Schedule of Submissions and Officer Recommendations

Table 1 – Submissions with recommendations to change Heritage Place Record form – changes made to LHS for approval

NO.	CM REFERENCE	ADDRESS	SUBMITTER CATEGORY	NEIGHBOURHOOD	SUMMARY OF SUBMISSION/COMMENT	OFFICER RESPONSE	OFFICER RECOMMENDATION
1	12110/23	Parliament House, 4 Harvest Terrace	Custodian	West Perth	Deputy Executive Manager of Parliamentary Services - Parliament House, 4 Harvest Terrace, West Perth suggested edits to improve Heritage Place Record with culling of unnecessary images; dating and labeling of images and inclusion of State Heritage Registration dates.	Agreed. Update heritage place record to Parliament House to reflect the corrections provided and consider alternative images.	Recommend change to LHS. Note and include corrections to information where agreed. No change made to final image to include historical date as the approach is consistent with all Place Record Forms, however will consider adding this field in the future consistently across all Place Record Forms.
2	180246/22	Various	Custodian	Various	Appreciate the Heritage Place Record Forms for 7 properties owned by The Roman Catholic Archbishop of Perth. All these properties are entered onto the State Heritage Register (SHR). Please note a couple of inaccuracies: *Victoria Square Cottages* Six cottages built on Lot A20 (19-29 Victoria Square, Perth). Cottages 19 and 21 are not listed on the SHR register as both were considered 'under threshold' during the assessment process. That being said both cottages are located within the St Mary's Cathedral Precinct (HCWA 4291). Therefore while we do not believe these cottages warrant being list on your Local Heritage Survey as stand alone buildings, we do acknowledge the impact they contribute to the St Mary's Catholic Cathedral Precinct. *St Mary's Cathedral* St Mary's Catholic Cathedral is constructed from sandstone and concrete. The pictures of the red brick cathedral included in this record, are of St George's Anglican Cathedral, not St Mary's	The City has recognised the Victoria Street Cottages as including No 21, as they are included on the City's Planning Scheme Heritage List as five cottages. The LHS includes No. 19 because it sits on the same lot as No. 21. The five cottages are not being identified as stand-alone buildings as you noted, they are included as one heritage place. Places which are below threshold for the State Heritage Register will be included on a local government Local Heritage Survey as they have local significance. Agreed. Update heritage place record on St Mary's Cathedral to reflect this corrected information and anomaly.	Recommend change to LHS. Retain entry in as Category 1 in line with the approach for the cottages to be considered one heritage place. Note No. 19 is of lesser significance and consider classifications for future reviews. Update Heritage Place Records with corrected information provided.

NO.	CM REFERENCE	ADDRESS	SUBMITTER CATEGORY	NEIGHBOURHOOD	SUMMARY OF SUBMISSION/COMMENT	OFFICER RESPONSE	OFFICER RECOMMENDATION
					Catholic Cathedral. The pictures of the garden belong to St Mary's Catholic Cathedral. *Archbishop's Palace* Please note this building provides long term residential accommodation for members of the clergy working within St Mary's parish, not '*short-term residential accommodation for church purposes'* as noted on the Heritage Place Record Form under 'History'. *St John's Pro-Cathedral* This building was restored in two stages 2013 & 2015. It has now reverted to being used as a place of Public Worship. *St Brigid's School* This building was restored in 2006. It now accommodates offices occupied by agencies working for the Catholic Church. *St Brigid's Church* This building underwent extensive restorations in 2012/2013.	Agreed. Update heritage place record on Archbishop's Palace to reflect this corrected information. Agreed. Update heritage place record on St. John's Pro-Cathedral to reflect this corrected information. Agreed. Update heritage place record on St Brigid's School to reflect this corrected information. Agreed. Update heritage place record on St Brigid's Church to reflect this corrected information.	Update Heritage Place Records with corrected information provided. Update Heritage Place Records with corrected information provided. Update Heritage Place Records with corrected information provided. Update Heritage Place Records with corrected information provided.
3	243891/22	21 Rheola St	Owner	West Perth	As owner of 21 Rheola St respectfully request removal of property from LHS. The Bull Nose Verandah and associated extensions (including brickwork and waiting rooms) were part of an extensive renovations in 2000 approved by the City of Perth to replace a flat roof 1970's renovation to the original building. As such the extension and front street scape afforded by the extension/bull nose verandah and associated front of building extensions are not part of the original property.	The place is on the LHS due to the residence's cultural heritage significance and to the municipality in accordance with provisions of Heritage Act 2018. The house is still a Queen Anne Federation residence built in 1903, irrespective of later additions. Nevertheless, the category 2 classification of significance as being very important to the heritage of the locality is difficult to justify. Further investigations reveal that the whole front of the residence has been modified to such an extent in 2000 that the original features of a diagonal entry, emblematic of the original Queen Anne Federation construction has been lost.	Recommend change to LHS. Retain entry and reclassify as a Category 4 place – has elements of values worth noting for community interest (as the rear of the building is still original) but otherwise makes little contribution.

NO.	CM REFERENCE	ADDRESS	SUBMITTER CATEGORY	NEIGHBOURHOOD	SUMMARY OF SUBMISSION/COMMENT	OFFICER RESPONSE	OFFICER RECOMMENDATION
4	230955/22	484 Murray St	Consultant on behalf of owner	Perth	The consultant, PTS Planning provides a written objection on behalf of owner - Goldvista (Perth) Pty Ltd to the listing of 484 Murray St on the Local Heritage Survey. The consultant asserts that if the site is included on the survey Goldvista (Perth) Pty Ltd, they would proceed to demolition of the building to ensure that there are no implications/ impediments to its future development aspirations for the site. We also note that if the building is to be listed, then a more complete assessment should be undertaken including determining the extent of original fabric as surely this is important to the heritage listing consideration and the Category of Significance. If the City, against the landowners wishes, intends to retain the listing on the heritage survey the Record Form needs to be amended to: Delete the reference to the draft Conservation Management Plan as it is a draft and therefore has no standing and has not been approved or endorsed by the landowner. The Place record needs to identify that the building has received approval for demolition as part of the redevelopment of the site and surrounding lots. The Classification of the Significance needs to be reviewed as the current wording suggests a higher level of heritage significance and protection than the Record Form suggests 'very important to the heritage of the locality' and will have future implications for the landowner. As a public document the wording will evoke an emotive outcome towards heritage retention and restoration. Goldvista (Perth) Pty Ltd objects to the listing of the subject site on the Local Heritage Survey.	The LHS does not change development of the property. Unlike the Heritage List the Local Heritage Survey is not an instrument for development control and the planning provisions currently applicable remain. Agree to delete reference to draft Conservation Management Plan. The references in the Heritage Place Record for 484 Murray Street, Perth relate to the 2008 and 2020 Draft Conservation Management Plans for 474 Murray Street, Perth. The 1935 two-storey building and warehouse is of cultural heritage significance to the municipality in accordance with provisions of Heritage Act 2018. The place has historical significance as a purpose-built warehouse for Sara and Cook wholesalers in 1935. It has historical and aesthetic significance as an Inter-War Functionalist style building designed by architects Oldham, Boas, and Ednie-Brown. The place makes a positive contribution to the Murray Street streetscape. It is a representative example of a commercial warehouse that has been adapted for another use in the city. However in considering the respondents submission, support reclassification to Category 3 of some/moderate cultural heritage significance.	Recommend change to LHS. Retain entry and re-classify place as Category 3 place of some/moderate cultural heritage significance. Contributes to the heritage of the locality. Delete reference to the Conservation Management Plan in the Heritage Place Record Form.

NO.	CM REFERENCE	ADDRESS	SUBMITTER CATEGORY	NEIGHBOURHOOD	SUMMARY OF SUBMISSION/COMMENT	OFFICER RESPONSE	OFFICER RECOMMENDATION
5	250698/22	WA Cricket Ground	Museum Co-ordinator	East Perth	Museum Curator of the WA Cricket Ground sought edits to the heritage place record form. These include minor edits, as well as a rewrite to the history section to include reference to Noongar place names and usage relevant to the area pre WACA Ground. Changes also made to the Physical Description dating back to 1930, with connection to Perth architects Messrs. Powell and Cameron. The architects did a lot of work at the trotting ground 1926-1929 prior to the CHANGE structure on Hale Street which was part of a new entry gate at the time. The Museum Curator included an illustration from the Sunday Times 1930 showing the proposed entry gate with CHANGE structures. The curator is seeking out company archives on Powell and Cameron and if they include WACA drawings as they also worked on a grandstand at the ground in 1930-31.	Agreed. Update heritage place record to WA Cricket Ground to reflect the requested information. The Museum Curator can make a request for an archive search through the City's Records section and/or contact State Records in respect of archival material on Powell and Cameron Architects.	Recommend change to LHS. Amendments made Heritage Place Record to reflect requested changes in place name, corrections and history as submitted. Advise the Museum Curator to make a request for an archive search through the City's Records section and/or contact State Records in respect of archival material on Powell and Cameron Architects.

Table 2 – Submissions with recommendations for no change to Heritage Place Record form or LHS

NO.	CM REFERENCE	ADDRESS	SUBMITTER CATEGORY	NEIGHBOURHOOD	SUMMARY OF SUBMISSION/COMMENT	OFFICER RESPONSE	OFFICER RECOMMENDATION
6	186887/22	11 Colin St	Strata Unit Owner	West Perth	As Strata Unit Owner of 8/11 Colin St strongly objects to inclusion on LHS. Had I known heritage may be a possibility I would not have bought the property at all. Heritage offers owners absolutely no upside and will result in an endless amount of outgoings for owners and thus unlimited downside. This has been first hand experience with a family property that has also been heritage gory ed, and as such I am in complete opposition to the proposal of 11 Colin Street been heritage listed. I don't have the right to walk into your house and tell you what you do and do not have to maintain because (a) you would tell me to get off your property and (b) a property is a unique representation and extension of each of us as individuals, and to be told what we can or can't do as a result of the views or interests of others (who have not spent hundreds of thousands on purchasing the property/bearing the brunt of the property been heritage listed) is completely unreasonable. If the council wants to preserve (and fund the maintenance costs) council properties that is fine, but I was categorically told that they would not be financing the maintenance costs of this building and thus I see absolutely nothing positive with anything heritage related re this address.	There are four main statutory lists containing heritage lists for places that are significant locally, state-wide, Australia-wide and/or world-wide. Locally significant heritage places are listed on local government planning schemes. The Local Heritage Survey sits below these statutory lists and is a document which identifies and records information of the places which the City has deemed to be of cultural heritage significance to the municipality The Local Heritage Survey doesn't have any direct development implications. The three-storey brick and tile apartment block with projecting rendered sections, with large areas of fenestration and a prominent circular tower with horizontal bands of face brick and render, is an outstanding example of the post-war functionalist style in West Perth that sits comfortably within the streeetscape. As a result, the post-war functionalist apartment block has been assessed as having some/moderate cultural heritage significance (Level 3) to the City. The City are yet to consider additional places for inclusion on the Local Heritage List, which will be assessed under separate legislation and process.	Recommend no change. Retain entry in LHS as Category 3 place of some/moderate cultural heritage significance. Contributes to the heritage of the locality.
7	203173/22	69 Mount St	Resident/Owner	West Perth	As owners of 69 Mount St, strongly oppose entry of their home on the LHS, to which they have consistently objected to any such entry over last 31 years. Our views on being included on any Local Heritage List should be well known to the city and for all reasons previously advanced.	Noted. On 12/5/2009 Council resolved that the place be removed from the current assessment process, following objection. The Local Heritage Survey is not an instrument for development control and the planning provisions currently applicable remain, The home at 69 Mount Street was built in 1897 for John Hopgood. It was occupied by John	Recommend no change. Retain entry in LHS as Category 2 place of considerable cultural heritage significance and very important to the heritage of the locality.

NO.	CM REFERENCE	ADDRESS	SUBMITTER CATEGORY	NEIGHBOURHOOD	SUMMARY OF SUBMISSION/COMMENT	OFFICER RESPONSE	OFFICER RECOMMENDATION
					In essence, it is unfair, prejudicial & discriminatory to single out home for heritage listing in light of the other developments along Mount Street over the past 30 years. Incentives will not cover losses & decreased property value for resale.	Andrew Muir, Inspector of Engineering Surveys from 1899 to 1913. The firm Hobbs, Smith and Forbes, Architects designed additions in 1913 and Sir Walter Hartwell James and Lady Eleanora James occupied the property from 1914-1942. James was one of WA's leading social reformers, an important and influential figure in the federal movement in WA, a barrister, Perth City councillor, Premier from 1902 to 1904, Attorney-General and Chancellor of the University of WA. Lady James was a prominent feminist and notable social worker. In 1986, alterations and additions were undertaken by architects Overman & Zuideveld. In 2000 the place was added to the State Register (Interim Entry 24/11/2000) and was removed 16/11/2001.	
8	181420/22	324-332 Murray St	Owner	Perth	Owner objecting to inclusion of 324-332 Murray St (Windsor House) on LHS. Submission sent to City earlier in 2016 about their building's heritage significance in relation to the Queen Street heritage area. Their consultant deemed that the place wasn't of significance, so the owner wondered why the place was included on draft LHS. Rowe Group submits that Windsor House does not provide significant heritage value as the building has been so significantly modified since construction. The consultant noted that the City's Heritage Area Place Assessment and the State Heritage Assessment, which deemed the Queen Street Heritage Area below threshold draw similar conclusions from these modifications. The City's Assessment and the State Heritage Assessment also both confirm that the existing development at the site does not provide any	Windsor House is located on the corner of Murray and Queen Streets, with its primary elevation facing Murray Street. The Draft Local Heritage Survey (LHS) makes an inventory of places of local cultural heritage significance to the municipality. The Draft LHS does not address the state significance of heritage areas, which is the essence of the Consultant's report. Windsor House was designed in the Inter-War Free Classical Style of architecture of brick construction with a corrugated iron gable roof. The commercial/ warehouse building was originally constructed in 1898, with modifications over time. The Murray Street façade of Windsor House is divided by its horizontal shop awnings spanning the length of the elevation. The first-floor elevation remains relatively true to its original form and is a rendered façade containing stylized references to classical architecture. Windsor House's nine double sash windows, which are unevenly spaced over the length of the first floor, appear to be original openings	Recommend no change. Retain entry in LHS as Category 2 place of considerable cultural heritage significance and very important to the heritage of the locality.

NO.	CM REFERENCE	ADDRESS	SUBMITTER CATEGORY	NEIGHBOURHOOD	SUMMARY OF SUBMISSION/COMMENT	OFFICER RESPONSE	OFFICER RECOMMENDATION
					recognizable heritage character at all at the ground level of Murray Street or Queen Street.	and relate to the original internal layout of the building. These elements include pediments and piers, which are set against the parapet wall and used to create recessed bays. Label molds are used above the windows in the stage of building closest to the Queen Street intersection. The ground floor façade of the Murray Street elevation has been modified to greater suit its modern retail requirements. The Queen Street elevation of Windsor House has undergone substantial change.	
9	247693/22	60 Havelock St	Owner	West Perth	Owner objecting to inclusion of 60 Havelock St on LHS. Doesn't want the property to be included on any heritage listing. Concerned that he as the owner has done all the work to upkeep and maintain his property and now the City wants to take all the credit and put restrictions on his property. The City have done nothing to support or recognize heritage.	The City supports heritage places and has offered a range of incentives to ratepayers over the last 20 years, for their maintenance and conservation. 60 Havelock Street was built c. 1898, a two-storey residence at a prestigious address. Henry Sadler, plumber was the first occupant and lived there until c. 1920. After this the place was operated as a boarding house (1925) and apartments (1930), before becoming a single residence again (1949). Adjacent No 58 was demolished in 1980 and is now a car park. The rear of the building has an addition (No. 60A). In 2021, 60 Havelock Street was converted to offices. Inside it retains many original features such as fireplaces, staircase, cornices and skirtings, timber framed windows, and timber floors. The 1898 place was put on the LHS as the two-storey Federation Filigree building was of cultural heritage significance to the municipality in accordance with provisions of Heritage Act 2018. Unlike the Heritage List the Local Heritage Survey is not an instrument for development control and the planning provisions currently applicable remain. The City are yet to consider additional places for inclusion on the Local Heritage List, which	Recommend no change. Retain entry in LHS as Category 3 place of some/moderate cultural heritage significance. Contributes to the heritage of the locality.

NO.	CM REFERENCE	ADDRESS	SUBMITTER CATEGORY	NEIGHBOURHOOD	SUMMARY OF SUBMISSION/COMMENT	OFFICER RESPONSE	OFFICER RECOMMENDATION
						will be assessed under separate legislation and process.	
10	248988/22	989 Wellington St	Consultant on behalf of Owner	West Perth	Consultants acting on behalf of the owners of 989 Wellington St, West Perth. City of Perth issued a current DA and a Building Permit including a Demolition Permit, for the removal of the building, and replacing it with a 9 storey residential building, containing 8 apartments. Therefore the inclusion of placing this property on any register is a mistake as the approvals mentioned are found within the City of Perth records, further it is confirmed that our client is in the process of purchasing the adjoining property to the west, which will also be redeveloped into residential accommodation, and if that property is included, it should be removed as it will also be demolished. There are other more deserving Local Heritage examples in West Perth, and Council if serious about retaining examples of architectural form, use and personalities, need to provide significant incentives for retention, in fact the City has over many years, let representative examples go. The owners have undertaken their approval process, and intend to proceed with construction of providing much needed residential accommodation. Thank you for bringing this information to the Owners attention, please update your records to include the DA and BP approvals.	Noted. Development Approval for redevelopment of the site – DA2019/5117 is still current/valid with the approval expiring on 24 April 2024. BPC 2020/287 has since lapsed nearly 6 mths ago. The owner/applicant will need to apply for: • demolition permit for existing building and • a building permit complying with current applicable building code. The City's Draft Local Heritage Survey 2022 does not change anything regarding redevelopment of the property, as these matters are covered under separate planning legislation and processes. The 1903 place was put on the City's Draft Local Heritage Survey 2022, as the single storey Federation Queen Anne building was of cultural heritage significance to the municipality in accordance with Heritage Act 2018.	Recommend no change. Retain entry in LHS as Category 2 place of considerable cultural heritage significance and very important to the heritage of the locality.

