid-fifties.
The Metropolitan Water Supply Survey plan dated 1954 shows that the flats at Nos. 114 and 126 were constructed by then, and in between them was vacant land. Aerial photos show that by 1965 the flats at Nos. 118, 120, 122 and 124 had also been built.

WESTERN AUSTRALIAN HISTORIC THEME

HISTORY

Site of Buildings, Burt Way demonstrated the development of ideas in the state in regard to housing. The dominant ideology of the single residence for all families was challenged during the 1930s by a demand for a different type of housing from people with low incomes or those who did not seek traditional home ownership. Site of Buildings, Burt Way demonstrated a thought-out response to this demand from the architect and firm that led the development of this type of housing in Western Australia. (Criterion 2.1) Site of Buildings, Burt Way is associated with the World War Two period and the post war years when restrictions on building imposed particular problems. The flats represented the solution that one firm used during this period to overcome restrictions. The principles of functionalism and economy were crafted to produce designs to meet the

requirements of good investment and affordable housing. (Criterion 2.2) Site of Buildings, Burt Way is closely associated with prominent Perth architect Harold Krantz and the firm Krantz and Sheldon. This firm dominated the design and construction of flats in Perth between the late 1930s and 1960s.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement and mobility - 107 Settlements

AUSTRALIAN HISTORIC THEME

4. Building Settlements, Town and Cities - 4.1 Planning urban settlements

STATEMENT OF SIGNIFICANCE

The flats were representative examples (apart from 'Franclair', 102 Terrace Road) of the innovative work of the architect Harold Krantz and the firm Krantz and Sheldon, the architectural practice responsible for much of the low cost/ investment flats built in Perth in this period, who provided affordable housing through highly functional building design.
The buildings were representative examples of blocks of low-cost flats built in Perth in the 1940s and 1950s that used typical domestic details of the period enriched by a concentration of Inter War Functionalist style detailing on their main façades.
The flats demonstrated changing ideas regarding housing in Western Australia in the 1940s, with the development of flats for singles and couples as an alternative to the dominant single suburban family house form.
Burt Way, had strong landmark qualities for the vistas it provided of the Swan River when viewed from Adelaide Terrace and for its streetscape values which derived from not only the buildings but also the avenue of Cypress pines that gave the area an almost suburban scale.
The flats were a homogeneous group of medium sized blocks of flats constructed between the 1940s and 1950s which shared many stylistic characteristics that contributed to the strong precinctual quality of the site and the greater precinct that faces Langley Park between Victoria Avenue and Plain Street.
The site is associated with the World War Two period and the post-war years when restrictions on building imposed particular problems and the flats were a demonstration of how through rational, economic design one firm overcame these restrictions to meet the requirements of good investment and affordable housing.
The flats had high social value, in particular for their role in providing affordable accommodation in the city, their associations with less affluent sections of the community and for their importance to the community demonstrated by the concern expressed over the demolition of the buildings.
The site remains a significant indicator of a distinct period in the history of architectural philosophy with regards to the provision of low-cost inner-city housing.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The site is associated with the World War Two period and the post-war years when restrictions on building imposed particular problems and the flats were a demonstration of how through rational, economic design one firm overcame these restrictions to meet the requirements of good investment and affordable housing.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The flats were representative examples (apart from 'Franclair', 102 Terrace Road) of the innovative work of the architect Harold Krantz and the firm Krantz and Sheldon, the architectural practice responsible for much of the low cost/ investment flats built in Perth in this period, who provided affordable housing through highly functional building design.
The buildings were representative examples of blocks of low-cost flats built in Perth in the 1940s and 1950s that used typical domestic details of the period enriched by a concentration of Inter War Functionalist style detailing on their main façades.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

The flats demonstrated changing ideas regarding housing in Western Australia in the 1940s, with the development of flats for singles and couples as an alternative to the dominant single suburban family house form.
The flats had high social value, in particular for their role in providing affordable accommodation in the city, their associations with less affluent sections of the community and for their importance to the community demonstrated by the concern expressed over the demolition of the buildings.

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

Burt Way, had strong landmark qualities for the vistas it provided of the Swan River when viewed from Adelaide Terrace and for its streetscape values which derived from not only the buildings but also the avenue of Cypress pines that gave the area an almost suburban scale.
The flats were a homogeneous group of medium sized blocks of flats constructed between the 1940s and 1950s which shared many stylistic characteristics that contributed to the strong precinctual quality of the site and the greater precinct that faces Langley Park between Victoria Avenue and Plain Street.
The site remains a significant indicator of a distinct period in the history of architectural philosophy with regards to the provision of low-cost inner-city housing.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision-making body is relevant

CONDITION AND AUTHENTICITY

Condition	
Building Fabric Authenticity	Until the evictions prior to demolition in 2002, Site of Buildings, Burt Way was of high integrity as the flats continued to fulfil their original intended purpose as rented accommodation. As the buildings have been demolished, and the land earmarked for an upmarket development, the place is now of low integrity.

For Adoption

	Prior to demolition in 2002, Site of Buildings, Burt Way was of moderate authenticity with all buildings having undergone a degree of change. The most significant alteration to the buildings was the frequent enclosure of their balconies. As the buildings have been demolished, the place is now of low authenticity.

CLASSIFICATION OF SIGNIFICANCE

E - Historic Site

Builder	
Other Associations	

HISTORY

The current bridges are the third set of bridges at the site. As the area was shallow, only flat-bottomed boats could navigate the waters to travel upstream. As a result a bridge was suggested so goods could be transported by road to Guildford and the surrounding areas. The first bridge was opened in 1843. As the demands increased on the bridge it was strengthened and widened. In 1940 the bridge was ending its life and a new bridge was required. This new six lane bridge was completed in 1952.It was one of the main places for people making their way across the river. Local Nyoongar people held access to and granted right of passage to this crossing at Matta Gerrup (Heirisson Island) and the area was important for trade, religious ceremony, economic activity and socialising. Matta Gerrup means ‘shin deep’ and refers to the shallowness of the river at this point.

AUSTRALIAN HISTORIC THEME

2. Peopling Australia - 2.5 Promoting settlement
3. Developing Local, Regional and National Economies - 3.8.7 Building and maintaining roads
8. Developing Australia's Cultural Life - 8.10.5 Advancing knowledge in science and technology

STATEMENT OF SIGNIFICANCE

The place consists of the first bridges in Western Australia constructed of steel and reinforced concrete materials using advanced principles of structural analysis to produce efficient structures of lasting durability.
The place is representative of the bridge building technology of the period during which they were constructed, with its structural, balustrading and bridge pier treatment design. The 1952 bridges were also innovative in lighting design.
The place represents almost 120 years of continuous bridge building endeavour up to the completion of construction in 1952.
The place is important as the river flats presented a navigation barrier to early explorers and settlers, and from the establishment of the settlement of Perth, work was carried out at the site to improve river navigation and provide a river crossing.
The place has associations with E W C Godfrey, who designed and supervised its construction, and with the Department of Public Works and the Main Roads Department.
The place also has historical associations with Surveyor General J S Roe, Superintendent of Works Henry Trigg and Major F C Irwin, who designed and modified the first Causeway opened in 1843, and with Richard Roach Jewell, who designed the second Causeway that was built by convicts and opened in 1865.
The place represents a continuous point of crossing between the eastern and western shores of the Swan River, traditionally for Aboriginal people and then for European settlers.
The place is part of an important road link in the history of Western Australia connecting Perth with the southern suburbs and providing access to inland areas.
The place is highly valued by the community in providing a link over the river for pedestrians, cyclists and vehicle transport and access to the adjacent landscaped recreational areas.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place represents almost 120 years of continuous bridge building endeavour up to the completion of construction in 1952.The place is important as the river flats presented a navigation barrier to early explorers and settlers, and from the establishment of the settlement of Perth, work was carried out at the site to improve river navigation and provide a river crossing.
The place represents a continuous point of crossing between the eastern and western shores of the Swan River, traditionally for Aboriginal people and then for European settlers.
The place is part of an important road link in the history of Western Australia connecting Perth with the southern suburbs and providing access to inland areas.

HISTORY

In March 1927, Architect L Bowser-Cumpston prepared plans for a kiosk and dressing rooms. The tender of E Allwood was accepted in April 1928 and the kiosk was erected at a cost of £5991 and was ready for leasing in February 1929. Florence Hummerston Child Care Centre is located on the Esplanade Reserve (1880-present). The reserve formerly contained a Recreation Ground, Wanda Tennis Club, Perth Croquet Club, Perth Bowling Club and WA Bowling Association, all established by 1915. The building currently known as the Florence Hummerston Child Care Centre was built in 1928 as a refreshment kiosk, public conveniences and change rooms. They were built by the Perth City Council as a cost of £5,99.00. A concrete platform for concerts and orchestral performances was built adjacent in 1944. The change rooms and toilets were redesigned internally in the 1970s. In 1977 the PCC leased the building to Gary Thompson Holdings who converted it into Annabella's Nightclub. The lease for the club was not renewed after 1980. In 1982 the Salvation Army leased the kiosk as a centre for young people known as 'The Converted Duke'. In 1985 the place was taken over by the Florence Hummerston Day Care Centre which occupied the building until 1998. The Child Care Centre was named after Florence Hummerston (1889-1984), first woman councillor of the City of Perth, who served from 1951-1965 and was involved in various social justice organisations including Meals on Wheels and Wanslea House. Florence Hummerston established a child-minding centre on the third floor of the National Mutual Arcade building in 1964

which relocated to the Esplanade building in 1985. (Information extracted from HCWA Assessment Documentation for Esplanade Reserve, No 3850).

PHYSICAL DESCRIPTION

Architectural Style 1 General	Inter-War (c.1915-c.1940)
Architectural Style 1 Specific	Free Classical
Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

A four storied commercial building of monumental proportions. The base is emphasised with large arched openings and the top storey is differentiated from the others. This building features classical columns and a prominent cornice.

Walls 1 Material	Brick
Walls 2 Material	
Roof Material	Concrete
Architect	F G B Hawkins
Builder	
Other Associations	

HISTORY

The building was constructed in 1930/1931 for the Atlas Assurance Company which was an insurance company. The building was designed by F. G. B. Hawkins, an architect who also designed 655 Hay Street Mall.
The building was clad with Wunderlich terracotta, as well as on the interior walls and floor. This product was one of many Australian companies whose products were used in the building.
The Atlas Assurance Company occupied the ground floor until they sold the building in 1970. After this time is was known as the Phoenix Building. The name change reflected the owner Phoenix Assurance Company of Australia Ltd. The office space through the building has been used for various tenants over the years.
Ownership changed in 1978 and the building was renovated. Many additions to the building were made during the 1980s. In 1988 the owners changed the name back to the Atlas Building.

AUSTRALIAN HISTORIC THEME

3. Developing Perth's (Local, Regional & National) Economies -3.14 Developing an Australian engineering and construction industry
3. Developing Perth's (Local, Regional & National) Economies -3.14.2 Using Western Australian materials in construction
3. Developing Perth's (Local, Regional & National) Economies - 3.18 Financing Australia
3. Developing Perth's (Local, Regional & National) Economies -3.18.3 Insuring against risk
4. Building Perth (Settlements & Cities) - 4.1.5 Creating capital cities
5. Working - 5.4 Working in offices
8. Developing Perth's Cultural Life - 8.10.4 Designing and building fine buildings

STATEMENT OF SIGNIFICANCE

The place is of aesthetic significance as a fine and intact example of Inter-War Free Classical commercial building of the 1930's with Art Deco decorative themes incorporated throughout the building.
It demonstrates a high quality of architectural retailing and craftsmanship.
It is a rare and representative reminder of the 1920's and 1930's in which few commercial buildings were constructed.
Refer to documentation of places for entry in the heritage council's State Register of Heritage Places (COP Heritage Places File 1.38/8).

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The place is a rare demonstration of Wunderlich architectural terracotta cladding, and exhibits a high quality of architectural detailing and craftsmanship.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

It is a rare and representative reminder of the 1920's and 1930's in which few commercial buildings were constructed.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place is of aesthetic significance as a fine and intact example of Inter-War Free Classical commercial building of the 1930's with Art Deco decorative themes incorporated throughout the building.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision-making body is relevant

CONDITION AND AUTHENTICITY

Condition	Good
Building Fabric Authenticity	High level authenticity only minor cosmetic changes have occurred to the third-floor level of the interior which can be easily removed.

CLASSIFICATION OF SIGNIFICANCE

Exceptional – Category 1 – Essential to the heritage of the locality. Rare or outstanding example.

HISTORY

Until the 1880's the town centre was characterised by the establishment of small cottages, shops and small businesses and was rural in character. The expansion of commerce following the discovery of gold in the 1890's put pressure on land in the centre of Perth with the result that most residential uses were displaced in favour of commercial development.
During the 1890's and early 1900's the centre of Perth was substantially rebuilt.
The period of expansion in Perth coincided with a period of economic depression in the eastern states, in particular Victoria. As a result, was substantial migration from Victoria to WA. This migration included businessmen, architects and builders, all of whom had a considerable influence on the development of the city.
Example of a commercial building constructed in Perth during the period of expansion and development that followed the gold rush of the 1890's.

HISTORY

West Perth developed as suburban residential area in the late 1890's. From its inception it had the characteristics of a quality neighbourhood.
Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location which provided healthy site drainage as well as cooling breezes and views over the city and hills.
The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system. The area was subdivided into large residential lots for development and proceed accordingly. Less prestigious areas also developed in lower parts of the area and adjacent to the railway.
The homes built in West Perth from the early 1900's included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.

HISTORY

West Perth developed as suburban residential area in the late 1890's. From its inception it had the characteristics of a quality neighbourhood.
Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location which provided healthy site drainage as well as cooling breezes and views over the city and hills.
The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system. The area was subdivided into large residential lots for development and proceed accordingly. Less prestigious areas also developed in lower parts of the area and adjacent to the railway.
The homes built in West Perth from the early 1900's included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway
The land on which this building is located was part of a landholding subdivided for residential development in 1898. This lot and the lot to the north (lot 4), were secured by accountant Frederick William Kenneth Bunning in 1902 and then transferred to dentist, Grafton Cameron Dickson Forster (1869-1949) in January 1903.
Forster had a successful practice as a dental surgeon and seemed to engage in interests outside his profession. In 1903, he engaged architect Frederick Burwell to design a hotel in Applecross (Hotel Melville). Forster lived in St Georges Terrace so it is clear that he built this house and the one adjacent as investment properties. This property was transferred in Ethel Blanch Harry in July 1904

The Harry family, consisting of Oscar and Ethel and their two boys Geoffrey and Romilly, lived at the house until c1914 when the property was transferred to George Loder Needham. It was at about this time that the house which was designated as 44 Thomas Street was renumbered as 58 Thomas Street.
George Needham did not live at the residence throughout the period of his ownership which ended in 1926. Several other occupants are recorded in the Post Office Directories as living at the property in the 1910s and 1920s. Those living there appear to have been professional men and their families. Occupations included civil servants and accountants.
In 1926, the place was transferred to another accountant, Edward Stephen Hart (c1876-1956) who owned and occupied the residence until 1951.
In October 1951, the place was transferred to accountant, Gordon Vale Mummery (c1914-1982). His wife Annie lived at the house until her death in 1991.
In 1991, the property was transferred to the State Planning Commission.

HISTORY

West Perth developed as suburban residential area in the late 1890's. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location which provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system. The area was subdivided into large residential lots for development and proceed accordingly. Less prestigious areas also developed in lower parts of the area and adjacent to the railway.
The homes built in West Perth from the early 1900's included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.

HISTORY

Demolished 2020. In 1888 sixteen acres of land, bounded by Brooking (Kings Park Road), Thomas and Hay Streets, in West Perth, and comprising Perth Town Lots H121, 127-130, H135 & H136, were purchased by Melbourne real estate agent Robert Walker. The land was gradually subdivided over the following decade. West Perth developed rapidly as a residential suburb during the gold boom years. and the area of West Perth that was situated on higher ground tended to be taken up by more affluent professionals.
In 1900 the larger lots were subdivided and Lot 100 (70 Thomas St) was transferred to William Kenneth Bunning, a contractor of Perth in 1905. The property was later transferred to James Alexander Campbell, a dentist, in 1908.
The property went through a series of owners between 1908 and 1947 and appears to have served largely as a rental property with various tenants throughout much of this time. From 1947 the place remained in the ownership of the Kenny family through until 2008 when it was purchased by a commercial entity who leased it as an office/storeroom.
In 2013 the property was purchased by the WA Planning Commission. Thomas Street, West Perth is subject to a provision in the Metropolitan Regional Scheme (1963) which notes the need to widen roads around the metropolitan area.
The house was demolished in January 2020, along with Nos. 68 and 66 to the north.

HISTORY

West Perth developed as suburban residential area in the late 1890's. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location which provided healthy site drainage as well as cooling breezes and views over the city and hills.
The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system. The area was subdivided into large residential lots for development and proceed accordingly. Less prestigious areas also developed in lower parts of the area and adjacent to the railway. (Ian Kelly; 'The Development of Housing in Perth (1890-1915)'; Unpub . thesis UWA 1992; p96.)
The homes built in West Perth from the early 1900's included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
On 18 July 1928, the transfers of Lots 101 and 102 to Alexander Joseph Leckie. From 1928, through into the mid-1930s, the Leckie family resided at 76 Thomas Street. In 1932/33 they decided to build a block of flats on part of the property. Block of flats designed by prominent Perth architect Marshall Clifton in 1933. The first major project undertaken by Clifton in partnership with George Herbert Parry. The Leckie family were involved in the design of the building. The building was constructed using reject clinker bricks.
In 1935 Madeline Meagher purchased the property and the flats were tenanted during the 41 years the Meagher family owned the property.

On 1 May 1981, the place was transferred to the Metropolitan Region Planning Authority. The place is still tenanted

WESTERN AUSTRALIAN HISTORIC THEME

8. Developing Perth's Cultural Life - 8.10.4 Building and designing fine buildings
8. Developing Perth's Cultural Life - 8.13 Living in cities and suburbs

STATEMENT OF SIGNIFICANCE

The place was designed by Marshal Clifton, prominent Western Australian architect and artist (1903-1975) and is a very fine example of his body of work.
The place is a very fine example of the Inter-War Mediterranean style applied to a two-storey block of four flats and features some fine detailing in its balconies, front entrance and internal face brickwork detailing, with generously planned and well detailed interiors.
The place is a distinctive and early demonstration of self-contained flat style accommodation for members of the upper and middle classes in Perth and West Perth in the early to late 1930s, in a period in which the attractions and advantages of such accommodation were being actively promoted.
The place was built as an investment for music teacher, Alexander Joseph Leckie, who played a most influential and prominent role in the development of music in Western Australia.

NATURE OF SIGNIFICANCE

Physical Description	

Single-storey asymmetrical building with a diversity of roof forms and large semi-circular windows. Distinguished by pyramidal forms and prominent eaves with exposed rafters. Rendered and face brick building with a tiled roof and arched window openings. The plan of the building comprises a series of interlocking octagonal forms. Single storey generally with a second storey in the central core.

Walls 1 Material	Brick
Walls 2 Material	Render - Roughcast
Roof Material	Tile - Terracotta
Architect	Louis Bowser-Cumpston
Builder	
Other Associations	Florence Hummerston

HISTORY

In March 1927, Architect Louis Bowser-Cumpston prepared plans for a kiosk and dressing rooms. The tender of E Allwood was accepted in April 1928 and the kiosk was erected at a cost of £5991 and was ready for leasing in February 1929. Florence Hummerston Child Care Centre is located on the Esplanade Reserve (1880-present). The reserve formerly contained a Recreation Ground, Wanda Tennis Club, Perth Croquet Club, Perth Bowling Club and WA Bowling Association, all established by 1915. The building currently known as the Florence Hummerston Child Care Centre was built in 1928 as a refreshment kiosk, public conveniences and change rooms. They were built by the Perth City Council as a cost of £5,99.00. A concrete platform for concerts and orchestral performances was built adjacent in 1944. The change rooms and toilets were redesigned internally in the 1970s. In 1977 the PCC leased the building to Gary Thompson Holdings who converted it into Annabella's Nightclub. The lease for the club was not renewed after 1980. In 1982 the Salvation Army leased the kiosk as a centre for young people known as 'The Converted Duke'.
In 1985 the place was taken over by the Florence Hummerston Day Care Centre which occupied the building until 1998. The Child Care Centre was named after Florence Hummerston (1889-1984), first woman councillor of the City of Perth, who served from 1951-1965 and was involved in various social justice organisations including Meals on Wheels and Wanslea House. Florence Hummerston established a child-minding centre on

the third floor of the National Mutual Arcade building in 1964 which relocated to the Esplanade building in 1985. (Information extracted from HCWA Assessment Documentation for Esplanade Reserve, No 3850).

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway. In 1902 there were only five houses on Ventnor Avenue, but by the following year most of the street was developed. The house at No. 3 was originally No. 11, and first listed in the 1903 post office directory. It was called ‘Cranmore’, occupied by C. A. Saw. Numbering changed in 1908, by which time Walter W. Browning was the occupant.
The Metropolitan Water Supply Survey plan (1954) shows the house has a large basement at the back, with external stairs at the rear, due to the topography. There was a garage at the side and steps leading to the verandah at the south side. There are also steps at the front verandah. Along the rear lane were two weatherboard outbuildings and a brick laundry and WC. At 2022 the former house is used for commercial purposes. The high masonry and steel picket fence is intrusive and obscures views of the former house.

WESTERN AUSTRALIAN HISTORIC THEME

STATEMENT OF SIGNIFICANCE

The place has aesthetic significance as a Federation Queen Anne residential building dating from the first decade of the twentieth century.
It contributes to the visual quality of its location and is a reminder of the origins of West Perth as a residential area for the wealthier citizens of Perth in the late nineteenth and early twentieth century.
It has historic significance as a surviving example of a Federation Queen Anne residence in an area increasingly under development pressure since the 1980s.
The place is a representative example of a residential property close to the city centre that has undergone a change of use to commercial/professional offices.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

It has historic significance as a surviving example of a Federation Queen Anne residence in an area increasingly under development pressure since the 1980s.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The place is a representative example of a residential property close to the city centre that has undergone a change of use to commercial/professional offices.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place has aesthetic significance as a Federation Queen Anne residential building dating from the first decade of the twentieth century.

It contributes to the visual quality of its location and is a reminder of the origins of West Perth as a residential area for the wealthier citizens of Perth in the late nineteenth and early twentieth century.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Excellent
Building Fabric Authenticity	High. Largely as originally constructed with most detail intact.

CLASSIFICATION OF SIGNIFICANCE

Considerable – Category 2 - Very important to the heritage of the locality.

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
HPPL House (Hancock Prospecting Pty Ltd) was built c. 1990 as new headquarters for the company. The Metropolitan Water Supply Survey plan dated 1954 shows that the new office building replaced eight houses (four stand alone and two pairs of semi-detached) at 28-42 Ventnor Street. The building takes up the south half the block, with the northern half containing a tennis court. Gina Rinehart (née Hancock, born 1954) is the Executive Chairman of Hancock Prospecting, a privately-owned mineral exploration and extraction company founded by her father, Lang Hancock. Rinehart is Australia's richest person and one of the top ten richest women in the world. In March 2021, The Australian Business Review stated her wealth equalled A$36.28 billion.

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway. In 1902 there were only five houses on Ventnor Avenue, but by the following year most of the street was developed. The house at No. 48 was first listed in the 1908 post office directory, occupied by Robert Wigglesworth, chief clerk at the Lands and Surveys Department.
The Metropolitan Water Supply Survey plan (1954) shows a large house with a verandah along the front and all along the north side, with projecting bays on both verandahs.
At 2022 the former house is used for a politician’s offices.

STATEMENT OF SIGNIFICANCE

The place has aesthetic significance as a Federation Queen Anne residential building dating from the first decade of the twentieth century.
It contributes to the visual quality of its location and is a reminder of the origins of West Perth as a residential area for the wealthier citizens of Perth in the late nineteenth and early twentieth century.
It has historic significance as a surviving example of a Federation Queen Anne residence in an area increasingly under development pressure since the

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

It has historic significance as a surviving example of a Federation Queen Anne residence in an area increasingly under development pressure since the 1980s.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

It contributes to the visual quality of its location and is a reminder of the origins of West Perth as a residential area for the wealthier citizens of Perth in the late nineteenth and early twentieth century.

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The place is a representative example of a residential property close to the city centre that has undergone a change of use to commercial/professional offices.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place has aesthetic significance as a Federation Queen Anne residential building dating from the first decade of the twentieth century.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

HISTORY

MHI 2001 - Trees that have grown to form part of the Streetscape for Victoria Avenue, 27 trees in total. Further Research Required. National Trust 1986 - identified 27 trees, incomplete avenue. One of few examples of mature avenue planning in city centre, important element in streetscape, trees poorly managed, do not appear to be thriving, appearance marred by gaps and disfigured Eucalypt growing in medium strip. Changes in water table and water quality may have affected trees, also road works in early 1970s. (Assessment undertaken 27/08/1986); COP TRIM 42009-16

HISTORY

The first Roman Catholic Church built in Perth. St. John's Pro-Cathedral was constructed in 1843/4 following a request by Fr John Brady for land for a Roman Catholic Church. Work continued in 1846 including plastering the walls, adding doors and windows to the building.
The church was constructed on land to the south east of the church square that was set aside for the proposed construction of a Roman Catholic Cathedral. The church was named after St. John the Apostle and Evangelist and later designated a Pro-Cathedral. It was used until 1865 when the size of the congregation couldn't fit in the building and a larger one was required. This resulted in the construction of St Mary's Cathedral. With the addition of an enclosed verandah on the north side of the church the Sisters of Mercy opened there first school there. St John's served as the convent chapel until 1924 then as a school and music room until its restoration in 1977 by Archbishop Sir Lancelot Goody. It has now reverted to being used as a place of Public Worship.

Roof Material	Metal - Zincalume
Architect	Michael Cavanagh
Builder	
Other Associations	

HISTORY

The building was completed in 1855 for the use of the Bishop of Perth and other priests. It was constructed by the Catholic brothers from Subiaco and New Norcia. The two-storey building was quite large compared to the small cottages around it. In 1895 the building was extended and refurbished. The building was altered 1911 by architect Michael Cavanagh for Archbishop Clune.
The building continues to be used as the Archbishop's office and as long term residential accommodation for members of the clergy working within St Mary's parish.

HISTORY

The land that the cottages are located was granted to Michael Smith in 1849. In the late 1880s and 1890s the original land parcel was divided up. In 1897 four cottages on Victoria Square are listed in the City of Perth rate book. In 1898 a fifth cottage was recorded on the property, No 23. The five cottages listed in 1898 were No 21, 23, 25, 27 and 29 and were part of the building boom which occurred during the Gold Boom. The cottages were built to rent.

The designs of No 23, 25, 27 and 29 were all similar in floor plan. No. 21 is a mirror image of No. 23 to 29. The cottages were located within the area of buildings associated with the Catholic Church including St Mary's Cathedral, Sisters of Mercy convent and school, Bishop's House. The Colonial Hospital was located near the houses.

The property which included all cottages was sold by Michael Smith's son John in 1902. Mrs Matilda Osbourne bought the property and continued to rent out the buildings. A boarding house operated from No. 21 and No. 27 from the early 1900s.

In 1906 the property was transferred to the Roman Catholic Church. The cottages continued to be rented to families up to the 1970s. Some tenants also operated boarding houses from the cottages to supplement their income. During World War Two servicemen were billeted at No. 21 when the Moore family lived there.
In the 1960s plans were approved to convert the cottage at No. 21 into a showroom which resulted in the change to the front window, removal of internal walls, removal of front veranda and rendering the building. It was used by an accountant in 1968.
In 1950 the Catholic Church established community facilities in the cottages such as Catholic Migrant Association, Catholic Missions Office. In the 1970s the cottages were used for offices such as Catholic Immigration, Catholic Missions, Lay Apostolate, Young Catholic Workers.
The place was originally built to house workers and their families, which also contributes to the social value of the place to the community.

WESTERN AUSTRALIAN HISTORIC THEME

8. Developing Perth's Cultural Life - 8.5.2 Helping other people
8. Developing Perth's Cultural Life - 8.6.3 Founding Australian religious institutions
8. Developing Perth's Cultural Life - 8.12 Living in and around Australian homes

STATEMENT OF SIGNIFICANCE

The place, which forms a significant streetscape, is part of the suburban residential development associated with the expansion of Perth at the turn of the twentieth century, and is rare as a relatively intact example of a nineteenth century group of cottages.
The place is rare in Western Australia as an example of row housing, unified by the repetition of decorative treatment to front elevations across the group, although the dwellings were constructed as individual structures and are individually good examples of simple workers' cottages.
The place, which has been owned by the Roman Catholic Church since 1906 and used from the early 1970s by various of its social welfare and religious service organisations, contributes to a precinct of nineteenth century structures associated with the Roman Catholic Church around Victoria Square.
The place is valued by those who have used and benefited from the provision of social welfare and religious services operating from the cottages since the 1970s.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place, which has been owned by the Roman Catholic Church since 1906 and used from the early 1970s by various of its social welfare and religious service organisations, contributes to a precinct of nineteenth century structures associated with the Roman Catholic Church around Victoria Square.

Gothic style Cathedral constructed in three stages. The original building dates from 1864 but was altered and a spire constructed is 1905. The more recent section of the building dates from the 1920's and was intended to be the first stage of new Cathedral. The rest of the Cathedral was intended to be completed later and would have involved the demolition of the 1864/1905 section. Two new wings were added in 2009.