The property is in the William Street Heritage Area as a contributory property of heritage significance. Busy Bee Arcade was constructed in 1894 (according to its pediments) designed by architect F.W. Upton and was the first 'shopping arcade' in Perth.	Recommend no change. Retain entry in LHS as Category 2 place of considerable cultural heritage significance and very important to the heritage of the locality.

NO.	CM REFERENCE	ADDRESS	SUBMITTER CATEGORY	NEIGHBOURHOOD	SUMMARY OF SUBMISSION/COMMENT	OFFICER RESPONSE	OFFICER RECOMMENDATION
						The building was originally tuckpointed face brick with a rendered unpainted masonry pediment. In the gold boom period, the building was occupied by a butcher, baker and a bootmaker. From 1915 until at least 1935 the building was used as a fish shop, tobacconist, fruiterers and greengrocer, bootmaker and a cafe. One tenancy was used by Wing, Hing and Co as greengrocer for over 20 years. In 1920, the post office directory lists a tenancy off William Street (along the right of way) between No. 199 and No. 201 as The Busy Bee Letter Box, and The Perth Night Watch Patrolling Co. The James Street frontage comprises a number of shops, all with re-entrant doorways, and the canopy extending across both street frontages. At some stage the ground floor became one tenancy. No sign of an arcade is evident in these photographs This Area was declared as being of cultural heritage significance by Council on 26 August 2014. Development of properties in this area are subject to the Heritage Guidelines as provided under Section 6.9 William Street Conservation Area Design Guidelines.	
12	240208/22 240211/22 240213/22 240215/22 240219/22 240264/22 240267/22 240268/22	370 Murray St	Owner	Perth	As owner of 370 Murray St strongly object to inclusion on LHS and want the property's inclusion removed. Rainmaze Pty Ltd, owner of the subject site, has engaged heritage specialist Griffith Architects and another Perth-based planning architect for advice. After careful consideration of the Draft LHS, heritage specialist Griffiths Architects conclusion is: 'By its own assessment criteria of Hercon values/factors, this place does not meet threshold for inclusion in the local heritage survey'. The Draft LHS has also been considered from a high-level from a planning perspective.	The LHS does not change development of the property. The 1910 two storey building and warehouse is of some/moderate cultural heritage significance to the municipality in accordance with provisions of Heritage Act 2018. The building took the current form of a two-storey building with rear warehouse around circa 1910. In 1915 it was Perth Shop Fitting Co, and there was 'large works and showrooms' on the site. In 1930, General Motor Sales and Services announced that their registered office was at the rear of No. 370 Murray Street. The facade of the building has stripped back detailing and dates from the Inter-War period. A 1930 image obtained from the State Library of WA shows the original two-storey building	Recommend no change. Retain entry in LHS as Category 3 place of some/moderate cultural heritage significance. Contributes to the heritage of the locality.

NO.	CM REFERENCE	ADDRESS	SUBMITTER CATEGORY	NEIGHBOURHOOD	SUMMARY OF SUBMISSION/COMMENT	OFFICER RESPONSE	OFFICER RECOMMENDATION
					Primary justifications for this objection are as follows: a) Significant modification to the Building over time has meant that no heritage appearance now visible. b) Recent major redevelopment on the Building's Western Boundary has had detrimental impact locally on the heritage streetscape. Rainmaze objects to the subject site being placed on the Draft LHS and request that it be removed to ensure it does not compromise the future site development potential.	with the stretcher bond brickwork, which has been subsequently rendered. Signage from the Perth Shop Fitting Co is evident in the driveway. The first floor window placements, gated ground floor driveway on the east side of the building, deeply profiled pinasters and parapet are still intact. In the warehouse at the rear, the original king post principal trusswork and tie downs are still evident and have been painted white. The warehouse asbestos roof has been replaced. Aerial photos show that the driveway is now part of an open aired space behind the front building, which has been maintained since the 1960s for carparking. In 2003 some trees were planted there to create a courtyard. In 2022 the refurbished building was offered for lease as office accommodation, and the advertisement online includes photos and floor plans. The rear building is an open plan warehouse, while the two-storey street front building has a modern office fit out. Considering the modifications to the original buildings and warehouse, which are important historically as a two-storey commercial building constructed in Perth during the period of development and consolidation following the gold boom, the place is of some/moderate cultural heritage significance. Unlike the Heritage List the Local Heritage Survey is not an instrument for development control and the planning provisions currently applicable remain.	
13	216926/22	38-40 Outram St	Consultant on behalf of owner	West Perth	Planning Solutions represent the owners of 38-40 Outram St and strongly object to inclusion on the LHS and want the property's inclusion removed. This submission objects to Category 3 as proposed by the City in the Draft Local Heritage Survey for former semi-detached Federation	A re-categorisation from a specified management category, requires a submission to address the cultural heritage values and statement of significance of the place that inform the level of categorisation.	Recommend no change. Retain entry in LHS as Category 3 place of some/moderate cultural heritage significance.

NO.	CM REFERENCE	ADDRESS	SUBMITTER CATEGORY	NEIGHBOURHOOD	SUMMARY OF SUBMISSION/COMMENT	OFFICER RESPONSE	OFFICER RECOMMENDATION
					bungalow houses at 38-40 Outram Street West Perth. As outlined in this submission, the uncertainty and inconsistency of the process and consequent categories is fraught and does not substantiate the category as stated for former semi-detached Federation bungalow houses at 38-40 Outram Street. The Statement of Significance for this submission, assessed against the appropriate criteria, is relevant to, and substantiates, a Category 4 listing for former semi-detached houses 38-40 Outram Street West Perth, on the City of Perth's Local Heritage Survey. The former semi-detached houses 38-40 Outram Street West Perth, originally in the Federation bungalow style of architecture has very little aesthetic or historic significance. It was one of many semi- detached houses built on a small-lots in West Perth, in the early 1900s. Significant interventions to the front, and the removal of the dividing wall have impacted the original houses that are no longer recognisable as semi-detached Federation bungalow houses in the presentation of the single frontage to the streetscape. There are no known historical associations The Local Heritage Survey recommendation for former semi-detached houses 38-40 Outram Street West Perth, is a Category 3. Category 3 can mean a possible Category 2, as alluded to in the Local Heritage Survey. Owners are entitled to certainty of the category and the implications. A Category 3 recommendation that can possibly become a Category 2, is not a definitive outcome, particularly when this place, assessed by the appropriate criteria is a Category 4 at best. For the reasons outlined in this submission, a re-classification to a Category 4 for the former	Independent Heritage Planning Consultants – Element classified the place as category 3 in 2022, as having some significance in contributing to the heritage of the locality. A category 4 classification has elements or values worth noting for community interest but otherwise makes little contribution. In the case of 38-40 Outram Street, the place has aesthetic significance as a former pair of houses built in the Federation Queen Anne style in 1905. Two passages still evident, front rooms have walls removed to create an open reception area. Presently the former pair is No. 40, and under the same owner, and has been used for offices. Post Office directories show that the attached pair was first listed in 1905. The houses were first occupied by John Coyle and George Withers. The Metropolitan Water Supply Survey plan (1954) shows an identical attached pair with full length front verandahs and the same at the rear, with steps down to a small rear yard. Aerial photos show that between 1985 and 1995 the roof covering was replaced. The original entrance doors and the windows have now been replaced with French doors. Nevertheless, the original hipped roof structure for the two semi-detached dwellings, with front gables and chimneys with rendered corbelling has been retained. The bullnosed verandah, timber posts and frieze, to front porch. Low brick fence with piers and timber pickets to both buildings all contribute to the streetscape. Forming part of a group of turn of the century houses. Houses on either side are substantially intact.	Contributes to the heritage of the locality.

NO.	CM REFERENCE	ADDRESS	SUBMITTER CATEGORY	NEIGHBOURHOOD	SUMMARY OF SUBMISSION/COMMENT	OFFICER RESPONSE	OFFICER RECOMMENDATION
					semi-detached houses 38-40 Outram Street West Perth, is requested.	In light of above analysis, do not support reclassification to Category 4.	
14	216582/22	42 Outram St	Consultant on behalf of owner	West Perth	Planning Solutions represent the owners of 42 Outram St and strongly object to inclusion on the LHS and want the property's inclusion removed. Retain entry in LHS as Category 3 place of some/moderate cultural heritage significance. Contributes to the heritage of the locality.

NO.	CM REFERENCE	ADDRESS	SUBMITTER CATEGORY	NEIGHBOURHOOD	SUMMARY OF SUBMISSION/COMMENT	OFFICER RESPONSE	OFFICER RECOMMENDATION
						effect, timber finial and pebbledash faces Outram street. The bullnosed front verandah with timber posts and decorative brackets is visible form Outram Street. Sash windows have timber framed awnings and contribute to the streetscape. Forming part of a group of turn of the century houses, which support the classification of Category 3. The former houses on the two opposite corners are substantially intact and built at a similar time to 42 Outram Street. These places, at 46 and 49 Outram St are of greater cultural heritage significance and have a Category 2 classification. In light of above analysis, do not support reclassification to Category 4.	
15	239193/22	13-15 Ord St	Consultant on behalf of owner	West Perth	Representing the owners of 13-15 Ord St (Swanline House) strongly object to inclusion on LHS and want the property's inclusion removed. 15 Ord Street is presently classified as Category 2 and will retain this classification in the LHS. It is our understanding that typically only those places classified as Category 1 have been included on the Scheme Heritage List. However, we note the Guidelines for Establishing a Heritage List, published in March 2021 indicate places classified as Category 1 and 2 should be included on the Scheme Heritage List. If it were the City's ultimate intent to add the place to the Scheme Heritage List we would strongly object to the classification and would reserve the right to make further submissions seeking a reclassification to Category 3 or 4 and to strongly object to its addition to the Scheme Heritage List.	A re-categorisation from a specified management category, requires a submission to address the cultural heritage values and statement of significance of the place that inform the level of categorisation. Independent Heritage Planning Consultants – Element classified the place as category 2 in 2022, as having considerable cultural heritage significance and very important to the heritage of the locality. A category 3 classification has elements or values of some/moderate cultural heritage significance A category 4 classification has elements or values worth noting for community interest but otherwise makes little contribution. The place has aesthetic significance as a grand two-storey Federation Queen Anne residence from 1902. Swanline has historic significance for reflecting the way of life of people who lived in this	Recommend no change. Retain entry in LHS as Category 2 place of considerable cultural heritage significance and very important to the heritage of the locality.

NO.	CM REFERENCE	ADDRESS	SUBMITTER CATEGORY	NEIGHBOURHOOD	SUMMARY OF SUBMISSION/COMMENT	OFFICER RESPONSE	OFFICER RECOMMENDATION
						location in the late nineteenth and early twentieth century. The place is a representative example of a residential property in West Perth that has undergone a change of use to commercial/professional offices with the changing character and growth of the City. In the case of 13-15 Ord Street, in light of the thorough analysis undertaken by independent Heritage Planning Consultants, do not support reclassification to Category 3 or 4. The City is yet to consider additional places for inclusion on the Local Heritage List, which will be assessed under separate legislation and process. While the DPLH Guidelines for Establishing a Heritage List, Appendix 1 – Sample Text for a Local Planning Policy – The Heritage List, does recommend that Category 1 and 2 place are the minimum threshold for inclusion on a Heritage List, the City has not yet determined a policy and approach to the addition of new places to the Heritage List.	
16	239193/22	27 Outram St	Consultant on behalf of owner	West Perth	Representing the owners of 27 Outram St, strongly object to inclusion on LHS and want the property's inclusion removed. Whilst the site has some/moderate significance, it is understood 27 Outram Street has retained its classification of Category 3 as it contributes to the heritage of the locality. Given the classification has not changed we do not have an objection to it remaining on the LHS, however, this would be on the basis it is not added to the Scheme Heritage List. If it were the City's ultimate intent to add the place to the Scheme Heritage List we would strongly object to the classification and would reserve the right to make further submissions seeking a reclassification to Category 4 and to strongly object to its addition to the Scheme Heritage List.	The City are yet to consider additional places for inclusion on the Local Heritage List, which will be assessed under separate legislation and process.	Recommend no change. Retain entry in LHS as Category 3 place of some/moderate cultural heritage significance. Contributes to the heritage of the locality.

NO.	CM REFERENCE	ADDRESS	SUBMITTER CATEGORY	NEIGHBOURHOOD	SUMMARY OF SUBMISSION/COMMENT	OFFICER RESPONSE	OFFICER RECOMMENDATION
					In light of the above comments, we seek the City's confirmation the Place will not be added to the Scheme Heritage List.		
17	239193/22	28-42 Ventnor St	Consultant on behalf of owner	West Perth	Representing the owners of 28-42 Ventnor St (HPPL House) strongly object to inclusion on LHS and want the property's inclusion removed. It appears the listing of the place is based on its association with Hancock Prospecting. Given the place is to be downgraded to Category 4 there seems little heritage value in the place remaining on the LHS. Whilst it is recognised the Hancock family has made an undeniable contribution to the development of the Nations Iron Ore industry there may be a more meaningful way for the City of Perth to celebrate West Australian pioneers of this industry. It is on this basis we respectfully request the place be removed from the LHS.	The place has been classified as Category 4 - The place has elements or values worth noting for community interest but otherwise makes little contribution.	Recommend no change. Retain entry on LHS and classification as Category 4 place – has elements of values worth noting for community interest (due to association with Hancock Prospecting which has had a profound effect on the State of WA) but otherwise makes little contribution.
18	207283/22	University of Western Australia	Custodian	Crawley	As the owner of a range of buildings included within the draft Local Heritage Survey, the University encourages its ongoing review. We support the listing of places of cultural significance for the public record and note that the listing of a place does not have a statutory implication for planning and development. In keeping with the University's Conservation Management Plan, we maintain our position that the campus should be considered for its heritage value as a whole. The campus has always accommodated a range of different building styles and types. Some of these formally heritage listed, and others are not. It is important to allow for the refreshing and maintenance of buildings to ensure their relevance in the ever-changing University environment. The campus is more strongly recognised by its collection of buildings rather than any one particular building. As such, the entire campus	The approach taken in the Draft Local Heritage Survey is to apply a local lens to places for cultural heritage survey purposes, not for planning heritage control. The City respects the comprehensive and holistic University of Western Australia Crawley Campus Conservation Management Plan prepared by Ronald Bodycoat, Robyn Taylor and Gillian Lilleyman in 2008. By way of context, the UWA campus is situated on a reserve for university purposes, the statutory authority is the Western Australian Planning Commission, not the City of Perth. Out of courtesy, the UWA Planning Team run all applications through the City's Development Approvals Unit and any heritage applications on the State Heritage Register to the Department Planning, Lands and Heritage/State Heritage Branch for comment.	No change to detail/approach recommended.

NO.	CM REFERENCE	ADDRESS	SUBMITTER CATEGORY	NEIGHBOURHOOD	SUMMARY OF SUBMISSION/COMMENT	OFFICER RESPONSE	OFFICER RECOMMENDATION
					should be included in the Local Heritage Survey, not individual buildings within their immediate setting. This is an important consideration and will help ensure that the campus and its buildings are not frozen in time. It will help reflect the integrity and totality of the physical qualities of the whole campus. Furthermore, it would encourage the constant improvement of all the existing campus assets and the pursuit of contextual excellence in any new development. The ad hoc listings of individual buildings will likely inhibit the appropriate development of the campus. Inclusion of the campus would acknowledge that the University will continue to grow organically and reshape itself according to changing circumstances and often unpredictable requirements for change over time.		
19	249411/2022	18 Emerald Terrace	Owner	West Perth	As owner of 18 Emerald Terrace strongly object to the property becoming "Heritage Listed" and want the property's inclusion removed from the Draft LHS. I acknowledge that at this point in time it is only being recorded on a list of potential heritage listing properties. However, I believe this is the start of a process that will eventually see my property heritage listed. When I purchased the property I had conducted discussions with both my adjoining neighbours about amalgamating our three properties and considering a higher density commercial/ residential development. This possibility was certainly taken into account in offering to purchase my property and the ultimate price I paid. So my issue is; if the property becomes heritage listed, who is going to compensate me for the loss of potential value that it offers in a re-development with my neighbours. The value to me of the property is far in excess of its individual value as a free standing office.	The LHS does not change development of the property. Unlike the Heritage List the Local Heritage Survey is not an instrument for development control and the planning provisions currently applicable remain. Removal from the Local Heritage Survey or a re-categorisation from a specified management category, requires a submission to address the cultural heritage values and statement of significance of the place that inform the level of categorisation. Independent Heritage Planning Consultants – Element classified the place as category 2 in 2022, as having considerable cultural heritage significance and very important to the heritage of the locality. No submission has as yet been made by the owner to address the cultural heritage values and statement of significance of the place that inform the level of categorisation.	Recommend no change. Retain entry in LHS as Category 2 place of considerable cultural heritage significance and very important to the heritage of the locality.

NO.	CM REFERENCE	ADDRESS	SUBMITTER CATEGORY	NEIGHBOURHOOD	SUMMARY OF SUBMISSION/COMMENT	OFFICER RESPONSE	OFFICER RECOMMENDATION
					Please record my objection to the proposed inclusion of my property on the preliminary register. I am seeking legal opinion on my situation, and should the property be included on any heritage list, I will instruct my lawyer to undertake whatever action is appropriate to protect my rights.	The City are yet to consider additional places for inclusion on the Local Heritage List, which will be assessed under separate legislation and process.	
20	250355/2022	23 Rheola St	Strata Unit Owner/Residents	West Perth	As Strata Unit Owners of 3/23 Rheola Street strongly object to inclusion of 23 Rheola Street on to the Draft Local Heritage Survey 2022. We have noted that there are already examples of these values relating to this architect and the style of building on the Heritage List. Whilst we understand there is a significant difference between a property that has been placed on the Heritage List and one on the LHS, we would hold the view that this building is not significant enough nor in sufficient original condition to either enter the place on the LHS or for it to be placed on the Heritage List. We understand that for the property to be on the Heritage List a more extensive and transparent process would occur. We would appreciate the opportunity to discuss further if required.	The Local Heritage Survey is a document which identifies and records information of the places which the City considers to be of cultural heritage significance to the municipality. Independent Heritage Planning Consultants – Element classified the place as category 2 in 2022, as having considerable cultural heritage significance and very important to the heritage of the locality. The place has historic significance as a block of flats designed by architects Parry and Clifton. Suffolk Flats has aesthetic significance for its Inter-War Functionalist style of architecture, which Marshall Clifton is known for. The place represents the changing character of housing in the Inter-War period, and the increased demand for housing in inner city areas in the mid-twentieth century. The City are yet to consider additional places for inclusion on the Local Heritage List, which will be assessed under separate legislation and process.	Recommend no change. Retain entry in LHS as Category 2 place of considerable cultural heritage significance and very important to the heritage of the locality.
21	250317/22	23 Rheola St	Strata Unit Owner	West Perth	As Strata Unit Owner of 1/23 Rheola Street strongly object to inclusion of 23 Rheola Street (which is subdivided into 4 strata lots) on to the Draft Local Heritage Survey 2022. I note the strata unit owners of 3/23 Rheola Street have sent in a submission, with which I concur. Furthermore, in or about 1987 there was significant fire damage to the building. The building was repaired with modifications to enable	The Local Heritage Survey is a document which identifies and records information of the places which the City of Perth considers to be of cultural heritage significance to the municipality, and as was noted, the Local Heritage Survey doesn't have any direct development implications. Independent Heritage Planning Consultants – Element classified the place as category 2 in 2022, as having considerable cultural heritage	Recommend no change. Retain entry in LHS as Category 2 place of considerable cultural heritage significance and very important to the heritage of the locality.

NO.	CM REFERENCE	ADDRESS	SUBMITTER CATEGORY	NEIGHBOURHOOD	SUMMARY OF SUBMISSION/COMMENT	OFFICER RESPONSE	OFFICER RECOMMENDATION
					the land and building from purple title to strata title. In this process the original redbrick building was painted orange. Relevantly the original building cannot now be seen. It follows there is no basis for the building to be on the LHS. The Strata Unit Owner requests the land and building be removed from the LHS.	significance and very important to the heritage of the locality The place has historic significance as a block of flats designed by architects Parry and Clifton. Suffolk Flats has aesthetic significance for its Inter-War Functionalist style of architecture, which Marshall Clifton is known for. The place represents the changing character of housing in the Inter-War period, and the increased demand for housing in inner city areas in the mid Twentieth century. The painting of the external brickwork does not irreversibly impact on the identified cultural heritage values and Statement of Significance as articulated within the attached Heritage Place Record for “Suffolk”. The City are yet to consider additional places for inclusion on the Local Heritage List, which will be assessed under separate legislation and process.

Heritage Place Record Form

For Adoption

STATEMENT OF SIGNIFICANCE

The place has aesthetic interest as a well-designed Late Twentieth Century educational building.
The place forms part of a group of education building and makes a positive contribution to the streetscape.
The place demonstrates social value with the close association that TAFE has established with the Northbridge community.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

It demonstrates the close association that TAFE has established with the Northbridge community.

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The building is an example of a well-designed Late Twentieth Century educational building. It contributes to the streetscape.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision-making body is relevant

CONDITION AND AUTHENTICITY

Condition	Good
Building Fabric Authenticity	High

HISTORY

In the early years of the Swan River colony the area to the north of Perth (now known as Northbridge) was low lying and swampy and was therefore settled more slowly than the better land closer to the river. It was also further from the river port and the main means of transport. Northbridge is an inner suburban area, named because it is just north of Perth across the railway bridge. It was approved as a suburb name in 1982.
In 1854 some of the swampy land to the north of Perth was drained producing some fertile land for farming and later subdivision. The land was subdivided into allotments circa 1860. Land in the area was taken up by discharged soldiers, artisans and small landholders. The area at this period was characterised by small cottages and businesses.
In 1881, the railway from Fremantle to Guildford was opened and became the main transport route. From that

period commerce and trade tended to be more fashionable with smaller commercial enterprises and manufacturing to the north. It was less fashionable to live north of the railway line, however the area was close to the city and during the 1890's and early 1900's was substantially redeveloped with further subdivision of lots and mixed residential and commercial development. A number of trade and community organisations had their origins in the area at this time.
Over the years the population of the area changed as people relocated to suburban areas of the city. As a result, Northbridge became the home for successive migrant communities. for example, communities including Greek, Italian, Chinese and more recently Vietnamese migrants have settled here as property remained relatively cheap and had the advantage of being close to the city. These communities have over the years given this area a distinctive character, generally recycling the existing buildings rather than redeveloping the area. (Extracted from M. Pitt Morrison and J. White in C.T. Stannage, A New History of Western Australia; U.W.A. 1981 and Michael Bosworth, Thematic Historical framework, City of Perth Unpub. 1995).

HISTORY

In the early years of the Swan River colony the area to the north of Perth (now known as Northbridge) was low lying and swampy and was therefore settled more slowly than the better land closer to the river. It was also further from the river port and the main means of transport. Northbridge is an inner suburban area, named because it is just north of Perth across the railway bridge. It was approved as a suburb name in 1982. In 1854 some of the swampy land to the north of Perth was drained producing some fertile land for farming and later subdivision. The land was subdivided into allotments circa 1860. Land in the area was taken up by discharged soldiers, artisans and small landholders. The area at this period was characterised by small cottages and businesses.
In 1881, the railway from Fremantle to Guildford was opened and became the main transport route. From that period commerce and trade tended to be more fashionable with smaller commercial enterprises and manufacturing to the north. It was less fashionable to live north of the railway line, however the area was close

to the city and during the 1890's and early 1900's was substantially redeveloped with further subdivision of lots and mixed residential and commercial development. A number of trade and community organisations had their origins in the area at this time. Over the years the population of the area changed as people relocated to suburban areas of the city. As a result, Northbridge became the home for successive migrant communities. for example, communities including Greek, Italian, Chinese and more recently Vietnamese migrants have settled here as property remained relatively cheap and had the advantage of being close to the city. These communities have over the years given this area a distinctive character, generally recycling the existing buildings rather than redeveloping the area. (Extracted from M. Pitt Morrison and J. White in C.T. Stannage,
A New History of Western Australia; U.W.A. 1981 and Michael Bosworth, Thematic Historical framework, City of Perth Unpub. 1995). The homes built in Perth the 1890's and early 1900's were generally larger and more elaborately detailed than the earlier simple cottages there replaced. Although influenced in their design by homes of Victoria in particular, due to the influx of migrants from the eastern states, houses in Perth tended to be constructed as single detached, or sometimes pairs of attached houses, rather than the extensive rows of terrace houses found in eastern Australia. Houses were generally single storey brick with corrugated iron roofs. Some more prestigious homes had slate or tiled roofs. Stucco decoration was popular as was wrought iron lace and timber fretwork.
In 1929 the place was listed as being the address for the Women's Christian Temperance Union, as well as containing apartments. In 1949 it was operating as the Frances Willard Hostel.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement and mobility - 107 Settlements
4. Social and civic activities - 404 Community services and utilities
4. Social and civic activities - 402 Education and science

AUSTRALIAN HISTORIC THEME

4. Building Settlements, Town and Cities - 4.1.2 Making suburbs
6. Educating - 6.3 Training people for the workplace

STATEMENT OF SIGNIFICANCE

The place is of aesthetic significance as a Federation Queen Anne style residence with a façade of symmetrical design.
The place is of historic significance as it reflects the expansion and development of residential and commercial buildings on the city fringes during the rapid population increase of the 1890's gold boom and the early years of the twentieth century.
The place has historic significance as it represents the changing demographic character of the city fringe of Perth as expansion of transport services enabled the more well-to-do members of society to move further a afield to newly developed suburbs.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

It reflects the expansion and development of residential and commercial buildings on the city fringes during the rapid population increase of the 1890's gold boom and the early years of the twentieth century.
The place has historic significance as it represents the changing demographic character of the city fringe of Perth as expansion of transport services enabled the more well-to-do members of society to move further a afield to newly developed suburbs.

HISTORY

St John's Church was designed by the architect Richard Spanney (Spangenberg) in c1934 using ironstone from Darlington. Prior to this, the Lutherans had a church and school in Fitzgerald Street, on a block of land granted to them for this purpose by the Government. This was soon after the arrival of their first pastor E. Fischer, in April 1901, who established the first Lutheran congregations in Western Australia.
During the First World War, the Lutherans suffered considerable hostility because of their German ancestry. This resulted in a number of families returning to Europe after the War. Those who remained, undertook to build

a new church with funds from the sale of some property, and with the help of members. Building materials used in the original church were re-used in the construction of the new church in Aberdeen Street. The new Church was dedicated on Sunday June 7th, 1936.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement and mobility - 104 Land allocation and subdivision
4. Social and civic activities - 406 Religion

AUSTRALIAN HISTORIC THEME

PHYSICAL DESCRIPTION

Architectural Style 1 General	Federation (c.1890-c.1915)
Architectural Style 1 Specific	Queen Anne
Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

The place is a pair of two-storey Federation Queen Anne style semidetached houses built of stone, brick and iron. The houses are arranged symmetrically around a central party wall and have a richly detailed roofscape, limestone walls with brick quoins to the front and return facades and cast iron balustrade panels around the upper verandah level.
The place has a landmark quality in Museum Street, and in the local area, as the only surviving two-storey semi-detached pair of residences with some fine decorative fabric and construction detailing.

Walls 1 Material	Brick
Walls 2 Material	Stone - Limestone
Roof Material	Metal - Corrugated Iron
Architect	
Builder	George Napier
Other Associations	Mrs Lydia Farmer- Former owner

HISTORY

The pair of houses at 1 Museum Street, originally called Limbo Street but renamed c. 1895-98, were constructed as an investment property during the Gold Boom in Western Australia when there was a massive demand for accommodation in Perth. The materials of its construction, its design, and the nature of the accommodation provided are indicative of the relatively affluent tenants for whom the place was intended. The houses were built in 1897 for Mrs Lydia Farmer by builder, George Napier. Little is known of Lydia Farmer although she owned other property in nearby Francis Street where she had a house designed by the well-known architect, J. J. Talbot Hobbs. She is not recorded as having lived at 1 Museum Street which appears to have been tenanted throughout her ownership.
There was little change to the place through the first half of the twentieth century although some renovations

were carried out in the 1950-60's and by the mid 1970's there were plans for the construction of a new Technical College to be built on land extending from Aberdeen through to Francis Street. Concern was voiced over the future of the houses and they were assessed, but not classified by the National Trust of Australia (WA). The Crown acquired the land for construction of the new technical college, including 1 Museum Street, and development commenced in the mid 1980's. It was proposed that 1 Museum Street be demolished as it was considered to have little architectural significance and the estimated costs to upgrade it considered too high. An adjoining house at 25 Museum Street was demolished in 1979 but 1 Museum Street remained and was used as a site office during construction of the technical college.
The place was occupied by the Australian Writers' Guild between 1989 -1998 but there was minimal maintenance undertaken at the place resulting in further deterioration. At present 1 Museum Street is occupied by the offices of the International Centre of the Central Institute of Technology (TAFE).

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement and mobility - 104 Land allocation and subdivision

AUSTRALIAN HISTORIC THEME

2. Peopling Perth - 2.4.2 Migrating to seek opportunity
4. Building Perth (Settlements & Cities) - 4.1.2 Making suburbs
8. Developing Perth's Cultural Life - 8.10.4 Designing & building fine buildings
8. Developing Perth's Cultural Life - 8.13 Living in cities and suburbs

STATEMENT OF SIGNIFICANCE

The place is significant as an attractive pair of two storey semi-detached houses in the Federation Queen Anne style with richly detailed roofscape, cast iron balustrades and fine masonry.
The place has a clearly identifiable residential form and is significant for providing evidence of the former residential nature of much of the locality and with the rapid expansion of building in Western Australia during the Gold Boom.
The place is valued by the community for its aesthetic contribution to the area as evidenced by the community's response to the proposed demolition and redevelopment.
The place is an uncommon building type in Western Australia.
The place is a good example of the Federation Queen Anne style and is representative of the nature of accommodation for relatively affluent tenants in the Gold Boom era.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place has a clearly identifiable residential form and is significant for providing evidence of the former residential nature of much of the locality and with the rapid expansion of building in Western Australia during the Gold Boom.

Archaeology	
Physical Description	

Modest three cottages with solid walls and steep hip roofs with a basic four room layout. They have lathe and plaster ceilings and small paved double hung windows. The additions made just prior to the turn of the century provided the basic cottages with a more prestigious front. The additional rooms are high with moulded skirtings and architraves, cornices and simpler double hung windows. At some stage, the front walls were tuck pointed. For more detailed discussions on the Physical Evidence refer to Ronald Bodycoat, Architect, 'Three Cottages, Aberdeen Street, Northbridge' prepared for the Ministry for Planning in December 1997 and revised in September 2001, following their restoration in 2000.

HISTORY

No. 62, originally a c1860s worker's cottage which was extended and refurbished in the late 1890s. The place had a succession of residents over the decades.
No. 64, originally a c1860s worker's cottage which was extended and refurbished in the 1890s. The place had a succession of residents over the decades. During the early 1900s, Mr Ah Moy operated a greengrocers from the premises, possibly from a building on the site that no longer exists. The place was a lodging house during the 1920s, 1930s and 1940s.
No. 66, originally a c1860s worker's cottage which had a succession of residents over the years. It was extended and refurbished in the late 1890s. During the early decades of the twentieth century, residents included an auctioneer, a nurse, and various residents of Chinese descent, including Mr Bor Daerping, a Chinese herbalist.
The archaeological examination and study carried out by the Centre for Archaeology at University of Western Australian in 1993 records that Henry Gibbs held title to the land at the time of his death in 1897 at which point his family subdivided the land. The characteristics of the simple cottages - the standard and layout of the houses, and the level and detail of decorative elements - indicate a working class use of the site.
The additions of the late 1890s, probably after 1897, in the Victorian architectural style then in vogue for small residential buildings in Perth, were applied in the same general character to the front of all Three Cottages, improving the standard of accommodation and upgrading their presentation to the street environment in accordance with regulations and social expectations then in place. Archaeological evidence has established that the structure, now lost, which originally filled the gap between Cottages at 64 & 66 Aberdeen Street, was constructed about the time of subdivision in 1897; that structure is recorded as being demolished in 1950.
Two of the Cottages were in residential use until the 1960s when they are recorded as being abandoned; the third was occupied until 1982.
Since then, all Three Cottages were in a dilapidated state until they were fully restored by the EPRA. They are now used as professional offices.

WESTERN AUSTRALIAN HISTORIC THEME

3. Occupations - 306 Domestic activities

AUSTRALIAN HISTORIC THEME

4. Building Settlements, Town and Cities - 4.1.2 Making suburbs
8. Developing Australia's Cultural Life - 8.12 Living in and around Australian Homes

STATEMENT OF SIGNIFICANCE

The place has interest as a well detailed Federation Queen Anne style of residential building.
The place forms an integral part of a group of residential buildings and contributes to the historic character of the area.
The place reflects colonial urban residential settings prior to the gold rush period.
The place reflects the expansion and development of residential and commercial buildings on the city fringes during the rapid population increase if the 1890s gold boom and the early years of the twentieth century.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

It reflects the expansion and development of residential and commercial buildings on the city fringes during the rapid population increase if the 1890s gold boom and the early years of the twentieth century.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The cottage attached to the rear represents one of the earliest surviving examples of c1860s housing in the City.

For Adoption

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

The cottage attached to the rear represents one of the earliest surviving examples of c1860s housing in the City.

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The place reflects colonial urban residential settings prior to the gold rush period.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

The place represents the changing character of the local community from the typically heterogeneous population of the gold boom of the 1890s to the increasing concentration of ethnic minorities during the twentieth century.

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place has interest as a well detailed Federation Queen Anne style of residential building.
The place is representative of the architectural styles at the two principle periods of construction, i.e. the 1860s and the late nineteenth century.
The place forms an integral part of a group of residential buildings and contributes to the historic character of the area.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Fair to Good
Building Fabric Authenticity	Medium authenticity. Buildings have been restored.

CLASSIFICATION OF SIGNIFICANCE

Exceptional – Category 1 - Essential to the heritage of the locality. Rare or outstanding example.

HISTORY

The area to the north of Perth (now known as Northbridge) was valued by the Whadjuk Nyoongar for its low lying and swampy lakes system, which provided abundant resources. After colonisation, this land was not settled as quickly as drier areas on the ridge of Perth. In 1854 some of the swampy land to the north of Perth was drained producing fertile land for farming. As the population grew during the convict era of the 1850s the land was subdivided into allotments circa 1860 and taken up by discharged soldiers, artisans and small landholders. The area at this period was characterised by small cottages and businesses.
In 1881 the railway from Fremantle to Guildford was opened and became the main transport route. From that period commerce and trade tended to focus on smaller commercial enterprises and manufacturing to the north. It was less fashionable to live north of the railway line, however the area was close to the city and during the 1890s and early 1900s was substantially redeveloped with further subdivision of lots and mixed residential and commercial development. This was an immediate response to the tripling of the State's population in the recent decade due to the gold boom, and a pressing demand for affordable accommodation.
A number of trade and community organisations had their origins in the area at this time.
Over the years the population of the area changed as people relocated to suburban areas of the city. As a result, Northbridge became the home for successive migrant communities. for example, communities including Greek, Italian, Chinese and more recently Vietnamese migrants have settled here as property remained

relatively cheap and had the advantage of being close to the city. These communities have over the years given this area a distinctive character, generally recycling the existing buildings rather than redeveloping the area.
Northbridge, named because it is just north of Perth across the railway bridge, was approved as a suburb name in 1982. The former house at 63 Aberdeen Street dates from 1907. The Post Office Directory lists it for the first time in 1908, with the new occupant Samuel R. Maley.
In 1917 Alexander Afflick Patman was the listed resident. With his wife Maud, the family grew to nine children. The Patman family occupied the house for more than 30 years, up to at least 1949.The Metropolitan Water Supply Survey plan dated 1950 shows the footprint of the house with two projecting bays to the street, and various outbuildings to the rear, including a brick garage.
As 2021 the house is a restaurant. An addition has been made to the west side to expand the restaurant space, and the front has brick pillars and a wall to the street.