HISTORY

The original survey of Perth was on a traditional grid pattern influenced by the natural elevations of the landscape. Also included in this plan was a church square which was located on high ground which was thought to be used by the Church of England, but this site was granted by Governor Kennedy to the Catholic Church after Bishop Serra petitioned him for a site of a cathedral. The Cathedral was built in 1865 and was a simple two storey building, in the Gothic style with a tower on the southern side. Between 1897 and 1910 additions were made to the building. In 1926 the foundation stone was laid for the new Cathedral which only included a new transept and sanctuary due to financial limitations. The additions were designed by Michael Cavanagh. The

Cathedral was closed in 2006 to facilitate construction and conservation works to complete it. The Cathedral was reopened in 2009 with two new wings.

STATEMENT OF SIGNIFICANCE

The place is a prominent landmark in Perth, as well as a major element within the historic Murray Street East.
The place and its grounds, set in Victoria Square, reflects the original general intention of the colonial Surveyor General's town plan for Perth.
The place is highly valued by the Catholic community of Western Australia.
The place is an unusual demonstration of different expressions of Gothic ecclesiastic architecture in the one building.
The original portion of the Cathedral (1865) is associated with the Benedictine Brothers who constructed the building.
The later portion of the Cathedral (1930) is associated with prominent Western Australian architect Michael Cavanagh.
The place is associated with Bishops Griver, Gibney and Clune, who administered the principal phases of its construction.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place and its grounds, set in Victoria Square, reflects the original general intention of the colonial Surveyor General's town plan for Perth.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

The place is highly valued by the Catholic community of Western Australia.

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place is a prominent landmark in Perth, as well as a major element within the historic Murray Street East.
The place is an unusual demonstration of different expressions of Gothic ecclesiastic architecture in the one building.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The original portion of the Cathedral (1865) is associated with the Benedictine Brothers who constructed the building.
The later portion of the Cathedral (1930) is associated with prominent Western Australian architect Michael Cavanagh.
The place is associated with Bishops Griver, Gibney and Clune, who administered the principal phases of its construction.

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision-making body is relevant

CONDITION AND AUTHENTICITY

Condition	Excellent
Building Fabric Authenticity	During its life St. Mary's Roman Catholic Cathedral has been subject to a series of alterations and additions associated with the changing needs of the Church, and liturgical changes. The building retains a high degree of authenticity.

CLASSIFICATION OF SIGNIFICANCE

Exceptional – Category 1 – Essential to the heritage of the locality. Rare or outstanding example.

HISTORY

Kirkman House was designed by the Public Works Department of W.A under the direction of Chief Architect Hilson Beasley. It was built in 1909 to provide nurses' quarters for staff of Royal Perth Hospital. In 1926 the north wing was constructed to provide accommodation for the Commonwealth nurses who worked in the Soldiers Ward.
The building was remodelled into offices in 1971 and the current office accommodation in 1991.

HISTORY

Ornate English Gothic style chapel designed by prominent church architect E le B Henderson. Purpose built initially as a chapel for the adjoining Convent of the Sisters of Mercy. The Sisters of Mercy used their own money to build the convent at Victoria Square in 1848 but it was not until 1924 that the chapel was constructed. The chapel has a high barrel-vaulted ceiling and stained glass windows, within Romanesque arches. The murals in the dome were painted in Italy, on canvas, by an Italian nun and purchased in Rome in the early 1930s by Mother Brigid McDonald.

The Sisters of Mercy arrived in Perth from Ireland in 1846, led by Mother Ursula Frayne. After arriving in Perth, in 1846 the sisters became the first female religious teaching order to establish a school in Australia. Having navigated sectarism in Ireland, they decided to offer a general education to all Christians. The sisters prioritised

Aboriginal people, immigrant Irish orphan girls, the poor and the uneducated. The sisters established a fee-paying school, benevolent institution and Western Australia's first high school.

Many elements in the chapel were created by local craftsmen. The stalls were designed and made of polished jarrah wood, and the bell was cast at the foundry of Frederick Metters in Subiaco. The sisters have since moved out of the convent, and the building is now the Mercy Heritage Centre. The chapel is now used as the school chapel for the adjoining Mercedes College.

HISTORY

Originally built as Our Lady's College in 1896 by Joseph Nunan and Finian builders. In 1967 the two schools of Our Lady's College and (the non-fee paying) St.Joseph's were amalgamated to become Mercedes College. The place was established from 1843 by the Holy Cross Sisters (Sisters of Mercy) of the Catholic Church as a place of worship, community outreach and education. It is the place Australia's first secondary school for girls.

HISTORY

The old school building constructed directly behind St.John's Pro-Cathedral off Victoria Street, Perth according to Alan Lloyd (2004), was the site of the first Sisters of Mercy Convent in Australia erected under the leadership of Mother Ursula Frayne. Construction of the two-storey stone building commenced on 3 May 1847 funded by the Sisters of Mercy and was blessed by Bishop John Brady on 3 May 1848. With great courage, facing primitive conditions and hardship, the College flourished – the sisters would recognise this as "the fruit of trust in Divine Providence". From the Mother House at Victoria Square, the sisters undertook the establishment of schools throughout the state and beyond.
After the opening of the new 1871 Sisters of Mercy Convent on the corner of Victoria Square and Goderich Street, the former Convent building became a home for female orphans. The limestone rendered building is now used as a school building by Mercedes College.

HISTORY

The Sisters of Mercy came to in WA in 1845 and opened their first school in 1846. The population expansion brought about by goldrushes of the 1890s and amendments to the Education Act in 1893, created the need for the establishment of further schooling facilities.
In 1895 (the Golden Jubilee of the sisters arrival in Australia), the foundation stone was laid for a new school building, St Joseph's Day School designed by Cavanagh & Cavanagh (Our Lady's College was constructed at the same time). The building was constructed using Cottesloe freestone with Sydney freestone dressings.
The building was blessed and opened by Bishop Gibney on 15 August 1896. Bishop Gibney donated the school to the sisters of Mercy as recognition of their years of service to the Church. St Joseph's was initially a free school, while Our Lady's College attracted fees.
In 1909, extensive improvements were carried out. The building added to and renovated frequently over the following years. Between 1916-21, a new building was added to the east of the school, known as the 'Serisier'. The Sisters held a week-long bazaar to finance the construction.
In 1964, the place was the first Catholic school to receive a grant from the Menzies Government promoting the

establishment of science labs.
In 1967, St Joseph's and Our Lady's College were amalgamated to form Mercedes Catholic Girls School, later Mercedes College. In 1984, further classrooms were added. It is the oldest Catholic School in WA. The building continues to function as a school.

HISTORY

West Perth developed as suburban residential area in the late 1890's. From its inception it had the characteristics of a quality neighbourhood.
Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location which provided healthy site drainage as well as cooling breezes and views over the city and hills.
The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system. The area was subdivided into large residential lots for development and proceed accordingly. Less prestigious areas also developed in lower parts of the area and adjacent to the railway. (Ian Kelly; 'The Development of Housing in Perth (1890-1915)'; Unpub. thesis UWA 1992; p96.)
The homes built in West Perth from the early 1900's included prestigious mansions built in prominent locations and smaller working-class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
The property has been continually used as a residence since it was constructed in 1905. Until 1951 it was owned by different generations of the Bethel family. Since then it has been owned by the Buxton family.

The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway. House, 10 Walker Avenue was built in 1907, with the first occupant being George A Burkett, an attorney at R. Stephens and Son. The house was called ‘Talana.’
The Metropolitan Water Supply Survey plan dated 1954 shows No. 10 as a brick house with a half-length front verandah that wraps around the north side, and central steps. The house was reroofed in c. 1982. At 2021, the place is used as offices. The former back yard and the front garden are now carparking space.

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status associated with addresses in Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and priced accordingly. Less prestigious areas also developed in lower parts of the area and adjacent to the railway. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway. Nos. 22-24 Walker Avenue were first listed in the Post Office Directory in 1949. A house had been built facing Ord Street (No. 51, previously No. 99) in 1907. It was still listed in 1949. A possible scenario is that the Ord Street house was extended at the rear, with two new residences built facing Walker Street. This cannot be determined without further research and /or a physical assessment of the property.
The Metropolitan Water Supply Survey plan (date unknown, revised 1954) shows a single house at No. 51 Ord

Street. It has a small porch entry, accessed from central steps and a pathway that bends towards the corner of the lot. There was a brick garage on the rear boundary, along a Right-Of-Way between this house and No 20. Walker Avenue.
At 2021, the property is used as offices.

HISTORY

The homes built in Perth in the 1890's and early 1900's were generally larger and more elaborately detailed than the earlier simple cottages they replaced. Although influenced in their design by homes of Victoria in particular, due to the influx of migrants from the eastern states, houses in Perth tended to be constructed as single detached, or sometimes pairs of attached, houses, rather than the extensive rows of terrace houses found in eastern Australia. Houses were generally single storey brick with corrugated iron roofs. Some more prestigious homes had slate or tiled roofs. Stucco decoration was popular as was wrought iron lace and timber fretwork.
Although East Perth was included on the plan for Perth from earliest surveys, the area remained substantially undeveloped until the period of expansion that accompanied the gold rush. Part of the area had been designated for cemetery purposes which probably detracted from its attractiveness for settlement.
In 1884 East Perth has a population of 600 in 112 houses set amongst fruit and vegetable gardens and paddocks. By 1894 the population had moor than doubled to 1300 residents and 245 houses and by 1904 it had increased to 6000 occupants of 1066 houses. The East Perth Primary School was planned in 1894 as a response to the needs of the growing population. [Ian Kelly; 'The Development of Housing in Perth (1890-1915)'. Unpub. Thesis UWA 1992; p 96]
Waterloo Crescent appeared on the first statutory plan of Perth prepared by A. Hillman and signed by Governor John Hunt in 1845. However, it was not established and settled until much later. Waterloo Crescent is the only residential crescent in the city and contains a group of houses of similar scale and form constructed from the turn of the century to the inter-war period.

HISTORY

Although East Perth was included on the plan for Perth from earliest colonial surveys, the area remained substantially undeveloped until the period of expansion that accompanied the gold rush. Part of the area had been designated for cemetery purposes which probably detracted from its attractiveness for settlement.
In the 1870s East Perth developed as a residential area, as the city population gradually increased. However, it underwent tremendous growth during the late-nineteenth century, which was a result of the gold boom. The increase in wealth encouraged speculative development of housing in Perth, Fremantle and other new areas close to these centres such as Subiaco, East Perth and North Perth. While detached houses remained the most popular form, semi-detached houses and terraces were not uncommon in these areas. In 1884 East Perth had a population of 600 in 112 houses set amongst fruit and vegetable gardens and paddocks. By 1894 the population had more than doubled and by 1904 it had increased to 6,000 occupants of 1066 houses. Areas which had previously had a scattering of houses and vacant sites were quickly developed with primarily rental accommodation. This relatively short burst of activity played a major role in establishing the late nineteenth century character of the area. In general, East Perth acquired a respectable working-class character by the turn of the century: ‘a middle-class-come-skilled working man’s suburb.
Waterloo Crescent appeared on the first statutory plan of Perth prepared by A. Hillman and signed by Governor John Hunt in 1845. However it was not established and settled until much later. Waterloo Crescent is the only

residential crescent in the city and contains a group of houses of similar scale and form constructed from the turn of the century to the Inter-War period.
There were originally nine houses along the north side of Waterloo Crescent between Horatio and Bronte Streets. Over time starting c. 1970 and up to 2000 all but two have been demolished and replaced with multi-storey apartment blocks. Only Nos. 10, 12 and 36 remain extant at 2021. No. 12 was built c 1913; listed for the first time in Post Office Directory of 1914. Aerial photos suggest it has been extended to the rear. The Metropolitan Water Supply Survey plan (1953) shows a brick house with a wrap around verandah. There was a garage on the rear boundary accessed from the Right of Way.
No. 12 lot boundary now encompasses the former rear yard of the adjacent No. 10. In 2022, the place continues to be a private residence.

In the 1870s East Perth developed as a residential area, as the city population gradually increased. However, it underwent tremendous growth during the late-nineteenth century, which was a result of the gold boom. The increase in wealth encouraged speculative development of housing in Perth, Fremantle and other new areas close to these centres such as Subiaco, East Perth and North Perth. While detached houses remained the most popular form, semi-detached houses and terraces were not uncommon in these areas. In 1884 East Perth had a population of 600 in 112 houses set amongst fruit and vegetable gardens and paddocks. By 1894 the population had more than doubled and by 1904 it had increased to 6,000 occupants of 1066 houses. Areas which had

previously had a scattering of houses and vacant sites were quickly developed with primarily rental accommodation. This relatively short burst of activity played a major role in establishing the late nineteenth century character of the area. In general, East Perth acquired a respectable working-class character by the turn of the century: 'a middle-class-come-skilled working man's suburb.
Waterloo Crescent appeared on the first statutory plan of Perth prepared by A. Hillman and signed by Governor John Hunt in 1845. However it was not established and settled until much later. Waterloo Crescent is the only residential crescent in the city and contains a group of houses of similar scale and form constructed from the turn of the century to the Inter-War period.
There were originally nine houses along the north side of Waterloo Crescent between Horatio and Bronte Streets. Over time starting c. 1970 and up to 2000 all but two have been demolished and replaced with multi-storey apartment blocks. Only Nos. 10, 12 and 36 remain extant at 2021. No. 36 was built c. 1909; listed for the first time in Post Office Directory of 1910, with Charles W. Arnott as the main occupant. The Metropolitan Water Supply Survey plan (1953) shows a two storey brick house with two sets of steps leading to it from the street. In 2022, the place continues to be a private residence.

STATEMENT OF SIGNIFICANCE

The place has aesthetic and historic significance as a fine example of a two-storey Federation Queen Anne style residence built in c. 1909.
The place has rarity value as one of the few remaining heritage residential properties in the area and represents a wealthier class of people who lived in this elevated position.
The significance of the place is increased because it remains substantially intact.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place has historic significance as a fine example of a two-storey Federation Queen Anne style residence built in c. 1909.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The place has rarity value as one of the few remaining heritage residential properties in the area. The significance of the place is increased because it remains substantially intact.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The place represents a wealthier class of people who lived in this elevated position.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

For Adoption

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place has aesthetic significance as a fine example of a two-storey Federation Queen Anne style residence built in c. 1909.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Very Good
Building Fabric Authenticity	High. Intact with some restoration.

CLASSIFICATION OF SIGNIFICANCE

Considerable – Category 2 - Very important to the heritage of the locality.

HISTORY

The Perth Girls' School (fmr) and in particular the playing fields to the north and north-east of the main building (Lot 775) were located on part of the former East Perth Cemeteries (HCWA Place No. 2164).
When the cemetery was closed in 1899 the families of the deceased were given the option to transfer any remains to Karrakatta Cemetery.
Some remains were left and the school, playing fields and some of the outbuildings were subsequently constructed on the land. Refer to Conservation Plan for further details.

STATEMENT OF SIGNIFICANCE

The place a particularly fine example of the use of the Inter-War stripped Classical style.
The place is prominent landmark in the area.
The place design is of particular note as it is of scale and prominence more often associated with large government departments that with a State school building.
The monumental scale of the building reflects the status afforded to a particular educational philosophy and the government's optimism for the future of Perth.
The award of the RIBA Bronze Medal in 1939 demonstrates the high professional regard for the building design at the time of construction.
The place demonstrates a particular phase in the philosophy of female education, a philosophy that is no longer evident.

HISTORY

Prior to the 1890's central Perth was characterised by numerous small shops and businesses located in amongst residential premises which included boarding houses and cottages. Following the gold rush of the 1890's there was substantial redevelopment of the centre of the city with the result that very few cottages of other small buildings remained extant.
The building was constructed in 1894 by George Taylor who was a builder and bricklayer. The house was one of six built on the town lot during the 1890s. These were Nos. 15, 17, 19, 21, 23 and 25 which were renumbered in 1907 and No. 25 became No. 33. The house was probably built with bricks from the East Perth Brickworks. The house was rented out.
In 1920 Henry Crackel bought the house and it was sold again in 1925 to Edith Heron. The Heron family owned the place until 1976. The next owners occupied the house until 1980. Since then it has been rented and lived in by the owners. Conservation work has been carried out in that time.

8. Developing Perth's Cultural Life - 8.10.4 Building & designing fine buildings
8. Developing Perth's Cultural Life - 8.13 Living in cities and suburbs

STATEMENT OF SIGNIFICANCE

The place exhibits significant aesthetic qualities in the distinctive use of two toned bonded brickwork incorporating rare white clay bricks dating from the late nineteenth century.
The place is a minor landmark due to the patterned brickwork and relative isolation from neighbouring buildings. The contrast in scale and style to surrounding developments also contributes to the landmark quality of the place.
The place was one of many worker's homes built in East Perth during the gold boom period, when the population underwent a significant increase and areas near the city experienced rapid suburbanisation and industrial development.
The place is representative of the work of developers/builders, who constructed numerous homes for rental in the East Perth area during the 1890s.
It is associated with builder George Taylor.
Due to the demolition of surrounding homes, the place stands as a reminder of an earlier streetscape and of the origins of the locality.

HISTORY

East Perth was included on the plan for Perth from earliest surveys, however the area remained substantially undeveloped until the period of expansion that accompanied the gold rush. Part of the area had been designated for cemetery purposes which probably detracted from its attractiveness for settlement. In 1884 East Perth had a population of 600 residents and 112 houses set amongst fruit and vegetable gardens and paddocks. By 1894 the population had more than doubled to 1300 residents and 245 houses and by 1904 it had increased to 6000 residents and 1066 houses. The East Perth Primary School was planned in 1894 as a response to the needs of the growing population.
Regarding the construction date of the existing house, historical rate books note a cottage at Lot E31 in 1884 and at part lot E31 in 1885, however it is not clear if these structures form part of future Lot 1 on Plan 108. Notwithstanding this, a historical map dated 1897 shows built form at the now 45 Wellington Street, East Perth. The Original Certificate of Title for 45 Wellington Street indicates that on 18 December 1925 Mr John Reidy purchased the place. Mr Reidy is noted as being a Tramway Employee. The previous Certificate of Title dated February 1891 has the sole proprietor as The Reverend David Shearer. The Reverend David Shearer arrived in the Colony in 1879 as the first clergyman of the Presbyterian denomination. He established a church in Pier Street and a Manse in Stirling Street. Born in 1848 Mary Gertrude Eliot was one of the early settlers in Western Australia. She was the first daughter of the George Eliot who came out with Captain Stirling in 1829, and afterwards played an honourable part in various capacities in the service of the state.

The Lot was subsequently transferred by endowment to Anna Louise Eliot and Mary Gertrude Eliot in February 1897. Information from the nominator for the place notes that Mr John Reidy was resided with Mary Eliot. Historical rate books note ownership transferring from Gertrude Eliot to John Reidy on 14 September 1920. John Reidy's wife died in 1926, the funeral notice made reference to their daughter Kathleen and that Ada Mary was the sister in law to Reverend Father Reidy. John Reidy was still living at the property in 1951 and remains in the family.

HISTORY

In 1886 Edwin Good created smaller lots from the larger land parcel. During this time East Perth was developed as a result of the gold boom. The property was purchased in 1890, however wasn't built on until 1925 when William and Catherine Collins purchased the property. Catherine lived at the property until the early 1970s.
In the 1960s the property was sold and since then was owned by various people who rented the property.

HISTORY

Originally one of Perth's many swamps, this area was drained and established as a public reserve in the 1830's. It was used for football and cricket matches and for training and exercising horses. In 1898-99 two cricket pitches were constructed. 1902-03 200 trees were planted and then in 1904-06 3 concrete pitches were laid.
The establishment of parks was closely linked to wealth with the result that Perth did not begin to develop comprehensive system of parks until after the goldrushes of the 1890's.
Public debate on the lack of park land in Perth was voiced in editorials in the newspapers between 1875 and 1886. The provision of a network of parklands in central Perth and around the river were the themes central to these concerns.
It was declared a public open space in c1845 and it was known as the rec or Recreation Ground. It was officially named Wellington Square in 1897 after Lord Wellington who was the English Prime Minister at the time.
Between 1900 and 1914 the City of Perth made improvements to the area including a perimeter fence,

grandstand, toilets, sports facilities including tennis courts and cricket pitches and planting. A caretaker's cottage was built in 1913/1914 to discourage antisocial behaviour. The fence was proposed to be removed in 1913 to discourage people from hiding and sleeping out of site behind the fence. Fences around other gardens in Perth were also being removed at this time. The fence was removed in 1927.
Between 1960 and 1970 the tennis courts were removed. The caretaker's cottage was removed in 1987. The area was improved in the 1990s. The place continues to be used for recreational purposes.

HISTORY

In 1890 Western Australia achieved responsible government. This, combined with the discovery of gold in the early 1890s, provided the catalyst for development in Perth. Some smaller businesses began to establish themselves in existing cottages and a number of larger enterprises erected substantial new offices and warehouses. Earlier uses primarily served the local population, however this later development was more broadly based and was a direct response to the expansion of the city centre during the gold rush. The period from the late 1890s to early decades of the twentieth century was characterised by a vigorous public works and corresponding expansion of commerce and trade. During this period, the character of the Wellington Street was established. The Post Office Directory lists Perth Knitting Mills at this location from 1924, indicating this is the date of construction of the building. This manufacturer was one of seven knitting mills in Perth by 1927, but the venture was short-lived. By 1934 the company was no longer operating, and the building remained vacant for some time.

In 1945 the Department of Native Affairs moved into the building. Later occupiers of the building include Community Welfare (Native Welfare Office), Aboriginal Affairs, the Aboriginal Lands Trust (1968-1981), and the WA Aboriginal Media Association (c. 2005). The property changed hands from this organisation in 2016 to the current owners.

Drawings for this building are held at the State Records Office from when it was used by Community Welfare - Native Welfare Office, and later Aboriginal Affairs, as the Public Works Department would have had responsibility for its maintenance, repairs and renovations.

At 2021, the building is occupied by a café on the ground floor, and a private training / education college above. The street view has been substantially altered over time as to be unrecognisable as a 1920s building.

Walls 1 Material	Brick - Face
Walls 2 Material	
Roof Material	Tile - Terracotta
Architect	Reginald Summerhayes & George Rowe
Builder	
Other Associations	

HISTORY

The building was constructed in 1936 from a design by Reginald Summerhayes. The Dental Board was established in 1894 and plans were made to establish a dental hospital. The first Perth Dental Hospital was established in Murray Street in 1927.
The land around the property was the location of manufacturers, importers and other businesses.
By 1950 a new building was opened to cater for the increase in facilities required. In the 1960s the building was renovated. New buildings which were part of Royal Perth Hospital continued to be constructed into the 1970s. In the 1980s the building was proposed to be demolished; however this plan wasn't carried out.

HISTORY

The order of St. John was established in Perth in 1891, by a Dr McWilliams, who commenced operations by establishing classes in first aid. The movement was very popular mainly because of the rush of prosperity with the gold discoveries in the eastern part of the State. Interest in teaching first aid was maintained when Australians volunteered to fight in South Africa during the Boer War. The St. John Ambulance Association taught the police, firemen and railway men the essentials of first aid and they carried out the duties of attending to accident victims. It was only in 1921 that the Association recognised the need to provide an ambulance service to the citizens of the State of Western Australia. A building was acquired on the south side of Murray Street, opposite the Royal Perth Hospital and adjoining the fire brigade headquarters. The building provided a common centre for all St. John activities. Provision was made for the housing of three T Model Ford ambulances, costing 305 pounds. The Association expanded slowly throughout the State. Naturally, expansion was slowed during the depression years of the 1930's. By 1938, there were 26 active sub centres. The cramped conditions for ambulance crews, the need for bigger classrooms to teach first aid, and the increased administrative load, made it essential to acquire new premises. It was logical that the new headquarters should be centrally located in Perth near the Royal Perth Hospital. The Association wanted a headquarters which would clearly identify its role of teaching first aid and providing an ambulance service to the community. After lengthy negotiations, land was obtained in Wellington Street from the City Of Perth, who waived the purchase price of 1500 pounds. Local

authorities in the area served by the Perth Ambulance Service, guaranteed a contribution of 1 pound on a pro rata basis, according to population.
The Lotteries Commission generously agreed to contribute 3000 pounds on a basis of 1 pound for 1 pound of the collections of the Association. The sum of 950 pounds was raised from the sale of the Murray Street premises to the fire brigade. Donations were also received from the public. The building was to cost 16500 pounds plus 1000 pounds for contingencies and 1000 pounds for furnishing. The architects, Messrs. Ochiltree and Hargrave were appointed to design and supervise the new building. The plans were signed in 1939 by Dr Holland and C.W. Arnott, the builder. They show that the building was to cater for teaching first aid, providing administration offices and board room, ambulance crew facilities and Brigade Headquarters meeting room. A unique feature of the buildings in that period was the provision of a caretaker's flat which was tacked onto the back of the building. There were no parking facilities for cars provided. There were several meetings between the Councillors and architects. Restraints and changes to the building were made, mainly as a result, of lack of funds.
The original quote on the building was 23000 pounds when it was envisaged that Donnybrook sandstone was to be used on the outside facade. Although the Donnybrook quarries were nearby, and the stone attractive and relatively inexpensive, the stone had to be replaced by cement rendered bricks. The roof was of corrugated iron and floors, doorframes and fittings are all of Jarrah timber. The Board Room table needs special mention. It had to be constructed in the Board Room, when the building was completed and must be one of the largest Jarrah timber tables in Western Australia. The table measures 17 feet 9 inches long by 5 feet & 1/4 in width and is constructed of one piece of Jarrah. Ten St. John Logos are inset into the perimeter of the table in lighter timber.
The building was officially opened on Monday 10th June, 1940 at 8pm by the Lieutenant Governor Sir James Mitchell.

8. Developing Perth's Cultural Life - 8.10.4 Designing and building fine buildings

STATEMENT OF SIGNIFICANCE

The place is of aesthetic significance as an example of a building designed in the Inter War Art Decor c1913 - 1940 style.
The building is of remarkably high authenticity and as such has rarity value.
Since its construction in 1940 St John Ambulance Building has been directly associated with the services of St John Ambulance. From 1940 to 1979, the building was the administrative headquarters of the association and the brigade and since this time has continued to be used as the location of first aid training courses, the museum and library, commandery offices, and for many years served as the central city ambulance depot.
The place has social value for its association with this community service organisation for both the people who have worked and trained with the organisation since 1940 up to 2001, and for the wider community that has been served by the organisation.
The place is an excellent example of the work of the architectural firm Ochiltree and Hargrave who were prominent in Western Australia.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

Since its construction in 1940 St John Ambulance Building has been directly associated with the services of St John Ambulance. From 1940 to 1979, the building was the administrative headquarters of the association and the brigade and since this time has continued to be used as the location of first aid training courses, the museum and library, commandery offices, and for many years served as the central city ambulance depot.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The building is of remarkably high authenticity and as such has rarity value.

HISTORY

The two storey building No. 319-332 was built in 1897 as noted on the building's pediment. The buildings had many uses over the years including Woo, Sang, Long and Co storekeepers who occupied in in 1897 and the Hamburg Dining Room operated by Messrs Gimm and Richards. The single storey shops, which have been demolished, were possibly constructed in the late 1890s.
The Wellington Surplus Store which was located on the property was established before World War Two by T Starke. It was originally known as Wellington Dealers. The building has been demolished c2017 and the façade remains.

AUSTRALIAN HISTORIC THEME

4. Building Perth's (settlements & cities) - 4.1.5 Developing city centres

STATEMENT OF SIGNIFICANCE

The two-storey section of the improvements at 317-323 Wellington and Pier Streets is a good example of Federation Free Classical style shops and residences.
The place is associated with the patterns of commercial development of Perth's city centre following the gold boom of the 1890s.
The place, and in particular 317-323 Wellington and Pier Streets is representative of the practice of living above shops, which became very rare after World War II, but has seen a more recent revival.
The two-storey section of the improvements at 317-323 Wellington and Pier Streets contributes to the city setting on an important street corner.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The place, and in particular 317-323 Wellington and Pier Streets is representative of the practice of living above shops, which became very rare after World War II, but has seen a more recent revival.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The two-storey section of the improvements at 317-323 Wellington and Pier Streets is a good example of Federation Free Classical style shops and residences.
The two-storey section of the improvements at 317-323 Wellington and Pier Streets contributes to the city setting on an important street corner.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The place is associated with the patterns of commercial development of Perth's city centre following the gold boom of the 1890s.

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision-making body is relevant

CONDITION AND AUTHENTICITY

Condition	Poor
Building Fabric Authenticity	Low level of authenticity as only the facade remains.

CLASSIFICATION OF SIGNIFICANCE

Physical Description	

A classical inspired stucco and brick bridge whose winding form adds vitality to the railway station forecourt. Cast iron swans add local relevance to the decoration. (Ref: Molyneux, I 'Looking Around Perth' Westcolour Press 1981 p39) The Bridge has formed a major link between the city centre and the expanding northern suburbs since the development of the railway made its construction imperative. COP Description: Horseshoe Bridge constructed in 1904, is a classically inspired brick and stucco bridge whose winding form adds vitality to the ‘Perth Railway Station’. The bridge creates a meandering boundary to the station forecourt. The bridge has four traffic lanes which, in 1986, carried approximately 18,000 vehicles per day into the city. The eastern footpath gives direct access to both city rail station platforms and first floor level of the station. It also incorporates a bus stop. The main structural elements of the bridge are of steel. The bridge features rendered concrete balustrading with decorative end piers. The bridge is supported by a series of semi-circular arches with rendered decorative treatment. Rendered cast iron swans add local relevance to the decoration. Many of the arches on the Wellington Street elevation have been enclosed with glass, creating shop fronts to the retail spaces behind. Development approval was granted by MRA (formally EPRA) in 2009 for the resurfacing and reconfiguration of the Horseshoe Bridge, Footpaths and Roadway to enhancement the pedestrian environment and accommodate for two-way traffic. The works were completed to extend the life of the bridge by providing a durable deck surface and will improve waterproofing of the structure and tenancies beneath the bridge.