STATEMENT OF SIGNIFICANCE

The place has aesthetic and historic significance as a Federation Queen Anne former residence built in 1907.
It is a reminder of the earlier character of this area of Perth as primarily residential.
It has historical value and associations with the Northbridge Greek community due to its former use at the Pittokos Night School.
It represents the more recent development pressures of adaptive re-use into commercial, retail and restaurant spaces that Northbridge is known for in the 21st Century.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place is important in demonstrating the evolution of Northbridge's history.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

The place has potential to yield information on the former use of the residence as the Pittakos Night School.

For Adoption

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The place illustrates a way of life of adapting substantial residences within Northbridge for a variety of cultural, educational and uses over the length of the 20th century.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

The place exhibits the aesthetic characteristics of an adapted Queen Anne Federation villa built in the early 20th century.

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The place has an association with Northbridge Greek community, due to its former use as the Pittakos Night School.

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

White in C.T. Stannage, A New History of Western Australia; U.W.A. 1981 and Michael Bosworth, Thematic Historical framework, City of Perth Unpub. 1995).
Post office directories for No. 70 indicate various people have occupied the place, possibly since the late 1890s, however, further research is needed to clarify this. For some years, single names are listed for the place, at other times it operated as a boarding house. For example, in 1924 Madame Stephano, a masseuse, and Mrs Helena Stevens, are listed. In 1929 it is listed as a lodging house run by Mrs R. F. Buckley.

HISTORY

A hotel and stables are recorded on this site from at least 1890, when a Mr W. Love was the owner. Since that time, the hotel has had several name changes.
In 1900 it is listed as the Cosmopolitan Hotel; in 1910 the Union Hotel, then the Red Lion Hotel in 1940. The place was subsequently renamed the Aberdeen Hotel. In 1886 a hotel and stables were recorded in the rate book, where the house was previously recorded. John Jones, a brewer, leased the hotel for five years. In 1891 N. Routledge leased the property for ten years. A two-storey building was built next to the hotel in 1892 and was known as Balcony House and was eventually part of the hotel complex.
The lease changed hands after N. Routledge and in 1897 the hotel was noted as the Cosmopolitan in the rates book. In 1898 buildings were constructed around the hotel. In 1901 works to the hotel's bar and accommodation rooms were approved. In 1904 Friedrich J.L.T Schruth acquired the shop and house on the west side of the hotel. Friedrich Schruth had previously owned the Royal Hotel in Wellington Street. The family owned and

leased the hotel which changed its name in 1905 to the Union Hotel. After his death, the licensees changed a few times, however the Schruth family became the licensee again with Heinrich Schruth taking over from 1917 to 1927. Changes in licensees often occurred at this time due to the high cost.
Further alterations were carried out in 1922 which incorporated the shop and building adjacent to the hotel. The colonnades were also built on the ground and first floors at this time. In the 1950s the name changed to the Red Lion hotel and further internal changes occurred in the subsequent decades. In the 1980s the hotel became an important place for Perth's gay and lesbian community to meet and socialise. Stages were set up at the venue for entertainment during this time.
The hotel was acquired by the Main Roads Department in 1996, along with a number of other properties along the length of the proposed Northbridge Tunnel development.

HISTORY

The history of the occupancy of this house and site is unclear. A number of names of people are listed for the house and/or other dwellings in the vicinity which may have been located between No. 90 and the hotel, or behind.
Research into the hotel may shed some light on this site, as a Water and Sewerage map for 1950 suggests the hotel had been extended over land next to No. 90. In 1900, No. 90 appears to have been the residence of William Burns, part owner of the bakery, Brown and Burns, which is listed at No. 84. This may have been located behind the house.
In 1904, Lee Jones is listed for No. 90, then J. Clarke in 1924 and 1929. Mr Duffy, a plumber, is listed for 1935/36 and 1949. Edward Letch is listed at No. 88 in 1893, 1897, 1900 and 1904.
In 1910 there is a listing for a No. 86, as a bonded store. It may have been sometime after, c1904 that the hotel was extended.

HISTORY

In the early years of the Swan River colony the area to the north of Perth (now known as Northbridge) was low lying and swampy and was therefore settled more slowly than the better land closer to the river. It was also further from the river port and the main means of transport. Northbridge is an inner suburban area, named because it is just north of Perth across the railway bridge. It was approved as a suburb name in 1982. In 1854 some of the swampy land to the north of Perth was drained producing some fertile land for farming and later subdivision. The land was subdivided into allotments circa 1860. Land in the area was taken up by discharged soldiers, artisans and small landholders. The area at this period was characterised by small cottages and businesses. In 1881, the railway from Fremantle to Guildford was opened and became the main transport route. From that period commerce and trade tended to be more fashionable with smaller commercial enterprises and manufacturing to the north. It was less fashionable to live north of the railway line, however the area was close to the city and during the 1890's and early 1900's was substantially redeveloped with further subdivision of lots and mixed residential and commercial development.
A number of trade and community organisations had their origins in the area at this time. Over the years the population of the area changed as people relocated to suburban areas of the city. As a result, Northbridge became the home for successive migrant communities. for example, communities including Greek, Italian, Chinese and more recently Vietnamese migrants have settled here as property remained relatively cheap and

had the advantage of being close to the city. These communities have over the years given this area a distinctive character, generally recycling the existing buildings rather than redeveloping the area. (Extracted from M. Pitt Morrison and J. White in C.T. Stannage, A New History of Western Australia; U.W.A. 1981 and Michael Bosworth, Thematic Historical framework, City of Perth Unpub. 1995). The homes built in Perth the 1890's and early 1900's were generally larger and more elaborately detailed than the earlier simple cottages there replaced. Although influenced in their design by homes of Victoria in particular, due to the influx of migrants from the eastern states, houses in Perth tended to be constructed as single detached, or sometimes pairs of attached houses, rather than the extensive rows of terrace houses found in eastern Australia. Houses were generally single storey brick with corrugated iron roofs. Some more prestigious homes had slate or tiled roofs. Stucco decoration was popular as was wrought iron lace and timber fretwork.
The West Australian 11 Feb 1920 notes that this property was being sold by auction along with No. 94. The advertisement notes that the brick villa contains five good main rooms, vestibule, maid's room, kitchen. It adjoins No. 94 by a joint right of way.
In 1902 James Gill advertised his work of gravel driveways, paths and carriage drives; asphalt tennis courts, lawns, turfed and concrete cricket pitches, wood paved stables, drainage from this property. There were several people listed at the property in the early twentieth century.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement and mobility - 104 Land allocation and subdivision

AUSTRALIAN HISTORIC THEME

4. Building Settlements, Town and Cities - 4.1.2 Making suburbs

STATEMENT OF SIGNIFICANCE

The place has some interest as a modestly detailed Federation Queen Anne style of residential building.
The place reflects the expansion and development of residential and commercial buildings on the city fringes during the rapid population increase of the 1890's gold boom and the early years of the twentieth century.
The place represents the changing demographic character of the city fringe of Perth as expansion of transport services enabled the more well-to-do members of society to move further afield to newly developed suburbs.
The place represents the changing character of the local community from the typically heterogeneous population of the gold boom of the 1890's to the increasing concentration of ethnic minorities in the course of the twentieth century.
The place is representative as an example of a modest residential building dating from the late nineteenth and early twentieth century.

HISTORY

This residence is indicated on the City of Perth's c1895 Water Map. Mrs M. Finngean is listed in the Post Office directories as running a lodging house there in 1924 and 1929, and Mrs Daisy King is listed in 1935-36, the place still operating as a lodging house. Some of the street numbers along Aberdeen Street were to change over the years and it is believed that this was originally No. 102, the home of Mrs Von Bibra, who acquired Lot 323 in 1905 and presumably built this house. The place then operated for a number of years as a women's health care house.

HISTORY

The area to the north of Perth (now known as Northbridge) was valued by the Whadjuk Nyoongar for its low lying and swampy lakes system, which provided abundant resources. After colonisation, this land was not settled as quickly as drier areas on the ridge of Perth. In 1854 some of the swampy land to the north of Perth was drained producing fertile land for farming. As the population grew during the convict era of the 1850s the land was subdivided into allotments circa 1860 and taken up by discharged soldiers, artisans and small landholders. The area at this period was characterised by small cottages and businesses.
In 1881 the railway from Fremantle to Guildford was opened and became the main transport route. From that period commerce and trade tended to focus on smaller commercial enterprises and manufacturing to the north. It was less fashionable to live north of the railway line, however the area was close to the city and during the 1890s and early 1900s was substantially redeveloped with further subdivision of lots and mixed residential and commercial development. This was an immediate response to the tripling of the State's population in the recent decade due to the gold boom, and a pressing demand for affordable accommodation.
A number of trade and community organisations had their origins in the area at this time. Over the years the population of the area changed as people relocated to suburban areas of the city. As a result, Northbridge

became the home for successive migrant communities. for example, communities including Greek, Italian, Chinese and more recently Vietnamese migrants have settled here as property remained relatively cheap and had the advantage of being close to the city. These communities have over the years given this area a distinctive character, generally recycling the existing buildings rather than redeveloping the area. Northbridge, named because it is just north of Perth across the railway bridge, was approved as a suburb name in 1982.
The row of five shops on the corner of Lake and Aberdeen Street was originally numbered 111-119. The Post Office Directory lists them for the first time in 1897. Numbering changed in 1908 to the present-day 105-113.
The Re Store was located on the corner No. 105-107 from 1936. The business was founded in 1936 by John Re, the son of a Sicilian immigrant and grocer, who had stores in Fremantle and James Street, Northbridge. At the height of the Depression, Mr. Re pawned his wife Maria's engagement ring in order to purchase the building in Northbridge. After WWII and the influx of migrants from Italy, The Re Store became a home away from home for them, making available Italian foods, books and magazines. John's insight and ambition saw him expanding their product range and as a result their business grew.
The Re group established European Foods Wholesalers and supplied a burgeoning hospitality industry in Perth, importing cheeses, pasta, olive oil, chocolates and many more interesting products from all over Europe. John Re began roasting coffee under the brand Braziliano. He designed the artwork and the logo himself. To this day Braziliano coffee can be found in cafes and restaurants around Perth and is one of the largest coffee roasters in Perth. A second Re Store location was opened in West Perth in 1955, relocating to Leederville in 1974. The Northbridge store is now located opposite the original site at 72 Lake Street. Today both stores are still operating by descendants of John Re. The Re Store is most often cited as the originator of the continental roll ('the conti roll'), and the Re Store is considered a Perth institution. (See Re Store Family History for early photos of 105-113 Aberdeen Street. https://the-re-store.com.au/family-history/)Historical photographs show that the shops had re-entrant doors, tiled from the ground to windowsill height, which was low.
The Metropolitan Water Supply Survey plan dated 1949 shows the re-entrant door, and a verandah along the front and around the corner. At that time, No. 105 did not wrap around the corner along Lake Street, as it does today, connecting to the adjacent building. There was access to the rear from Lake Street to a long-galvanised iron structure. As at 2021, the building appears to be vacant. The street fronts have been heavily modified, and there have been additions to the Lake Street and Aberdeen Street ends of the original building. The parapet conceals the roof. The moulded detail delineating each shop remains the same as 1930s photographs, and the awning features pressed tin lining. There is potential for restoration of the Federation Free Classical style building.

HISTORY

The area to the north of Perth (now known as Northbridge) was valued by the Whadjuk Nyoongar for its low lying and swampy lakes system, which provided abundant resources. After colonisation, this land was not settled as quickly as drier areas on the ridge of Perth. In 1854 some of the swampy land to the north of Perth was drained producing fertile land for farming. As the population grew during the convict era of the 1850s the land was subdivided into allotments circa 1860 and taken up by discharged soldiers, artisans and small landholders. The area at this period was characterised by small cottages and businesses.
In 1881 the railway from Fremantle to Guildford was opened and became the main transport route. From that period commerce and trade tended to focus on smaller commercial enterprises and manufacturing to the north. It was less fashionable to live north of the railway line, however the area was close to the city and during the 1890s and early 1900s was substantially redeveloped with further subdivision of lots and mixed residential and commercial development. This was an immediate response to the tripling of the State's population in the recent decade due to the gold boom, and a pressing demand for affordable accommodation.
A number of trade and community organisations had their origins in the area at this time. Over the years the population of the area changed as people relocated to suburban areas of the city. As a result, Northbridge became the home for successive migrant communities. for example, communities including Greek, Italian,

Chinese and more recently Vietnamese migrants have settled here as property remained relatively cheap and had the advantage of being close to the city. These communities have over the years given this area a distinctive character, generally recycling the existing buildings rather than redeveloping the area. Northbridge, named because it is just north of Perth across the railway bridge, was approved as a suburb name in 1982.
There was a building on the north west corner of Lake and Aberdeen Street from 1897, occupied by Alfred, Butcher, grocer. It is likely it was always a two-storey building which provided residences in the upper floor for the business operator/s. The building was listed as No. 112 Aberdeen Street, and also as 81 Lake Street.
From 1904 to 1938, the building was No. 112, Herbert Maher, grocer, followed by Paul Bordoni, grocer from 1939. In 1940 the upper floor was converted into 'Devon Flats.' (No. 114). Paul and Teresa Bordoni lived in Flat 5 and continued to operate the grocery store on the ground floor corner premises.
The Metropolitan Water Supply Survey plan dated 1949 shows No. 112 is the portion facing Aberdeen Street, and No. 81 is the Lake Street side. There is a galvanised iron building labelled 'Stables' adjacent to the building on the Lake Street side.
In 2011 the place was Backpackers International. It closed in 2018. The building has had several phases of modification. In 2022 it is undergoing a refurbishment.

HISTORY

In the early years of the Swan River colony the area to the north of Perth (now known as Northbridge) was low lying and swampy and was therefore settled more slowly than the better land closer to the river. It was also further from the river port and the main means of transport. Northbridge is an inner suburban area, named because it is just north of Perth across the railway bridge. It was approved as a suburb name in 1982. In 1854 some of the swampy land to the north of Perth was drained producing some fertile land for farming and later subdivision. The land was subdivided into allotments circa 1860. Land in the area was taken up by discharged soldiers, artisans and small landholders. The area at this period was characterised by small cottages and businesses. In 1881, the railway from Fremantle to Guildford was opened and became the main transport route. From that period commerce and trade tended to be more fashionable with smaller commercial enterprises and manufacturing to the north. It was less fashionable to live north of the railway line, however the area was close to the city and during the 1890's and early 1900's was substantially redeveloped with further subdivision of lots and mixed residential and commercial development.
A number of trade and community organisations had their origins in the area at this time. Over the years the population of the area changed as people relocated to suburban areas of the city. As a result, Northbridge

became the home for successive migrant communities. for example, communities including Greek, Italian, Chinese and more recently Vietnamese migrants have settled here as property remained relatively cheap and had the advantage of being close to the city. These communities have over the years given this area a distinctive character, generally recycling the existing buildings rather than redeveloping the area. (Extracted from M. Pitt Morrison and J. White in C.T. Stannage, A New History of Western Australia; U.W.A. 1981 and Michael Bosworth, Thematic Historical framework, City of Perth Unpub. 1995). The homes built in Perth the 1890's and early 1900's were generally larger and more elaborately detailed than the earlier simple cottages there replaced. Although influenced in their design by homes of Victoria in particular, due to the influx of migrants from the eastern states, houses in Perth tended to be constructed as single detached, or sometimes pairs of attached houses, rather than the extensive rows of terrace houses found in eastern Australia. Houses were generally single storey brick with corrugated iron roofs. Some more prestigious homes had slate or tiled roofs. Stucco decoration was popular as was wrought iron lace and timber fretwork.
This residence appears on the c.1895 Water Map for the City of Perth. Although the street numbers have changed along Aberdeen Street, photographic evidence and listings in the Post Office directories suggest that this was once the home of Neil McNeil, the prominent West Australian businessman. Prior to 1898 McNeil had a mansion, 'The Cliffe', built by architect J. J. Talbot Hobbs in Peppermint Grove. A photograph of 116 Aberdeen Street, dated 1893 and captioned as the home of Neil McNeil, and various references in the Post Office directories for 1904 (then listed as No.118) and 1915, suggests this was a town residence both before and after the construction of 'The Cliffe'. There were also other residents listed for No.118 (now No.116), for example, James Capom (PO directory for 1893-6,) and Caporn and Frederick Draper (builder), tor 1897, and George Ferrier and Frederick Draper, for 1900. In 1924, Mrs H. Jersoe was listed.

HISTORY

This house was apparently the residence of the Hon. Frederick Piesse, c.1897, then of the prominent Perth builder Robert O. Law (1900 and 1904 PO Directories). Law was involved with contract work on the City's sewerage system, and the State's railways, as well as undertaking major building projects, such as the Perth Mint, Harry Boan's department store, and Surrey Chambers for Neil McNeil, who lived next door at No. 118. Another well-known identity in the neighbourhood at this time was J. S. Battye, who lived across the road at 'Nuestro Nido'. In 1924, a Miss M. Scott, a dancing teacher, lived there with Mr Walter Scott.

Physical Description	

Single storey residential building with medium pitched hipped and gabled roof. Prominent cornice pointed arched air vent to gable. Roof tiles not original. Front windows and verandah modified. The original front door with sidelights and fanlights remains extant, however the front windows were replaced circa 1050s. The front verandah was replaced with a concrete slab, steel posts and balustrade. The building features elaborate eaves brackets with a decorative leaf motif. The only other known example being on the adjacent house. Internally the building has undergone some alterations circa 1950s. Two rooms have been opened into one and a new fireplace constructed. The building retains two original marble fireplaces one of which has been relocated. There are six original rooms and a central passage with moulded decoration. Leadlights to the passage door and front door are probably not original but are not recent and are finely executed. The proportions of the rooms are generous. The building is part of an intact group of heritage places. The house was originally identical to the adjacent house which is more intact externally.

HISTORY

In the early years of the Swan River colony the area to the north of Perth (now known as Northbridge) was low lying and swampy and was therefore settled more slowly than the better land closer to the river. It was also

further from the river port and the main means of transport. Northbridge is an inner suburban area, named because it is just north of Perth across the railway bridge. It was approved as a suburb name in 1982. In 1854 some of the swampy land to the north of Perth was drained producing some fertile land for farming and later subdivision. The land was subdivided into allotments circa 1860. Land in the area was taken up by discharged soldiers, artisans and small landholders.
The area at this period was characterised by small cottages and businesses. In 1881, the railway from Fremantle to Guildford was opened and became the main transport route. From that period commerce and trade tended to be more fashionable with smaller commercial enterprises and manufacturing to the north. It was less fashionable to live north of the railway line, however the area was close to the city and during the 1890's and early 1900's was substantially redeveloped with further subdivision of lots and mixed residential and commercial development.
A number of trade and community organisations had their origins in the area at this time. Over the years the population of the area changed as people relocated to suburban areas of the city. As a result, Northbridge became the home for successive migrant communities. for example, communities including Greek, Italian, Chinese and more recently Vietnamese migrants have settled here as property remained relatively cheap and had the advantage of being close to the city. These communities have over the years given this area a distinctive character, generally recycling the existing buildings rather than redeveloping the area. (Extracted from M. Pitt Morrison and J. White in C.T. Stannage, A New History of Western Australia; U.W.A. 1981 and Michael Bosworth, Thematic Historical framework, City of Perth Unpub. 1995).
The homes built in Perth the 1890's and early 1900's were generally larger and more elaborately detailed than the earlier simple cottages there replaced. Although influenced in their design by homes of Victoria in particular, due to the influx of migrants from the eastern states, houses in Perth tended to be constructed as single detached, or sometimes pairs of attached houses, rather than the extensive rows of terrace houses found in eastern Australia. Houses were generally single storey brick with corrugated iron roofs. Some more prestigious homes had slate or tiled roofs. Stucco decoration was popular as was wrought iron lace and timber fretwork. Col Joseph A Campbell was listed at the property from 1910 until 1933. He was the secretary of St John Ambulance. In 1933 Peter Klkulas was listed at the property.
The house was purchased by the family of Mrs Malaxos as a family home in 1933. The building was subsequently altered internally and externally in the style of the period. The building originally had extensive gardens featuring fruit trees and vegetables, stables and a brick well which is extant in 2000.

WESTERN AUSTRALIAN HISTORIC THEME

HISTORY

In the early years of the Swan River colony the area to the north of Perth (now known as Northbridge) was low lying and swampy and was therefore settled more slowly than the better land closer to the river. It was also further from the river port and the main means of transport. Northbridge is an inner suburban area, named because it is just north of Perth across the railway bridge. It was approved as a suburb name in 1982. In 1854 some of the swampy land to the north of Perth was drained producing some fertile land for farming and later subdivision. The land was subdivided into allotments circa 1860. Land in the area was taken up by discharged soldiers, artisans and small landholders. The area at this period was characterised by small cottages and businesses. In 1881, the railway from Fremantle to Guildford was opened and became the main transport route. From that period commerce and trade tended to be more fashionable with smaller commercial enterprises and manufacturing to the north. It was less fashionable to live north of the railway line, however the area was close to the city and during the 1890's and early 1900's was substantially redeveloped with further subdivision of lots and mixed residential and commercial development. A number of trade and community organisations had their origins in the area at this time. Over the years the population of the area changed as people relocated to suburban areas of the city. As a result, Northbridge became the home for successive migrant communities. for

example, communities including Greek, Italian, Chinese and more recently Vietnamese migrants have settled here as property remained relatively cheap and had the advantage of being close to the city. These communities have over the years given this area a distinctive character, generally recycling the existing buildings rather than redeveloping the area. (Extracted from M. Pitt Morrison and J. White in C.T. Stannage, A New History of Western Australia; U.W.A. 1981 and Michael Bosworth, Thematic Historical framework, City of Perth Unpub. 1995). The homes built in Perth the 1890's and early 1900's were generally larger and more elaborately detailed than the earlier simple cottages there replaced. Although influenced in their design by homes of Victoria in particular, due to the influx of migrants from the eastern states, houses in Perth tended to be constructed as single detached, or sometimes pairs of attached houses, rather than the extensive rows of terrace houses found in eastern Australia. Houses were generally single storey brick with corrugated iron roofs. Some more prestigious homes had slate or tiled roofs. Stucco decoration was popular as was wrought iron lace and timber fretwork.
In 1932 the minister for Greek Church, Reverend Christopher Mannessis, is listed at the address. This is close to the Greek Church on Parker Street and reflects the changing demographic of Northbridge at the time. Prior to this several different people lived at the property including a doctor Roy Merryweather.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement and mobility - 104 Land allocation and subdivision

AUSTRALIAN HISTORIC THEME

4. Building Settlements, Town and Cities - 4.1.2 Making suburbs

STATEMENT OF SIGNIFICANCE

The place is of aesthetic significance as an example of a residential building dating from period around the turn of the century. The increasing affluence of the community following the gold boom is reflected in the increased use of decoration.
The place is of aesthetic significance because it contributes to the visual quality of its location.
The place is of aesthetic significance as an integral component of a group of residential buildings representing the pattern of settlement in Perth from the late nineteenth to early twentieth centuries.
The place is of historic significance because it reflects the way of life of the wealthier residents of Perth in the late nineteenth and early twentieth century.
The place is a representative example of a residential property in Perth dating from the late nineteenth century to early twentieth century.
The place represents the changing character of the Perth community from the gold rush settlement period to the period of settlement by various ethnic communities, to the present.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

It reflects the way of life of the wealthier residents of Perth in the late nineteenth and early twentieth century. It represents the changing character of the Perth community from the gold rush settlement period to the period of settlement by various ethnic communities, to the present.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

It is representative of a residential property in Perth dating from the late nineteenth century to early twentieth century.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

It is an example of a residential building dating from period around the turn of the century and the increasing affluence of the community following the gold boom is reflected in the increased use of decoration. It contributes to the visual quality of its location. It is an integral component of a group of residential buildings representing the pattern of settlement in Perth from the late nineteenth to early twentieth centuries.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Fair
Building Fabric Authenticity	Medium level authenticity as it is largely intact roof tiling and verandah not original. Addition to rear of building.

CLASSIFICATION OF SIGNIFICANCE

Some/moderate – Category 3 - Contributes to the heritage of the locality.

HISTORY

In the early years of the Swan River colony the area to the north of Perth (now known as Northbridge) was low lying and swampy and was therefore settled more slowly than the better land closer to the river. It was also further from the river port and the main means of transport. Northbridge is an inner suburban area, named because it is just north of Perth across the railway bridge. It was approved as a suburb name in 1982.
In 1881, the railway from Fremantle to Guildford was opened and became the main transport route. From that period commerce and trade tended to be more fashionable with smaller commercial enterprises and manufacturing to the north. It was less fashionable to live north of the railway line, however the area was close to the city and during the 1890's and early 1900's was substantially redeveloped with further subdivision of lots and mixed residential and commercial development. The homes built in Perth the 1890's and early 1900's were generally larger and more elaborately detailed than the earlier simple cottages there replaced. Although influenced in their design by homes of Victoria in particular, due to the influx of migrants from the eastern states, houses in Perth tended to be constructed as single detached, or sometimes pairs of attached houses, rather than the extensive rows of terrace houses found in eastern Australia. Houses were generally single storey brick with corrugated iron roofs. Some more prestigious homes had slate or tiled roofs. Stucco decoration was popular as was wrought iron lace and timber fretwork consultant.

For Adoption

The area to the north of Perth (now known as Northbridge) was valued by the Whadjuk Nyoongar for its low lying and swampy lakes system, which provided abundant resources. After colonisation, this land was not settled as quickly as drier areas on the ridge of Perth. In 1854 some of the swampy land to the north of Perth was drained producing fertile land for farming. As the population grew during the convict era of the 1850s the land was subdivided into allotments circa 1860 and taken up by discharged soldiers, artisans and small landholders. The area at this period was characterised by small cottages and businesses.
This was an immediate response to the tripling of the State's population in the recent decade due to the gold boom, and a pressing demand for affordable accommodation.
A number of trade and community organisations had their origins in the area at this time. Over the years the population of the area changed as people relocated to suburban areas of the city. As a result, Northbridge became the home for successive migrant communities. for example, communities including Greek, Italian, Chinese and more recently Vietnamese migrants have settled here as property remained relatively cheap and had the advantage of being close to the city. These communities have over the years given this area a distinctive character, generally recycling the existing buildings rather than redeveloping the area. Northbridge, named because it is just north of Perth across the railway bridge, was approved as a suburb name in 1982. The two-storey semi-detached houses at 123-125 Aberdeen Street were originally numbered 131-133. The Post Office Directory lists them for the first time in 1900. Numbering changed in 1908 to 123-125. In 1930 the place was vacant and in 1931 it was listed as 'Italiana Home'. A 1932 advertisement in 'Stampa Italiana' an Italian newspaper, records Luigi Balbiani as the occupant, who is registering his business 'Bussola Macaroni' in Hay Street, Subiaco. From 1935 the houses are listed under John Sepich, agent. In 1966, Davorka Sepich was granted a Certificate of Naturalisation from the Department of immigration, listed as living at 125 Aberdeen Street, indicating the same family was still in the house.
The houses are built in the Federation Queen Anne style of architecture but have now been modified with an upper floor concrete balustrade and arched porched entries. A real estate advertisement online (Nov 2018) shows that some of the original features remain internally, including the timber staircases, skirtings, moulded archways, sash windows, and sidelight surrounds to the front doors.

WESTERN AUSTRALIAN HISTORIC THEME

HISTORY

In the early years of the Swan River colony the area to the north of Perth (now known as Northbridge) was low lying and swampy and was therefore settled more slowly than the better land closer to the river. It was also further from the river port and the main means of transport. Northbridge is an inner suburban area, named because it is just north of Perth across the railway bridge. It was approved as a suburb name in 1982. In 1854 some of the swampy land to the north of Perth was drained producing some fertile land for farming and later subdivision. The land was subdivided into allotments circa 1860. Land in the area was taken up by discharged soldiers, artisans and small landholders. The area at this period was characterised by small cottages and businesses. In 1881, the railway from Fremantle to Guildford was opened and became the main transport route. From that period commerce and trade tended to be more fashionable with smaller commercial enterprises and manufacturing to the north. It was less fashionable to live north of the railway line, however the area was close to the city and during the 1890's and early 1900's was substantially redeveloped with further subdivision of lots and mixed residential and commercial development.
A number of trade and community organisations had their origins in the area at this time. Over the years the population of the area changed as people relocated to suburban areas of the city. As a result, Northbridge became the home for successive migrant communities. for example, communities including Greek, Italian, Chinese and more recently Vietnamese migrants have settled here as property remained relatively cheap and

had the advantage of being close to the city. These communities have over the years given this area a distinctive character, generally recycling the existing buildings rather than redeveloping the area. (Extracted from M. Pitt Morrison and J. White in C.T. Stannage, A New History of Western Australia; U.W.A. 1981 and Michael Bosworth, Thematic Historical framework, City of Perth Unpub. 1995). The homes built in Perth the 1890's and early 1900's were generally larger and more elaborately detailed than the earlier simple cottages there replaced. Although influenced in their design by homes of Victoria in particular, due to the influx of migrants from the eastern states, houses in Perth tended to be constructed as single detached, or sometimes pairs of attached houses, rather than the extensive rows of terrace houses found in eastern Australia. Houses were generally single storey brick with corrugated iron roofs. Some more prestigious homes had slate or tiled roofs. Stucco decoration was popular as was wrought iron lace and timber fretwork.
There were many people listed at this property in the Wise's Post Office directories during the twentieth century.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement and mobility - 104 Land allocation and subdivision

AUSTRALIAN HISTORIC THEME

4. Building Settlements, Town and Cities - 4.1.2 Making suburbs

STATEMENT OF SIGNIFICANCE

The place has interest as a modestly detailed example of a Federation Queen Anne style of residential building with fine detailing and original front fence.
The place forms a part of a group of residential buildings and contributes to the historic character of the area.
The place reflects the expansion and development of residential and commercial buildings on the city fringes during the rapid population increase of the 1890's gold boom and the early years of the twentieth century.
The single storey residence set back from the street with a low front fence forms part of a streetscape that contributes to the community's sense of place
The place is a rare as an example of a well-maintained late nineteenth and early twentieth century residential building, with original features intact, still extant within close proximity to Perth City centre
The place is representative as an example of a modest residential building dating from the late nineteenth and early twentieth century.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

It reflects the expansion and development of residential and commercial buildings on the city fringes during the rapid population increase of the 1890's gold boom and the early years of the twentieth century.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

It is rare as an example of a well-maintained late nineteenth and early twentieth century residential building, with original features intact, still extant within proximity to Perth City centre.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

It is an example of a modest residential building dating from the late nineteenth and early twentieth century.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social,

cultural or spiritual associations

The single storey residence set back from the street with a low front fence forms part of a streetscape that contributes to the community's sense of place.

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

It is a modestly detailed example of a Federation Queen Anne style of residential building with fine detailing and original front fence. It forms a part of a group of residential buildings and contributes to the historic character of the area.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Fair
Building Fabric Authenticity	Medium level of authenticity as it has lost original window and door. Building has a two storey addition to the rear.

CLASSIFICATION OF SIGNIFICANCE

Some/moderate – Category 3 - Contributes to the heritage of the locality.

Architectural Style 1 Specific	Arts and Crafts
Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

Original Post Office building single storey. Distinguished by large semi-circular openings to Loggia and sash windows. Two storey residential section employs some of the architectural features of the original building. Two storey addition on eastern side. The alterations removed all the internal walls and features and all the building behind the main ridge line, leaving only the external street elevation intact. A two storey extension was built at the eastern end of the building incorporating the existing electricity sub-station and incorporating a second storey over the original residential section. A single storey extension was also constructed on the southern side facing Parker Street and the arches over the verandah of the original residential section facing Aberdeen Street were infilled.

In the early years of the Swan River colony, the area to the north of Perth (now known as Northbridge) was low lying and swampy and was therefore settled more slowly than the better land closer to the river. It was also further from the river port and the main means of transport. Northbridge is an inner suburban area, named because it is just north of Perth across the railway bridge. It was approved as a suburb name in 1982. In 1854 some of the swampy land to the north of Perth was drained producing some fertile land for farming and later subdivision. The land was subdivided into allotments circa 1860. Land in the area was taken up by discharged soldiers, artisans and small landholders. The area, at this period, was characterised by small cottages and businesses. In 1881, the railway from Fremantle to Guildford was opened and became the main transport route. From that period, commerce and trade tended to be more fashionable with smaller commercial enterprises and manufacturing to the north. It was less fashionable to live north of the railway line, however the area was close

to the city and during the 1890's and early 1900's was substantially redeveloped with further subdivision of lots and mixed residential and commercial development. A number of trade and community organisations had their origins in the area at this time. Over the years the population of the area changed as people relocated to suburban areas of the city. As a result, Northbridge became the home for successive migrant communities; for example, communities including Greek, Italian, Chinese and more recently Vietnamese migrants have settled here as property remained relatively cheap and had the advantage of being close to the city. These communities have, over the years, given this area a distinctive character, generally recycling the existing buildings rather than redeveloping the area. (Extracted from M. Pitt Morrison and J. White in C.T. Stannage, A New History of Western Australia; U.W.A. 1981 and Michael Bosworth, Thematic Historical framework, City of Perth Unpub. 1995). The building was designed by the Public Works Department of WA in the 1890's. The style of the building was strongly influenced by Chief Architect, George Temple Poole.
In 1900 the Post and Telegraph Office was opened with Mrs S E Snowball as Postmistress. Postmasters and postmistresses changed over the twentieth century. In 1925 the Commonwealth Bank was also operating from the building. In 1994/5 major structural alterations were carried out to convert the building to a night club.

HISTORY

This house appears to be one of the earliest substantial homes to be built in the area. Mr Richard Sholl, the Post-Master General, acquired two lots, Y163, which extended from Newcastle Street through to Aberdeen Street and lot Y165, which occupied the south east corner of the block bounded by Palmerston and Aberdeen Streets, and adjacent to Lot Y163. Here he erected his home 'Lancewood' in c1888-9 (possibly earlier) and lived there for a number of years. As with Newcastle Street, Aberdeen Street underwent a change in its house numbers. In 1904 the house is listed at No. 164. In 1924 and 1935-6 Mr William s. D. Blackhall is listed as being the resident. In 1949 Mrs Lily Empson resided there.
In the early years of the Swan River colony the area to the north of Perth (now known as Northbridge) was low lying and swampy and was therefore settled more slowly than the better land closer to the river. It was also further from the river port and the main means of transport. Northbridge is an inner suburban area, named because it is just north of Perth across the railway bridge. It was approved as a suburb name in 1982. In 1854 some of the swampy land to the north of Perth was drained producing some fertile land for farming and later subdivision. The land was subdivided into allotments circa 1860. Land in the area was taken up by discharged soldiers, artisans and small landholders. The area at this period was characterised by small cottages and businesses. In 1881, the railway from Fremantle to Guildford was opened and became the main transport route. From that period commerce and trade tended to be more fashionable with smaller commercial enterprises and

manufacturing to the north. It was less fashionable to live north of the railway line, however the area was close to the city and during the 1890's and early 1900's was substantially redeveloped with further subdivision of lots and mixed residential and commercial development. A number of trade and community organisations had their origins in the area at this time. Over the years the population of the area changed as people relocated to suburban areas of the city. As a result, Northbridge became the home for successive migrant communities. for example, communities including Greek, Italian, Chinese and more recently Vietnamese migrants have settled here as property remained relatively cheap and had the advantage of being close to the city. These communities have over the years given this area a distinctive character, generally recycling the existing buildings rather than redeveloping the area. (Extracted from M. Pitt Morrison and J. STATEMENT OF SIGNIFICANCE

The place has interest as a substantial Federation Queen Anne style of residential building.
The place forms an integral part of a group of residential buildings and contributes to the historic character of the area.
The place reflects the expansion and development of residential and commercial buildings on the city fringes during the rapid population increase of the 1890's gold boom and the early years of the twentieth century.
The place represents the changing demographic character of the city fringe of Perth as expansion of transport services enabled the more wealthy members of society to move further afield to newly developed suburbs.
The place is associated with Richard Sholl, the Post-Master General, during the period he occupied the house.
The substantial single storey residence forms part of an intact streetscape that contributes to the community's sense of place.
The place is rare as an example of a late nineteenth century residential building still extant within close proximity to Perth City centre.
The place is rare in the study area as an example of a substantial residential building set within large gardens.
The place is representative as an example of a substantial residential building dating from the late nineteenth century.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place reflects the expansion and development of residential and commercial buildings on the city fringes during the rapid population increase of the 1890's gold boom and the early years of the twentieth century. The place represents the changing demographic character of the city fringe of Perth as expansion of transport services enabled the more wealthy members of society to move further afield to newly developed suburbs.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The place is rare as an example of a late nineteenth century residential building still extant within close proximity to Perth City centre. The place is rare in the study area as an example of a substantial residential building set within large gardens.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The place is representative as an example of a substantial residential building dating from the late nineteenth century.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

The substantial single storey residence forms part of an intact streetscape that contributes to the community's sense of place.