HISTORY

The Horseshoe Bridge was built by the Public Works Department (PWD) in 1902-04 to enable the passage of road traffic over the railway line. The completion of the bridge allowed for easier vehicular and pedestrian traffic over the tracks and reinforced William Street as one of the main access routes into Central Perth from the north. In the early 1920s, a tram line was laid over the horseshoe Bridge, connecting Osborne Park and Leederville with central Perth via Newcastle Street. The bridge has acted as a major link between the city centre and the expanding northern suburbs and remains in use.

STATEMENT OF SIGNIFICANCE

Aesthetic Value: Horseshoe Bridge is of considerable aesthetic value.
The balustrade detailing and swan sculptures on the newel posts contribute to the aesthetic qualities of the precinct.
Historic Value: Constructed in 1904 Horseshoe Bridge is one of the oldest surviving intact bridges in central Perth. The bridge is an outstanding example of a major urban railway overbridge of its time.
Scientific Value: Horseshoe Bridge is a unique example of its type and demonstration an innovative solution in an elegant form to the problem of bridging a railway when space was restricted.
Social Value: Horseshoe Bridge exhibits design characteristics that are valued by the community. The area in which it is sited is significant to the Nyungar Aboriginal Group for hunting and mythology reasons.
Rarity: Horseshoe Bridge is a unique and substantially intact example of its type.
Representativeness: Horseshoe Bridge is representative of the growth of the railway and its impact upon the road transport systems in Central Perth.

NATURE OF SIGNIFICANCE

HISTORY

Perth Railway Station was constructed in several stages but an intended additional floor and central tower were never commenced.
The original Perth Railway Station was built in 1881 when the line connecting Fremantle and Guildford was opened. The central section of the present building was finished in 1884, the west wing being added in 1896 and the east wing completing the structure in 1897.

8. Developing Perth's Cultural Life - 8.10.4 Designing and building fine buildings

STATEMENT OF SIGNIFICANCE

The place marks the development of the Fremantle to Guildford Railway in 1881 and the subsequent development of the State's rail network, the major communication link within Western Australia from that time until the latter part of the twentieth century.
Constructed in 1894, the Perth Station Building is one of the oldest surviving principal city stations in Australia.
The intactness and quality of the architecture of the Railway Station building contributes significant aesthetic value to the streetscape of Wellington Street.
The place is significant for its association with significant Western Australian Government Architects and Engineers, including James Thomas, John A. Wright, Richard Roach Jewell, George Temple Poole and C.Y. O'Connor.
The Perth Station Building is a particularly well-articulated example of a building in the Victorian Free Classical Style and as such provides an important termination at the northern end of Forrest Place, the main civic plaza in the City of Perth.
The place contains a site which is of significance to the Nyoongar Aboriginal people for hunting and mythology reasons.

HISTORY

The building dates from the period of commercial expansion in Perth following the gold rush of the 1890's, when a large number of hotels or 'pubs' were built in Perth, on the outskirts of the city and in country towns. They provided accommodation and refreshment to travellers and the increasing number of immigrants arriving in the state, including the large proportion of working men from Victoria. Typically a hotel was constructed on a corner with entrance to the public bar addressing the corner and the entrance for residents on one of the streets. There was often a tower or other feature on the corner and a verandah with elaborate cast iron decoration along the street facades.

In response to the temperance movement, coffee palaces and hotels were constructed during the gold rush period. The coffee palaces offered similar accommodation and facilities to hotels but were unlicensed. The Grand Central Coffee Palace was one of many coffee palaces constructed during the late 1890s and into the early 1900s in Perth. From 1903 – 1913 the premises were leased to Elizabeth Ellis. A newspaper article from the Sunday Times on 15 November 1903 (Trove) announced the new management:

To residents and visitors alike the want of a first-class coffee palace has been long felt – somewhere to go for those who desire to get away from the ordinary hotel or hash-house life. Many persons, both male and female, ladies especially, object to go to hotels; to many of them the surroundings are objectionable. Then the ordinary boarding houses – well, they need not to be described, as they are too well known to most of us. Dirty kitchens, badly-cooked food, dirty, slovenly owners that make one sick to look at is the usual type. Mrs Ellis has started

the Grand Central Coffee Palace in Wellington Street, near Barrack Street. It is a first class four-storey building, quite new and fresh, has splendid accommodation, single rooms, hotel and cold baths, good cuisine, a large and lofty dining room, reading and smoke rooms, ladies' room, drawing room, special verandahs, and everything up to date. The chargers are reasonable, and as there is a rush on for rooms, those who wish to secure first-class accommodation, civility, and comfort should pay Mrs Ellis a visit at once.

During 1907, and 1908 J. H and Mrs E. Robinson were listed in the postal directly for that establishment. In 1938, the name Grant Central Coffees Palace changed to Grand Central Hostel. After the death of Albert Olley, in 1941, probate was granted to his widow Lydia Olley. Mrs Olley owned the property until 1947 when Thomas Dean, a hotel proprietor, and Julian Stack of the Majestic Hotel, became equal owners of the property.

In 1956, the Board of Management of Royal Perth Hospital purchased the property. The Grand Hostel as the place was then known was purchased by Royal Perth Hospital to accommodate the residential requirements of the nursing staff at the Royal Perth Hospital. Some alterations were made to the property at the time in response to fire and safety requirements of Perth City Council.

In 1971 Jewell House, a purpose built residential facility for the nursing staff in Goderich Street, was constructed and the Grant Hostel was no longer required by the Royal Perth Hospital. Mr Alan Farnham leased it and operated a guest house until the property was sold to 379 Pty Ltd in 1976.

For a short period from 1987, Garry and Kerry Hoar owned the property however a mortgage lapsed, and a power of sale was exercised in March 1981. The property was auctioned and subsequently sold to the highest bidder (undisclosed amount) after being passed in at the auction when bidding reached $360,000. Vlmay Pty Ltd purchased the site at that time. In 1988 Feluga Pty Ltd purchased the property.

During the 1980s, the hostel operated as a lodging house with low cost accommodation in regular rooms and the basement offered to backpackers. Bathrooms were converted to accommodation facilities with boards over the baths providing additional sleeping spaces.

The Young Women's Christian Association of Perth (Inc) purchased the property in 1992, with financial assistance from the Lotteries Commission. They proposed to provide budget accommodation for up to 80 people as well as a base for many of its support programs, thereby enabling an increase in the services offered to young men and women. It was also envisaged that the Grand Central YWCA the new name introduced by YWCA, would become City Safe House for people of all ages.

They commissioned Architects Bateman Groom & Jones to refurbish the building. The refurbishment involved an upgrade of the first and second floor accommodation rooms and bathroom facilities. The third floor was converted from a residential function to offices. A new kitchen block was constructed, and the dining room was refurbished. The Wellington Street ground floor rooms were altered and converted to a cafe. In September and October 1993, overseas delegates attending the 2nd World Congress on Art Deco 'Deco Down Under' stayed at the 'Hotel.'

The YWCA was unable to provide a viable return from the Palace and sold the property to Wintide (Australia) Pty Ptd in May 1995. Wintide (Australia) Pty Ltd subsequently commissioned Architects Woodhead Firth and Lee to refurbish the third floor which will increase the capacity of the place by converting the third floor from offices to accommodation. The building has been owned by Central City Pty Ltd since October 2007 and is now operating as Akara Hotel.

STATEMENT OF SIGNIFICANCE

The place is an example of a commercial building constructed during the period of economic affluence and increased development that followed the gold boom.
The place is a landmark when viewed from the northern side of the railway line because of its austere façade.
The place is an example of how Perth was transformed by the Art Deco movement.
The place reflects the way of life of the wealthier residents of Perth in the late nineteenth and early twentieth century.
The place reflects the expansion and development of commerce and trade in the City of Perth in the early years of the twentieth century.
The place is an example of the style of alcohol free hotel built for the Temperance Movement to provide accommodation.
The place was constructed at the time of the Gold Boom, a significant cultural and development phase in the history of the State, and a period of rapid development of Perth.
The place is one of Perth's last remaining coffee palaces which, although substantially changed, it is still being used for the purposes similar to the original.
The place is representative of the 1930s modernistation of buildings constructed during the Gold Boom period.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place is an example of the style of alcohol free hotel built for the Temperance Movement to provide accommodation.
The place was constructed at the time of the Gold boom, a significant cultural and development phase in the history of the State, and a period of rapid development of Perth.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The place is one of Perth's last remaining coffee palaces which, although substantially changed, it is still being used for the purposes similar to the original.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The place is an example of a commercial building constructed during the period of economic affluence and increased development that followed the gold boom.
The place reflects the way of life of the wealthier residents of Perth in the late nineteenth and early twentieth century.
The place reflects the expansion and development of commerce and trade in the City of Perth in the early years of the twentieth century.
The place is representative of the 1930s modernistation of buildings constructed during the Gold boom period.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place is a landmark when viewed from the northern side of the railway line because of its austere façade.
The place is an example of how Perth was transformed by the Art Deco movement.

HISTORY

Despite the fact that the area lacked the width to claim status as a true city square, Forrest Place was always one of Perth's most important civic squares.
In the early days fruit barrows and flower stalls added colour and atmosphere to what was a bustling Street.
During the Second World War Forrest Place was a recruiting centre and fund-raising post for the war effort.
Forrest Place is best remembered as a political forum which has resounded to the wit and repartee of some of Australia's most famous political figures. Leaders such as Menzies and Whitlam.
Historically the precinct has been used as a meeting place.

Physical Description	

Commercial Building, 553-561 Wellington Street comprises a two-storey corner commercial building, constructed of painted brick walls, painted render, painted stucco decorations, and corrugated roof sheeting. Internally it has timber floorboards and floor structure with modern stud work and plaster partitions. Some internal brick walls remain. External - Commercial Building, 553-561 Wellington Street has two street facades, one on Wellington Street and one on Queen Street. Each facade is of similar extent, however resolved with different detailing. The Wellington Street facade is divided into six bays by moulded pilasters. The bays correspond to the five shopfronts of the ground floor, except the Queen Street corner (No. 561), which is further vertically divided into two. The pilasters are moulded with Page 255 Page 11 Page 11 of 21 motifs including a five-pointed star, a rosette and a moulded panel. Between the pilasters the brickwork is tuck-pointed but has been painted over, while all traces of brickwork to the lower level have been lost. Each tuck-pointed bay includes a window with label moulds and a broken segmental arch vestigial aedicule (decorative mantle over window). Emphasis to the corner is given by the increased rhythm of the fenestration of the final two bays and by repeating the composition of moulded pilasters and windows on the narrow facade of the chamfered corner entrance.

The ground floor shopfronts have been considerably modified with no original shop fronts in situ. The shopfronts have been replaced with aluminium framed glazing. The former corner tenancy of No. 561 has what appear to be the original ground floor apertures of display windows, however the glazing and finishes are of recent construction. Its front door is a panelled timber door that has been modified with glazing and stripped of original finishes and hardware. The awning suspended above Nos. 553 - 561 (including the corner of Queen Street) is a modern steel awning with emphasis placed in the corner. The treatment of the facade of No. 561 is carried through into Queen Street with three pilasters framing two moulded windows and the awning at first floor level. However, the predominant character of the Queen Street facade starts from the end of No 561, although some elements and the parapet entablature of the Wellington Street facade is continued.

The first floor of the Queen Street facade is characterised by eight equally spaced double hung windows of similar size to those of Wellington Street but with a much-simplified moulding surrounding them. This equal

spacing continues the emphatic fenestration of the Queen Street corner (No. 561). The windows are set on a field of painted face brickwork from ground level to the entablature. Flush stucco banding at window-head levels provide a linear emphasis which counterpoints the more classical pilastered facade of Wellington Street and highlights the arches of the ground floor openings. The ground floor (other than No. 561) is characterised by the interspersing of wide and narrow arched openings along the Queen Street, each incorporated into a running stucco moulding. The tympanums (glazed arches) are imperfect semicircles in a non-classical style. The upper windows to both Queen and Wellington Street facades have all been replaced with black aluminium framed windows. The majority of windows are in the original openings incorporating a shallow arch window head and rendered keystone feature. The exception being the second window from the southern end of the elevation which has a square window head and no keystone. It is likely that the position of this window is original, but the opening has been altered over time.

The entrance is contained within the truncated corner elevation containing non-original aluminium framed glazed door and plain fanlight above. A further door is located in the Wellington Street section of this corner element, again containing non-original aluminium doors and windows. The ground level frontage incorporates arched former shop windows. The windows consist of three large panes with three highlights above contained within the arched section of the opening. All the original timber framed windows have been replaced with black aluminium framed units. Fabric canopies extend out over the door and window openings to two of the three former shops.

The metal roof is behind parapet walls to each street frontage and adjoining buildings. Internal - Internally, the place has been adapted to accommodate its most recent use as a backpacker's hostel. One of the former shops along Wellington Street has been converted into a laundrette for the hostel, whilst other former shops serve as recreation spaces. Evidence of the original plan form exists to the upper level with some passages indicated as original by the remnant stop chamfered arches. Despite this, much has been altered to accommodate wider corridors and door openings to meet BCA requirements.

Some of the room layouts have also changed to accommodate access to the bathrooms. The bathrooms are located in the core of the Wellington Street wing with rooms to either side looking over Wellington Street and the rear courtyard area. The external walkway extends across the rear of the two wings with an external staircase leading to the courtyard area. At ground level the plan form has been altered over time with the former separate tenancy spaces being adapted and amalgamated to accommodate the most recent function.

The bedrooms comprise plastered and painted walls, plaster board ceilings and simple cornices. The floors are carpeted with a shallow timber skirting. Many openings have lost their early doors and are now bare openings. Other original doors have been replaced with fire rated flushed panel doors, while others have been boarded up.

The stairwell is located in the original location however the balustrade has been replaced with a mid 20th century timber structure and it is understood that the upper flight of stairs has been replaced entirely.

HISTORY

Commercial Building, 553 - 561 Wellington Street (1897), formerly Regent House and Hassell's Buildings, also known as Regent House, is located on the corner of Wellington and Queen Streets, Perth. This land was originally granted to Joseph Ellis on 24 November 1840.1 The existing building occupies the north-west corner of the block bounded by William, Murray, Queen and Wellington Streets, in the CBD of the City of Perth. As was the case with Commercial Building, 553 - 561 Wellington Street, documentary evidence indicates that the much of the building stock on this block was developed between the late 19th century and the late 1920s.2

Following the completion of the Fremantle to Guildford railway in 1881 and the discovery of gold in the next decade, leading to a rapid growth in the population of Western Australia, there was a large increase in building activity in the City centre. In the City, the Central Railway Station in Wellington Street acted as a focus for intensive redevelopment along the north-south axis between William and Barrack Streets. Retail consolidated in

this area, with emporia on the tram route in Hay Street or, in the case of Boans, opposite the Central Railway Station. Warehousing relocated from near the riverside to the King Street area to be closer to the railway marshalling yards and freight facilities.[3]

With the siting of a tram route that ran from Hay Street along William Street into North Perth, William Street developed as a retail and small-scale service precinct as did the portion of Murray Street in this vicinity. Large hotels were also located in prominent positions, such as the Royal Hotel on the corner of William and Wellington Streets and the Hotel Wentworth of the corner of Murray and William Streets. Wellington and Queen Streets both had a large number of produce merchants, importers, manufacturer's agents, and warehousing facilities, no doubt attracted by the close proximity of the City Produce Markets and rail freight yards on the north side of Wellington Street. There were also a number of small to medium manufacturing operations in this area as well as a number of small cafes, restaurants and wine saloons.[4]

The University of Western Australia received a bequest comprising much of the property within the block bounded by William, Murray, Queen and Wellington Streets in the late 1950s.

In the 1980s, this endowment land on the eastern, southern and central portions of the street block was developed to establish Raine Square, as a plaza surrounded by commercial tenancies. [5] This redevelopment of the area involved the retention of most of the existing structures with William and Murray Street frontages, the removal of large parts of the central area and some of the buildings fronting Wellington Street, as well as the connection of the site to the bus and railway stations to the north via pedestrian ways and a footbridge. The buildings in Queen Street, including Commercial Building, 553 - 561 Wellington Street, were not included in these developments.

The land on which Commercial Building, 553 - 561 Wellington Street is now situated, Lots 17 and 18 of Block V24, was first built on in the late 1880s. According to Rate Book entries, this land was owned by W.J. Avery and Co. in this period.[6]

In 1887, on the Queen Street portion of the land there were three cottages occupied by a painter, an engineer and agents. The Wellington Street portion of the land was vacant ground at this time.[7] On 8 February 1892 title to Lots 17 and 18 was transferred to David William Harwood, a farmer and grazier. It appears that around this time, Queen Street came into official existence.[8]

By 1896, a number of cottages had been constructed on Queen Street part of the land, occupied by a tailor, a carpenter, two millers, a police constable, two labourers, a widow, a hotel keeper, an engineer and a clerk.[9] On 3 April 1897, title to this land was transferred to William Hooper and John Maxwell Drummond, 'gentlemen', as tenants–incommon.[10] Also in 1897, the construction of a new building on the site is recorded, that would later become known as Regent House, Hassell's Buildings and Commercial Building, 553 - 561 Wellington Street.[11]

While the cottages in Queen Street were again listed in the rate book entries, in addition there were recorded two offices in Queen Street, occupied by commercial agents. It seems likely that at least some of the cottages were demolished to make way for Commercial Building, 553 - 561 Wellington Street. [12] On this block, in Wellington Street, were three shops and offices, with one occupied by the owner, S.B. Shanks, agents; a restaurant situated in another of the shops; and J.J. Green, merchants, in another of the premises. The Rate Book also records a house on this portion of Wellington Street, leased for the use of a painter, and for a boarding house.[13]

For Queen Street, in 1898, Mrs Mary Eley resided at No 36, Miss Webley at No 38, and Anthony Heibernik, White and Co., produce merchants, and Wilcock and Co. carrying agents, at No 40. In 1900, D.C. Manolas is listed at No 36, Mrs E.J. Campbell at No 38, and Frank Russell at No 40. No entries for Commercial Building, 553 - 561 Wellington Street in Queen Street appear in the Post Office Directories after this date, until the early part of the 1940s when Regent House (Apartments) is listed at No 42 Queen Street.[14]

In 1904, three undivided sixteenth shares in the property were transferred to Alfred Earl Burt, with the remaining thirteen sixteenth shares held by William Hooper and John Maxwell Drummond.[15] On 15 March 1926, Bernado Molinari acquired the title to Commercial Building, 553 - 561 Wellington Street from Burt, Hooper and Drummond.[16]

As in the late 19th century, Commercial Building, 553 - 561 Wellington Street and the surrounding properties continued to house a variety of commercial and residential tenants. Wellington and Queen Streets both had a large number of produce merchants, importers, manufacturer's agents, and warehousing facilities. There were also a number of small to medium manufacturing operations in this area as well as a number of small cafes, restaurants and wine saloons.[17]

For the Wellington Street frontages to this property, early Post Office Directory listings record a fruiterer and a confectioner in 1900 and in 1905 a 'coffee palace' and a produce merchant.[18] In entries for Nos 553-555 Wellington Street, in 1910 and 1915 the occupier was Yukichi Kawajiri, fruiterer, in 1920 no listing, in 1925, there was M. George, bootmaker; and D. Papalazarus, coffee house, at No 553, and S. Johnson, hairdresser and

tobacconist, at No 555.[19] Nos 553-555 Wellington Street was occupied by Molinari Wine Saloon in 1930, 1934-35, and 1940- 41.
In 1945, Nicholas Rizos had a wine saloon at No 553, while in 1949, there was a wine saloon run by J. Maffescoini. Live Savers (Australasia) Pty Ltd, confectioners, were at No 555 in 1945, while in 1949 there was WA Amplifiers, radio apparatus manufacturers.[20] WA Amplifiers continued to occupy No 555 until around 1956.[21]
For Nos 557-559 Wellington Street, in 1910 and 1915 there was G. Gettaz, wine saloon, in 1920 no listing, and in 1925, Molinari Wine Saloon and Restaurant.[22] Located at Nos 557- 559, in 1930 and 1934-35 was Molinari Restaurant. For 1940- 41, Miss Minnie Waugh ran a café at No 557, in 1945 Demetreus Georgaidis' restaurant and café was at this address, and in 1949, Myra May's restaurant operated here. Hassell's Hardware Store, ironmongers, was at No 559 in 1940-41, 1945, and 1949.[23] Hassell's Hardware continued to occupy No 559 until around 1985.[24]
At No 561 Wellington Street, in 1915 was found Cornelius O'Brien, bootmaker, in 1920, no listing, and in 1925, T. Morris, produce merchant.[25] T. Morris continued to occupy No 561 in 1930, while the premises were vacant in 1934-35. For 1940-41, 1945 and 1949, at Nos 559 and 561 was WA Stove Co., stove makers.[26] The WA Stove Co. continued to occupy premises at Commercial Building, 553 - 561 Wellington Street until around 1992.[27]
In October 1950, a fire swept through the upper floor of the building causing the roof to collapse. At the time the building was described as a lodging house. The local press noted that the roof had collapsed but that most of the damage was confined to the first floor and could be rebuilt. The ground floor tenancies suffered water damage only.
Commercial Building, 553 - 561 Wellington Street was transferred to James Francis Hassell on 10 July 1959.[28] With the death of James Francis Hassell on 28 September 1984, Alice Mary Hassell became the owner of this property.[29]
With the death of Alice Mary Hassell on 26 March 1997, title to the property was transferred temporarily to James Paul Lilleyman and Patricia Ann Lilleyman, her executors.[30]
On 24 December 1997, the land was transferred from the Lilleymans as a bequest to the Roman Catholic Archbishop of Perth, the present owner of this property.[31] This bequest was carried out in accordance with the will of Alice Mary Hassell which directs that it 'be used for the completion of the construction of St Mary's Cathedral, Perth.[32]
In May 2001, Commercial Building, 553 – 561 Wellington Street was the subject of a development application to the City of Perth, which approved demolition of the building provided the façade was retained.
This development did not take place and the property was subsequently offered for sale. The new owners resolved to convert the property to a backpacker's hostel and under the guidelines provided by City of Perth, undertook internal works to adapt the building for this purpose. A significant part of the adaption involved the removal of many of the original fittings, fixtures and room layouts in order to meet BCA requirements. Consequently, the hallways were widened, ceilings removed, the original staircase removed, some of the floor levels changed and many of the internal walls were relocated. Air-conditioning units were installed for all the rooms and skylights introduced in the public spaces. All of the original windows and doors were removed with the exception of a few fixed fanlights on the ground level facing Queen Street. The courtyard space has seen the addition of a swimming pool and new stairs to the first floor.
A pool was installed into the courtyard to the rear of between 2003 and 2004.
As a result of the redevelopment of Raine Square in 2011, a car parking complex was constructed directly to the east of Commercial Building, 553 – 561 Wellington Street.
By 2015, the majority of the original lathe and plaster walls had been removed. Commercial Building, 553 – 561 Wellington Street continues to be for budget accommodation.

STATEMENT OF SIGNIFICANCE

The place is designed as a corner building, employing simple and distinct ornamental devices to produce a rhythm in the streetscape that contribute to the aesthetic qualities of Queen and Wellington Street.
The place is one of the remnant late nineteenth century buildings that contributes to the character of the south side of the Wellington Street between Barrack and Milligan Streets, Perth which relate to this period of economic prosperity in the state.
The place is evidence of development of the commercial district in this part of Perth CBD which related to the markets, railway station and marshalling yards.
The place's form demonstrates the mixed uses of commercial and living accommodation typical of inner city two storey late nineteenth century commercial buildings.

HISTORY

The building has long associations with West Australian Farmers. The rural industry, and more specifically, Westfarmers, influenced the nature and development of primary industry in the state, and hence of the state economy.
Many West Australians most prominent businessmen and politicians have been members of the agricultural co-operative movement. Walter Harper, Hon. TH Bath CBE, Basil Murray, John Thompson and Sir Thorley Loton all served at the Wellington Street premises.
Original home of 6WF the first radio station in the State in 1924.
Until the 1880's the town centre was characterised by the establishment of small cottages, shops and small businesses and was rural in character. The expansion of commerce following the discovery of gold in the 1890's put pressure on land in the centre of Perth with the result that most residential uses were displaced in favour of commercial development. The centre of Perth was substantially rebuilt during the 1890's and early 1900s.

The period of expansion in Perth coincided with a period of economic depression in the eastern states, in particular Victoria. As a result, there was substantial migration from Victoria to WA. This migration included businessmen, architects and builders, all of whom had a considerable influence on the development of the city. Example of a commercial building constructed in Perth during the period of expansion and development that followed the gold rush of the 1890's.

3. Developing Perth's (Local, Regional & National) Economies - 3.18.4 Cooperating to raise capital (co-ops, building societies, etc.)
3. Developing Perth's (Local, Regional & National) Economies - 3.20.2 Broadcasting
4. Building Perth (Settlements & Cities) - 4.1.4 Creating capital cities
4. Building Perth (Settlements & Cities) - 4.6 Remembering significant phases in the development of settlements, towns and cities
8. Developing Perth's Cultural Life - 8.10 Pursuing excellence in the arts & sciences
8. Developing Perth's Cultural Life - 8.10.4 Designing and building fine buildings

STATEMENT OF SIGNIFICANCE

The place is a particularly fine and rare example of the Federation Warehouse style architecture in Perth.
The place is a dominant visual element in the Wellington Street streetscape to the west of the William Street intersection. The articulation of the façade sets the pattern for adjacent structures, such as the Wills building.
The place was the long time administrative centre for the agricultural co-operative movement in Western Australia and a physical representation of Wesfarmers' achievements in the primary industry sector. Its urban location has contributed to the Western Australian community's awareness of the significance of the agricultural industry in the state's economy.
A number of Western Australia's most prominent businessmen and politicians have been members of the Wesfarmers agricultural cooperative. Walter Harper, Hon. T. H. Bath C.B.E., Basil Murray, John Thomson and Sir Thorley Loton, all served as prominent board members and employees at the Wellington Street premises.
The place was designed by, and is a fine example of the work of, prominent turn of the century architect and soldier, Sir J. J. Talbot Hobbs.
The place is important for its structural system of cast iron columns, with the capitals used both to decorate and to support the beams and the complementing corbel brackets at the walls. This combination of function and decoration is rare.
The place is associated with Wesfarmers' establishment in 1924 of 6WF, Perth's first radio station. The station operated and transmitted from the top storey of the Wellington Street premises. 6WF was the first broadcasting service in Western Australia and initially transmitted primary industry prices to rural farmers. Entertainment later complemented this early emphasis on rural programming. 6WF was sold in 1928 to the Australian Broadcasting Company, now known as the Australian Broadcasting Corporation.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place was the long time administrative centre for the agricultural co-operative movement in Western Australia and a physical representation of Wesfarmers' achievements in the primary industry sector. Its urban location has contributed to the Western Australian community's awareness of the significance of the agricultural industry in the state's economy.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The place is important for its structural system of cast iron columns, with the capitals used both to decorate and to support the beams and the complementing corbel brackets at the walls. This combination of function and decoration is rare.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place is a particularly fine and rare example of the Federation Warehouse style architecture in Perth.
The place is a dominant visual element in the Wellington Street streetscape to the west of the William Street intersection. The articulation of the façade sets the pattern for adjacent structures, such as the Wills building.
The place was designed by, and is a fine example of the work of, prominent turn of the century architect and soldier, Sir J. J. Talbot Hobbs.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

A number of Western Australia's most prominent businessmen and politicians have been members of the Wesfarmers agricultural cooperative. Walter Harper, Hon. T. H. Bath C.B.E., Basil Murray, John Thomson and Sir Thorley Loton, all served as prominent board members and employees at the Wellington Street premises.

Archaeology	
Physical Description	

Perth Entertainment Centre was a prominent, multi-storey structure with a circular plan form and sloping walls clad with wide profile ribbed sheeting. The free-standing building sat on level paving between Wellington Street and the railway line and had little surrounding development which contributed to the landmark value of the place.
A tall rectangular form housing the fly tower was visible at the rear of the building adjacent to the railway reserve. The sloping walls of the cladding hovered above ground level with glazed entrance doors providing access from the surrounding paved piazza to the interior foyer spaces around the south-east quadrant of the building. The cladding was not continuous through the height of the building, with a recessed horizontal void partially encircling the mid-level providing light and emergency egress from the upper level foyers surrounding the internal auditorium.
The site is adjacent to the Perth Arena, located on the former carpark of 'Perth Entertainment Centre', and forms part of the Perth City Link Project Area.

HISTORY

Perth Entertainment Centre opened in December 1974. Constructed as a multi-purpose entertainment venue with approximately 8000 seats, the place hosted a range of events and international artists, including theatrical extravaganzas, musicals, rock concerts, sporting tournaments, circuses and more recently was home to the Perth Wildcats basketball team.
Initially owned by Channel 7 and associated with theatrical entrepreneur, Michael Edgley, the place was bought by the State Government in 1976 and remained in use until c. 2002.From 2002 the place was unoccupied until its demolition in 2011 to enable redevelopment of the site into the 'Kings Square' commercial and residential precinct by Channel 7.

HISTORY

Built in 1906, this building originally housed offices and a store for W.J Cotton grocers & produce merchants.
In 1890 Western Australia achieved responsible government. This, combined with the discovery of gold in the early 1890's, provided the catalyst for development in Perth.
King Street was gazetted in 1845 and named after King William IV.
Prior to the 1890's the area around King Street was characterised by workers' cottages with shops, coal yards, smithies and foundries located in the adjacent areas of Murray and Hay Street. In the mid 1890's some smaller businesses began to establish themselves in existing cottages and a number of larger enterprises erected substantial new offices and warehouses in the area. Earlier uses primarily served the local population, however this later development was more broadly based and was a direct response to the expansion of the city centre during the gold rush.
The period from the 1890's to early decades of the twentieth century was characterised by a vigorous public works and corresponding expansion of commerce and trade. During this period, the character of the area around King Street was established. This area has recently (1990's) undergone a substantial program of restoration and is now characterised by new uses including cafes, boutiques and professional offices.
Example of a commercial building constructed in Perth during the period of expansion and development that followed the gold rush of the 1890's.

HISTORY

In 1890 Western Australia achieved responsible government. This, combined with the discovery of gold in the early 1890s, provided the catalyst for development in Perth. King Street was gazetted in 1845 and named after King William IV. Prior to the 1890s the area around King Street was characterised by workers' cottages with shops, coal yards, smithies and foundries located in the adjacent areas of Murray and Hay Street. In the mid 1890s some smaller businesses began to establish themselves in existing cottages and a number of larger enterprises erected substantial new offices and warehouses in the area. Earlier uses primarily served the local population, however this later development was more broadly based and was a direct response to the expansion of the city centre during the gold rush. The period from the late 1890s to early decades of the twentieth century was characterised by a vigorous public works and corresponding expansion of commerce and trade. During this period, the character of the area around King Street was established. In the 1990s, King underwent a substantial program of restoration and is now characterised by new uses including cafes, boutiques and professional offices. In 1992, the State Government decided to develop inner city housing. Work on a multistorey building at 601 Wellington Street was designed as housing for Homeswest and completed by 1995. The building won a Royal Australian Institute of Architects commendation in 1995. The adjacent No. 605 was restored to be the Homeswest office (P2146 Railways Institute Building fmr).

STATEMENT OF SIGNIFICANCE

The place has historical significance as an example of inner city residential architecture dating from the 1990s. It has social significance as a Homeswest housing project in the Perth City area and reflects changes in government policy.
The building was awarded a Royal Australian Institute of Architects commendation in 1995.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place has historical significance as an example of inner city residential architecture dating from the 1990s.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

It has social significance as a Homeswest housing project in the Perth City area, and reflects changes in government policy.

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

The building was awarded a Royal Australian Institute of Architects commendation in 1995.

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Good
Building Fabric Authenticity	High.

CLASSIFICATION OF SIGNIFICANCE

Some/moderate – Category 3 - Contributes to the heritage of the locality.

HISTORY

In 1890 Western Australia achieved responsible government. This, combined with the discovery of gold in the early 1890s, provided the catalyst for development in Perth. Some smaller businesses began to establish themselves in existing cottages and a number of larger enterprises erected substantial new offices and warehouses. Earlier uses primarily served the local population, however this later development was more broadly based and was a direct response to the expansion of the city centre during the gold rush. The period from the late 1890s to early decades of the twentieth century was characterised by a vigorous public works and corresponding expansion of commerce and trade. During this period, the character of the Wellington Street was established. Part of Shafto Lane used to be called Barratt's Lane, and in the early 1900s the building was a lime merchants, later given the number 631. In 1908, the building was occupied by D. J. Fowler Ltd, wholesale grocers. The company had businesses at Fremantle, Kalgoorlie, Adelaide, Broken Hill and London. In c. 1915-1949 H. J. Wigmore and Co., machinery and product merchants occupied No. 613 as their registered office. Farmers' Mercantile Union and Chaff Mills was in No. 619 in 1915, but by 1920 Wigmores occupied Nos. 613-619. In c. 1970, the place was a nightclub called The Florideta. It was taken over in 1972 by John (Gobbles) Golding and became Gobbles nightclub. It then had a couple of other owners before being purchased by Bob Maher in 1979, who was proprietor until 1998. It was then sold to Abe Saffron, a well-known entrepreneur and Sydney based businessman who owned properties in Perth including the Raffles hotel in Applecross. In 2022 there is a 'Gobbles Nightclub' Facebook page. Employees and patrons regard the place as Perth institution.

HISTORY

In 1890 Western Australia achieved responsible government. This, combined with the discovery of gold in the early 1890s, provided the catalyst for development in Perth. Some smaller businesses began to establish themselves in existing cottages and a number of larger enterprises erected substantial new offices and warehouses. Earlier uses primarily served the local population, however this later development was more broadly based and was a direct response to the expansion of the city centre during the gold rush. The period from the late 1890s to early decades of the twentieth century was characterised by a vigorous public works and corresponding expansion of commerce and trade. During this period, the character of the Wellington Street was established. The telephone came to Western Australia in 1887, with the first manual exchange opening in a three-room cottage in Wellington Street with 12 subscribers. The first automatic dial telephone exchange was built at 410 Murray Street in 1912. When it opened it was the biggest exchange of its kind in Australia. It continued as Perth's automatic telephone exchange right up until 1987. Meanwhile the new Telephone Exchange Building was constructed to the north of the original facing Wellington Street in c. 1975. It is believed to have been built to withstand nuclear attack.

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
The Metropolitan Water Supply Survey plan (1953) shows the corner lot of Wellington and Coolgardie as vacant, and that Coolgardie Street was marked for widening. Aerial photos show that between 1953 and 1965 this had occurred and all houses along Coolgardie Street has been demolished. Thrimby House was built in this period. It is typical of the Post War International style of architecture, with a cubiform shape, strong horizontal structural frames expressed, the use of stone as a contrasting feature, the external sun-control device in the form of the steel vertical window louvres on the east side, and the horizontal louvres on the north side. In 1983 the building was the National Bank of Australia. (See State Library of WA photo 312195PD). In 1995 the property was owned by Thrimby Pty Ltd, whose name is above the entrance on Coolgardie Street. At 2022 the building is occupied by an accounting firm.

HISTORY

The street number first appeared in the Post Office Directory in 1921, and it is presumed that the building was probably constructed around this time. Building developed as a result, of commercial expansion in the Inter-War period. From 1921 George Walsh, a cooper, established a business which made casks for hops and ginger beer and for pickling.
In 1947 the agricultural distributer Tropical Traders & Patersons Ltd was located at the place. Newspaper advertisements during the 1940s and 1950s showed agricultural products and machinery. The business also had offices in the South West.
The building was later converted for office use.

Physical Description	

885 and 887 Wellington Street are a pair of two-storey painted brick terraces, with a pedimented parapet above a two-storey verandah with cast iron lacework balustrade and frieze.
The side parapet walls and central fire wall between the terrace units have decorative mouldings at first floor and verandah roof level. The ball mouldings on top of verandah parapets are repeated in a larger form on main parapet. A construction date of '1903' is stated in the central bay of the frieze below the triangular pediment. The pediment is decorated with shield (cartouche) and swag. The verandah roofs are corrugated Colorbond in an ovolo form and have turned timber posts at the centre of each bay.
A rendered brick retaining wall lines the street with tiled concrete steps ascending to the front verandah of each terrace.
All windows are timber double-hung sashes, with those at the ground floor having 6 small coloured glass panes at the top of the top sash. The ground floor doors are timber panelled with 9 small glazed panels and 2 larger panels in the top section. They also have fanlights, one of which has retained its original ornate leadlight. The first floor windows are plain double-hung sashes and there are multi-pane French doors accessing the verandah with ornate leadlight highlights.
There are a number of other terrace houses extant further to the west along Wellington Street

HISTORY

A PWD block plan of 1897 shows numerous residences in the west Perth area including many terrace houses opposite the future location of 885-887 Wellington Street. The block bounded by Wellington, Havelock, Murray and Gordon Streets show very little development. A laneway is marked running from Wellington and then turning east-west centrally through the block. This indicates the alignment of the western boundary of 887 Wellington Street.

Although the building was constructed in 1903, there are no entries in Post Office Directories until 1907, when a George Freer is occupant at 887 Wellington. In 1908, James J Ballinger was occupant at 887 and a Mrs Burnett in 885. In 1913, occupants included Frank A Stratton in 885 and Archibald Hamilton in 887. In 1920, Arthur T Downie was occupant in 885 and Thomas Gough in 887. In 1926, Mrs Mary Anne Beale was occupant in 885 and Edward Hull in 887. The constant change of occupants, illustrated by the few years examined above, indicates it may have been constructed and retained as an investment for residential leasing.
A sewerage plan dated 1943 to1953 shows the outline of 885 and 887 Wellington Street including a wall at the front boundary and steps up to a verandah of each residence. The plan also shows the buildings have a narrow rear wing on the common boundary, each with galvanised iron structures attached to the rear and water closets in the centre of the rear yard. A large portion of the rear yard adjoining the side and rear boundaries is taken up by a brick structure labelled 'Clarkson's Store'. Clarkson's is noted as the building immediately to the east of 885 Wellington Street.
City of Perth records indicate it was substantially restored in 2004.

WESTERN AUSTRALIAN HISTORIC THEME

HISTORY

The establishment of parks was closely linked to wealth with the result that Perth did not begin to develop comprehensive system of parks until after the goldrushes of the 1890's.
Public debate on the lack of park land in Perth was voiced in editorials in the newspapers between 1875 and 1886. The provision of a network of parklands in central Perth and around the river were the themes central to these concerns.

A garden has been located on the place since c1898-1901 when the first garden was laid out by the City of Perth, designed by gardener John Braithwaite. At that time, it was called Delhi Square. The design included extensive grassed areas, a central garden bed, trees and radial paths. In 1914 the external fence was removed from this park, as well as many others in the city.
The current form of the garden was designed in 1975-1976 designed by Peter Cala and Marion Blackwell in the Paradise Garden style. The redesigned garden was renamed Harold Boas Gardens. Mature trees were retained, and the landscaping included hills and water features. Many new trees and shrubs were planted which suited the new environment, some were uncommon at the time and were grown specifically for the garden.
In 1976 the garden was renamed Harold Boas Gardens to commemorate the service of former Perth City Councillor Harold Boas.

WESTERN AUSTRALIAN HISTORIC THEME

4. Building Perth's (settlements & cities) - 405 Sport, recreation and entertainment
4. Building Perth's (settlements & cities) - 409 Environmental awareness
6. People - 603 Local heroes & battlers
6. People - 605 Famous & infamous people

AUSTRALIAN HISTORIC THEME

4. Building Perth (Settlements & Cities) - 4.1.4 Creating capital cities
8. Developing Perth's Cultural Life - 8.1.3 Developing public parks & gardens

STATEMENT OF SIGNIFICANCE

The place is an excellent and rare example of the Paradise Garden style designed landscape, containing some early tree plantings, and overlaid with the informal planning of the present gardens that includes lakes, a waterfall, cascade, footbridges, and plantings of predominantly exotic trees, shrubs and ground covers.
The place is an important example of creative landscape design, significant for its innovation and achievement in the 1970s, which introduced a number of new species into public gardens in this State, some among them being among the first such use in public gardens in Australia, and some specifically for this project being propagated for the first time from seed or cuttings of indigenous plants collected in various regions of Australia.
The place commemorates the notable contribution of prominent architect and town planner Harold Boas to the City of Perth as a Perth City Councillor (1914-16, 1926-42, 1944), and in particular his influential role in assuring the inclusion of public parks and gardens in the development of town planning for the city.
The place is a good example of a work designed by Landscape Architect Peter Cala and Ecologist/Landscape Architect Marion Blackwell, of Blackwell & Cala.
The place is highly valued by the community as a well-used photographic backdrop and a landscape landmark.
The place is important for its contribution as a teaching site, used by tertiary institutions and as a reference site.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place commemorates the notable contribution of prominent architect and town planner Harold Boas to the City of Perth as a Perth City Councillor (1914-16, 1926-42, 1944), and in particular his influential role in assuring the inclusion of public parks and gardens in the development of town planning for the city.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

The place is important for its contribution as a teaching site, used by tertiary institutions and as a reference site.

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
The row of terraced houses was first listed in the post office directory in 1899, as Nos. 855-859 in 1902. Numbering changing to 935-939 in 1908. The first occupants were W. E. Ottaway (935), David Keay (837) and J. M. Rogers (839).
The storey row of three two-storey terraces are made of rendered brick with quoining to door and window openings. The corrugated iron roof has party walls and corbelled chimneys. The two storey verandahs are under the main roof with timber posts and decorative wrought iron balustrades and friezes.

The row of terraced houses were first listed in the post office directory in 1899, as Nos. 855-859 in 1902. Numbering changing to 935-939 in 1908. The first occupants were W. E. Ottaway (935), David Keay (837) and J. M. Rogers (839).The storey row of three two-storey terraces are made of rendered brick with quoining to door and window openings. The corrugated iron roof has party walls and corbelled chimneys. The two storey verandahs are under the main roof with timber posts and decorative wrought iron balustrades and friezes.

8. Developing Perth (Australia's) Cultural Life - 8.12 Living in and around Australian homes

STATEMENT OF SIGNIFICANCE

The places have historical significance as an example of a row of two-storey terrace buildings dating from a period around the turn of the century.
The increasing affluence of the community following the gold boom is reflected in the increased use of decoration which is typical of the Federation Filigree style of architecture.
The terraces represent the way of life of the working people of Perth in the late nineteenth and early twentieth century and are an example of residences in West Perth that have undergone a change of use to commercial/professional offices with the changing character and growth of the City.
The Terraces have rarity value as one of the few two-storey residential terrace buildings in Perth.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The places have historical significance as an example of a row of two-storey terrace buildings dating from a period around the turn of the century.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The Terraces have rarity value as one of the few two-storey residential terrace buildings in Perth.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

The terraces represent the way of life of the working people of Perth in the late nineteenth and early twentieth century.

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

They are an example of residences in West Perth that have undergone a change of use to commercial/professional offices with the changing character and growth of the City.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
The row of terraced houses were first listed in the post office directory in 1899, as Nos. 855-859 in 1902. Numbering changing to 935-939 in 1908. The first occupants were W. E. Ottaway (935), David Keay (837) and J. M. Rogers (839).

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway. In 1928 the post office directory lists the house at 941 Wellington Street as a new building. The first occupant was Mrs Thompson.
The Metropolitan Water Supply Survey plan (1953) shows the house is set back further from the street than the rest of houses along this block, another indication of it being a later style. Aerial photos show it has not changed a great deal apart from the rear garden being cleared for car parking space in the early 1980s. At 2022 the former house is an office.

The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway. The property at No. 955 Wellington Street was originally a semi-detached, built c. 1899 with the Nos. 873-875. Numbering changed in 1908 to 953-955. The Metropolitan Water Supply Survey plan (1953) shows a mirrored pair. Aerial photos show that c. 1970 the double hipped roof was replaced and from the street, the former houses now appear as one, apart from there being two entrance doors. The central steps from the street remain extant. At 2022 the property is used as a medical consulting rooms.

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
Post Office directories show that up to 1903 there no houses built in the block between Colin and Outram Street along this part of Wellington Street. The first houses were listed in 1904. No. 975 was listed in 1904, originally No. 889, then No. 891 in 1907. It had the same occupant from 1905-1908: Peter C. McKenzie. The street was renumbered in 1908 to today’s numbering. The Metropolitan Water Supply Survey plan (1953) shows No. 973 and 975 as having a similar in footprint, with a projecting bay to the east side, and a half-length verandah with stairs to the verandah running in parallel to the street.
Aerial photos show the two houses have become adjoined, and at 2022 have one owner, with a street address of No. 973. The view from the street shows that the front verandah of No. 973 has been enclosed.

HISTORY

Demolished 1965. West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system. The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway. The Metropolitan Water Supply Survey plan (1953) shows No. 987 as very similar to those either side and most of the rest of that block. It was probably built in the first decade of the 1900s. Aerial photos show the house was demolished between 1965 and 1970 and replaced with the current commercial building.

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system. The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
Post Office directories show that up to 1903 there no houses built in the block between Colin and Outram Street along this part of Wellington Street. The first houses were listed in 1904. Numbering of houses area changed, and so did occupants, so it is difficult to confirm the exact date of construction of the house at No. 989 through the post office directory. However, the row of five houses (985, 987, 989, 991 and 993) date from 1903 to 1908, and are all similar in a style of architecture (Federation Queen Anne), all with central curved steps leading from the front verandah to the street. The listed resident of No. 989 in 1908 was Mrs Helen Yde.
The Metropolitan Water Supply Survey plan (1953) shows No. 989 with two projecting bays either side of the central door. From aerial photos and the contemporary street view, it is clear that the roof line has not changed from the original hipped roof and double gable with the separate dropped verandah roof. The roof has two tall,

corbelled chimneys. The street façade is symmetrical with three sash windows on each bay and a central door with top and side lights. The verandah under a separate corrugated iron roof has metal posts and balustrade (not original).
A real estate advertisement from 2021 shows that the house retains some original features such as timber skirtings, hallway arches, high ceilings and fireplace surrounds. At 2022 the former house is used for offices.

WESTERN AUSTRALIAN HISTORIC THEME

STATEMENT OF SIGNIFICANCE

The place has historic and aesthetic significance as a Federation Queen Anne residential building dating from the first decade of the 1900s.
It represents the changing character of the Perth community from the post gold rush settlement period to the present; in particular of a residential property in West Perth that has undergone a change of use to commercial/professional offices.
As one of three surviving houses together, the place makes a positive contribution to the streetscape.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place has historic significance as a Federation Queen Anne residential building dating from the first decade of the 1900s.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

As one of three surviving houses together, the place makes a positive contribution to the streetscape.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

It represents the changing character of the Perth community from the post gold rush settlement period to the present.

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

It represents in particular of a residential property in West Perth that has undergone a change of use to commercial/professional offices.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place has aesthetic significance as a Federation Queen Anne residential building dating from the first decade of the 1900s.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Good
Building Fabric Authenticity	Original in form but has lost original detail. Medium.

CLASSIFICATION OF SIGNIFICANCE

Considerable – Category 2 - Very important to the heritage of the locality.

No. 991 was first listed in 1909, with the resident as Frederick Pearse, insurance agent.
The Metropolitan Water Supply Survey plan (1953) shows No. 991 with a full length front verandah and from aerial photos and the contemporary street view, it is clear that the roof line has not changed from the original

hipped roof with central gable and a separate verandah roof. The house has a half-timbered central gable and a recent (2017/18) corrugated steel roof (Colorbond) and tall face brick, corbelled chimneys. It has a symmetrical facade with pairs of sash windows either side of a central door with top and side lights. The verandah under a separate roof has timber frieze, posts and balustrade (not original).
At 2022 the former house is used for medical consulting rooms.

The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
Post Office directories show that up to 1903 there no houses built in the block between Colin and Outram Street along this part of Wellington Street. The first houses were listed in 1904. Numbering of houses area changed, and so did occupants, so it is difficult to confirm the exact date of construction of the house at No. 989 through the post office directory. However, the row of five houses (985, 987, 989, 991 and 993) date from 1903 to 1908, and are all similar in a style of architecture (Federation Queen Anne), all with central curved steps leading from the front verandah to the street. The listed resident of No. 993 in 1908 was Charles Long.
The Metropolitan Water Supply Survey plan (1953) shows No. 993 as a larger house than the rest of the row, with a projecting bay on the west side. From aerial photos and the contemporary street view, it is clear that the roof line has not changed. The house has a hipped corrugated steel roof (Colorbond) and tall corbelled

chimneys. It has an asymmetrical facade with a side gable over a projecting bay, sash windows and a verandah under a separate roof has timber frieze, posts and balustrade (not original).
A real estate advertisement (undated, c 2021) shows that the house retains some original features such as timber skirtings, hallway arches, high, decorative moulded ceilings and fireplace surrounds. At 2022 the former house is used for offices.

HISTORY

Demolished 1995. There were originally four properties on the location: A semi-detached pair (Nos. 1010-1012) built before 1910, and two houses (1014 and 1018) built between 1910 to 1915. The semi-detached houses were demolished in the 1970s.
No. 1018 was demolished between 1985 and 1995; and No. 1014 was demolished between 1995 and 2000.
The new building was constructed 2002/03.

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system. The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
Post Office directories show that the house was built c. 1904, first listed in 1905 and allocated a street number (No. 929) which changed to No. in 1908. The house was first occupied by Mrs Janet Britnall. The Metropolitan Water Supply Survey plan (1953) shows the house has an asymmetrical frontage, with a projecting bay on each side, the western side projecting closer to the street than the other. Aerial photos and street views show that a two storey rear addition was built in c. 1980. From the street there are two tall brick corbelled chimneys visible, and the gabled roof has timber detail (not original). The front verandah also has a non-original filigree balustrade not in-keeping with the style. At 2022 the former house is used as medical consulting rooms.

HISTORY

West Perth developed as suburban residential area in the late 1890's. From its inception it had the characteristics of a quality neighbourhood, proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location which provided healthy site drainage as well as cooling breezes and views over the city and hills.
The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system. The area was subdivided into large residential lots for development and proceed accordingly. Less prestigious areas also developed in lower parts of the area and adjacent to the railway.
The homes built in West Perth from the early 1900's included prestigious mansions built in prominent locations and smaller working-class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
There were many residents who lived at the property during the first half of the twentieth century.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement & mobility - 107 Settlements
3. Occupations - 306 Domestic activities
3. Occupations - 308 Commercial services & industries
5. Outside influences - 504 Depression and boom

AUSTRALIAN HISTORIC THEME

4. Building Perth (Settlements & Cities) - 4.1.5 Developing city centres
4. Building Perth (Settlements & Cities) - 4.6 Remembering significant phases in the development of settlements, towns & cities
5. Working - 5.1 Working in offices
8. Developing Perth's Cultural Life - 8.10.4 Designing and building fine buildings
8. Developing Perth's Cultural Life - 8.12 Living in and around Australian homes

STATEMENT OF SIGNIFICANCE

The place is an intact example of a house built circa 1900 in the Federation Queen Anne architectural style, featuring a half timbered gable, chimneys with stucco corbelling and other elements of the style.
The place is one of a pair of almost identical houses and as such contributes to the streetscape of Wellington Street in West Perth.
The place is a remnant of the many homes built in West Perth in the period of prosperity at the turn of the century when the population underwent a significant increase as a result of the gold boom era.
Due to the demolition of surrounding houses, the place stands as a reminder of an earlier streetscape and of the origins of the locality

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place is a remnant of the many homes built in West Perth in the period of prosperity at the turn of the century when the population underwent a significant increase as a result of the gold boom era.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

Due to the demolition of surrounding houses, the place stands as a reminder of an earlier streetscape and of the origins of the locality.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place is an intact example of a house built circa 1900 in the Federation Queen Anne architectural style, featuring a half timbered gable, chimneys with stucco corbelling and other elements of the style.
The place is one of a pair of almost identical houses and as such contributes to the streetscape of Wellington Street in West Perth.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system. The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
Post Office directories show that the house was first listed in 1906 and allocated a street number (No. 931) which changed to No. in 1908. The house was first occupied by Joseph Russell. The Metropolitan Water Supply Survey plan (1953) shows the house as symmetrical with a projecting bay either side of the central steps leading to the full length front verandah. Aerial photos and street view show that a rear addition was built in c. 1970, which is two storey with a flat roof. The front verandah roof and verandah detail has been lost and replaced with a flat steel roof with no posts, and a cement front porch with steel balustrade. At 2022 the former house is used as offices.

The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system. The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
Post Office directories show that the house was first listed in 1904 and allocated a street number (No. 934) which changed in 1908. The house was first occupied by Mrs Eva Arnold. The Metropolitan Water Supply

Survey plan (1953) shows the house as very wide in comparison to others around it, with two projecting bays and a full length front verandah. There is a brick addition at the rear with a skillion roof. A real estate advertisement in 2021 shows that the house retains some original features such as fireplace mantles and skirtings, but the ceilings appear replaced, and other likely features have been removed. The view from the street shows that the front verandah and verandah roof have been lost; replaced with a bull nose porch roof over the central entrance door. At 2022 the former house is used as an office.

HISTORY

In 1842 the property, East Perth Cemetery, was allocated to be used as a burial site. The cemetery was open to Church of England initially, then was open to Roman Catholic, Congregational, Wesley churches, then Jewish community.
In 1897 Karrakatta cemetery was allocated as an alternative to East Perth which people were concerned about as a health hazard. By 1899 East Perth cemetery was designated as a disused cemetery. Approximately 10,000 people were buried there, with only 800 headstones remaining.
In 1910 some of the disused area of the cemetery had been sold for housing. There was public concern that the cemetery was in a bad state of repair and two local residents lobbied for fundraising to maintain the cemetery.
In the 1950s some of the land from the Presbyterian, Jewish and Chinese sections was given to the Education Department for use by Perth Girls School.
In the 1990s a fence was erected around the perimeter, a memorial to the Chinese people buried in the cemetery was placed inside the grounds and the Jewish cemetery was set aside as a reserve. Restored headstones were placed in this area. Site abuts the East Perth Cemetery and once contained graves.
The whole cemetery is vested with the National Trust.

HISTORY

Although East Perth was included on the plan for Perth from earliest colonial surveys, the area remained substantially undeveloped until the period of expansion that accompanied the gold rush. Part of the area had also been designated for cemetery purposes, and from the 1860s East Perth developed as an industrial area when brickworks were established in the area. Later an abattoir and the gas works were amongst the industries established. The presence of industries provided employment but also reduced the general attractiveness of the area for residential purposes. The gold boom created an increase in wealth which encouraged speculative development of housing in Perth, Fremantle and other new areas close to these centres such as Subiaco, East Perth and North Perth. While detached houses remained the most popular form, semi-detached houses and terraces were not uncommon in these areas. In 1884 East Perth had a population of 600 in 112 houses set amongst fruit and vegetable gardens and paddocks. By 1894 the population had more than doubled and by 1904 it had increased to 6,000 occupants of 1066 houses. Areas which had previously had a scattering of houses and vacant sites were quickly developed with primarily rental accommodation. This relatively short burst of activity played a major role in establishing the late nineteenth century character of the area. By 1904 a high proportion of residences were rental accommodation. The phenomenon of a highly transient population produced by a typical pattern of immigrants and young working men taking up residence in short term accommodation characterised East Perth well into the twentieth century. In general, the suburb appears to have acquired a respectable working-class character by the turn of the century: ‘a middle-class-come-skilled working man’s suburb.’

The 1897 Perth Town Plan shows no development on Wickham Street. No. 33 was one of the first houses on the street, first listed in the Post Office Directory in 1898. It was originally No. 75. Numbering changed in 1908. The Metropolitan Water Supply Survey plan (1953) shows a brick house with a full-length verandah and centrally located steps.

HISTORY

Although East Perth was included on the plan for Perth from earliest colonial surveys, the area remained substantially undeveloped until the period of expansion that accompanied the gold rush. Part of the area had also been designated for cemetery purposes, and from the 1860s East Perth developed as an industrial area when brickworks were established in the area. Later an abattoir and the gas works were amongst the industries established. The presence of industries provided employment but also reduced the general attractiveness of the area for residential purposes. The gold boom created an increase in wealth which encouraged speculative development of housing in Perth, Fremantle and other new areas close to these centres such as Subiaco, East Perth and North Perth. While detached houses remained the most popular form, semi-detached houses and terraces were not uncommon in these areas. In 1884 East Perth had a population of 600 in 112 houses set amongst fruit and vegetable gardens and paddocks. By 1894 the population had more than doubled and by 1904 it had increased to 6,000 occupants of 1066 houses. Areas which had previously had a scattering of houses and vacant sites were quickly developed with primarily rental accommodation. This relatively short burst of activity played a major role in establishing the late nineteenth century character of the area. By 1904 a high proportion of residences were rental accommodation. The phenomenon of a highly transient population produced by a typical pattern of immigrants and young working men taking up residence in short term accommodation characterised East Perth well into the twentieth century. In general, the suburb appears to have acquired a respectable working-class character by the turn of the century: ‘a middle-class-come-skilled working man’s suburb.’

The 1897 Perth Town Plan shows no development on Wickham Street. No. 35 was one of the first houses on the street, first listed in the Post Office Directory in 1898. It was originally No. 77. Numbering changed in 1908. The occupant was Mrs C. Mary Gordon who was still the main occupant in 1920. Numbering changed in 1908. The Metropolitan Water Supply Survey plan (1953) shows a brick house with a full length verandah and centrally located steps.

Architectural Style 2 Specific	
Archaeology	
Physical Description	

The P&O Building is a six-storey office building spread over ground and five upper floors. The façade is highly symmetrical in its presentation and whilst shorter than the adjacent Gledden Building, it does have a vertical emphasis. The stone façade is divided into bays, the central three bays are slightly proud of the outer two bays. Each bay contains five windows, with a string course between the fourth and fifth row of windows. The windows are multi-paned metal framed casements, with the central windows being four panes wide and the outer windows being narrower at three panes wide. The fifth row of windows are the same width as the other openings but are not as tall. All windows have a stone still. The top of the building is adorned with a stepped parapet. The ground floor is taller than the ground floor of the neighbouring buildings with a deep ashlar stone fascia above the entrance and shop window. The window is not original but together with the kickboard below the shop window reflects the art deco emphasis of the building's architectural style. The main entrance is located to the north of the window, a tall entry with a granite architrave and timber and glazed doors, with two styles of fanlight. To the south of the shop unit, a metal gate way provides access to the rear of the site.
The entrance lobby to the upper floors of the P&O Building has a terrazzo floor treatment, marble columns and panels to the wall, copper detailing to the lift and a highly ornate cornice to the coffered ceiling. The ground floor retail/office unit has retained many of the original details together with a suspended ceiling over part of the original coffered ceiling. False walls have been erected in the office/shop unit to allow for modern service installations.
The main staircase has a concrete tread and ornate metal balustrade with stone newel posts and marble dado along the wall. Metal framed windows follow the angle of the stairs. There is a roof top terrace.