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place has interest as a substantial Federation Queen Anne style of residential building. The place forms an integral part of a group of residential buildings and contributes to the historic character of the area.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The place is associated with Richard Sholl, the Post-Master General, during the period he occupied the house.

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

HISTORY

This is one of the earliest substantial houses to be erected in the street. It was the residence of Mr A. Dillon Bell, the Government's Engineer in c1893-4, then later the home of Frederick C. Monger, MLA (1900 listing). The place is listed as a private hospital run by Miss E. Harvey in 1920, then the home of J. Ralph Donaldson, a medical practitioner, in 1924. In 1935-6 it is listed as apartments under the name of Miss Evelyn Doyle. In 1949, Mrs Margaret M. Blake is listed as the resident. The place is significant for its association with Carl Torre, a prominent businessman and member of an Italian family well known within the Northbridge area.
The place is significant for its association with Sister Peter who was held in high regard for her charitable work with the poor and homeless.
In the early years of the Swan River colony the area to the north of Perth (now known as Northbridge) was low lying and swampy and was therefore settled more slowly than the better land closer to the river. It was also further from the river port and the main means of transport. Northbridge is an inner suburban area, named because it is just north of Perth across the railway bridge. It was approved as a suburb name in 1982. In 1854 some of the swampy land to the north of Perth was drained producing some fertile land for farming and later subdivision. The land was subdivided into allotments circa 1860. Land in the area was taken up by discharged soldiers, artisans and small landholders. The area at this period was characterised by small cottages and businesses. In 1881, the railway from Fremantle to Guildford was opened and became the main transport route.

From that period commerce and trade tended to be more fashionable with smaller commercial enterprises and manufacturing to the north. It was less fashionable to live north of the railway line, however the area was close to the city and during the 1890's and early 1900's was substantially redeveloped with further subdivision of lots and mixed residential and commercial development. A number of trade and community organisations had their origins in the area at this time. Over the years the population of the area changed as people relocated to suburban areas of the city. As a result, Northbridge became the home for successive migrant communities. for example, communities including Greek, Italian, Chinese and more recently Vietnamese migrants have settled here as property remained relatively cheap and had the advantage of being close to the city. These communities have over the years given this area a distinctive character, generally recycling the existing buildings rather than redeveloping the area. (Extracted from M. Pitt Morrison and J. White in C.T. Stannage, A New History of Western Australia; U.W.A. 1981 and Michael Bosworth, Thematic Historical framework, City of Perth Unpub. 1995). The homes built in Perth the 1890's and early 1900's were generally larger and more elaborately detailed than the earlier simple cottages there replaced. Although influenced in their design by homes of Victoria in particular, due to the influx of migrants from the eastern states, houses in Perth tended to be constructed as single detached, or sometimes pairs of attached houses, rather than the extensive rows of terrace houses found in eastern Australia. Houses were generally single storey brick with corrugated iron roofs. Some more prestigious homes had slate or tiled roofs. Stucco decoration was popular as was wrought iron lace and timber fretwork.

WESTERN AUSTRALIAN HISTORIC THEME

3. Developing Local, Regional and National Economies - 3.24.1 Providing medical and dental services
3. Developing Local, Regional and National Economies - 3.24.2 Providing hospital services

STATEMENT OF SIGNIFICANCE

The place is rare as a substantial Victorian Italianate style residence still extant within the Perth region.
The place is a fine example of a substantial, Victorian Italianate style, residential building set within an established garden.
The place forms an integral part of group of residential buildings and contributes to the historic character of the area.
The place reflects the expansion of housing opportunities in the city of Perth in the area north of the railway line. It was one of the first substantial houses to be constructed in the area, during the early gold boom years in Western Australia, and reflects the nature of the social milieu that once lived along particular sections of Aberdeen Street.
The place is important as a reflection of the diversity of cultural changes and residential patterns that have occurred in Northbridge over the course of a century. This is reflected in the changing functions of the house from a domestic dwelling to a medical centre; a private hospital during World War I; apartments during the depression years of the 1930; a place for post-war migrant families during the 1950s; its use by the Daughters of Charity of Saint Vincent De Paul; and a community health centre for workers in the sex industry during the late 1990s.The place is important for its association with Robert and Richard Sholl, early land holders in the district and men of some standing and influence in the colony.
The place is significant for its association with Carl Torre, a prominent businessman and member of an Italian family well known within the Northbridge area.
The place is significant for its association with Sister Peter who was held in high regard for her charitable work with the poor and homeless.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

For Adoption

The place forms an integral part of group of residential buildings and contributes to the historic character of the area. The place reflects the expansion of housing opportunities in the city of Perth in the area north of the railway line. It was one of the first substantial houses to be constructed in the area, during the early gold boom years in Western Australia, and reflects the nature of the social milieu that once lived along particular sections of Aberdeen Street.
The place is important as a reflection of the diversity of cultural changes and residential patterns that have occurred in Northbridge over the course of a century. This is reflected in the changing functions of the house from a domestic dwelling to a medical centre; a private hospital during World War I; apartments during the depression years of the 1930; a place for post-war migrant families during the 1950s; its use by the Daughters of Charity of Saint Vincent De Paul; and a community health centre for workers in the sex industry during the late 1990s.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The place is rare as a substantial Victorian Italianate style residence still extant within the Perth region.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place is a fine example of a substantial, Victorian Italianate style, residential building set within an established garden.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The place is important for its association with Robert and Richard Sholl, early land holders in the district and men of some standing and influence in the colony. The place is significant for its association with Carl Torre, a prominent businessman and member of an Italian family well known within the Northbridge area. The place is significant for its association with Sister Peter who was held in high regard for her charitable work with the poor and homeless.

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

HISTORY

This residence appears on a water map for the City dated c1895. A number of people resided at the place including Henry Seeligson in 1900, Charles Brook in 1904 and Dr Burnside, medical practitioner, in 1920.In the early years of the Swan River colony the area to the north of Perth (now known as Northbridge) was low lying and swampy and was therefore settled more slowly than the better land closer to the river. It was also further from the river port and the main means of transport. Northbridge is an inner suburban area, named because it is just north of Perth across the railway bridge. It was approved as a suburb name in 1982. In 1854 some of the swampy land to the north of Perth was drained producing some fertile land for farming and later subdivision. The land was subdivided into allotments circa 1860. Land in the area was taken up by discharged soldiers, artisans and small landholders. The area at this period was characterised by small cottages and businesses. In 1881, the railway from Fremantle to Guildford was opened and became the main transport route. From that period commerce and trade tended to be more fashionable with smaller commercial enterprises and manufacturing to the north. It was less fashionable to live north of the railway line, however the area was close to the city and during the 1890's and early 1900's was substantially redeveloped with further subdivision of lots and mixed residential and commercial development. A number of trade and community organisations had their origins in the area at this time. Over the years the population of the area changed as people relocated to suburban areas of the city. As a result, Northbridge became the home for successive migrant communities. for example,

communities including Greek, Italian, Chinese and more recently Vietnamese migrants have settled here as property remained relatively cheap and had the advantage of being close to the city. These communities have over the years given this area a distinctive character, generally recycling the existing buildings rather than redeveloping the area. (Extracted from M. Pitt Morrison and J. White in C.T. Stannage, A New History of Western Australia; U.W.A. 1981 and Michael Bosworth, Thematic Historical framework, City of Perth Unpub. 1995). The homes built in Perth the 1890's and early 1900's were generally larger and more elaborately detailed than the earlier simple cottages there replaced. Although influenced in their design by homes of Victoria in particular, due to the influx of migrants from the eastern states, houses in Perth tended to be constructed as single detached, or sometimes pairs of attached houses, rather than the extensive rows of terrace houses found in eastern Australia. Houses were generally single storey brick with corrugated iron roofs. Some more prestigious homes had slate or tiled roofs. Stucco decoration was popular as was wrought iron lace and timber fretwork.

AUSTRALIAN HISTORIC THEME

2. Peopling Australia - 2.4.5 Changing the face of rural and urban Australia through migration
4. Building Settlements, Town and Cities - 4.1.2 Making suburbs

STATEMENT OF SIGNIFICANCE

The place is rare as an extant example of a freestanding Victorian Italianate style residence within the Perth region dating from the late nineteenth century.
The place is a well designed and highly intact Victorian Italianate Style residence with an elaborately detailed façade; as a building, which has remained largely unaltered despite the changes that have occurred in the area, the place has importance in contributing to the community's sense of place.
The place forms an integral part of a group of single storey residential buildings and contributes to the historic character of the area.
The place reflects the expansion and development of residential buildings on the city fringes during the rapid population increase of the 1890s gold boom and the early years of the twentieth century.
The changing ownership of the property reflects the evolving demographic mix of the street, particularly the increasing presence in the area of central and southern European immigrants in the inter-war and immediate post-World War Two periods.

HISTORY

This residence appears on an early water map for the City, dated c1895. In 1904 a Mr J. McKeckne may have lived in the house, however because of the changes in both the street numbers and names of residents during these years, residents' names cannot be stated with certainty. In 1935-36, Jack Antonovitch lived in the house, then in 1949 Vasilis Mistilis - the names are suggestive of the type of people who were there to settle in Northbridge following post-war migration to Australia.
In the early years of the Swan River colony the area to the north of Perth (now known as Northbridge) was low lying and swampy and was therefore settled more slowly than the better land closer to the river. It was also further from the river port and the main means of transport. Northbridge is an inner suburban area, named because it is just north of Perth across the railway bridge. It was approved as a suburb name in 1982. In 1854 some of the swampy land to the north of Perth was drained producing some fertile land for farming and later subdivision. The land was subdivided into allotments circa 1860. Land in the area was taken up by discharged soldiers, artisans and small landholders. The area at this period was characterised by small cottages and businesses. In 1881, the railway from Fremantle to Guildford was opened and became the main transport route. From that period commerce and trade tended to be more fashionable with smaller commercial enterprises and manufacturing to the north. It was less fashionable to live north of the railway line, however the area was close to the city and during the 1890's and early 1900's was substantially redeveloped with further subdivision of lots

and mixed residential and commercial development. A number of trade and community organisations had their origins in the area at this time. Over the years the population of the area changed as people relocated to suburban areas of the city. As a result, Northbridge became the home for successive migrant communities. for example, communities including Greek, Italian, Chinese and more recently Vietnamese migrants have settled here as property remained relatively cheap and had the advantage of being close to the city. STATEMENT OF SIGNIFICANCE

The place has interest as a modestly detailed Federation Queen Anne style of residential building.
The place forms an integral part of a group of residential buildings and contributes to the historic character of the area.
The place reflects the expansion and development of residential and commercial buildings on the city fringes during the rapid population increase of the 1890's gold boom and the early years of the twentieth century.
The place represents the changing demographic character of the city fringe of Perth as expansion of transport services enabled the more well-to-do members of society to move further afield to newly developed suburbs.
The place represents the changing character of the local community from the typically heterogeneous population of the gold boom of the 1890's to the increasing concentration of ethnic minorities in the course of the twentieth century.
The single storey cottage set back from the street with a low front fence forms part of an intact streetscape that contributes to the community's sense of place.
The place is rare as an example of a late nineteenth century residential building still extant within close proximity to Perth City centre.
The place is representative as an example of a modest residential building dating from the late nineteenth century.

HISTORY

This residence appears on an early Water Map for the city dated c1895.In the early years of the Swan River colony the area to the north of Perth (now known as Northbridge) was low lying and swampy and was therefore settled more slowly than the better land closer to the river. It was also further from the river port and the main means of transport. Northbridge is an inner suburban area, named because it is just north of Perth across the railway bridge. It was approved as a suburb name in 1982. In 1854 some of the swampy land to the north of Perth was drained producing some fertile land for farming and later subdivision. The land was subdivided into allotments circa 1860. Land in the area was taken up by discharged soldiers, artisans and small landholders. The area at this period was characterised by small cottages and businesses. In 1881, the railway from Fremantle to Guildford was opened and became the main transport route. From that period commerce and trade tended to be more fashionable with smaller commercial enterprises and manufacturing to the north. It was less fashionable to live north of the railway line, however the area was close to the city and during the 1890's and early 1900's was substantially redeveloped with further subdivision of lots and mixed residential and commercial development. A number of trade and community organisations had their origins in the area at this time. Over the years the population of the area changed as people relocated to suburban areas of the city. As a result, Northbridge became the home for successive migrant communities. for example, communities including Greek, Italian, Chinese and more recently Vietnamese migrants have settled here as property remained relatively

cheap and had the advantage of being close to the city. These communities have over the years given this area a distinctive character, generally recycling the existing buildings rather than redeveloping the area. (Extracted from M. Pitt Morrison and J. White in C.T. Stannage, A New History of Western Australia; U.W.A. 1981 and Michael Bosworth, Thematic Historical framework, City of Perth Unpub. 1995). The homes built in Perth the 1890's and early 1900's were generally larger and more elaborately detailed than the earlier simple cottages there replaced. Although influenced in their design by homes of Victoria in particular, due to the influx of migrants from the eastern states, houses in Perth tended to be constructed as single detached, or sometimes pairs of attached houses, rather than the extensive rows of terrace houses found in eastern Australia. Houses were generally single storey brick with corrugated iron roofs. Some more prestigious homes had slate or tiled roofs. Stucco decoration was popular as was wrought iron lace and timber fretwork.

STATEMENT OF SIGNIFICANCE

The place has interest as a modestly detailed Federation Queen Anne style of residential building.
The place forms an integral part of a group of residential buildings and contributes to the historic character of the area.
The place reflects the expansion and development of residential and commercial buildings on the city fringes during the rapid population increase of the 1890's gold boom and the early years of the twentieth century.
The place represents the changing demographic character of the city fringe of Perth as expansion of transport services enabled the more well-to-do members of society to move further afield to newly developed suburbs.
The place represents the changing character of the local community from the typically heterogeneous population of the gold boom of the 1890's to the increasing concentration of ethnic minorities in the course of the twentieth century.
The single storey cottage set back from the street with a low front fence forms part of an intact streetscape that contributes to the community's sense of place.
The place is rare as an example of a late nineteenth century residential building still extant within close proximity to Perth City centre.
The place is representative as an example of a modest residential building dating from the late nineteenth century.

HISTORY

This place was erected in the latter part of the 1890s. Mr Charles Braddock, Chemist, is listed for the premises in 1904. He called for tenders to build a brick shop and house in the West Australian during May 1899. The street numbers in Aberdeen Street have changed over time and this property was originally numbered 194-196. In 1924 it was a perfumery, then in 1935-6 William Kelly operated a mixed business there, then a Mrs Delia Bona lived there.
In the early years of the Swan River colony the area to the north of Perth (now known as Northbridge) was low lying and swampy and was therefore settled more slowly than the better land closer to the river. It was also further from the river port and the main means of transport. Northbridge is an inner suburban area, named because it is just north of Perth across the railway bridge. It was approved as a suburb name in 1982. In 1854 some of the swampy land to the north of Perth was drained producing some fertile land for farming and later subdivision. the land was subdivided into allotments circa 1860. Land in the area was taken up by discharged soldiers, artisans and small landholders. The area at this period was characterised by small cottages and businesses. In 1881, the railway from Fremantle to Guildford was opened and became the main transport route. From that period commerce and trade tended to be more fashionable with smaller commercial enterprises and manufacturing to the north. It was less fashionable to live north of the railway line, however the area was close to the city and during the 1890's and early 1900's was substantially redeveloped with further subdivision of lots

and mixed residential and commercial development. A number of trade and community organisations had their origins in the area at this time. Over the years the population of the area changed as people relocated to suburban areas of the city. As a result, Northbridge became the home for successive migrant communities. for example, communities including Greek, Italian, Chinese and more recently Vietnamese migrants have settled here as property remained relatively cheap and had the advantage of being close to the city. These communities have over the years given this area a distinctive character, generally recycling the existing buildings rather than redeveloping the area. (Extracted from M. Pitt Morrison and J. White in C.T. Stannage, A New History of Western Australia; U.W.A. 1981 and Michael Bosworth, Thematic Historical framework, City of Perth Unpub. 1995). The homes built in Perth the 1890's and early 1900's were generally larger and more elaborately detailed than the earlier simple cottages there replaced. Although influenced in their design by homes of Victoria in particular, due to the influx of migrants from the eastern states, houses in Perth tended to be constructed as single detached, or sometimes pairs of attached houses, rather than the extensive rows of terrace houses found in eastern Australia. Houses were generally single storey brick with corrugated iron roofs. Some more prestigious homes had slate or tiled roofs. Stucco decoration was popular as was wrought iron lace and timber fretwork.
The property currently operates as a café.