Walls 1 Material	Stone - Sandstone - Donnybrook
Walls 2 Material	Brick
Roof Material	Concrete

Architect	J J Talbot Hobbs, Smith & Forbes
Builder	Atwood
Other Associations	Orient Line (owner)

HISTORY

This building was built during 1936 for the Orient Line steam ship company to establish their presence in Western Australian market in this period of growing affluence in the population.
The building was designed by local firm, Hobbs Smith and Forbes and constructed by contractor Mr Attwood for £41073.The building was opened by the Governor Sir William Campion on 16 September 1930.AT the time of construction the building was twice the height of any other building in the near vicinity. On the parapet were the words 'Orient Line Company' in bronze lettering. A model ship of one of the company's fleet was a prominent item in the foyer and popular with passing pedestrians.

WESTERN AUSTRALIAN HISTORIC THEME

4. Building Perth (Settlements & Cities) - 4.6 Remembering significant phases in the development of settlements, towns and cities
8. Developing Perth's Cultural Life - 8.10.4 Designing and building fine buildings

STATEMENT OF SIGNIFICANCE

The place is a very fine example of an Inter-War Functionalist style building, with some very fine interiors in the Inter-War Chicagoesque style.
The place is rare for the degree of intactness of its exterior and its important interior details.
The place was built as the Western Australian office of the Orient Steam Navigation Company, one of the two major passenger and cruise liner companies serving Australia from the late 1800s to the 1970s.
The place is part of a group of important buildings that visually terminate a strong collection of late nineteenth and early twentieth century buildings in western end of Hay Street Mall.
The place was designed by the architectural firm of Hobbs, Smith and Forbes, which designed a number of important institutional and commercial buildings in Western Australia.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place was built as the Western Australian office of the Orient Steam Navigation Company, one of the two major passenger and cruise liner companies serving Australia from the late 1800s to the 1970s.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The place is rare for the degree of intactness of its exterior and its important interior details.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place is a very fine example of an Inter-War Functionalist style building, with some very fine interiors in the Inter-War Chicagoesque style.
The place is part of a group of important buildings that visually terminate a strong collection of late nineteenth and early twentieth century buildings in western end of Hay Street Mall.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The place was designed by the architectural firm of Hobbs, Smith and Forbes, which designed a number of important institutional and commercial buildings in Western Australia.

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision-making body is relevant

CONDITION AND AUTHENTICITY

Condition	Fair
Building Fabric Authenticity	High level of authenticity. The building still presents with a high degree of original fabric and original detailing to the exterior. The canopy has been altered but remains in keeping with the building.

CLASSIFICATION OF SIGNIFICANCE

Exceptional – Category 1 – Essential to the heritage of the locality. Rare or outstanding example.

Builder	J Halliday; J Platt; James Brittain; Richard Roach Jewell; William Buggins
Other Associations	

HISTORY

The building was opened on 10 April 1870 for the Methodist congregation.
Families who were part of the Methodist congregation, Hardeys and the Clarksons, arrived in the colony in 1830 and established a property in Maylands, Tranby, after the ship they travelled on.
Services were held in Perth from June 1830. Land was purchased on the corner of William and Hay Streets in 1867 with funds raised from members of the community. The building was designed by Richard Roach Jewell. It was built at the same time as the Perth Town Hall. The building's cornerstone was laid in 1867 by Governor J S Hampton.
In 1880 a room was added and in the 1890s the church had to be enlarged to accommodate more people. After the earthquake in Meckering in 1968 the steeple had to be partly demolished as it was unsafe and other repairs were made. The church was redeveloped in 1974 when the Wesley Centre was built adjacent to the church and some of the building was demolished to provide more space between the buildings. During the 1980s restoration work was carried out.

WESTERN AUSTRALIAN HISTORIC THEME

4. Social & civic activities - 408 Institutions
6. People - 603 Early settlers
6. People - 606 Famous & infamous people

AUSTRALIAN HISTORIC THEME

4. Building Perth (Settlements & Cities) - 4.1.5 Developing city centres
4. Building Perth (Settlements & Cities) - 4.6 Remembering significant phases in the development of settlements, towns and cities
8. Developing Perth's Cultural Life - 8.6. Worshipping
8. Developing Perth's Cultural Life - 8.10.4 Designing and building fine buildings

STATEMENT OF SIGNIFICANCE

The place is a fine example of Victorian Academic Gothic architecture.
The place occupies a strategic position at the corner of Hay and William Streets and makes a major contribution to the streetscape of central Perth.
The place is a landmark in the city.
The place is held in high regard by the members of the Uniting Church and the general community.
The building is closely associated with the establishment and growth of the State and, in particular, with the Hardey and Shenton families.
The place is highly significant as one of the remaining buildings by Richard Roach Jewell, an important colonial architect.
The place is highly significant in the history of Methodism in Western Australia.
The place is one of a small number of remaining colonial buildings of the mid-nineteenth century, the loss of which would greatly diminish the historic building stock of Perth.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place is one of a small number of remaining colonial buildings of the mid-nineteenth century, the loss of which would greatly diminish the historic building stock of Perth.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

The place is held in high regard by the members of the Uniting Church and the general community.
The place is highly significant in the history of Methodism in Western Australia.

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place is a fine example of Victorian Academic Gothic architecture.
The place occupies a strategic position at the corner of Hay and William Streets and makes a major contribution to the streetscape of central Perth.
The place is a landmark in the city.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The building is closely associated with the establishment and growth of the State and, in particular, with the Hardey and Shenton families.
The place is highly significant as one of the remaining buildings by Richard Roach Jewell, an important colonial architect.

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision-making body is relevant

CONDITION AND AUTHENTICITY

Condition	Good
Building Fabric Authenticity	Medium level of authenticity as it has been restored to original detail.

CLASSIFICATION OF SIGNIFICANCE

Exceptional – Category 1 – Essential to the heritage of the locality. Rare or outstanding example.

HISTORY

In 1830 the property was purchased by James Inkpen and Methodist member Barnard Clarkson arrived in the Colony. In 1836 the Subscription Chapel was built which was altered during the 1840s to accommodate more functions.
In 1897 the decision to develop the site, including the demolition of buildings, was made and construction of the Queen's Buildings began in 1898. The building was opened by the Premier John Forrest in 1899.
In 1924 a second storey was added and the building was altered during the 1950s.

AUSTRALIAN HISTORIC THEME

3. Developing Perth's (Local, Regional & National) Economies - 3.19 Marketing and retailing
4. Building Perth (Settlements & Cities) - 4.6 Remembering significant phases in the development of settlements, towns and cities
8. Developing Perth's Cultural Life - 8.6.6 Running city missions
8. Developing Perth's Cultural Life - 8.10.4 Designing and building fine buildings

STATEMENT OF SIGNIFICANCE

The architectural characters of the external facades and some surviving internal details demonstrate clearly the Federation Free Classical and Inter-War Gothic styles.
The property development on that site derives from the characteristic spirit and beliefs of the Wesleyan Methodists, now identified as the Uniting Church in Australia, to provide spiritual and pastoral care of the community of the City of Perth in particular.
The property located on a prominent corner site in the Central Business Centre of the City of Perth, represents today the continuing presence at that place of development which began in the early 1830s when the Wesleyan Methodists constructed there the first Chapels, Sunday Schools and Mission buildings.
The current building complex reflects a continuation of the original commercial and social amenities instigated there in 1834 and extended in 1840, 1898, 1915, and 1925 to provide community outreach by the Wesleyan Methodists including to 1977 where Methodists, Presbyterians and Congregationalists joined together to form the Uniting Church of Australia (WA).
The specific historical significance of the place derives from the first Methodist Chapel constructed there in 1834 as the second religious denomination to be established in the Colony - the Subscription Chapel and School and later in 1840 the centenary chapel.
The adjacent Wesley Church constructed in 1870 continues the religious relevance of the initial use of the property on a block extending from Hay Street to Murray Street, fronting onto William Street, now incorporating the Queen's Buildings constructed in 1898 and extended in 1915 and 1925, and the Wesley quarter of 1976.
The Wesleyan Mission prospered under the guidance of its founders, Joseph Hardy, Barnard Clarkson, James Inkpen, Frances Armstrong, Henry Trigg, George Shenton (snr), Frederick Waldeck, George Rowe, JW Grove, and other.
Queen's Buildings provide a tangible reminder of past achievements of the Wesleyan Mission on that site - the Native School, the Sisters of the People, Good Samaritan Industries, the Chinese Mission and Tranby Hall.

Archaeology	
Physical Description	

Wales Arcade (fmr) was constructed in 1967 and refurbished in 1990. Now known as Westpac Junction, the building has had various tenants over the years. The site was previously occupied by a large retail and commercial building that extended around the corner into William Street and of which, Commercial Building 96-100 William Street (behind the temporary cladding) is the only remnant.
Wales Arcade (fmr), a six-storey building with shops at ground floor and offices above, is constructed in the Late Twentieth-Century International style and has the characteristic form of a multi storey office building constructed in the Post–War period. It has alternating bands of masonry spandrels and ribbon windows. The windows are shaded by ribbed concrete sunhoods. The street elevation is divided into three parts by piers that rise for the full height of the building. The east and west walls are constructed of painted brickwork. The building has a canopy running continuously across its street elevation, with the face of the building below canopy level filled by a modern shop front.
This building is intrusive to the William and Wellington Street Precinct as it is much larger than the other buildings, doesn't exhibit the same degree of modulation that give the earlier buildings a similar sense of order and scale and because it doesn't relate to the street in the same fashion. (Source: Assessment Document William and Wellington Street Precinct 15/10/2004)

HISTORY

The post-World War Two period brought about the most significant changes to the Perth central area since the gold rush days of the 1890s and early 1900s.There were some redevelopment in the William and Wellington Street Precinct during this period. On the eastern side of William Street the Federation period commercial buildings were demolished or redeveloped and replaced with multi-storey retail and office buildings in the 1960s, including 110 William Street.

WESTERN AUSTRALIAN HISTORIC THEME

3. Occupations - 308 Commercial services and industries

AUSTRALIAN HISTORIC THEME

3. Developing Perth's (Local, Regional & National) Economies - 3.17.2 Banking & lending
4. Building Perth (Settlements & Cities) - 4.1.5 Developing city centres

STATEMENT OF SIGNIFICANCE

The majority of the buildings in William and Wellington Street Precinct were constructed during the late Gold Boom period and are representative of the reconstruction of the central Perth business district at this time as small shops and residences were demolished and replaced with multi-storey retail and commercial premises accommodating a variety of tenants.
As one of the principal areas in the central business district of Perth, Western Australia's capital city, and a major access route from the north, William and Wellington Street Precinct is valued by the community for its contribution to the built environment of the City of Perth and contributes to the sense of place of the community of the State.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

HISTORY

Barkers Building (demolished) was constructed for Harriet May Barker in 1925. Designed by architects Oldham, Boas & Ednie-Brown, Barkers Buildings was built by A. Hill and comprised four shops fronting William Street, with offices on the upper floors and basement below. Barkers Building is a good example of a competently designed and built medium sized commercial building displaying the aesthetic characteristics of the Inter-War Free Classical style. Above canopy level the west elevation is composed as three parts with dominant bays at each side of the recessed central bay. The central bay contains two large windows edged by blocked columns, which support the balustrading that runs in front of the second floor windows.
The building has a single storey suspended canopy running continuously across its street elevation. Generally, the level of authenticity of Barkers Buildings is moderate, with altered ground floor shop fronts, upper windows and internal fitout. Barkers Building was demolished in 2004.

HISTORY

The building was constructed in 1883 for Michael McMahon, publican. The building has been altered in 1897 and 1920s. The central area of Perth was developed in the 1890s as a retail and entertainment area with theatres and hotels developed near the train line.
The property was owned by Edwin Barrington at the time of the hotel's construction.
McMahon had been the proprietor at several Perth hotels prior to The Globe's construction. After his death, several other publicans worked at the hotel during the late 1890s. The building was developed. The lessees changed several times during the twentieth century.

8. Developing Perth's Cultural Life - 8.10.4 Designing and building fine buildings

STATEMENT OF SIGNIFICANCE

The place is rare as an 1880s hotel that continued to operate with its original function until 2004, having providing accommodation, dining and bar facilities since its construction in 1884, and until 2004 was one of only three Federation period hotels associated with a railway station in the metropolitan area that provide both tavern and accommodation facilities.
The place is an integral component of a precinct of buildings from the Federation and Inter-War periods. It is important to the historic streetscapes that remain on both sides of William Street and along Wellington Street.
The place is a good example of a classically derived building with a simply composed front façade.
The place is associated with the expansion and the intensive building program in the Perth central business district that occurred during the gold rush period in the 1880s and 1890s, together with the opening of the Fremantle to Guildford railway in 1881.

HISTORY

The building was constructed in 1906 for Levi Green who was an ironmonger. It was designed by R. J. Dennehy. It was later used as a retail business for Green and by the Bairds Company and then Myer. The central area of Perth was developed in the 1890s as a retail and entertainment area with theatres and hotels developed near the train line. The building was completed in 1906 due to difficulties with the construction of the building. At the time of its construction, it was one of a few buildings in the area which was higher than two stories.
In 1919 William Baird purchased the property. Baird had established a store in Coolgardie in c1896, Kalgoorlie and Boulder. A store opened in Hay Street in 1903 and an arcade which ran from Hay to Murray Streets. The store sold hardware, toys and gift merchandise. The arcade was tenanted by other shops. In 1920 the Bairds' Emporium opened and offered drapery, men's clothing, furniture, shoes and hardware products. Bairds owned the property until 1964. In 1969 Myer bought Bairds Limited and the building was operated as a Myer department store.
Conservation works were carried out in the building in the 2000s after works to the adjacent 140William complex was completed.

8. Developing Perth's Cultural Life - 8.10.4 Designing and building fine buildings

STATEMENT OF SIGNIFICANCE

The place is an excellent and striking example of a substantial commercial building in the Federation Free Style and has dramatic landmark qualities, particularly in its position opposite open space beside the horseshoe bridge.
The place is an integral component of a precinct of buildings from the Federation and Inter-War periods and is important to the historic streetscapes that remain on both sides of William Street and along Wellington Street.
The place is a fine example of the work of notable architect Richard Dennehy applied to a commercial building and was constructed by prominent Perth builder J.D. Sanders.
The place demonstrates the transition from ironmongers' stores to more specialised hardware, machinery sales and generalist department stores that provided a greater range of goods traditional to ironmongers. It was originally constructed as Levi Greens' Ironmongery and utilised for over eighty years as retail premises.
The place was occupied for fifty years by the popular store Bairds Company, a business of particular importance to country customers, which operated its main store from the site from 1919 up to 1969.
The place was hailed at its construction as a modern demonstration of the prosperity of Western Australia.

Demolished
Saunders Building was originally a single-storey building constructed in the early Gold Boom period. A second storey was added in the 1950s when the shopfront and interior of the ground floor were substantially remodelled. As a result, the building became a crudely designed version of Post-War International Style, featuring a horizontal band of glazing set within bands of rendered masonry. The masonry construction street elevation was completely rendered and painted and has a single storey suspended canopy. The face of the building below canopy level was filled by a modern shop front.

HISTORY

Saunders Building was built in 1892 for the Silver Pan Confectionery Company. The site comprised a single-storey shop fronting Wellington Street and a separate factory building to the rear. By 1900, the factory at the rear housed the printing works for Frederick Vosper's Sunday Times. In 1910, the lease was taken over by John Saunders, a draper from Kalgoorlie, who purchased the property in 1919. The Saunders family operating Western Australia's most prominent menswear business from the premises until the early 1980s and made a number of changes to the building over the years, including the addition of a second floor and an extension to the rear in the 1950s. In 2003, a discount travel agency, coach booking office and internet café occupied the retail premises fronting Wellington Street, while the upper floor was used as accommodation is association with the Globe Backpackers next door.

Saunders Building was demolished in 2004.

Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

Mitchell's Buildings was constructed using traditional building materials and techniques, the walls of the front facade are finished with a grey coloured render while the roof is concealed by the parapet.
The building was designed in the Federation Free Classical style and is distinguished by an inventively composed front façade modulated by strongly moulded elements including paired ionic engaged columns, architraved openings, rusticated pilasters and parapeted walling adorned with a stepped pediment.
The massing of the stepped pediment forms a prominent skyline feature incorporating a stepped arrangement of block-like pieces which includes at its top a square block on which is '1912' formed in bas relief numerals. Other bas relief lettering on the façade includes 'Mitchell's' in the frieze of the entablature directly below the pediment, while 'Buildings' is located in the frieze further south. The building has a rectangular form extending across the full width of the street boundary and abutting the two-storey buildings to the north and south. A suspended canopy runs continuously across the upper level of the ground floor façade.
The canopy is segmentally curved in section allowing light to reach the band of high level windows running above the shopfront. The fl at metal fascia is covered with signwritten advertising for the retail tenancies.
Beneath the canopy much of the expression and fabric of the original facade has been altered and now consists of shopfronts stylistically characteristic of retail fit-outs of the last decades of the twentieth century, featuring large expanses of aluminium framed glazing.
Much of the interior surface finishes and detailing is consistent with the original period of construction, featuring timber flooring, plastered and painted walls and ceilings, ornate archways and architraves, and ornate pressed metal ceilings.

HISTORY

Until the 1880s the town centre was characterised by the establishment of small cottages, shops and small businesses and was rural in character. The expansion of commerce following the discovery of gold in the 1890s put pressure on land in the centre of Perth with the result that most residential uses were displaced in favour of commercial development. During the 1890s and early 1900s the centre of Perth was substantially rebuilt.
The period of expansion in Perth coincided with a period of economic depression in the eastern states, in particular Victoria. As a result, there was substantial migration from Victoria to WA. This migration included businessmen, architects and builders, all of whom had a considerable influence on the development of the city.
In 1837 Perth Town Lot V20 was granted to John Mitchell, a Private in the 63rd Infantry Regiment. By 1884 there were six cottages located on the property, two cottages with shops and a residence and grounds. Portions of the property were sold in the late 1880s and in the 1890s four commercial buildings were located on the property.
In 1922 the remaining portion of land owned by the Mitchell family was subdivided and Lot 3 became the location of Mitchell's Buildings which was constructed in 1912-1913.
During the twentieth century the building was modified and renovated. It was used for commercial purposes.
In 2004 this building was part of the Perth Underground rail project and only the façade of the building was retained. A new commercial building was constructed at the rear of the building.

STATEMENT OF SIGNIFICANCE

The place is an integral component of a largely intact precinct of buildings from the Federation and Interwar periods, strongly contributing to the historic streetscape that remains on both sides of William Street, and together with other nearby streetscapes from that period collectively forms a significant townscape.
The place is a fine example of the Federation Free Classical Style applied to a commercial building, distinguished by an inventively composed front façade modulated by strongly moulded classical elements, some with mannerist characteristics, that give it considerable depth and visual strength.
The place is representative and provides evidence of the City of Perth's expansion and the intensive building program that occurred during the gold rush period, which dates from the discovery of gold in Western Australia in the 1880s and 1890s up to World War One.
The upper floor of the building, designed in the ionic order, is of high authenticity with the fabric of both the interior and exterior of the building remaining largely in its original state.
The place has been associated with the Mitchell family, after whom the building is named, since the original 1837 land grant to John Mitchell, with members of the Mitchell family continuing to own the property up to 1949.
The place was designed by architect Louis Bowser Cumpston.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place is representative and provides evidence of the City of Perth's expansion and the intensive building program that occurred during the gold rush period, which dates from the discovery of gold in Western Australia in the 1880s and 1890s up to World War One.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place is an integral component of a largely intact precinct of buildings from the Federation and Interwar periods, strongly contributing to the historic streetscape that remains on both sides of William Street, and together with other nearby streetscapes from that period collectively forms a significant townscape.
The place is a fine example of the Federation Free Classical Style applied to a commercial building, distinguished by an inventively composed front façade modulated by strongly moulded classical elements, some with mannerist characteristics, that give it considerable depth and visual strength.

HISTORY

The building was constructed in 1910 for Harry Higham. It was designed by Oldham and Cox architects. The central area of Perth was developed in the 1890s as a retail and entertainment area with theatres and hotels developed near the train line.
The building replaced an earlier set of shops which had been constructed by the previous landowner Wesley Maley who purchased a section of the original land grant. The building comprised of eight shops on the ground floor and office space in the upper floors. The ground floor shops were first occupied by outfitters, supply store, ladies underclothing, tobacconist, tea rooms and stationer. Some of the tenancies changed in 1912 as some of the office space was used by railway related activities. The building was known as Higham Buildings in 1915 and was recorded as Wellington Buildings in 1918.
During the twentieth century various unions and associations have been based in the building. In 2004 the building was transferred to the Western Australian Planning Commission as part of the railway tunnel and station under William Street.

WESTERN AUSTRALIAN HISTORIC THEME

Archaeology	
Physical Description	

No.167-181 consists of two buildings, the federation era single storey section, and the more recent corner section. The Federation era section is a single storey rendered masonry building with several hipped and skillion roofs concealed behind a simple rendered parapet with moulded details. This parapet has been painted in recent times in a variety of colours. The corner building contains remnant portions of the previously demolished building, and a new facade has been constructed. The new facade on the corner of Roe and William Streets has been constructed of face brick and glass blocks, with metal clad arches located on the canopy above the two shop entries on Roe Street with simple brick arch motifs on the parapet. The Federation era section of the building has a variety of openings, including re-entrant doors to two William Street tenancies, roller door to one William Street tenancy, and contemporary metal-framed flush doors to remaining tenancies. Panang foods features the original stained-glass top lights, and portions of early timber joinery, in a re-entrant configuration. Cantilevered metal clad canopy with corrugated metal soffit. The older federation building appears to retain the early roof configurations and what appear to be early outbuildings.
The tenancies in the newer portion comprise painted face brick and contemporary plasterboard walls and ceilings. Any remnant original material is not immediately visible. Turnstyle Collectables appears to comprise original materials, including face brick walls (face and painted), ripple iron ceilings, plaster and batten ceilings and timber-framed doors, with more recent materials. The entry door is a modified re-entrant configuration, with the door being in line with the front boundary. Penang Foods is currently fitted out as a restaurant. Although the fit out is not recent, it does not appear to be original. Any original fabric is not readily apparent. The Bird has been recently refurbished as a bar with decor which features exposed materials and structural elements which appear to be aged but may be part of the refurbishment. An examination of the construction drawings would be required to determine if original materials remain. In the rear courtyard, original outbuildings may exist as part of the current configuration.
No. 167-181 William Street comprises six tenancies, two tenancies are located in the newer building with entrances off Roe Street and the truncated corner. Four tenancies are located in the older building off William Street.

HISTORY

The Northbridge area was a series of lakes and sandy swamps prior to colonisation. This area was used for market gardens from the 1830s. c.1845 William Street extended north from Wellington Street to Ellen Street (now Newcastle Street) and was named Hutt Street. Although aligned with William Street to the south, passage was not possible through Gooloogoolup (Lake Kingsford) to Hutt Street at the time. In 1873 the lakes were drained and in the late 1870s work began on the Fremantle to Guildford railway line with the Perth railway station constructed on the drained site of Lake Kingsford.
In the late 1880s Hutt Street was on the periphery of the town with few buildings. The gold rushes of the 1890s had a profound effect on the state's economy and Hutt Street was one of the many streets of Perth that was heavily developed as a result.
In 1897/8 Hutt Street was renamed William Street and by the turn of the century William Street south of Aberdeen Street was a busy commercial district. The construction of the Horseshoe Bridge in 1903 had a major impact on the role of William Street as an arterial road. A mixture of commercial, cultural and 'immoral' activities formed William Street's character. The present diverse social, cultural and commercial mix is a continuation of the character established around the turn of the century.
The row of single storey shops dating from c. 1900 from No.161-181 William Street have a long history of use and occupation. The Metropolitan Water Supply Survey plan dated 1949 shows brick and iron buildings at the front of the lots (facing William Street) with attached brick and iron residences at rear. They also show a variety of outbuildings and rear verandahs, some of which are still extant.
The post office directory from 1895 show that Gutteridge H & Co 'Product Merchants' owned the corner lot, with a grocer and boarding house next door. By 1905 this section of William Street housed several grocers and a butcher. A photograph from c.1905 shows a verandah supported on timber posts extending to the pavement with advertising on the canopy sides.
During the 1910s and 1920s several of the tenancies started to be used as cafes, such as No.177 which was ANA Cafe, and No.167 was Shanghai Cafe. The other tenancies were still being used as grocers, fruit shops and other business aimed at providing for the needs of nearby residents. During the Inter-War period the tenancies began to be used a photography office, a tobacconist, and a motor tyre shop. The Westeralia Cafe occupied No.181.Following World War II there were a number of waves of Polish refugees, many of whom moved to Northbridge, living and working there. Amongst the many tenancies of this group were several catering to Polish people, particularly the Echo Company at 167, which assisted with shipping parcels to Poland and sold Polish books and newspapers; and the White Eagle butchers, catering to a Polish clientele.
The tenancies appear to have featured tiled re-entrance shop front configurations. A series of 1966 photographs show that the tenancies at No.169, 173 and 175 featured central re-entrant doors, with No.171 and 177 with side entrance doors. There appear to be no Roe Street entrances, with entry to this tenancy via the corner entrance. Roe Street was widened during the 1980s, resulting in the southern most portion of the buildings being demolished, and the corner tenancy and Roe Street portion being substantially rebuilt. The re-entrant doorway are apparent along William Street but the ground floors are modified. The brick parapet is simple and undetailed, and the suspended awnings are not original. Lot 116 originally had a single house (No. 10 Roe Street) that was demolished in 1984.

HISTORY

During the 1890's, the gold-rushes had a profound impact on the state's economy. Commercial and residential development was rapid in all parts of the town and land became a sought after commodity. Hutt Street (renamed William Street in 1897/98) underwent massive changes during this period with Perth Town Lot Y15, being the land on Hutt Street between Francis and James streets, sold in six portions between 1882 and 1886.
The southern portion was transferred to Stephen Parker in 1885 and a liquor licence was granted to John Stuart in 1886. It appears a hotel was built around this time to the design of architects, H. S. Trigg & Son.
The hotel was demolished in c. 1980 and during the subsequent years was utilised as a carpark.
In 2007, the State Government announced the construction a new performing arts venue on the site called the State Theatre Centre.

STATEMENT OF SIGNIFICANCE

The place is the site of early development in the William Street precinct and reflects the development boom and social activities which occurred north of the railway at the turn of the century, largely due to gold rush prosperity and the influx of migrants.
The redevelopment of the site is representative of the evolutions in the continuing commercial viability of the precinct and contributions to the social life and character of the precinct.
The place has landmark value, directly across from the Horseshoe Bridge and forming a gateway between the Perth City centre and Northbridge.

Physical Description	

The S. Chester Building (No. 174 -182) is a two-storey commercial building, previously occupied by 'Maestro for Hair' and in 2008 utilised as a construction site office. Prior to the construction of the State Theatre Centre on the Old Governor Broome Hotel Site, the two-storey S. Chester Building terminated the William Street strip at its southern end.
The building has a symmetrical façade which is ornamented above the street awning with classically inspired stucco mouldings and a prominent triangular pediment above the horizontal parapet.
The name of original proprietor is apparent in relief lettering below the pediment. There are three timber framed sash windows spaced evenly across the façade of the upper level. S. Chester Building shares an awning with the '1898 Building', (the adjacent single storey shops on the northern side of the building). This awning dates from 1957 and replaced a two storey verandah and balcony.
Subsequently, the upper floor windows, which replaced doors opening onto the balcony, were not provided with shading. In 2007, the construction and expansion of the State Theatre Centre ancillary uses into the adjacent buildings has resulted in façade renovations and upgrades including maintenance and repairs to the existing two storey S. Chester Building.

HISTORY

During the 1890's, the gold-rushes had a profound impact on the state's economy. Commercial and residential development was rapid in all parts of the town and land became a sought after commodity. Hutt Street (renamed William Street in 1897/98) underwent massive changes during this period with Perth Town Lot Y15, being the land on Hutt Street between Francis and James streets, sold in six portions between 1882 and 1886.
The first of these portions was sold to Sydney Chester, a storekeeper in 1882. Chester's landholding appears to have included the sites for both '1898 Building' and S. Chester Building. S. Chester, a grocer and draper, appears in post office directories from 1885 providing an indication for the date of construction of the building. The property is recorded as being leased to Hedley J. Holway, tobacconist and hairdresser from 1900 until after 1933. According to building licence plan drawings prepared by architects, Oldham Boas and Ednie-Brown and Partners for Mrs Rose Harrison, the original balcony and verandah were removed c. 1957.

WESTERN AUSTRALIAN HISTORIC THEME

4. Building Perth (Settlements & Cities) - 4.1.5 Developing city centres
4. Building Perth (Settlements & Cities) - 4.6 Remembering significant phases in the development of settlements, towns and cities
8. Developing Perth's Cultural Life - 8.4 Eating and drinking
8. Developing Perth's Cultural Life - 8.10 Pursuing excellence in the arts & sciences

STATEMENT OF SIGNIFICANCE

The place has landmark value due to its prominent location at the southern end of the William Street Precinct and displays aesthetic interest for its shopfronts and for the classically inspired stucco mouldings evident above the awning.
The place reflects the development boom which occurred north of the railway at the turn of the century, largely due to gold rush prosperity and the influx of migrants.
The place forms part of the vibrant William Street streetscape and contributes to the community's sense of place. The uses of the building reflect a diversity of commercial activities and occupation by ethnic groups that are identifiable characteristics of the local environment.
The building is one of the earliest extant examples of development in this southern end of William Street.
The place is representative of a Federation style commercial building incorporating a strong street focus and public accessibility.

Physical Description	

1898 Building (No. 174 -182) is a single-storey commercial building, previously occupied by 'Tak Chee Restaurant'. The building now forms part of the State Theatre Centre.
The single-storey 1898 Building comprises two retail units converted for use as a restaurant. The original parapet detailing has been retained above the street awning. The detailing consists of simple shallow relief pilasters, located at each end and in the centre, expressing the division of the building into two units, and rising just above the horizontal parapet which is level with the adjoining 1934 Building to the north. The fascia in the street awning is no longer extant revealing the timber framing and contributing to the dilapidated appearance of the place. The ground floor shop fronts have large panes of glazing above a rendered plinth, and recessed door openings to each side.
In 2007, the construction of the State Theatre Centre has resulted in façade renovations and upgrades including maintenance and repairs to the existing 1898 Building. Most noticeable is the second storey addition which consists of a concealed roof and a glass façade visible from William Street.

HISTORY

During the 1890's, the gold-rushes had a profound impact on the state's economy. Commercial and residential development was rapid in all parts of the town and land became a sought-after commodity. Hutt Street (renamed

William Street in 1897/98) underwent massive changes during this period with Perth Town Lot Y15, being the land on Hutt Street between Francis and James streets, sold in six portions between 1882 and 1886. The first of these portions was sold to Sydney Chester, a storekeeper in 1882. Chester's landholding appears to have included the sites for both 1898 Building and S. Chester Building.
The 1898 Building appears similar to drawings submitted for the building licence issued to R. H. Barratt in 1898 for construction of 'Business premises' comprising two single-storey shops. The drawings show a traditional verandah canopy supported on decorative posts. The canopy and posts have been replaced by the street awning which is tied back to the parapet and is likely to have been installed c. 1957, at the same time as alterations to the verandah at 'S. Chester Building'. It is not clear when the internal alterations amalgamating the two retail units for a single restaurant function were carried out.

Architectural Style 1 Specific	Free Classical
Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

Single-storey face brick rendered masonry and iron building with intact parapet featuring end piers, central stepped pediment and moulded brackets. The letters 'H.E.C' appear in relief on the pediment. This building has the most original and intact facade above awning level in the conservation area as it retains its original unpainted face brick and rendered masonry detailing. Large metal-framed windows flank the central metal-framed entry, which is flush with the external wall. The shopfront has been sympathetically designed to complement the building. The building originally comprised three shops with separate entries, however internal walls have been opened to create a single retail space and a central entry, and the rear of the shop has been extended.
Despite the openings in the internal walls, the previous three tenancy configuration of the building can be clearly read. Although subject to ongoing and recent extensions, some of the materials in the front portion may be original or early.

HISTORY

The Northbridge area was a series of lakes and sandy swamps prior to colonisation. This area was used for market gardens from the 1830s. c.1845 William Street extended north from Wellington Street to Ellen Street (now Newcastle Street) and was named Hutt Street. Although aligned with William Street to the south, passage was not possible through Gooloogoolup (Lake Kingsford) to Hutt Street at the time. In 1873 the lakes were drained and in the late 1870s work began on the Fremantle to Guildford railway line with the Perth railway station constructed on the drained site of Lake Kingsford.
In the late 1880s Hutt Street was on the periphery of the town with few buildings. The gold rushes of the 1890s had a profound effect on the state's economy and Hutt Street was one of the many streets of Perth that was heavily developed as a result.

In 1897/8 Hutt Street was renamed William Street and by the turn of the century William Street south of Aberdeen Street was a busy commercial district. The construction of the Horseshoe Bridge in 1903 had a major impact on the role of William Street as an arterial road. A mixture of commercial, cultural and 'immoral' activities formed William Street's character. The present diverse social, cultural and commercial mix is a continuation of the character established around the turn of the century.
The post office directory from 1895 indicates original owner of the site was Henry Ebenezer Clay who owned the site from 1895 until 1897. Henry Clay was the head of the Telegraph department and a respected figure the Perth colony. The letters 'H.E.C' are inscribed on the pediment above the shop, and most likely refer to his initials. Further research is required to verify the date of construction. The building consisted of three separate tenancies, which can be clearly read in the facade. PWD drawings show the building as being three separate brick shop fronts at No.183, No.185 and No.187. No. 183 William Street consisted of a brick shop front with a brick residence at rear with a verandah and brick outhouse. No. 185 William Street consisted of three separate buildings, with a brick shop front, a centre brick building with a verandah, and a rear brick building with an attached bathroom and galvanised iron outbuildings. No. 187 William Street appears to have been separated from No.183 and No.185 by a narrow arcade and consisted of three brick buildings. The post office directory from 1915 lists the building as being used as a watchmaker's shop, a tailor, painters, and Oyster Saloon. In 1925 the buildings were used as a clothier, milliner and as dining rooms owned by W. Muskett.
By the 1920s there was a small, but thriving Greek community living in Northbridge, due to the availability of cheap housing and the location of the Greek Orthodox church there. As the community grew, so did businesses providing them with goods and services, particularly food. A second wave of immigrants after World War Two, and a second church, resulted in a greater concentration of Greeks living in the area.
The Kakulas family have operated the place as a food store since 1929, having purchased the centre shop from Teeny Thomas Ginger Beer. During the 1930s the Kakulas store occupied the centre tenancy, with R. Reid owning a Chemist at No.183 and W. Muskett's dining rooms at No.187.During the post war period No.187 was occupied by a fish shop. 1960s photograph of the place shows Kakulas Bros occupying the centre shop in the building, flanked by an electronics shop and the Kafe Khyber. The building consisted of three centrally located tiled re-entrant shopfronts, which were modified into a single tenancy sometime after 1966 when the Kakulas Bros expanded into the two adjacent shops, continuing to provide the foodstuffs of southern Europe to their customers.
Kakulas Bros. currently occupy 183-187 William Street as sole tenants.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement and mobility - 101 Immigration, emigration and refugees
3. Occupations - 308 Commercial services and industries

AUSTRALIAN HISTORIC THEME

2. Peopling Perth - 2.4.2 Migrating to seek opportunity

4. Building Perth (Settlements & Cities) - 4.6 Remembering significant phases in the development of Perth centres
8. Developing Australia's Cultural Life - 8.4 Eating & Drinking

STATEMENT OF SIGNIFICANCE

The place is one of the most significant buildings in the William Street precinct for its largely intact above awning pediment, its sympathetic shop front alterations, and legible internal layout.
The place has aesthetic value for its well-proportioned and simply detailed face brick and rendered masonry parapet, which is largely intact.
The place has historic value as it reflects the economic changes in Western Australia, particularly the optimism following World War I; for its lengthy association with the Kakulas family; and for its continuity of use for over a century which has resulted in a largely intact built form on the street.
The place has social value as it reflects cultural and social change, and diversity in Western Australia, particularly in the twentieth century, as it was home for successive waves of migrant communities who first settled in Northbridge.

The place contributes to the community's sense of place as in integral part of the Northbridge district.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place has historic value as it reflects the economic changes in Western Australia, particularly the optimism following World War I; and for its continuity of use for over a century which has resulted in a largely intact built form on the street.

Physical Description	

Double-storey face brick and iron building comprising central, single level arcade with shops opening to street and arcade, with a network of spaces above, currently comprising a hairdressing school and accountant's practice. Arcade extends through building to the rear carpark. Building has a face brick parapet, with the front elevation clad in timber panels below awning height. Metal-framed eight pane windows extend across first floor facade, sheltered by two timber-clad concrete awnings. Street facing shops have large, single paned windows. A cantilevered canopy with pressed metal soffit extends the length of the building, with a small projecting portion over the central arcade entry. Arcade has late twentieth central timber cladding, and extensively glazed. The shops and tenancies that were inspected comprise contemporary ceiling, wall and floor finishes. Some internal timber framed windows, doors and floors may be original or early, but ongoing refurbishment has resulted in largely contemporary styling and finishes that may conceal original fabric. The 1950s extensions and late twentieth century recladding may well have removed, if not covered, material from the original building.

HISTORY

The post office directory from 1915 shows six separate tenancies at No.189-199 William Street, and plans for a redevelopment in the 1950s and a newspaper article indicate that they were single-storey street frontages. The uses included a tobacconist, draper, bootmaker, tea rooms and baker and stationer. No.189 William Street was run as a Stationer and Newsagency from 1915 to 1955 by H.T Dermer. The migrant history of Northbridge is reflected in the use and ownership of several buildings in this section of William Street. No.193 William Street was run as a fruit shop and owned by Greek migrant Mr Anastasas from 1935 until at least 1955. No.197 William Street also has a strong migrant connection. In 1925 the shop was owned by Mrs A Loy and used as tea rooms. In 1935 the shop was known as Café Canton and owned by F Wong. In 1945 it was used as a restaurant

and owned by Wong Sue, and by 1955 it was used as a herbalist by Wong Sue. Early PWD drawings show six tenancies with associated rear storage areas and two rear residences.
In 1954 a second storey was added to the existing single storey building by the architects Krantz and Sheldon, and an existing grocery shop demolished to make way for the central arcade. Drawings show that at the time two of the shops had small, attached residences at the rear; and a substantial workshop, which appears to have had masonry walls, was located in the area behind the arcade, in a space which is now a carpark. A 1966 image shows two centrally configured re-entrant tiled shopfronts in the southern portion of the arcade and three in the northern portion. No.199 William Street also opens onto Little Williams Lane, which runs between the Busy Bee arcade and No.189. It appears from early drawings that No.199 may have opened onto the lane before the arcade additions and alterations during the 1950s. Recently the rear of No.199 has been converted into a small bar, which reflects the current small bar trend in Perth.

WESTERN AUSTRALIAN HISTORIC THEME

3. Occupations - 308 Commercial services and industries

AUSTRALIAN HISTORIC THEME

2. Peopling Perth - 2.4.2 Migrating to seek opportunity
3. Developing Perth's (Local, Regional & National) Economies - 3.19 Marketing and retailing

STATEMENT OF SIGNIFICANCE

The place has aesthetic value as a modest but well designed and detailed example of Post-War International style small shopping arcade which contributes positively to the aesthetic qualities of the William Street streetscape.
The place has social value as it contributes to the community's sense of place as in integral part of the Northbridge district.
The place has historic value as it represents a continuity of commercial and a multiplicity of uses which shaped the character and present diversity of the area.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place has historic value as it represents a continuity of commercial and a multiplicity of uses which shaped the character and present diversity of the area.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

Physical Description	

Perth Hostel is a two and three-storey commercial building, currently occupied by a hairdresser and two restaurant/cafés at street level and also functions as a lodging house of the Perth Inner City Housing Association. The present façade of the three storey hostel building shows a restrained use of Art Deco detailing, but dates from the early 1950's. The proportion and horizontal emphasis relates to existing height lines from the adjacent two storey building. The street level also dates from the alterations and externally are relatively authentic to the date. Between 2009 and 2011, reinstatement and restoration works to the existing facade, enclosure of two existing openings along the southern boundary and the construction of new toilet facilities was completed. General repairs, new fitouts and painting to the building were also undertaken.

HISTORY

During the 1890's, the gold-rushes had a profound impact on the state's economy. Commercial and residential development was rapid in all parts of the town and land became a sought after commodity. Hutt Street (renamed William Street in 1897/98) underwent massive changes during this period with Perth Town Lot Y15, being the land on Hutt Street between Francis and James streets, sold in six portions between 1882 and 1886. It is likely the building was constructed after the issue of a building licence in 1903 as the place is shown in plans and photographs dated 1905.
The three storey hostel building was altered internally in the late 1940s. Prior to these changes being approved by the City, it was required that the 'dilapidated' verandahs and balconies be removed.

8. Developing Perth's Cultural Life - 8.13 Living in cities and suburbs

STATEMENT OF SIGNIFICANCE

The place has some landmark status due to its imposing bulk and three storey height and displays aesthetic interest in the restrained use of Art Deco style detailing in the façade above the street awning.
The place reflects the development boom which occurred north of the railway at the turn of the century, largely due to gold rush prosperity and the influx of migrants.
The place contributes to the community's sense of place having provided residential accommodation at the site for over 100 years and for the provision of low cost housing in an inner city area.
The long term function of the place as a residential lodging house (over 100 years) is rare as the longest operating business within the William Street precinct.
The construction of the place at the turn of the century is representative of the need for short term accommodation in close proximity to the railway station and city brought about by the gold boom. The mid-century modifications to the place represent a post-war desire to embrace modernity.

Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

The two-storey c. 1897 Building is similar to other buildings along William Street at the upper level with a restored tuckpointed brick façade divided into three bays by pilasters, and decorative string course mouldings beneath the timber framed casement windows and the simple horizontal parapet. There are no external features of the original Federation era of construction at ground level.
In 2005, works were undertaken to upgrade the front façade of the existing building and the installation of timber flooring.
The entrance to the building has been relocated to the adjacent 1907/11 building. The original entrance on the northern end of the tenancy to William Street has been replaced with full length glass windows to the street, as have the original metal framed windows with raked glazing, set back at the base.
In 2013, fit out works associated with a small bar use were approved for the rear of the building and rear of adjacent 1907/11 building for the subject site including:
The demolition of rear additions and the removal of two staircases;
Internal works to remaining staircases;
Removal of the existing awning, being replaced with a new steel awning and a new contemporary glass and steel canopy to the rear of the building facing James Street;
Installation of new doors and balustrades along the William Street façade;
Construction of new kitchen and toilet facilities; and
Construction of a new outdoor courtyard including stairs and ramping leading from James Street.
Currently the front tenancy (to William Street) is occupied by ‘Sauma’ Indian restaurant.

Archaeology	
Physical Description	

The c.1907/11 Building is a three-storey commercial building at the southeast corner of James and William streets currently occupied by 'Sauma' Indian restaurant.
The three storey portion of the place is truncated across the street corner and has a hipped corrugated iron roof. The upper levels have restored tuckpointed brick facades with simple render dressings to the rectangular windows. A two storey semi-restored tuckpointed brick (to James Street) and painted section with a hipped roof abuts the larger, front portion of the building, extending east along James Street with a further single storey section adjoining the rear of the place. A door opening at the rear of the two storey section of the place provides access to the upper floors.
In 2005, works were undertaken to upgrade the front façade of the existing building and the installation of timber flooring.
2013 fit out works associated with the small bar use at the rear of the building and in the adjacent 'c.1897 building', resulted in (amongst other works) the demolition of rear additions, construction of a new steel awning to William/James Streets and a new contemporary glass and steel canopy to the rear of the building facing James Street and construction of a new outdoor courtyard including stairs and ramping leading from James Street. Currently the front tenancy (to William Street) is occupied by 'Sauma' Indian restaurant.

HISTORY

During the 1890's, the gold-rushes had a profound impact on the state's economy. Commercial and residential development was rapid in all parts of the town and land became a sought-after commodity. Hutt Street (renamed William Street in 1897/98) underwent massive changes during this period with Perth Town Lot Y15, being the land on Hutt Street between Francis and James streets, sold in six portions between 1882 and 1886. The northern portion was subdivided into Lots 1 & 2 in 1896 and a building licence issued to Levi Green in 1897. It is assumed this was for the two-storey 'c. 1897 Building on the former Lot 2. A building licence issued to F. A. Wedge Esq. in 1907 is likely to have been for additions to the existing 1897 structure. Plans dated 1911, by architect J. Harwood show additions to the Union Restaurant at the corner of James and William streets for Wedge.
Lot 1 was transferred to The Bank of New South Wales in 1927 and continued to operate at the place until 1980 when the land, including Lot 2, which had been transferred to the Bank in 1955, was transferred to the Crown. Modifications were made to the ground level facade for a former restaurant at the place, 'Spaghetti Western' and upper level rooms were leased under the collective name, Gotham Studios to individual artists.

Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

Two-storey brick and iron commercial building on a prominent corner. Roof concealed behind parapet with triangular pediments and urns, and moulded panel details. The pediments contain moulded bee motifs, and the words 'The Busy Bee Arcade Estd 1891' on the parapet below the pediment. Vertically proportioned timber sash windows are set in pairs across the street facades at first floor level. The facade has been painted in various colours, though portions of the original rendered parapet remain unpainted, revealing the original finish. At ground floor level, the southern portion of the William Street facade has been clad in a flat panel, with two small metal-framed windows set into the wall. A cash point is located on this facade. Entry to the ground floor shop is via metal framed doors on both corners. Entrance to a second tenancy is located on the western end of the James Street facade.
The ground floor is one tenancy, with some evidence of the location of dividing walls remaining. Finishes and fittings are contemporary. On the first floor a single tenant occupies all rooms, with openings having been made to some internal walls to create larger spaces. Early ceilings with decorative cornices remain in two rooms, the remaining rooms have a contemporary fixed ceiling system. The layout and detailing suggest that it may have had a residential function originally. The ground floor tenancy comprises contemporary finishes, although there is some evidence of the location of the original dividing tenancy walls. Original material is not immediately apparent but may be behind framed walls and ceilings.
The first floor appears to have retained a large amount of materials (including ceilings and joinery) and planning that are original, or early. The place was completely repainted in late 2011. Original tuckpointing to the façade is evident under the external paintwork.

HISTORY

The Northbridge area was a series of lakes and sandy swamps prior to colonisation. This area was used for market gardens from the 1830s. c.1845 William Street extended north from Wellington Street to Ellen Street (now Newcastle Street) and was named Hutt Street. Although aligned with William Street to the south, passage was not possible through Gooloogoolup (Lake Kingsford) to Hutt Street at the time. In 1873 the lakes were drained and in the late 1870s work began on the Fremantle to Guildford railway line with the Perth railway station constructed on the drained site of Lake Kingsford.
In the late 1880s Hutt Street was on the periphery of the town with few buildings. The gold rushes of the 1890s had a profound effect on the state's economy and Hutt Street was one of the many streets of Perth that was heavily developed as a result.
In 1897/8 Hutt Street was renamed William Street and by the turn of the century William Street south of Aberdeen Street was a busy commercial district. The construction of the Horseshoe Bridge in 1903 had a major impact on the role of William Street as an arterial road. A mixture of commercial, cultural and 'immoral' activities formed William Street's character. The present diverse social, cultural and commercial mix is a continuation of the character established around the turn of the century. The Busy Bee Arcade was constructed in 1894 (according to its pediments) and evidence suggests that it was designed by architect F.W. Upton and was the first 'shopping arcade' in Perth.
Drawings suggest that the term arcade did not comprise a central arcade with shops opening off each side, but rather a row of shops in one building with openings off the same footpath. The building was originally tuckpointed face brick with a rendered unpainted masonry pediment. Early PWD drawings show four tenancies facing William Street, with a central hallway and stairway leading to second floor offices. F.W Upton designed several buildings around Perth, including the Midland Town Hall which is listed on the state register of heritage places. It is believed that Upton also designed the nearby Rosen Buildings at No. 218-220 William Street, Northbridge. In the gold boom period, the building was occupied by a butcher, baker and a bootmaker. From 1915 until at least 1935 the building was used as a fish shop, tobacconist, fruiterers and greengrocer, bootmaker and a cafe. One tenancy was used by Wing, Hing and Co as greengrocer for over 20 years. In 1920, the post office directory lists a tenancy off William Street (along the right of way) between No. 199 and No. 201 as The Busy Bee Letter Box, and The Perth Night Watch Patrolling Co.
The Metropolitan Water Supply Survey plan dated 1949 shows four tenancies facing William Street. During the post war period the building was used as a hairdresser, herbalist store, tobacconist and a chemist, and in the 1980s a cafe which was a gay meeting place. 1966 images show four shop fronts on William Street, all with tiled re-entrant shop fronts under a cantilevered awning. The James Street frontage comprises a number of shops, all with re-entrant doorways, and the canopy extending across both street frontages. At some stage the ground floor became one tenancy. No sign of an arcade is evident in these photographs.

WESTERN AUSTRALIAN HISTORIC THEME

STATEMENT OF SIGNIFICANCE

The place has aesthetic significance as a well-designed and proportioned Federation Free Classical building on a prominent corner. It has aesthetic significance and contributes positively to the William Street streetscape.
The place has historic significance as one of the earliest extant buildings on William Street, reflecting the economic changes in Western Australia, particularly the gold boom of the late nineteenth and early twentieth centuries, and as a reflection of continuity of commercial use for over a century. The place has historic significance as possibly the first shopping arcade in Perth. It contributes to the community's sense of place as a landmark in Northbridge.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place has historic significance as one of the earliest extant buildings on William Street, reflecting the economic changes in Western Australia, particularly the gold boom of the late nineteenth and early twentieth centuries, and as a reflection of continuity of commercial use for over a century. The place has historic significance as possibly the first shopping arcade in Perth.

Physical Description	

Noarlinga Chambers is a two-storey commercial building currently occupied by a bookshop and sushi restaurant. The building is located at the northeast corner of William and James Streets, with the façade treatment wrapping around the two elevations and truncated across the corner.
At ground level the building has glazed shopfronts with a recessed entrance to the northern unit (formerly the bookshop) along William Street and the principal entrance to the travel agency through the truncated corner. A doorway at the eastern end of the James Street elevation provides access to a stairwell leading to the upper floor. Above the overhanging street awning the building has a red brick façade divided into bays with pilasters and features contrasting beige render detailing in parallel bands around the window openings and along the top of the parapet which has rounded arch pediments. The corner bay is differentiated with a square profile parapet. The render detailing around the timber framed windows which are grouped in pairs adopts a classical theme with the overall composition representative of the Inter-War Free Classical style.
In 2010, works were undertaken for general repairs to the building and front façade. Works included the demolition of an existing toilet and construction of a new toilet facility to the rear of the building and replacement of the existing entry door with new timber framed doors.
In 2014, the construction of a five-seven storey boutique hotel called ‘Alex Hotel’ was undertaken on the adjacent National Bank (fmr) site and to the rear of the building.

HISTORY

During the 1890’s, the gold-rushes had a profound impact on the state’s economy. Commercial and residential development was rapid in all parts of the town and land became a sought after commodity. Hutt Street (renamed William Street in 1897/98) underwent massive changes during this period with Perth Town Lot Y34, being the

land on Hutt Street between Francis and James streets, first subdivided in 1896. The northern portion of the block was divided into six portions. Most of the southern portion of Y34 was transferred to Claude Edward Crocker, and in 1917 was sub-divided into four lots. The southernmost lot was briefly owned by Walter Padbury but was transferred to the Independent Order of Odd Fellows in 1924.
'Noarlinga Chambers' was constructed c. 1923 following the issue of a building licence for the construction of shops and offices for William Padbury. The building does not appear to have constructed as shown on the building licence plans which have additional shops extending to the east of the current structure along James Street.

STATEMENT OF SIGNIFICANCE

The place has aesthetic interest due to its truncated corner which addresses the William/James Street intersection and the Inter-War Classical style detailing in the façade above the street awning. The place forms part of a cohesive group of buildings constructed between 1920-1925 in the William Street streetscape.
The place reflects a secondary development boom which occurred in the area in the 1920's.
The place forms part of the vibrant William Street streetscape which together with the long term (over 50 years) occupation of the place by Merizzi Travel, contributes to the community's sense of place.
The place is representative of an Inter-War Free Classical style commercial building incorporating retail tenancies with a strong street focus and public accessibility.

Physical Description	

Brass Monkey is a three-storey (and part basement) face brick and iron building wrapping around the north-west corner of William and James streets, with a truncated corner, typical of corner treatments at this time. The corrugated metal hipped roof has projecting timber lined eaves with paired decorative scrolled square brackets, and tall, corbelled face brick chimneys. There are return verandahs to all floors, with decorative metal filigree valances and balustrading, supported on metal posts, and a circular corner tower with onion dome clad in metal shingles. Timber-framed double-hung sash windows are set at regular intervals into the street facades and on the first and second floor extend to floor height providing access to the verandahs. The original tuckpointing has been painted over with a colour scheme complementary to the building, although the tuck pointing is still clearly discernible. Many original features have been retained, including stained glass windows, mini-orb linings, timber staircases and joinery and decorative mouldings. Internally, openings have been made in walls to create larger spaces, and many finishes are not original, but the original intention of the hotel can be clearly read. The original accommodation spaces are still extant on the second floor, and currently are utilised as administrative and staff spaces. A new, metal-framed and glazed performance space has been created at the western end of the first floor. Outdoor spaces have been covered and paved to create a beer garden and courtyard, and access to the adjoining property, Grapevine, by making an opening in the boundary wall.

HISTORY

Brass Monkey is a three-storey (and part basement) face brick and iron building wrapping around the north-west corner of William and James streets, with a truncated corner, typical of corner treatments at this time. The corrugated metal hipped roof has projecting timber lined eaves with paired decorative scrolled square brackets, and tall, corbelled face brick chimneys. There are return verandahs to all floors, with decorative metal filigree valances and balustrading, supported on metal posts, and a circular corner tower with onion dome clad in metal

shingles. Timber-framed double-hung sash windows are set at regular intervals into the street facades and on the first and second floor extend to floor height providing access to the verandahs. The original tuckpointing has been painted over with a colour scheme complementary to the building, although the tuck pointing is still clearly discernible. Many original features have been retained, including stained glass windows, mini-orb linings, timber staircases and joinery and decorative mouldings. Internally, openings have been made in walls to create larger spaces, and many finishes are not original, but the original intention of the hotel can be clearly read. The original accommodation spaces are still extant on the second floor, and currently are utilised as administrative and staff spaces. A new, metal-framed and glazed performance space has been created at the western end of the first floor. Outdoor spaces have been covered and paved to create a beer garden and courtyard, and access to the adjoining property, Grapevine, by making an opening in the boundary wall. A substantial number of Perth hotels date from the period of commercial expansion in Perth following the gold rush of the 1890's. In this period a large number of 'pubs' were built in Perth, the outskirts of the city and in country towns. They provided accommodation and refreshment to travellers and the large number of immigrants arriving in the state, including the large proportion of working men from Victoria. Typically, hotels were constructed on a corner lot with entrance to the public bar addressing the corner and the entrance for residents on one of the streets. There was often a tower or other feature on the corner and a verandah with elaborate cast iron decoration along the street facades.
The original Great Western Hotel was built in 1896. In 1973 alterations and additions, including a new public bar and games room, were made to the place. After nearly a century of continuous operation as a hotel, it underwent a significant refurbishment program in 1988-89, and was renamed the Brass Monkey Hotel, although some of the original Great Western Hotel signage has been retained. The 1980s refurbishment, by architect Michael Patroni for the Matilda Bay Brewing Company, was part of a larger campaign by the company which saw the refurbishment of a number of hotels, including the Queens Hotel in Mt Lawley, the Captain Stirling in Claremont and the Sail and Anchor in Fremantle, which created a new style of hotel in Perth and was a significant change in licenced establishments in Perth. Patroni's work at the Brass Monkey received the Western Australian chapter of the Royal Australian Institute of Architects' Architectural Design Award in 1989. In 2011 the place still operates as a hotel, and its original intent and circulation spaces can be read clearly.

WESTERN AUSTRALIAN HISTORIC THEME

STATEMENT OF SIGNIFICANCE

The place is a landmark at the corner of James and William Streets, Northbridge, and the northern entrance to the City of Perth due to its prominent location, its large scale in the Northbridge context; fine design and detailing.
The place is a fine and comparatively intact demonstration of the aesthetic characteristics of a three-storey hotel in the Federation Filigree style built during the Gold Boom in Western Australia, with the handsome verandahs being of particular note.
The place is a very fine example of Cavanagh's work in the Federation Filigree style.
The place is a substantial and imposing hotel built in 1896, at the northern entrance to the City of Perth in close proximity to Perth Railway Station, to provide accommodation and facilities for visitors to Perth, and in particular those either from or travelling to the Goldfields by rail.

The place is associated with the Davies family for whom it was constructed in 1896, and who retained ownership to 1972; with well known Australian architect, Michael Cavanagh, who designed the original three storey building; with architects Krantz & Sheldon, Arndt & Silbert, who designed the 1973 additions; and with architect, Michael Patroni, who designed the restoration and renovation in 1988-89.
The place is highly valued by the community for its aesthetic characteristics, for its continuous role in the social life of the City of Perth since its construction in 1896, and for its former role in the provision of accommodation for visitors from the Goldfields and others.
The place contributes to the community's sense of place as an integral part of the City of Perth to the north of Perth Railway Station.
The place received the Western Australian chapter of the Royal Australian Institute of Architects' Architectural Design Award in 1989 for the restoration and renovation work completed in 1988-89.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place is a substantial and imposing hotel built in 1896, at the northern entrance to the City of Perth in close proximity to Perth Railway Station, to provide accommodation and facilities for visitors to Perth, and in particular those either from or travelling to the Goldfields by rail.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

Archaeology	
Physical Description	

National Bank (fmr) is a single-storey building with a former commercial use. The building is currently occupied by a restaurant and bar associated with the 'Alex Hotel' developed at the rear of the site.
The building is a distinctive element in the streetscape expressing the Post-War International style. Despite the lack of historic references in the façade treatment which is in direct contrast to the Federation and Inter-War buildings in the precinct, the building responds to adjacent developments by adopting strong horizontal and vertical elements.
The building has a simple rectangular elevational form with a horizontal roof line. A central rectangular opening divided into three bays by tapered vertical concrete fins punctuates the façade and is shaded by a projecting horizontal canopy. The three bays feature infill panels of red heeler brickwork beneath steel framed glazing and the southern bay includes full height stainless steel double leaf doors. Ceramic tiling has been applied to the remainder of the façade which sits on a plinth of dark heeler bricks.
In 2014, the construction of the 5-7 storey boutique 'Alex Hotel' was undertaken, primarily to the rear of the site. The development involved the part demolition and adaptive reuse of the 'National Bank (fmr)' building, including retention and restoration of the façade.