HISTORY

In the early years of the Swan River colony the area to the north of Perth (now known as Northbridge) was low lying and swampy and was therefore settled more slowly than the better land closer to the river. It was also further from the river port and the main means of transport. Northbridge is an inner suburban area, named because it is just north of Perth across the railway bridge. It was approved as a suburb name in 1982.
In 1854 some of the swampy land to the north of Perth was drained producing some fertile land for farming and later subdivision. the land was subdivided into allotments circa 1860. Land in the area was taken up by discharged soldiers, artisans and small landholders. The area at this period was characterised by small cottages and businesses.
In 1881, they railway from Fremantle to Guildford was opened and became the main transport route. From that period commerce and trade tended to be more fashionable with smaller commercial enterprises and manufacturing to the north. It was less fashionable to live north of the railway line, however the area was close to the city and during the 1890's and early 1900's was substantially redeveloped with further subdivision of lots and mixed residential and commercial development. A number of trade and community organisations had their origins in the area at this time.
Over the years the population of the area changed as people relocated to suburban areas of the city. As a result, Northbridge became the home for successive migrant communities for example, communities including

Greek, Italian, Chinese and more recently Vietnamese migrants have settled here as property remained relatively cheap and had the advantage of being close to the city. These communities have over the years given this area a distinctive character, generally recycling the existing buildings rather than redeveloping the area. (Extracted from M. Pitt Morrison and J. White in C.T. Stannage, A New History of Western Australia; U.W.A. 1981 and Michael Bosworth, Thematic Historical framework, City of Perth Unpub. 1995).
The homes built in Perth in the 1890's and early 1900's were generally larger and more elaborately detailed than the earlier simple cottages there replaced. Although influenced in their design by homes of Victoria in particular, due to the influx of migrants from the eastern states, houses in Perth tended to be constructed as single detached, or sometimes pairs of attached houses, rather than the extensive rows of terrace houses found in eastern Australia. Houses were generally single storey brick with corrugated iron roofs. Some more prestigious homes had slate or tiled roofs. Stucco decoration was popular as was wrought iron lace and timber fretwork.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement and mobility - 104 Land allocation and subdivision

AUSTRALIAN HISTORIC THEME

4. Building Settlements, Town and Cities - 4.1.2 Making suburbs

STATEMENT OF SIGNIFICANCE

The place has interest as a modestly detailed Federation Queen Anne style of residential building. The place forms an integral part of a group of residential buildings and contributes to the historic character of the area. The place reflects the expansion and development of residential and commercial buildings on the city fringes during the rapid population increase of the 1890s gold boom and the early years of the twentieth century.
The place represents the changing demographic character of the city fringe of Perth as expansion of transport services enabled the more well to do members of society to move further afield to newly developed suburbs.
The place represents the changing character of the local community from the typically heterogeneous population of the gold boom of the 1890s to the increasing concentration of ethnic minorities in the course of the twentieth century.
The single storey cottage set back from the street with a low front fence forms part of an intact streetscape that contributes to the community's sense of place.
The place is rare as an example of a late nineteenth century residential building still extant within close proximity to Perth City centre. The place is representative of a modest residential building dating from the late nineteenth century.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place reflects the expansion and development of residential and commercial buildings on the city fringes during the rapid population increase of the 1890s gold boom and the early years of the twentieth century. The place represents the changing demographic character of the city fringe of Perth as expansion of transport services enabled the more well to do members of society to move further afield to newly developed suburbs.
The place represents the changing character of the local community from the typically heterogeneous population of the gold boom of the 1890s to the increasing concentration of ethnic minorities in the course of the twentieth century.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The place is rare as an example of a late nineteenth century residential building still extant within close proximity to Perth City centre.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The place is representative of a modest residential building dating from the late nineteenth century.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

The single storey cottage set back from the street with a low front fence forms part of an intact streetscape that contributes to the community's sense of place.

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

Roof Material	
Architect	
Builder	
Other Associations	

HISTORY

Yagan was the son of Midgegooroo, who belonged to a tribal group of aboriginals that occupied a tract of land south of the Swan and Canning River in an area referred to as Beelier. He was born c1795.Yagan and his friends continued to defend their territory but in 1832 were overpowered. Yagan and his companions were imprisoned on Carnac Island. He died in July 1833. The head of Yagan was brutally hacked from the body. and taken to England by Ensign Dale and exhibited.
On 1 September 1997 a delegation of Nyoongar elders brought back Yagan's head 'kaat' to country. This led to vandalism of the statue. His kaat has been buried in a memorial park in July 2010 so that his sprit can become whole again.

HISTORY

The establishment of parks was closely linked to wealth with the result that Perth did not begin to develop a comprehensive system of parks until after the goldrush of the 1890's.Public debate on the lack of park land in Perth was voiced in editorials in the newspapers between 1875 and 1886. The provision of a network of parklands in central Perth and around the river were the themes central to these concerns. In 1886, following the successful reclamation of the area between William and Barrack Street for Esplanade reserve, integrated system of parks along the foreshore reserve were proposed.

Physical Description	

The three sewage pumping stations, prominently located along the Perth foreshore, incorporated a civic function that of a gentlemen's public toilet, as well as their utilitarian function of pumping sewage. This allowed Mr A.R.L. Wright, an Architect in the Public Works Department, to design the buildings in a more dignified domestic style of architecture than might have otherwise been the case.
The three pumping stations are identical in design, however the plan of Station no 1 Causeway was reversed. The Station share a classical tripartite form. The rockfaced cement block walls, cement rendered pilasters, roughcast frieze and corbelled cornice evoke a strong image of a small public temple, which is then moderated by the inclusion of quarter panned windows and picturesque gablets, terracotta ridge capping and finials on the red Marseillaise tiled roof.

HISTORY

Between 1891 and 1911 the population of the City of Perth increased from 9,500 to 87,000, a nine-fold increase (Census of WA). The City was ill equipped to deal with such a rapid influx of people. The demand for housing

was overwhelming and temporary tent cities had to be established in Perth Subiaco and Fremantle. Building construction was hurried and at times haphazard. As a consequence, public concern for jerry-built housing was frequently voiced in the press. In Perth the provision of piped water was limited drainage of storm water was in its infancy and disposal of sewage was by night soil cart or cesspit. With these overcrowded and unsanitary living conditions it was little wonder that there were several epidemics of cholera and typhoid fever. The efficient disposal of wastewater and sewage became a major health issue in the political debate. The installation of a public sewage system was a costly undertaking for a young state government already burdened with public dept. Public pressure from health authorities and civic leaders eventually saw the government act. (From National Trust Assessment).

WESTERN AUSTRALIAN HISTORIC THEME

4. Social and civic activities - 404 Community services and utilities

AUSTRALIAN HISTORIC THEME

4. Building Settlements, Town and Cities - 4.2 Supplying urban services

STATEMENT OF SIGNIFICANCE

The pumping stations are the survivors of the first three such buildings-built in Perth to provide sewage pumping facilities and men's public toilets and are excellent examples of industrial architecture specifically designed to be aesthetically pleasing in their prominent locations.
The pumping stations are important examples of the technology employed for the first time in Western Australia as part of the provision of sewerage and deep drainage to the metropolitan area in the pre-World War One period.
The pumping stations were part of the development of the Metropolitan Sewage and Deep Drainage Scheme in the pre-World War One period.
The pumping stations are notable for the particular attention paid to their design and the high standards demonstrated in their execution and fine examples of the Federation Free Classical style applied to utility buildings.
The pumping stations are associated with several notable Australian engineers, each of whom contributed to the development of the Metropolitan Sewerage and Deep Drainage Scheme, particularly C. Napier Bell, Hugh Oldham, J. Davis, T. C. Hodgson, C. S. R. Palmer and F. W. Lawson, and were designed by PWD architect A. R. L. Wright.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The pumping stations were part of the development of the Metropolitan Sewage and Deep Drainage Scheme in the pre-World War One period.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social,

cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The pumping stations are the survivors of the first three such buildings-built in Perth to provide sewage pumping facilities and men's public toilets and are excellent examples of industrial architecture specifically designed to be aesthetically pleasing in their prominent locations.
The pumping stations are notable for the particular attention paid to their design and the high standards demonstrated in their execution and fine examples of the Federation Free Classical style applied to utility buildings.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The pumping stations are associated with several notable Australian engineers, each of whom contributed to the development of the Metropolitan Sewerage and Deep Drainage Scheme, particularly C. Napier Bell, Hugh Oldham, J. Davis, T. C. Hodgson, C. S. R. Palmer and F. W. Lawson, and were designed by PWD architect A. R. L. Wright.

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

The pumping stations are important examples of the technology employed for the first time in Western Australia as part of the provision of sewerage and deep drainage to the metropolitan area in the pre-World War One period.

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Fair
Building Fabric Authenticity	High level of authenticity.

4. Social and civic activities - 403 Law and order

AUSTRALIAN HISTORIC THEME

7. Governing - 7.6.3 Policing Australia
7. Governing - 7.6.4 Dispensing Justice

STATEMENT OF SIGNIFICANCE

The place is a prominent landmark, by virtue of the distinctive concave form of the tall headquarters building, which marks the eastern gateway to the city of Perth.
The place is a good example of an office building constructed in the Late-Twentieth Century International style still extant within Perth. The increasing use of curvilinear forms was characteristic of this style and the concave form of the headquarters building is the dominant aesthetic.
The place is rare as it includes the only multi-storey office building of curvilinear form, designed in the 1960s, extant within Western Australia. The place is also rare as an intact multi-storey office building in the International style dating from the period.
The place demonstrates the principal characteristics of office buildings dating from the 1960s, such as the external expression of the concrete structure and the integration of passive sun-control devices in the design of the façade.
The place is associated with the Police Commissioners and other officers who have worked from it since its construction, and the Walsh Pitman Memorial is associated with the many fallen police officers that it commemorates.
The place, designed by the Architectural Division of the Public Works Department of Western Australia, is the first purpose-built consolidated Western Australian Police Service headquarters in Western Australia, incorporating all the major branches and sections of the Western Australian Police Department.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place, designed by the Architectural Division of the Public Works Department of Western Australia, is the first purpose-built consolidated Western Australian Police Service headquarters in Western Australia, incorporating all the major branches and sections of the Western Australian Police Department.

Architect	John Andrews
Builder	
Other Associations	

HISTORY

The Merlin Hotel was developed in 1982-83. The lot was earlier several different landholdings. For example, the 1948 Metropolitan Water Survey plan shows (from west to east) three houses at 123, 119 and 115 Adelaide Terrace, a large complex (possibly industrial) at No. 99-111, a row of five terraced houses at Nos. 97, 95, 93, 91 and 89, and then on the corner, another industrial building with bowsers at the front.
The Merlin Hotel was a development by John Roberts of Multiplex, later acquired by Mr Stan Perron. It was officially opened on 15 October 1984. When Perron sold it in 1988, it was one of the biggest deals in Perth and the highest price paid for a hotel in the city at the time.
The Hyatt Hotel management chain took over Malaysian Faber-Merlin chain, at which time the Merlin Hotel was renamed the Hyatt Regency. The purchase of the Merlin represented the first big move by the giant Japanese company and the Hyatt chain into Perth property.

Architectural Style 1 Specific	Gothic
Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

The small Gothic-style church is constructed using random coursed laterite stone from Darlington with stucco detailing. The steeply pitched roof is covered with Marseilles profile clay tiles. Timber barge boards with decorative detail are located on the building's facade. Steps lead to the entrance porch and a second entrance is located in the tower. A glass roofed link building at the rear of the former church provides access to the new building. The area surrounding the former church has been bituminised and landscaped. The Hall and outbuildings at the rear of the church were demolished, and a 19 level residential building containing 92 serviced apartments and associated car parking bays was constructed.

Walls 1 Material	Brick

Other Associations	

HISTORY

In 1939 the property was purchased by the Perth Society. Richard Spanney was appointed as the architect. Richard Spanney also designed the St John Lutheran church on Aberdeen Street, Northbridge. It was requested that the New Church building was constructed using the same design and materials as that church. This building is also in the Inter-War Gothic style and constructed with laterite stone. The church was completed in early 1940 and was dedicated for use on 25 February 1940. The church was the only one built for the Perth Society of the New Church. The church was based on the theological ideas of Emanuel Swendenborg and was first established in London in 1784. It then spread throughout the world. Members of the church arrived in Perth in 1896-97 and services were held in member's homes. The Perth Society of The New Church was incorporated in 1929. Mr Hickman came to Perth from Melbourne to assist with the leadership of the church and then became the leader for 36 years. He was a gifted preacher and writer. The church had a growing membership during the 1950s to the 1970s. It was a popular venue for weddings for members of the church as well as the general

public who liked the aesthetics of the building. Membership declined in the early 2000s and the building became too large for the small congregation. The church was sold in 2002. It was also used by the Indonesian Baptist Church in the early 2000s for a short time. The building was then used for office space.

WESTERN AUSTRALIAN HISTORIC THEME

8. Developing Australia's Cultural Life - 8.6.4 Making places for worship

STATEMENT OF SIGNIFICANCE

The place is of aesthetic significance as a very fine example of the InterWar Gothic style applied to a modestly scaled church.
The place is of aesthetic significance because it is a recognised landmark in the City of Perth. The place is of aesthetic significance because it contributes to the visual quality of its location. The place is of social significance because it represents a special place for members of the community associated with the development of the area. The place is associated with architect Richard Spanney and Mr W. Hickman who was the minister of the Perth Society for 36 years. The place is rare as one of two churches in Perth designed by architect Richard Spanney in the Inter-War Gothic style that feature laterite stone from Darlington.
The place is rare as one of a small number of churches built in Australia for the New Church of Australia and the only one in Western Australia.

HISTORY

The first radio station in Perth was taken over by the Australian Broadcasting Commission (ABC) in 1932. It was located on the corner of Hay and Milligan Streets, then relocated to Stirling Gardens on St Georges Terrace after the ABC began running it where they occupied the Stirling Institute after the Returned and Services League moved to Anzac House on St Georges Terrace. This building had to be adapted for its new purpose.
In 1942 the Federal Government bought a property on Adelaide Terrace for government purposes during WW2. After the War it was decided that it would be ideal to build a new studio facility on the property.
These studios were originally used for radio but as technology changed, television studies were also built on the place. Studio space for recording orchestral works was also included in the building and the largest studio was the home of the Western Australian Symphony Orchestra. A house “Rosehill’ built in c1874, for G. F. Stone who was the Attorney General, already located on the site and this was demolished in 1954. Construction work on the site for the new studios began in 1958. The studios were completed in 1960 and were known as the Rosehill Studios. Further buildings were built to accommodate advances in technology in television and radio. The buildings were occupied until 2005 when a new studio complex was constructed in 2005 in East Perth. The buildings covered the site between Adelaide Terrace and Terrace Road, with the radio buildings located at the front of the site, and the television building at the rear (Terrace Road). A large antenna was located on the roof of the television building located along Terrace Road. In 2010 the television buildings were demolished due to the approval of three high rise residential towers and three low rise apartment buildings on the site.
The administration and radio buildings located along Adelaide Terrace were retained, although a section of the Radio building was demolished along the former carpark. The Robert Juniper artwork and foundation stone are still in situ. These buildings were designed in the International Style with large expanse of windows on the façade. The Concerto apartment tower is accessed through the Administration building on Adelaide Terrace which has been altered at ground level, while the others are accessed on Terrace Road.

WESTERN AUSTRALIAN HISTORIC THEME

2. Transport and communications - 209 Technology and technological change
2. Transport and communications - 210 Telecommunications

AUSTRALIAN HISTORIC THEME

3. Developing Local, Regional and National Economies - 3.20.2 Broadcasting
8. Developing Australia’s Cultural Life - 8.10 Pursuing excellence in the arts and sciences

STATEMENT OF SIGNIFICANCE

The place was the first complete broadcasting complex built for the Australian Broadcasting Commission and was the first time in Australia that studios for radio and television broadcasting and recording, and sound recording, were developed on one site at the same time.
The place exhibits the simplicity of line and form typical of the Post-War International style, demonstrating the modernist ideals in architecture at the time of its construction, and is a good and highly intact example of the style in Western Australia.
The Basil Kirke Studio is the largest sound studio of its type and acoustic quality in Western Australia, and it exhibits the modernist principles of the time of its construction in the honest and unmasked use of materials, and simplicity of presentation, in features such as the brick patterning and timber panelling.
The place is associated with renown Western Australian artist Robert Juniper, who was commissioned by the Australian Broadcasting Commission to create the broadcasting-themed mural at the entrance, the first such commission by the Australian Broadcasting Commission.
The Robert Juniper mural is a rare remaining example of a commissioned piece of post-World War II public art retained in situ.
The place is associated with the West Australian Symphony Orchestra (WASO) which used the Basil Kirke Studio for rehearsals, recordings, broadcasts and concerts until it was relocated to the Perth Concert Hall, and continued to use ABC Sound Broadcasting and Television Studios Perth for administration purposes until 2004.The place is associated with several West Australian broadcasting identities. In particular it is associated with Basil Kirke, who was manager of the Australian Broadcasting Commission in Western Australia from 1932-

36 and 1952-1958, and who was instrumental in the establishment of ABC Sound Broadcasting and Television Studios, Perth.
The place is the public face of the Australian Broadcasting Commission in Western Australia from its construction in 1960 until it was superseded by a new facility in 2005. It was constructed at the same time the medium of television came to Western Australia, ushering in the beginning of a new era of communication, and rendering previous facilities used by the ABC obsolete.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place was the first complete broadcasting complex built for the Australian Broadcasting Commission, and was the first time in Australia that studios for radio and television broadcasting and recording, and sound recording, were developed on one site at the same time.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The Robert Juniper mural is a rare remaining example of a commissioned piece of post-World War II public art retained in situ.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

The place is the public face of the Australian Broadcasting Commission in Western Australia from its construction in 1960 until it was superseded by a new facility in 2005. It was constructed at the same time the medium of television came to Western Australia, ushering in the beginning of a new era of communication, and rendering previous facilities used by the ABC obsolete.