HISTORY

During the 1890's, the gold-rushes had a profound impact on the state's economy. Commercial and residential development was rapid in all parts of the town and land became a sought after commodity. Hutt Street (renamed William Street in 1897/98 underwent massive changes during this period with Perth Town Lot Y34, being the land on Hutt Street between Francis and James streets, first subdivided in 1896. The northern portion of the block was divided into six portions. Most of the southern portion of Y34 was transferred to Claude Edward Crocker, and in 1917 was sub-divided into four lots.
National Australia Bank archives show that the site was purchased in 1920 and freehold brick and stone premises were erected in 1921. The builder was G. Schofield and the architects were Hobbs Smith and Forbes. The current façade replaced the original in 1954 which is understood to have matched the parapet detail of the neighbouring 'Rosen Buildings'. The architects for the reconstruction were Ochiltree Hargrave and Moran. The bank operated at the site until 1983 when the property was transferred to Crown ownership and operated as the Perth Job Club, an annexe of Central Metropolitan TAFE.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement and mobility - 106 Workers
3. Occupations - 308 Commercial services and industries

3. Developing Perth's (Local, Regional & National) Economies -3.17.2 Banking & lending
3. Developing Perth's (Local, Regional & National) Economies - 3.19 Marketing and retailing
4. Building Perth (Settlements & Cities) - 4.1.5 Developing city centres
4. Building Perth (Settlements & Cities) - 4.6 Remembering significant phases in the development of settlements, towns and cities
8. Developing Perth's Cultural Life - 8.4 Eating and drinking
8. Developing Perth's Cultural Life - 8.10.4 Designing and building fine buildings

STATEMENT OF SIGNIFICANCE

The façade has been recognised as having particular aesthetic value as a highly competent, small scale example of the Post-War International style Modern development and forms part of a cohesive group of buildings constructed between 1920- 1925 on William Street.
The place was initially constructed in 1921 and reflects a secondary development boom which occurred in the area in the 1920's. The façade replacement in 1954 is significant for its technical achievement in sun control in the post-war period.
The place forms part of the vibrant William Street streetscape and contributes to the community's sense of place.
The place is the only Post-War International styled building at the railway end of William Street.
The place is representative of the search for a modern identity in the post-war era and the branch's embracement of these values.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place was initially constructed in 1921 and reflects a secondary development boom which occurred in the area in the 1920's. The façade replacement in 1954 is significant for its technical achievement in sun control in the post-war period.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The place is the only Post-War International styled building at the railway end of William Street.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The place is representative of the search for a modern identity in the post-war era and the branch's embracement of these values.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

The place forms part of the vibrant William Street streetscape and contributes to the community's sense of place.

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The façade has been recognised as having particular aesthetic value as a highly competent, small scale example of the Post-War International style Modern development and forms part of a cohesive group of buildings constructed between 1920- 1925 on William Street.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Good
Building Fabric Authenticity	Medium level of authenticity

CLASSIFICATION OF SIGNIFICANCE

Considerable – Category 2 – very important to the heritage of the locality

Physical Description	

Grapeskin Bar is a double-storey brick and iron commercial building with roof concealed behind a rendered masonry parapet with projecting moulded cornices, and a cantilevered metal-clad box awning with Grapeskin Bar painted on the front. The front elevation has been heavily modified, retaining little original fabric and currently and comprises an asymmetrical contemporary design with central metal-framed double doors flanked by metal-framed glazed roller door and tall, narrow metal framed display windows. The facade retains a pressed metal ceiling and soffit to the awning. The ground floor is fitted out as a bar and was refurbished in the late twentieth century. The second floor contains toilets and administrative spaces and has contemporary finishes. The simply detailed parapet mouldings recall other buildings on William Street, including No. 219-221, No.167-181 and No. 279 William Street on the western side, and No. 182-184 and No. 270-272 on the eastern side, together creating a consistency of aesthetic presentation.
It retains some original finishes, including pressed metal ceilings and concrete floors which have been incorporated into the decor.

HISTORY

The Northbridge area was a series of lakes and sandy swamps prior to colonisation. This area was used for market gardens from the 1830s. c.1845 William Street extended north from Wellington Street to Ellen Street (now Newcastle Street) and was named Hutt Street. Although aligned with William Street to the south, passage was not possible through Gooloogoolup (Lake Kingsford) to Hutt Street at the time. In 1873 the lakes were drained and in the late 1870s work began on the Fremantle to Guildford railway line with the Perth railway station constructed on the drained site of Lake Kingsford.

In the late 1880s Hutt Street was on the periphery of the town with few buildings. The gold rushes of the 1890s had a profound effect on the state's economy and Hutt Street was one of the many streets of Perth that was heavily developed as a result.
In 1897/8 Hutt Street was renamed William Street and by the turn of the century William Street south of Aberdeen Street was a busy commercial district. The construction of the Horseshoe Bridge in 1903 had a major impact on the role of William Street as an arterial road. A mixture of commercial, cultural and 'immoral' activities formed William Street's character. The present diverse social, cultural and commercial mix is a continuation of the character established around the turn of the century.
Evidence suggests that the single storey shops at Nos. 215-217 were constructed in c.1900, with early Post Office Directories showing that No. 215 was used as a watchmakers and jewellers from 1905 until c.1920. No. 217 William Street was used as a fruiterer's store from 1905 until c.1920. It was then a wine saloon, with Sydney Young listed as the proprietor (1920). From 1922, Ezio Luisini, a well-known Italian immigrant business man, owned and operated the place as a wine saloon, supplied by his winery in Wanneroo from 1929. In 1935 No. 215 William was occupied by Luisini's clothing shop, and the wine saloon was still located at No. 217. The Luisini's lived on the premises ('The West Australian' lists William Street as the family address in an obituary for Ezio's wife in 1931.) Early PWD drawings show No. 215 as a brick shop with a rear brick residence, the Luisini home.
Luisini became a valuable mentor to the Italian community, providing advice, credit and a place to gather. Evidence also suggests that the place was a social focus for the Italian community, providing a place to gather sociably. The area was known colloquially as 'Little Italy'.
In 1953 Parry and Parry Architects called for tenders for the addition of a second storey addition to 215 William Street. A 1966 image of the place shows two re-entrant shop fronts mirroring the adjacent No. 221-223 William Street. The canopy bears the words 'Importer Luisini Mercer Frocks Wine Saloon', indicating that the family had a long-standing association with the place.
A photograph c.1990s shows a single tenancy in Nos. 215-217 William Street. In the 2010s Grapeskin Bar occupied Nos. 215-217 William Street, with access to the Brass Monkey through a door let into the rear portion of the dividing walls.
At 2022 the place is 'Patriots Sports Bar,' part of the adjacent Brass Monkey Hotel.

WESTERN AUSTRALIAN HISTORIC THEME

3. Occupations - 311 Hospitality industry and tourism
4. Social and civic activities - 405 Sport, recreation and entertainment

AUSTRALIAN HISTORIC THEME

2. Peopling Perth - 2.4.2 Migrating to seek opportunity
3. Developing Perth's (Local, Regional & National) Economies - 3.19 Marketing and retailing

Physical Description	

Rosen Buildings is a two-storey commercial building, currently occupied by shops and ‘Flipside’ burger restaurant at ground level and ‘Mechanics Institute’ small bar on the upper level.
The building is symmetrical and divided vertically into three sections of approximately equal width. The central section is single-storey with a rear office and has two-storey forms housing combined commercial/residential functions to each side. The original division of the ground level shop fronts into three tenancies is still apparent although the central and southern retail units have been amalgamated. The shop fronts have recessed entrances and ceramic tiling beneath the large panes of glazing. The southernmost entrance is flush with the building façade and provides access to the upper floor.
Above the awning the two storey forms create a castle-like impression appearing as vertical tower elements on each side of the lower horizontal parapet which bears the name of the building in painted lettering on a restored tuckpointed façade. The detailing of the decorative cream render and contrasting brickwork to the towers and parapet reinforce this impression. The detailing shows some similarities to the single storey ‘Commercial Bank (fmr)’ at the corner of William and Francis Streets, suggesting a similar designer and date of construction.
Between 2012 and 2013, works were undertaken to the existing building including general repairs to the façade of the building, refurbishment and construction of new toilet facilities and new signage for ‘Tu’ tenancy. Internal fitouts were also undertaken to ‘Tu’ and ‘Mechanics Institute’ kitchens.

HISTORY

During the 1890's, the gold-rushes had a profound impact on the state's economy. Commercial and residential development was rapid in all parts of the town and land became a sought after commodity. Hutt Street (renamed William Street in 1897/98) underwent massive changes during this period with Perth Town Lot Y34, being the land on Hutt Street between Francis and James streets, first subdivided in 1896. The northern portion of the block was divided into six portions. Most of the southern portion of Y34 was transferred to Claude Edward Crocker, and in 1917 was sub-divided into four lots.
A building licence was issued to W. Rosen in 1923 for the construction of 'Rosen Building' which is believed to have been designed by architect F. W. Upton. Postal records show a variety of uses including dining rooms, second hand business, drapers and picture framers.

WESTERN AUSTRALIAN HISTORIC THEME

3. Occupations - 308 Commercial services and industries
5. Outside influences - 504 Depression and boom

AUSTRALIAN HISTORIC THEME

4. Building Perth (Settlements & Cities) - 4.1.5 Developing city centres
8. Developing Perth's Cultural Life - 8.13 Living in cities and suburbs

STATEMENT OF SIGNIFICANCE

The place displays aesthetic interest in the Inter-War style detailing in the façade above the street awning and is part of a cohesive group of buildings constructed between 1920-1925 in the William Street streetscape.
The place reflects a secondary development boom which occurred in the area in the 1920's.
The place forms part of the vibrant William Street streetscape and contributes to the community's sense of place.
The place is a substantially intact example of mixed commercial residential development incorporating a strong street focus.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

HISTORY

No.219-221 William Street appears to have been constructed in c.1900. Post Office Directories list the places as being used as a plumbers and hairdressers in 1905. By 1915 the plumbers were still at No.219 William Street, and a broker now occupied No.221. By 1925 No.219 was being used as the Albany Cafe, and a pawnbroker occupied No.221. In 1935 No.219 was used as a fish shop and No.221 as a furniture dealer. By 1945 Ezio Luisini, the owner of No.215-217 William Street, and a well-known identity in the Italian community, had

expanded his clothing store and wine saloon to include the premises at No.219. J.H. Kemp operated a rival wine saloon at No.221. By 1955 Luisini had expanded his business to No.221 William Street.
A 1966 image shows a canopy bearing the words ' Importer Luisini Mercer Frocks Wine Saloon' extending from N0.215 William Street to No. 221 William Street, indicating that the family had a long association with the place. In this image there are four re-entrant doorways. A photograph c.1990s shows the Universal bar in its current location. Universal Bar is the current tenant of 219-221 William Street.

Physical Description	

Rechabite Hall is a two-storey commercial building, previously currently occupied by the 'Rechabites' Hall Theatre'. The main building and two ground floor tenancies are currently vacant.
At street level the William Street façade has a cement rendered plinth which extends across the width of the building and a recessed central entrance to the hall with double leaf, panelled timber doors. To each side of the entrance is a retail tenancy with a glazed shopfront. The glazing above door head height is divided into square panes with metal framing. Above the awning the façade has a symmetrical composition of classical components and a prominent raised rectangular pediment in the centre of the parapet. The composition is broken into three bays with pilasters featuring Ionic Order capitals. The central bay over the main entrance has a large blocked arched over the window opening. The glazing at the upper level comprises small square panes of glazing in metal framing.

HISTORY

During the 1890's, the gold-rushes had a profound impact on the state's economy. Commercial and residential development was rapid in all parts of the town and land became a sought after commodity. Hutt Street (renamed William Street in 1897/98) underwent massive changes during this period with Perth Town Lot Y34, being the land on Hutt Street between Francis and James streets, first subdivided in 1896. The northern portion of the block was divided into six portions. Most of the southern portion of Y34 was transferred to Claude Edward Crocker, and in 1917 was sub-divided into four lots.
Following its construction in 1924 Rechabite Hall became headquarters for the Rechabite Society in Perth and used as a meeting place for annual conferences and for social events. The hall and clubrooms were also hired to outside organisations. The land was transferred to the Commonwealth Bank of Australia in 1947 and converted to banking chambers. The bank transferred to new premises in 1978 after which Multiplex Constructions occupied the building for a period until1986 during which the hall and ground floor were severely damaged by fire. The place was restored and re-opened as a performing arts venue in 1998.

STATEMENT OF SIGNIFICANCE

The place is a local landmark as a key component of the eastern streetscape of William Street between Roe and Newcastle Street. It is an intact example of an Inter-War Classical style building and it's markedly different from its neighbours in scale and design.
The place reflects a secondary development boom which occurred in the area in the 1920's and played an important role in the development of the Independent Order of Rechabites in Western Australia.
The place continues to play a significant role in the social life of the Northbridge/Perth Cultural Centre vicinity. Its long-term association with entertainment and cultural functions contributes to the community's sense of place.
The place is the only remaining Friendly Society building of four contemporaries that existed in the immediate area and is one of the few remaining major buildings designed by architect Edwin Summerhayes.
The place is representative of the predominance of temperance and friendly societies in the 1920's and 1930's in Western Australia.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place reflects a secondary development boom which occurred in the area in the 1920's and played an important role in the development of the Independent Order of Rechabites in Western Australia.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The place is the only remaining Friendly Society building of four contemporaries that existed in the immediate area and is one of the few remaining major buildings designed by architect Edwin Summerhayes.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The place is representative of the predominance of temperance and friendly societies in the 1920's and 1930's in Western Australia.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

The place continues to play a significant role in the social life of the Northbridge/Perth Cultural Centre vicinity. Its long-term association with entertainment and cultural functions contributes to the community's sense of place.

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place is a local landmark as a key component of the eastern streetscape of William Street between Roe and Newcastle Street. It is an intact example of an Inter-War Classical style building and it's markedly different from its neighbours in scale and design.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision-making body is relevant

CONDITION AND AUTHENTICITY

Condition	Very Good
Building Fabric Authenticity	Medium level of authenticity as it is intact, has had internal modifications.

CLASSIFICATION OF SIGNIFICANCE

Exceptional – Category 1 – Essential to the heritage of the locality. Rare or outstanding example.

Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

The c.1925 Building is a two-storey commercial building of brick construction with a simple gabled roof and parapeted gable to the street elevation, currently occupied by 'Penthouse Nightclub'. The flush façade is rendered and painted black with minimal surface features. An opening in the ground level façade of the building provides access to a set of steps leading up to the main entrance doors set back from, and above the footpath level. Advertising material located in the windows, awning fascia and across the upper level façade provides the only decorative features to the simple form of the place. The roof level gable obscures a larger rectangular form behind.

HISTORY

During the 1890's, the gold-rushes had a profound impact on the state's economy. Commercial and residential development was rapid in all parts of the town and land became a sought-after commodity. Hutt Street (renamed William Street in 1897/98) underwent massive changes during this period with Perth Town Lot Y34, being the land on Hutt Street between Francis and James streets, first subdivided in 1896. The northern portion of the block was divided into six portions and by 1905 there is evidence of a dwelling on the land immediately to the south of this subdivision, being the site of the current nightclub building. This land was transferred to Walter Drabble in 1917 but the date of subsequent development is unclear. The earliest indication in postal records of a

building occupying 230 William Street is provided in 1928 when 'The Famous Lasky Film Service' had an office there.
Photographs from the 1970's show a single-storey building housing the 'Zanzibar Nite Club' at the place. The building was remodelled c. 1986 and converted to the 'Crush Club' but remained single storey until it re-opened in 1994 as 'Lladro Nightclub' adopting a form similar to the current building.

WESTERN AUSTRALIAN HISTORIC THEME

3. Occupations - 308 Commercial services & industries
3. Occupations - 311 Hospitality industry & tourism
5. Outside influences - 506 Tourism

Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

Taylor's Buildings is a two-storey commercial building divided into five sections, corresponding to the subdivision lots (Lots 2-5 & 2006).
Lot 2 (No. 240) and the adjoining Lot 3 (No. 238) to the south was formerly occupied by 'Marchesi Menswear'. The matching paint scheme across the three facades of Lots 1 (adjacent c. 1905 building), 2, 3 & 4, (No's. 242, 240, 238 & 236) creates a degree of unity to the retail outlets. The other portions of 'Taylors Buildings' on Lots 5 & 2006 (No's. 234 and 232) have a different paint treatment or have been otherwise modified. In 2009 works were undertaken to restore and upgrade the façade of No's. 236-240 and adjacent No. 242 on both William Street and Francis Street elevations.
No. 240 William Street is the northern most portion of Taylor's Buildings and accommodated the main entrance to the Marchesi retail outlet through a wide contemporary aluminium framed opening with double doors and glazed sidelights. The awning over the footpath is at a lower level than the adjacent 'c. 1905 Building' reflecting the rise in the natural ground level towards Francis Street. Above the awning some Federation detailing is still extant in the string course moulding and parapet although the central window opening appears to have been modified and matches the opening in the adjacent unit to the south.
There is no direct access from the street into No. 238, although this section retains a strong street focus with a large window occupying most of the ground level façade beneath the overhanging awning which advertises the business as having been established in 1939 in the fascia. Above the awning some Federation detailing is still extant in the string course moulding and parapet although the central window opening appears to have been modified and matches the opening in the adjacent unit to the north. The name of the building is apparent in raised lettering extending across the building parapet of No. 238.
The shopfront of No. 236 has been replaced with a large, aluminium framed glazed door and window opening.

For Adoption

Above the awning some Federation detailing is still extant in the string course moulding, parapet and the pair of window openings. No. 236 is the only one of the group to have retained the original window detailing. 'Backpackers World Travel' formerly occupied the tenancy.
No's. 234 - 232 were previously occupied by 'Club 234' and was then occupied by 'The Beat' nightclub. The ground floor shopfront of No. 234 has been replaced with glazed concertina doors extending across the width of the unit. Above the awning the original Federation style detailing is no longer extant and the building has a flush façade, painted black with a wide window opening, which has been obscured internally. Air conditioning ductwork surrounds the location of the original pilaster expressing the party wall and is topped by a cubical ventilation unit which is a prominent skyline feature. The facade of No. 232 has been painted in black to match neighbouring No. 234 and the shop front glazing has been removed. A wide opening in the façade opens onto the entrance, which is set back from the footpath. Above the awning most of the original Federation style detailing is no longer extant, although the southern pilaster matches the detailing of the northern units. The wide window opening at first floor level has been obscured with an external shutter.

HISTORY

During the 1890's, the gold-rushes had a profound impact on the state's economy. Commercial and residential development was rapid in all parts of the town and land became a sought-after commodity. Hutt Street (renamed William Street in 1897/98) underwent massive changes during this period with Perth Town Lot Y34, being the land on Hutt Street between Francis and James streets, first subdivided in 1896. This northern third of the lot at the Francis Street corner was divided into six narrow portions and building licences were issued for 'Taylor's Buildings' (on Lots 2-5 & 2006) in 1896. The licences were issued to Dent, Cecil & Taylor indicating the building was a joint project, although rate books show R. Taylor was owner/occupier of 'new buildings' on Hutt Street in 1897.
'Taylors Buildings' were used for a variety of commercial uses including a long term use by Hang Lee's laundry (c. 1897-1932) at Lot 2. In 1905, a licence was issued to J. P. McLarty for the building at the corner with Francis Street and it is assumed the 'c. 1905 Building' was constructed shortly after this date on Lot 1. In 1910 Lots 1, 2 and 3 were transferred to members of the McLarty family and in 1939 to Giovanni Marchesi. Lots 4, 5 & 2006 appear to have had a succession of owners before also being transferred to G. Marchesi in 1940. There were multiple building licences issued for 'Taylors Buildings' from c. 1939 on, which would have included the modifications to the shopfronts, interior alterations and extensions at the rear.

Heritage Place Record Form

For Adoption

STATEMENT OF SIGNIFICANCE

The place reflects the development boom which occurred north of the railway at the turn of the century, largely due to gold rush prosperity and the influx of migrants.
The place forms part of the vibrant William Street streetscape and contribute to the community's sense of place.
The uses of the building reflect a diversity of commercial activities and occupation by ethnic groups that are identifiable characteristics of the local environment.
The place display aesthetic interest in the Federation style detailing in the façade above the street awnings While altered (particularly at the southern end) the façade continues to contribute to the streetscape.
The place is representative of a Federation style commercial building incorporating a strong street focus. The Marchesi business was established in 1939 and is representative of a commercial use maintaining a long association with the William Street/Northbridge community.

Physical Description	

The c. 1905 Building is a two-storey commercial building at the southeast corner of William and Francis streets currently occupied by 'Ruck Rover; clothing store. The painted brick building is truncated across the street intersection. The original opening has been replaced with a new aluminium framed, glazed door. A contemporary awning over the footpath wraps around the corner and the building facades above retain more of the original Federation style detailing with string course mouldings, rendered masonry pilasters and surrounds to window openings. The detailing is similar to the neighbouring 'Taylors Buildings' to the south, but has a higher awning and parapet level reflecting the rise in the natural ground level towards Francis Street. The rear portion of the Francis Street elevation is less elaborate than the three bays around the corner, lacking the mouldings and glazed shopfronts.Between 2008 and 2011, various works have been undertaken to the existing building including renovations to the front façade on both the William Street and Francis Street elevations of No. 242 as well as No's. 236-240 in the adjacent 'Rosen's Buildings', and the demolition and relocation of toilet facilities and internal upgrades.

Physical Description	

External - Three-storey brick and iron building wrapping around the north-west corner of William and Francis streets. The place has a corner tower with faceted dome clad in slate, which has been subsequently painted, and a steeply pitched corrugated metal roof painted red on the street side. The area directly below the dome features a band of highly detailed mouldings. The facade is highly ornate, with decorative tiles placed between the second-floor windows. In the centre of the William Street facade is a central raised parapet, which features shield, scrolls and other decorative details. A paint finish has been applied to the facade (2-3 times). The side parapets are face brick, painted in part, and may retain evidence of early painted signs. Tall, narrow timber framed casement windows are set into decorative stucco mouldings, featuring scrolled triangular pediments, and are set at regular intervals on the first and second floors. The ground floor has been modified to accommodate a variety of uses and verandahs to the ground and first floor have been removed. The William Street shops generally comprise a narrow shop space with private space behind. Shopfronts in the northern portion of the building retain their original configuration, with re-entrant doors, whilst the remaining shopfronts, including the double-fronted cafe on the corner, have extensively modified elevations. Internal - The shops are generally in fair-good condition. The hotel portion of the place comprises two floors of small rooms leading off long corridors, with a three-storey service block to the rear of the building.
The hotel retains some of its early features, including pressed metal ceilings, timber lined ceilings and joinery (including staircases, doors and windows). Later additions are quite utilitarian, and there have been some unsympathetic alterations and repairs to the place, but the original intent and circulation can be clearly read. Internally, the ground floor shops have been refurbished for a number of different ground floor shops have been refurbished for a number of different uses, and the quality of the finishes varies. In some shops, original elements such as ripple iron ceilings are still extant, and it may be possible that other original elements are concealed behind later works.

HISTORY

The Brittania (also spelt Britannia) Hotel was originally built as a coffee palace, to service travellers and families. The term coffee palace was generally used to describe temperance hotels, built from the 1880s onwards, to provide an alternative to licenced hotels. In addition to food and drink, coffee palaces offered accommodation, and often recreational and leisure facilities. The construction of coffee palaces coincided with the gold rush of the late nineteenth century, and reflects the use of Northbridge as a trade, accommodation and light manufacturing hub. The temperance movement reached its peak in the late nineteenth-early twentieth century, and as its popularity waned many coffee palaces applied for liquor licences.
The hotel was built in 1897 and opened on the 7 June 1897. It was run by Mr C. W. Genge, with accommodation for up to 150 permanent and temporary borders. In 1903 the place was extended to include another 35 rooms, and in 1927 plans were made to undertake further refurbishments. The hotel originally catered for travellers and families, however during the interwar period the hotel was blighted by several murders, robberies and suicides. The hotel appears to have had working class associations, and was also the address of many young men who signed up for World War I.
Post office records show that the ground floor was used as several small tenancies, with the main entrance to the hotel at No.253-255. This arrangement is reflected in early PWD drawings which show eight ground floor tenancies with a double width tenancy at No.253-255. Post Office records from 1915 show that the ground floor was used as a music warehouse, tobacconist and hairdresser, small goods store, baker, and engineers. In 1925 the ground floor tenancies were used as a grocer, tobacconist and hairdresser, ham and beef store, wine saloon, bookstore, and dressmaker. In the interwar and post war period the ground floor tenancies were used as a grocer, ham and beef store, wine saloon, dining rooms, second-hand dealer, boot repairers, and a clothing store. In 1955 it underwent extensive alterations at street level. A photograph dated c.1930 shows verandahs to the ground and first floor which have since been removed, and that the facade was originally tuck-pointed face brick with decorative stucco mouldings that have since been painted. In 1966 the ground floor accommodated a number of shops with re-entrant doors, some of which have since been altered in the southern portion of the building. The place currently accommodates retail and hospitality outlets on the ground floor, and backpacker accommodation in the remainder of the building.
Current tenants are Han's Cafe at 245 William Street, Seoul Buffet at 253A William Street, Britannia on William at 253 William (which occupies the entire building apart from the ground floor shops), Travel Affairs at 259 William Street, Sicari Stationery at 261 William Street, Siam Temple boutique at 263 William Street and Optima Vision at 266 William Street.

STATEMENT OF SIGNIFICANCE

The place has aesthetic value as a well-designed and proportioned Federation Free Classical building whose scale, detailing, materials and location on a prominent corner comprise a landmark in Northbridge.

The place has historic value as it reflects the economic changes in Western Australia, particularly the gold boom of the late nineteenth and early twentieth centuries, which resulted in heavy development of the street.
The place has historic value as it represents a continuity of commercial use, and a multiplicity of uses which shaped the character and present diversity of the area.
The place has historic value for its original use as a coffee palace, one of several in the area, that reflected a nationwide trend for temperance hotels during that era.
The place has social value as it contributes to the community's sense of place as an integral component of the Northbridge district.
The place is highly intact and has a strong continuity of use, as the lower tenancies have remained as retail use, with the upper levels being used as a backpackers.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

Physical Description	

Commercial Bank (fmr) is a single storey commercial building at the north-east corner of William and Francis streets, currently vacant. The rendered brick building has two street elevations and a truncated corner entrance with the original house at the rear of place visible from Francis Street. Beneath the wide street awning the facades are relatively plain consisting of infill masonry panels and large panes of glazing, spanning between pilasters which divide the elevations into bays reflecting the original tenancies. The pilasters rise above the awning and through the parapet creating a castellated silhouette along the roof line. The detailing is stylised and similar to the Rosen Building (No. 218-222 William Street).
In 2015, a change of use to restaurant/café and refurbishment works was approved for 'Commercial Bank (fmr)' and the adjacent cottages at No's 252 and 258 William Street. The works to 'Commercial Bank (fmr)' include removal of the original door panels and car parking bay and the installation of doors, windows, gates, fencing and alfresco areas.

HISTORY

During the 1890's, the gold-rushes had a profound impact on the state's economy. Commercial and residential development was rapid in all parts of the town and land became a sought-after commodity. Hutt Street (renamed William Street in 1897/98) underwent massive changes during this period with Perth Town Lot Y55, comprising the block of land on Hutt Street between Aberdeen and Francis streets, approved for subdivision in 1894. John Mews, the owner of a house and gardens on the corner with Francis Street from 1884, acquired Lot Y55 in 1895. The land was sub-divided into nine separate lots, with the two corner lots comprising the largest land areas, and subsequently developed with shops and houses.
The former residential component of the building is assumed to date from Mews' acquisition of the land in 1884 while postal records indicate that the three retail tenancies were added in the early 1920s. The Commercial Bank of Australia acquired the place in 1949 and substantial modifications were made in 1950 and 1966.

4. Building Perth (Settlements & Cities) - 4.1.5 Developing city centres
8. Developing Perth's Cultural Life - 8.13 Living in cities and suburbs

STATEMENT OF SIGNIFICANCE

The place has some aesthetic interest due to its truncated corner which address a street intersection, and for the simple detailing of the skyline features and parapet.
The place reflects a secondary development boom which occurred in the area in the 1920's.
The place forms part of the vibrant William Street streetscape and contributes to the community's sense of place. The uses of the building reflect a diversity of commercial activities and occupation by ethnic groups that are identifiable characteristics of the local environment.
The place is representative of the conversion in land use – from residential to commercial - which occurred in the street in the early 1920's.