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place exhibits the simplicity of line and form typical of the Post-War International style, demonstrating the modernist ideals in architecture at the time of its construction, and is a good and highly intact example of the style in Western Australia. The Basil Kirke Studio is the largest sound studio of its type and acoustic quality in Western Australia, and it exhibits the modernist principles of the time of its construction in the honest and unmasked use of materials, and simplicity of presentation, in features such as the brick patterning and timber panelling.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The place is associated with renown Western Australian artist Robert Juniper, who was commissioned by the Australian Broadcasting Commission to create the broadcasting-themed mural at the entrance, the first such commission by the Australian Broadcasting Commission. The place is associated with the West Australian Symphony Orchestra (WASO) which used the Basil Kirke Studio for rehearsals, recordings, broadcasts and concerts until it was relocated to the Perth Concert Hall, and continued to use ABC Sound Broadcasting and Television Studios Perth for administration purposes until 2004.The place is associated with several West

Australian broadcasting identities. In particular it is associated with Basil Kirke, who was manager of the Australian Broadcasting Commission in Western Australia from 1932-36 and 1952-1958, and who was instrumental in the establishment of ABC Sound Broadcasting and Television Studios, Perth.

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Fair
Building Fabric Authenticity	Moderate level of authenticity.

CLASSIFICATION OF SIGNIFICANCE

Exceptional – Category 1 - Essential to the heritage of the locality. Rare or outstanding example.

Physical Description	

Four storey reinforced concrete frame building. Building addresses the corner. Mostly sand brick walls to ground floor with the glazing above. adorn by vertical concrete elements. Precast concrete sun grille on western facade.

Walls 1 Material	Brick - Face
Walls 2 Material	Concrete
Roof Material	
Architect	Summerhayes & Associates
Builder	
Other Associations	

HISTORY

Summerhayes as an architectural firm was established in Kalgoorlie by Edwin Summerhayes in 1895, during the gold boom. The Perth office opened in 1897. In 1926 Edwin's son Reginald Summerhayes joined and the company's reputation grew under his influence. The third generation of architect, Geoffrey Summerhayes, joined the firm in 1952 and the name changed to Summerhayes and Associates. Together with Darryl Way, Colin Moore and Ralph Drexel, they became renowned for their Post-War International designs, one such being the five storey Chamber of Manufacturers Insurance (CMI) building at 212 Adelaide Terrace, on the northeast corner of the intersection of Hill Street.
The Chamber of Manufacturers Insurance which served Victoria, South Australia, West Australia and Tasmania, was bought out by Manufacturers Mutual Insurance (MMI) in 1989 which became Allianz Australia in 2000.The CMI office was erected in 1957, replacing a row of five terraced houses at 212-220 Adelaide Terrace. The Hill street elevation features concrete and face brick breeze blocks and the Adelaide Terrace elevation is panelled and glazed, with strong vertical lines. The corner has a concrete feature column with CMI in large lettering. There is a tennis court on the north side of the building, which was installed in 2004, replacing an earlier carpark, and a house at 44 Hill Street.

HISTORY

From the early years of settlement, the most prestigious residential address was St. Georges Terrace. By the late 1880s Adelaide Terrace was characterised by large houses overlooking the river. This area was considered to be the prestigious part of the city prior the development of West Perth. The house was formerly the home of Mrs. Annie Fletcher Wittenoom (nee Moore) daughter of Samuel and Dora Moore. Mrs A. F. Wittenoom is listed as residing in this location from the first Post Office Directory publication in 1893. In 1865, she has married Charles Wittenoom, son of the Rev. Wittenoom, the first colonial chaplain. Charles died in 1866, leaving her a widow with one child of their own, Florence, and three surviving children from his first marriage from which he was a widow, Edward (12), Frederick (11) and Rose (9). The house at No. 320 Adelaide Tce (renumbered to No. 254 in c. 1908, and prior to 1899 it was No. 13) was called 'Moleman'. Annie Wittenoom died in 1929. After this Miss F. Wittenoom is listed as the occupant, presumably her daughter, Florence. She died in 1946.The house was subsequently (from 1947) used by the Australian Red Cross Society for the Blood Bank and later for various commercial uses. Circa 1988 the building was damaged by vandals who removed the original stair,

internal fireplaces and several windows and doors. In 2011, the former house has a sign 'Cloonmore' above the entrance. The building has lost its front verandahs but is otherwise readable as a grand, two storey former residence.

STATEMENT OF SIGNIFICANCE

The place has aesthetic significance as an example of a residential building dating from around the turn of the century.
The place is representative of the way of life of the wealthier residents of Perth in the late nineteenth and early twentieth century.
It has associations with the Moore and Wittenoom families, who were amongst the first colonial settlers to Western Australia.
This is a rare surviving example of a grand residence on Adelaide Terrace dating from the 1890s and is a prominent building in the streetscape.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

This is a rare surviving example of a grand residence on Adelaide Terrace dating from the 1890s and is a prominent building in the streetscape.

HISTORY

From the early years of settlement, the most prestigious residential address was St. George's Terrace. By the late 1880's Adelaide Terrace was characterised by large houses overlooking the five. This area was considered to be the prestigious part of the city prior to the development of West Perth.1887-88 two storey residence was built as the house for Ernest Chawner Shenton. It was named Sydenham. The family moved to South Perth in the late 1890s and leased the property in Adelaide Terrace. In 1901 the street number was 325. In 1905 the property was transferred to Monica Hayes who was married to Edward Joseph Hayes. Monica was the daughter of Daniel Connor who was one of the wealthiest men in Perth. The property was renamed Kincora after an Irish palace.
The Hayes family lived at the property for more than 50 years. In the mid 1940s Eileen Hayes still lived at the house, and Mary C Clarice. In 1938 the building was converted to two flats. This resulted in changes to openings and room uses. The house was sold in 1955 to the Motor Vehicle Insurance Trust. In 1968 the Rural & Industries Bank of Western Australia were transferred a portion of the two lots. The property was transferred in 1994. The building is vacant and has been since 2004.It is falling into disrepair and has been boarded up to prevent people trespassing.

8. Developing Perth's Cultural Life - 8.10.4 Designing and building fine buildings
8. Developing Perth's Cultural Life - 8.12 Living in and around Australian homes

STATEMENT OF SIGNIFICANCE

The place provides a visual reminder of the former residential character of this area of the city of Perth in the pre Gold Boom era and demonstrate the standard of building and accommodation to which the city's leading citizens aspired in the 1880s and early to mid-1890s.
The place 257 Adelaide Terrace was associated with the eminent Victorian architectural practice of Terry & Oakden, and built for prominent colonial merchant Ernest Chawner Shenton and, from 1908, was the home of the well-known Hayes' family, including Sheila Gwynne (nee Hayes) who became an outstanding horse breeder and judge.
Despite extensive alteration, they are examples of finely detailed residences influenced by the Victorian Italianate style, relatively rare in the city of Perth, with 257 Adelaide Terrace relatively intact when viewed from the street and 259 Adelaide Terrace retaining much of its original internal spatial qualities and details.
Together the two houses have landmark value and add depth and meaning to Adelaide Terrace as two Victorian houses in juxtaposition with the late twentieth century high rise buildings that now dominate the street.
They are representative examples of Victorian houses that have been altered and adapted to provide for changes of use to residential flats and later commercial use as the city expanded and the needs of society changed over the twentieth century, a pattern of use that is not just typical of this locality but is common in western cities everywhere.
The individual significance of each of the houses that comprise Houses (fmr) 257 & 259 Adelaide Terrace is increased by its proximity to the other.

NATURE OF SIGNIFICANCE

HISTORY

From the years of early years of settlement the most prestigious residential address was St George's Terrace. By the late 1880's Adelaide Terrace was characterised by large houses over looking the river. This area was considered to be the prestigious part of the city prior to the development of West Perth.
Edward Bertram Johnstone worked in the Lands Office in Katanning in early 1900s. He was the Member of the Legislative Assembly Williams-Narrogin 1911-1928. During the 1930s he focused on his family and hotel business commissioning Marshall Clifton to build the Captain Stirling and Inglewood hotels. He died in 1942.
In May 1944 Hildelith Johnston married George Davidson Elliott and continued to live at the house. Changes were made to the house during the 1940s to 1950s. in 1962 a steel staircase was built. At that time Berta Johnston was living at the property with her mother.
The property was transferred to H O Johnston Estates Pty Limited in 1962. In c2000 the property was vacant. In 2004 an educational college was operating from the building.

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working-class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
The Post Office Directory lists occupants at these two properties from 1917. The Metropolitan Water Supply Survey plan dated 1953 shows a mirror pair of brick semi-detached houses, with verandahs that wrap around the outside. Along the rear lane there is a galvanised iron outbuilding at No. 6 and a brick and weatherboard laundry at No 4.
In 1986, the two houses were put into one ownership as No. 4 but from the street view, they can clearly be read as two semi-detached cottages, and retain much of the original form. For example, chimneys have been retained even though the roof has been replaced. The semi-detached pair has original fabric and form, and aside from the front boundary limestone wall and trees obscuring the view, retains high authenticity.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement and mobility - 107 Settlements
3. Occupations - 306 Domestic activities

AUSTRALIAN HISTORIC THEME

4. Building Settlements, Town and Cities - 4.1.2 Making suburbs

STATEMENT OF SIGNIFICANCE

The place has aesthetic significance as a Federation Queen Anne former semi-detached pair built in 1916.
It is a reminder that this area of West Perth was residential and is representative of the way of life of the wealthier residents of Perth in the early twentieth century.
The place has aesthetic significance because it contributes to the streetscape, and its significance is increased because it remains substantially intact.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

It is a reminder that this area of West Perth was residential and is representative of the way of life of the wealthier residents of Perth in the early twentieth century.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place has aesthetic significance because it contributes to the streetscape, and its significance is increased because it remains substantially intact.
The place has aesthetic significance as a Federation Queen Anne former semi-detached pair built in 1916.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision-making body is relevant

CONDITION AND AUTHENTICITY

Condition	Good
Building Fabric Authenticity	High. Intact.

CLASSIFICATION OF SIGNIFICANCE

Considerable – Category 2 - Very important to the heritage of the locality.

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
The Post Office Directory lists the semi-detached pair at 6-8 Altona Street from 1908. For the first decade the occupants were Joseph E. Donovan, of Donovan and Overland, jewellers at No. 8; and Mrs M. H. Trevenen at No. 10.The Metropolitan Water Supply Survey plan dated 1953 shows a mirror pair of brick semi-detached houses with verandahs that wrap around the outside. In c.1960 the front verandahs were removed and over time other changes have resulted in the place being read as a single house from the street, No. 8. The place also appears much altered from the rear lane, with steps to only one entry, and the rear verandah enclosed with weatherboard. It is used for office/commercial reasons.

HISTORY

"West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.14 Altona St
The Post Office Directory lists No. 14 from 1903, occupant A. H. Kruger. From c.1908 August Knapp, optician was resident. In 1949, Mrs Maud Knapp is resident, indicating it was in the Knapp family for some time.
The Metropolitan Water Supply Survey plan dated 1953 shows No. 14 as an asymmetrical brick building, with a half-length front verandah, a pathway leading to the north corner boundary of the front yard, a structure on the street front south boundary, possibly a carport, several weatherboard outbuildings, a water tank, galvanised iron shed for a copper, and an asbestos shed on the rear lane way.
Aerial photos show addition to the front and rear in the 1970s-1980s. More modifications to the street front have occurred c. 2000. From the street very little original fabric is visible and a new roof has meant the loss of two chimneys. The rear yard is a car park, accessed from the lane way. "

Physical Description	

A discontinuous group of Metropolitan Sewerage Vents. Each vent is similar in design, comprising an ornate circular cast iron base with fluting and moulding which contains the letters M S (Metropolitan Sewerage) in the lower portion. Each base is 2 metres high with a straight circular pipe rising above. The total height of the vents is between 9 metres and 15 metres. An access panel, measuring approximately 20cm by 10cm and secured by a bolt in each corner, provides visual access into the vents.

HISTORY

In 1900 the Perth City Council serviced residences with a pan collection system for outside toilets. In 1903 plans were developed by the State Government to form a deep sewerage system for Perth. One problem with this system was the creation of hydrogen sulphide gases in the pipes which needed to be vented so oxygen could enter the pipes.
The collective group of Metropolitan Sewerage Vents on Cook Street, Arthur Street and Royal Street were erected between c.1911 and 1928 to assist in reducing odours associated with the completion of Perth's new sewerage system. The disconnection of the sewer vents is unknown, however in the opinion of Water Corporation the changes to the system between the 1950s and 1970s led to many vents being unnecessary.

4. Building Settlements, Town and Cities - 4.2 Supplying urban services
8. Developing Australia's Cultural Life - 8.13 Living in cities and suburbs

STATEMENT OF SIGNIFICANCE

The group provides rare evidence of the earliest establishment of a deep sewerage system for Perth (operational from 1911), a significant milestone in the development of Perth as a modern city.
The group is a small sample of surviving c.1911-1930 sewerage ventilation shafts, a once-common piece of infrastructure that appears to have largely been removed and/or forgotten across the country.
The group comprises six representative examples of the standard natural ventilation shafts erected for the Perth and Fremantle sewerage systems from 1911 to 1930, when decorative but functional cast iron work was used for these items of public infrastructure.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The group is a small sample of surviving c.1911-1930 sewerage ventilation shafts, a once-common piece of infrastructure that appears to have largely been removed and/or forgotten across the country.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The group provides rare evidence of the earliest establishment of a deep sewerage system for Perth (operational from 1911), a significant milestone in the development of Perth as a modern city.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Good
Building Fabric Authenticity	Metropolitan Sewerage Vents has a moderate level of authenticity. Most of the original fabric of the individual vents appears to remain, although the cowl at the apex of the vent appears to have been removed from each vent, with the exception of the Cook Street vent. It is possible that some upper segments of the pipes have also been removed. Some corrosion has been observed, but this has been managed by the repainting of the cast iron bases.

CLASSIFICATION OF SIGNIFICANCE

Exceptional – Category 1 - Essential to the heritage of the locality. Rare or outstanding example.

Other Associations	UWA; US Navy

HISTORY

The whole of the Derbal Yerrigan (Swan River) is a Registered Aboriginal Site (ID3536) for mythological reasons. Matilda Bay is the bay to the east of Hackett Drive, Crawley. The north edge at the base of King's Park where Hackett Drive meets Mounts Bay Road is home to UWA buildings including Cygnet Hall, the UWA Boat Shed and the UWA Watersports complex. The southern edge is Pelican Point, the location for the Matilda Bay Restaurant (1968), Royal Perth Yacht Club (1952), Mounts Bay Sailing Club (c. 1959) and Pelican Point Sea Scout Club. Matilda Bay Reserve is grassed with a natural shoreline to the river.
The bay is named after Matilda Roe, wife of John Septimus Roe, the first Surveyor of Western Australia.
Matilda Bay was the location for a Catalina flying boat base established by the United States Navy in 1943. The Japanese invasion of the Philippines had resulted in the US evacuation from in and around Manila. They went first to Java but due to other threats of invasion, were again relocated, this time to Australia. The US Navy relocated the Catalina Patrol Wing No. 10 to Matilda Bay. They brought with them approximately 60-70 Catalinas and 1200 Americans, including both members of the Navy and their support personal. They took over the original club house of the Mounts Bay Sailing Club, which was then known as Pelican Point Advance Base 'A'. The Swan River became their base and training ground between missions that took them as far north as Ceylon (Sri Lanka).

HISTORY

The UWA Boatshed was used as Command Headquarters during WWII for the US Navy. (Ref: R. J. Ferguson, 'Crawley Campus: A government decision in favour of a university for Western Australia was made in 1901, however a shortage of funds prevented it being established until 1913. The University Endowment Bill in 1903 allowed for land to be set aside for the future. The first location was a temporary one in Irwin Street, Perth, in a weatherboard building. The first Chancellor was John Winthrop Hackett. In 1921 Crawley was chosen as the permanent site for UWA. The Irwin Street building was relocated there in 1932.The foundation stone for the Hackett Memorial Buildings was laid in 1929. They form the focal point and symbolic landmark of UWA.
The land in Nedlands on the Crawley foreshore was originally under the control of the Claremont Road Board, until annexed by Subiaco in 1907. This changed the local government boundary and gained Subiaco some of the foreshore. From the early 1890s, the Crawley riverfront was a popular place for picnicking, boating, swimming and crabbing, referred to as 'Subiaco Beach' by many local residents. The extension of the tramway to Nedlands in 1908 further increased the riverside's popularity. In 1910 with the efforts of Mayor Shirley White, the Government resumed the land to be reserved for use as a public recreation area. The UWA Boatshed was used as Command Headquarters during WWII for the US Navy. The boatshed has been recently reroofed.

Architectural Style 1 Specific	Art Deco
Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

The memorial is approximately seven metres high and comprises a twice life-size cast bronze bust of Sir Talbot Hobbs in military uniform mounted on a deeply-fluted column of Donnybrook stone.
A sword, also of cast bronze, is suspended from the waist on the proper left of the figure. Two bronze Australian Field Artillery badges are located on either side of the memorial. The memorial is mounted on a low raised platform with pavers. The overall appearance of the memorial could be described as being in the Inter-War Art Deco style.

HISTORY

The memorial commemorates Sir JJ Talbot Hobbs – one of Western Australia's most distinguished military soldiers. He is also acknowledged for being one of Australia's leading military commanders from the First World War. Apart from his military career, Hobbs was a prominent architect gaining considerable recognition from his 1891 winning design for the prestigious Weld Club in Perth. Many major commissions were to follow from this. He was Treasurer then President of the West Australian Institute of Architects which was formed in 1896.

WESTERN AUSTRALIAN HISTORIC THEME

5. Outside influences - 501 World wars and other wars
6. People - 606 Famous and infamous people

AUSTRALIAN HISTORIC THEME

8. Developing Perth's Cultural Life - 8.7 Honouring achievement
8. Developing Perth's Cultural Life - 8.9 Commemorating significant events
8. Developing Perth's Cultural