Physical Description	

The place is a single-storey building previously used as commercial premises and occupied by 'My Convenience Store'. The building has a simple block form with a hipped roof clad with corrugated iron, and a verandah extending across the width of the front elevation under a separate roof. The front facade features painted brickwork with aluminium framed glazing in the former door and window openings, arranged symmetrically around the former central entrance. Salmon brick steps lead up to the concrete verandah which has a two rung pipe balustrade spanning between the galvanised square section verandah posts.
In 2015, a change of use to restaurant/café and refurbishment works were approved for the cottages at No's 252 and 258 William Street and the adjacent 'Commercial Bank (fmr)'. The works to No. 252 include the removal of concrete steps and installation of a new ramp and balustrading, installation of new toilets, awnings, service compound, fencing, doors, windows, gates and alfresco areas.

The land was sub-divided into nine separate lots, with the two corner lots comprising the largest land areas, and subsequently developed with shops and houses.

The former residence, along with the neighbouring residential structure to the north, first appears in rate books c.1897 and is recorded as belonging to J.C. Mews. The place is listed in postal records as a boarding house in 1914 and by the mid 1920's, properties at 252-258 William Street are listed as a lodging house. In the 1970s the house operated as a photographic studio and in 1973 a building licence was issued for a verandah addition.

4. Building Settlements, Town and Cities - 4.1.5 Developing city centres
8. Developing Australia's Cultural Life - 8.13 Living in cities and suburbs

STATEMENT OF SIGNIFICANCE

The residential form and setting of the place contrasts with the surrounding one and two storey commercial buildings and contributes to the collective aesthetic value of the streetscape.
The place reflects the development boom which occurred north of the railway at the turn of the century, largely due to gold rush prosperity and the influx of migrants and provides evidence of the former single residential occupation of the land.
The residential form contributes to the community's sense of place.
With the exception of the two terrace houses on Museum Street, the former house along with its immediate neighbouring buildings, are among the only remaining residential buildings on the street block.

Physical Description	

Baldwin Buildings is a two-storey commercial building currently occupied by and ‘Joy Tours’ & ‘Outré’ gallery at ground level.
The street elevation has been extensively modified at ground floor, including the installation of new full height shopfront glazed windows and doors, but has retained much of the original detailing at first floor level. There is a rounded arch loggia forming a verandah at the upper level. The column capitals and arcading of the loggia and rendered brick walls and small panes of glazing behind, are characteristics of the Inter-War Mediterranean style. The building parapet includes the name ‘Baldwin Buildings in relief lettering, with the date ‘1928’ in the central raised pediment above.
Between 2009 and 2010 works were undertaken to the existing building including new paint works to the front façade, internal fit out works which include fixtures to walls, display stands and new lighting to the roof and walls.

HISTORY

During the 1890's, the gold-rushes had a profound impact on the state's economy. Commercial and residential development was rapid in all parts of the town and land became a sought-after commodity. Hutt Street (renamed William Street in 1897/98) underwent massive changes during this period with Perth Town Lot Y55, comprising the block of land on Hutt Street between Aberdeen and Francis streets, approved for subdivision in 1894. John Mews, the owner of a house and gardens on the corner with Francis Street from 1884, acquired Lot Y55 in 1895. The land was sub-divided into nine separate lots, with the two corner lots comprising the largest land areas, and subsequently developed with shops and houses.
A building licence for Lot 5 of Y55 was issued in 1928 to Mrs A.E. Jones which corresponds with the date in the building parapet. Postal records show the building having been occupied by tentmakers, a bookshop and signwriters at various times throughout the twentieth century. In the 1990s, an amusement parlour operated at the place.
The significance of the building's name has not been determined.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement & mobility - 101 Immigration, emigration and refugee
1. Demographic settlement & mobility - 107 Settlements
3. Occupations - 308 Commercial services and industries
5. Outside influences - 504 Depression and boom

AUSTRALIAN HISTORIC THEME

2. Peopling Perth - 2.4.2 Migrating to seek opportunity
3. Developing Perth's (Local, Regional & National) Economies - 3.10.3 Encouraging fringe & alternative businesses
3. Developing Perth's (Local, Regional & National) Economies - 3.19 Marketing and retailing

8. Developing Perth's Cultural Life - 8.10.4 Designing and building fine buildings
8. Developing Perth's Cultural Life - 8.13 Living in cities and suburbs

STATEMENT OF SIGNIFICANCE

The place displays aesthetic interest in the arcaded verandah across the upper floor level and is a component of a particularly cohesive group of buildings, especially at first floor and parapet level, which represent all of the significant characteristics of William Street Precinct.
The place reflects a secondary development boom which occurred in the area in the 1920's.
The place forms part of the vibrant William Street streetscape and contributes to the community's sense of place. The uses of the building reflect a diversity of commercial activities and occupation by ethnic groups that are identifiable characteristics of the local environment.
The place is a rare example of an Inter-War Mediterranean styled building within the precinct.
The place is representative of the commercial buildings constructed in the area in the 1920's, which exhibited a diversity of styles.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

Physical Description	

1906 Building is a two-storey commercial building currently occupied by a retail tenancy at ground level and the Australian Writers' Guild at the upper level.
The street elevation has been extensively modified at ground level, with the installation of new full height shopfront glazing. The upper level features rendered masonry divided into bays by pilasters with a long rectangular window opening in each bay. A contemporary street awning has been installed to William Street. It is likely a verandah structure once extended over the footpath.
In 2010 works were undertaken for the modification and shop fitout of the existing building consisting of the construction of shelving, bench counter, awning fascia sign and a new illuminated under awning light box.
In 2013, internal fitout works were undertaken to the upper floor tenancy.

HISTORY

During the 1890's, the gold-rushes had a profound impact on the state's economy. Commercial and residential development was rapid in all parts of the town and land became a sought-after commodity. Hutt Street (renamed William Street in 1897/98) underwent massive changes during this period with Perth Town Lot Y55, comprising the block of land on Hutt Street between Aberdeen and Francis streets, approved for subdivision in 1894. John Mews, the owner of a house and gardens on the corner with Francis Street from 1884, acquired Lot Y55 in

1895. The land was sub-divided into nine separate lots, with the two corner lots comprising the largest land areas, and subsequently developed with shops and houses.
A building licence for Lot 6 of Y55 was issued in 1906 to J. J. Holmes and in 1914 postal records show the building occupied by William H. Jones, furniture dealer. The issue of further building licences in 1930, 1952, 1967, 1970 and 1979 indicate that alterations to the place occurred throughout the twentieth century and include a proposal for use as a coffee lounge and billiards room at the place in 1979.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement & mobility - 101 Immigration, emigration and refugee
1. Demographic settlement & mobility - 107 Settlements
3. Occupations - 308 Commercial services and industries
5. Outside influences - 504 Depression and boom

AUSTRALIAN HISTORIC THEME

2. Peopling Perth - 2.4.2 Migrating to seek opportunity
3. Developing Perth's (Local, Regional & National) Economies - 3.19 Marking and retailing
4. Building Perth (Settlements & Cities) - 4.1.5 Developing city centres
8. Developing Perth's Cultural Life - 8.10.4 Designing and building fine buildings
8. Developing Perth's Cultural Life - 8.13 Living in cities and suburbs

STATEMENT OF SIGNIFICANCE

The place is a component of a particularly cohesive group of buildings, especially at first floor and parapet level, which represent all of the significant characteristics of William Street Precinct.
The place reflects the development boom which occurred north of the railway at the turn of the century, largely due to gold rush prosperity and the influx of migrants.
The place forms part of the vibrant William Street streetscape and contributes to the community's sense of place. The uses of the building reflect a diversity of commercial activities and occupation by ethnic groups that are identifiable characteristics of the local environment.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

Architectural Style 1 Specific	Free Classical
Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

Two-storey rendered brick and iron building with roof concealed behind a stepped central parapet with moulded detailing including deep horizontal cornices and brackets. The word 'Manchester' can just be made out under the painted surface on the southern side of the parapet. Timber-framed sash windows with top lights in banks of three and four are set into the first floor façade. The ground floor facade comprises three shop fronts, two of which have re-entrant doorways. The northern most tenancy has been recently refurbished as a cafe and extends through to the rear carpark. The cafe has an alfresco seating and plants on the footpath. The central tenancy has two rooms for retail sales, whilst the third tenancy comprises a narrow cafe with kitchen, open to the cafe, behind the seating area. There is also an entry to the first floor, sharing the entry space of the southernmost tenancy in an asymmetrical re-entrant shopfront configuration. The cantilevered canopy has a pressed metal soffit lining. The first floor, originally one open space, has been divided into two smaller areas by a masonry wall with three doors. The rear of this space accommodates a bar and toilet areas. The front space has been further modified with a low partition wall and some metal framing, possibly for hanging drapes. A vault is located towards the southern side of the front hall. The floor is concrete, having been replaced after a fire destroyed a timber floor. The ceilings in both halls are suspended plasterboard systems, the one in the rear hall being slightly lower than window head height. In the rear stairwell is a timber staircase, probably original, and timber-framed ledged and braced exit door. The front entrance to the first floor is by way of a staircase with timber handrails, probably original, with metal chequer-board plate treads.

HISTORY

The Northbridge area was a series of lakes and sandy swamps prior to colonisation. This area was used for market gardens from the 1830s. c.1845 William Street extended north from Wellington Street to Ellen Street

(now Newcastle Street) and was named Hutt Street. Although aligned with William Street to the south, passage was not possible through Gooloogoolup (Lake Kingsford) to Hutt Street at the time. In 1873 the lakes were drained and in the late 1870s work began on the Fremantle to Guildford railway line with the Perth railway station constructed on the drained site of Lake Kingsford.
In the late 1880s Hutt Street was on the periphery of the town with few buildings. The gold rushes of the 1890s had a profound effect on the state's economy and Hutt Street was one of the many streets of Perth that was heavily developed as a result.
In 1897/8 Hutt Street was renamed William Street and by the turn of the century William Street south of Aberdeen Street was a busy commercial district. The construction of the Horseshoe Bridge in 1903 had a major impact on the role of William Street as an arterial road. A mixture of commercial, cultural and 'immoral' activities formed William Street's character. The present diverse social, cultural and commercial mix is a continuation of the character established around the turn of the century.
Post Office directory records show that the building was referred to as the Oddfellows' Hall in 1900, and was originally No. 337. It was called Manchester Unity Hall from c.1925 until c.1955. It was the meeting place for several clubs in Perth, including the Manchester Unity Oddfellows Club, an altruistic society that promoted social development, and the Cracovia Club, a group comprising Polish immigrants who held dances in the hall.
The Patch Theatre founded by Edward and Ida Beeby in the 1930s was also located in the Manchester Unity building. Evidence suggests that the first floor was also utilised as a gymnasium and venue for boxing and wrestling matches in the 1930s and was home to the Swan Gymnasium and the Amateur Boxing and Wrestling Association. A photograph from the Northbridge History Collection is of a boxer, Peter Sideris, taken in the Manchester Unity building basement in the late 1940s.The Theatre Australia website and a newspaper article suggest that the Hole in the Wall theatre group may have been based in the building in the late 1990s, possibly in a basement. The ground floor appears to have been used as several tenancies, such as Western Dairy and Co. from c.1915 until the 1970s.Early PWD drawings list the building as a hall of brick construction. It is shown as a long rectangular building with a set of stairs to the south.
A 1966 photograph shows three shopfronts, all with re-entrant doors, and the first floor entrance in its current position.
The Metropolitan Water Supply Survey plan (1950) labels the building 'Hall' with southern and eastern external staircase and a largely vacant area to the rear. In 2014 the tenants were Little Willy's cafe at 267 William Street, Vinnie's Retro at 267B William Street and Joy Cafe at 269 William Street. The first floor was vacant.
At 2022, the tenants are Little Willy's cafe at 267 William Street, Vinnie's Retro at 267B William Street and Hongkies Hong Kong Kitchen at 269 William Street. The first floor is 'Paper Mountain' a Perth based Artist Run Initiative with a gallery, artist studios and a creative co-working space called The Common Room.

WESTERN AUSTRALIAN HISTORIC THEME

8. Developing Perth's Cultural Life - 8.5.4 Pursuing common leisure interests
8. Developing Perth's Cultural Life - 8.10 Pursuing excellence in the arts &sciences

STATEMENT OF SIGNIFICANCE

The place has aesthetic value as a simple Inter-War Free Classical building contributing to the visual qualities of the highly intact streetscape.
The place has aesthetic value for its visual connection to other buildings in the William Street streetscape, such as the Rosen Building and the Rechabite Hall.
The place has historic value as it reflects the economic changes in Western Australia, particularly the gold boom of the late nineteenth and early twentieth centuries, which resulted in heavy development of the street.

It represents a continuity of commercial use and reflects a multiplicity of uses which shaped the character and present diversity of the area.
The place contributes to the community's sense of place as an integral component of the Northbridge district.
The upstairs demonstrates continuity of use for cultural/recreational use, such as dance studios and galleries space. There is also continuity of use in the retail function of the ground floor tenancies.

Physical Description	

The c. 1896 Building is a single-storey commercial building, comprising two retail tenancies.
The central dividing wall between the two tenancies is expressed as a pilaster rising just above the roof level parapet giving some vertical emphasis to the simple design of the building and the horizontal parapet element. The brick and unpainted cement render, characteristic of the Federation period, is still apparent above the tenancies. The overhanging street awning is tied back to the parapet and has a decorative pressed metal soffit. In 2011 approval was issued for internal fitout works and awning signage associated with the southern tenancy café.

HISTORY

During the 1890's, the gold-rushes had a profound impact on the state's economy. Commercial and residential development was rapid in all parts of the town and land became a sought after commodity. Hutt Street (renamed William Street in 1897/98) underwent massive changes during this period with Perth Town Lot Y55, comprising the block of land on Hutt Street between Aberdeen and Francis streets, approved for subdivision in 1894. John Mews, the owner of a house and gardens on the corner with Francis Street from 1884, acquired Lot Y55 in

1895. The land was sub-divided into nine separate lots, with the two corner lots comprising the largest land areas, and subsequently developed with shops and houses.
It is not clear when 'c.1896 Building' was constructed. Postal records indicate that residences were located on the lot in the early 1890s but by 1897 the occupants were a butcher and bootmaker. A building licence, possibly for new shopfronts, was issued for the place in 1941.

HISTORY

The Northbridge area was a series of lakes and sandy swamps prior to colonisation. This area was used for market gardens from the 1830s. c.1845 William Street extended north from Wellington Street to Ellen Street (now Newcastle Street) and was named Hutt Street. Although aligned with William Street to the south, passage was not possible through Gooloogoolup (Lake Kingsford) to Hutt Street at the time. In 1873 the lakes were drained and in the late 1870s work began on the Fremantle to Guildford railway line with the Perth railway station constructed on the drained site of Lake Kingsford.
In the late 1880s Hutt Street was on the periphery of the town with few buildings. The gold rushes of the 1890s had a profound effect on the state's economy and Hutt Street was one of the many streets of Perth that was heavily developed as a result.
In 1897/8 Hutt Street was renamed William Street and by the turn of the century William Street south of Aberdeen Street was a busy commercial district. The construction of the Horseshoe Bridge in 1903 had a major impact on the role of William Street as an arterial road. A mixture of commercial, cultural and 'immoral' activities formed William Street's character. The present diverse social, cultural and commercial mix is a continuation of the character established around the turn of the century.

From c. 1900 the building was occupied by T. Walton Jones, stationer and draper. Early PWD drawings show the building as consisting of four separate brick buildings with associated rear components. Evidence suggests that in the 1930s and 1940s an illegal gambling den was operating in several of the residential tenancies, and charges were laid against several people. Since 1925, the tenancies have been used as a greengrocer, ironmonger, tobacconist, butcher, hair dresser, and a dentist. The pediment features 'Scolaro Building' in lettering. The Metropolitan Water Supply Survey plan (1950) shows Nos. 271 and 273 as narrow single room shopfronts, and No. 277 a large building, with No. 281 the corner tenancy with a cellar (now No. 57 Aberdeen Street). A 1966 photograph shows four tenancies, one with two entries (corner and re-entrant), two with re-entrant doorways, and one with an entry flush with the front wall. The place has associations with Joe Pisano, who operated two cafes in different tenancies, an early Italian restauranteur in Northbridge. At 2014 tenants were WA Chinese Books and News at 273 William Street and Golden King BBQ at 275 William Street, the central tenancies.
At 2022, tenants are Chinese Medicine and Acupuncture; WA's Chinese Videos, Books and News; and Ming's BBQ House. The corner tenancy is a café, La Cholita. The pressed tin awning may be original.

The place has historic significance as it represents a continuity of commercial use and reflects a multiplicity of uses which shaped the character and present diversity of the area.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

The place contributes to the community's sense of place as an integral component of the Northbridge district.

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place has aesthetic significance as a Federation Free Classical building contributing to the visual qualities of the moderately intact streetscape.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Fair
Building Fabric Authenticity	High

CLASSIFICATION OF SIGNIFICANCE

Considerable – Category 2 - Very important to the heritage of the locality.

Physical Description	

The c. 1897 Building is a two storey commercial building, currently occupied by 'Periscope' clothing store. The other retail space is currently empty. The site was previously occupied by 'Keith & Lottie' (No. 276) and the 'International Student Centre'. c. 1897 Building has a balustraded parapet at roof level with a central segmental pediment and scrolled brackets to each side. A decorative render urn sits atop each end of the parapet giving some emphasis to the parapet against the skyline. The upper level of the street façade is relatively plain beneath the parapet featuring a painted brick wall and a symmetrically composed elevation with two pairs of vertically proportioned windows. It is possible that both this and the '1906 Building' (No. 266-268) originally had verandahs and balconies. Each of the two tenancies at ground level has a central recessed doorway. The northern tenancy has ceramic tiling around the large pane, shopfront glazing.
Between 2010 and 2012, there have been works undertaken to the front façade of the building and internal renovations including a retail fitout associated with the 'Butcher Shop' including the creation of a new internal door from an existing window and the sealing of an existing internal door with removable gyprock as well as awning signage to William Street.

HISTORY

During the 1890's, the gold-rushes had a profound impact on the state's economy. Commercial and residential development was rapid in all parts of the town and land became a sought after commodity. Hutt Street (renamed William Street in 1897/98) underwent massive changes during this period with Perth Town Lot Y55, comprising the block of land on Hutt Street between Aberdeen and Francis streets, approved for subdivision in 1894. John Mews, the owner of a house and gardens on the corner with Francis Street from 1884, acquired Lot Y55 in 1895. The land was sub-divided into nine separate lots, with the two corner lots comprising the largest land areas, and subsequently developed with shops and houses.
It appears c. 1897 Building was constructed following the issue of a building licence to James Ellery in 1897 for two shops on lot 8 of Y55. In 1899 the premises were occupied by Goon Goon laundry and Sun Thong Chong, greengrocer. A proposal to remodel the shopfronts was approved in 1940.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement & mobility - 101 Immigration, emigration and refugee
1. Demographic settlement & mobility - 107 Settlements

STATEMENT OF SIGNIFICANCE

The place has aesthetic interest due to the Federation style detailing in the roof level parapet. c. 1897 Building is a component of a particularly cohesive group of buildings, especially at first floor and parapet level, which represent all of the significant characteristics of William Street Precinct.
The place reflects the development boom which occurred north of the railway at the turn of the century, largely due to gold rush prosperity and the influx of migrants.
The place forms part of the vibrant William Street streetscape and contributes to the community's sense of place. The uses of the building reflect a diversity of commercial activities and occupation by ethnic groups that are identifiable characteristics of the local community.
The place is representative of Federation style, two storey commercial building incorporating ground level commercial tenancies with a strong street focus and public accessibility.

1913 Building on the Aberdeen Street corner is a single storey commercial building, currently occupied by 'Generics' shop, 'Noise Pollution Records', 'Ollie & Sons', 'Happy Herb Shop' and 'Ristretto Coffee Roasters' café. The rendered masonry building has a parapet with simply detailed rendered mouldings divided into panels by pilasters, each topped by a decorative sphere. The William Street parapet is divided into three panels reflecting the individual tenancies of the internal planning. The central panel has a segmental pediment with '1913' in shallow relief within the pediment infill. The building is truncated at 45 degrees to the intersecting streets and has a corner entrance. The shopfronts have a plinth of glazed tiling beneath large panes of glazing. Between 2010 and 2014, due to the nature of the changing businesses within the '1913 Building', there have been various signage modifications on the awning reflecting the new tenancies. Further works including the repainting of the wall colour facing William Street from mustard yellow to deep burgundy and internal fit outs such as new fixtures and lighting have been undertaken.

HISTORY

"The Northbridge area was a series of lakes and sandy swamps prior to colonisation. This area was used for market gardens from the 1830s. c.1845 William Street extended north from Wellington Street to Ellen Street (now Newcastle Street) and was named Hutt Street. Although aligned with William Street to the south, passage was not possible through Gooloogoolup (Lake Kingsford) to Hutt Street at the time. In 1873 the lakes were drained and in the late 1870s work began on the Fremantle to Guildford railway line with the Perth railway station constructed on the drained site of Lake Kingsford.
In the late 1880s Hutt Street was on the periphery of the town with few buildings. The gold rushes of the 1890s had a profound effect on the state's economy and Hutt Street was one of the many streets of Perth that was heavily developed as a result.
In 1897/8 Hutt Street was renamed William Street and by the turn of the century William Street south of Aberdeen Street was a busy commercial district. The construction of the Horseshoe Bridge in 1903 had a major impact on the role of William Street as an arterial road. A mixture of commercial, cultural and 'immoral' activities

formed William Street's character. The present diverse social, cultural and commercial mix is a continuation of the character established around the turn of the century.
Post Office directories show that in 1900 the building was occupied by a grocer, bootmaker, carpenter and laundry, and was originally Nos. 357-365 William Street. In 1949 the tenants included a draper, a restaurant, a fruiterer and Champion Butchers. The Metropolitan Water Supply Survey plan (1950) shows a row of four attached two storey shops on the north corner of Aberdeen Street at Nos. 283, 285, 287 and 291 William Street, with a truncated corner, and a verandah that extends to No. 187 on William Street, and for only a short length on Aberdeen Street. The rear of the buildings have various outbuildings including bathrooms and rear lane WCs, suggesting the buildings were both commercial (ground floor) and residential (upper floors).At 2022 the building is vacant, previously occupied by Shisha, a Persian Café/ Restaurant/Club."

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement & mobility - 107 Settlements
3. Occupations - 308 Commercial services and industries
5. Outside influences - 504 Depression and boom

AUSTRALIAN HISTORIC THEME

HISTORY

The listings in the Post Office directory for 1900 indicate the west side of William Street, between Aberdeen and Newcastle Streets, was all residential. Commercial developments then replaced these dwellings. Mixed businesses are listed for this building, for example in 1935-6 there was a ladies hairdressers, the St Kilda Cafe, and a confectionary store.

Archaeology	
Physical Description	

Two storey building comprising of two adjoining shops at ground level and residences above with a decorative rendered parapet concealing the roofline. Cantilevered awning with pressed metal lining underside to front. Upper level walls are face brick (painted). The southern tenancy (former No. 310) has tuck-pointed Flemish bond. The northern tenancy has stretcher bond brick with rendered arches above windows and rendered sills. Windows are double-hung sashes. The southern tenancy has re-entrant door to shop.
In 2010 restoration works to the building were undertaken comprising refurbishing the shopfront, awnings, doors and windows and upgrading portions of the building in poor condition as well as removing and replacing the toilet block and fencing to the rear of the site.

HISTORY

The listings in the Post Office directory for 1900 indicates the east side of William Street, between Aberdeen and Newcastle, was all residential. By 1906 there were some stores, possibly on the street corners. The exact location of the various premises is difficult to determine because of the changes in street numbers that occurred during the first decade of the twentieth century.

The building was constructed in c.1905, probably as a result of the expanding commercial strip along William Street following the opening of the Horseshoe Bridge in 1903.

WESTERN AUSTRALIAN HISTORIC THEME

HISTORY

In c.1845, William Street was extended north from Wellington Street to Ellen Street (now Newcastle Street) and was named Hutt Street. Although aligned with William Street to the south passage was not possible through Lake Kingsford to Hutt
Street at the time. In 1873 the lakes were drained and in the late 1870's work began on the Fremantle to Guildford railway line with the Perth railway station constructed on the drained site of Lake Kingsford.
In the 1880's development of the street occurred. In the late 1880's Hutt Street was on the periphery of the town with few buildings. The gold rushes of the 1890's had a profound effect on the state's economy and Hutt Street was one of the many streets of Perth that was heavily developed as a result.

In 1897/8 Hutt Street was renamed William Street and by the turn of the century William Street south of Aberdeen Street was a busy commercial district. The construction of the Horseshoe Bridge in 1903 had a major impact on the role of William Street as an arterial road. A mixture of commercial, cultural and 'immoral' activities formed William Street's
character. The present diverse social, cultural and commercial mix is a continuation of the character established around the turn of the century.
The Post Office directory for 1900 indicates the east side of William Street, between Aberdeen and Newcastle, was all residential. By 1906, there were some stores, possibly on the street corners. The location of the various premises is difficult to determine because changes in street numbers that occurred during the first decade twentieth century.
The building was possibly constructed in c.1905 when the adjoining building at No. 312 was constructed. These buildings were part of the expanding commercial strip along William Street following the opening of the Horseshoe Bridge in 1903.

Builder	
Other Associations	

HISTORY

In c.1845, William Street was extended north from Wellington Street to Ellen Street (now Newcastle Street) and was named Hutt Street. Although aligned with William Street to the south passage was not possible through Lake Kingsford to Hutt Street at the time, In 1873 the lakes were drained and in the late 1870's work began on the Fremantle to Guildford railway line with the Perth railway station constructed on the drained site of Lake Kingsford.
In the 1880's development of the street occurred. In the late 1880's Hutt Street was on the periphery of the town with few buildings. The gold rushes of the 1890's had a profound effect on the state's economy and Hutt Street was one of the many streets of Perth that was heavily developed as a result.
In 1897/8 Hutt Street was renamed William Street and by the turn of the century William Street south of Aberdeen Street was a busy commercial district. The construction of the Horseshoe Bridge in 1903 had a major impact on the role of William Street as an arterial road. A mixture of commercial, cultural and 'immoral' activities formed William Street's character. The present diverse social, cultural and commercial mix is a continuation of the character established around the turn of the century.

The listings in the Post Office directory for 1900 indicate the east side of William Street, between Aberdeen and Newcastle, was all residential. By 1906 there were some stores, 'possibly on the street corners'. The exact location of the various premises is difficult to determine because of the changes in street numbers that occurred during the first decade of the twentieth century.
This building was possibly constructed c.1905 as a result of the expanding commercial strip along William Street following the opening of the Horseshoe Bridge in 1903.
The part of this building which wraps around into Newcastle Street is listed in the 1909 Post Office directory as the Army and Navy Stores.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement & mobility - 107 Settlements
1. Demographic settlement & mobility - 111 Depression and boom
3. Occupations - 308 Commercial services and industries

AUSTRALIAN HISTORIC THEME

3. Developing Perth's (Local, Regional & National) Economies -3.12.5 Retailing food & beverages
4. Building Perth (Settlements & Cities) - 4.1.5 Developing city centres
8. Developing Perth's Cultural Life - 8.4 Eating & drinking

STATEMENT OF SIGNIFICANCE

The place forms part of a group of commercial buildings and contributes to the historic character of the area.
The place reflects the expansion and development of residential and commercial buildings on the city fringes during the rapid population increase of the 1890's gold boom and the early years of the twentieth century.
The place is representative as an example of a commercial building dating from the late nineteenth and early twentieth century.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place reflects the expansion and development of residential and commercial buildings on the city fringes during the rapid population increase of the 1890's gold boom and the early years of the twentieth century.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The place is representative as an example of a commercial building dating from the late nineteenth and early twentieth century.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place forms part of a group of commercial buildings and contributes to the historic character of the area.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision-making body is relevant

CONDITION AND AUTHENTICITY

Condition	Good
Building Fabric Authenticity	Low level of authenticity as the façade substantially altered.

CLASSIFICATION OF SIGNIFICANCE

Considerable – Category 2 – Very important to the heritage of the locality

HISTORY

The listings in the Post Office directory for 1900 indicate the west side of William Street, between Aberdeen and Newcastle Streets, was all residential. Commercial developments then replaced these dwellings. Mixed businesses are listed for this building, for example in 1935-6 there was a ladies hairdressers, the St Kilda Cafe, and a confectionary store.

Architectural Style 2 Specific	
Archaeology	
Physical Description	

A single storied brick building with terracotta tiled gabled roof constructed in stages to the design of the government. The building now comprising a central space and fourteen former classrooms and service rooms.

Walls 1 Material	Brick - Face
Walls 2 Material	Stone - Limestone
Roof Material	Tile - Terracotta
Architect	Public Works Department [Hillson Beasley]; W A Government [Education Department]
Builder	
Other Associations	

HISTORY

In 1894 the property was acquired for the Education Department. The school opened in 1895 and consisted of two classrooms, teacher's room, cloak room and verandah. This is now the central and eastern parts of the current building. By 1899 the number of students was 307 which exceeded the number the school could accommodate. New classrooms were added to the western side and a large classroom was divided to provide more space. The school was extended again in 1902 to accommodate more students. Further additions were completed in the 1910s.
In 1946 numbers had dropped, and by the 1970s it was proposed to close the school due to a lack of numbers. The school was closed in 1975.

The building was used as office space by the Education Department. The building continues to be used as offices for private businesses.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement & mobility - 104 Land allocation and subdivision
1. Demographic settlement & mobility - 107 Settlements
1. Demographic settlement & mobility - 108 Government Policy
4. Social & civic activities - 402 Education and science
5. Outside influences - 504 Depression and boom

AUSTRALIAN HISTORIC THEME
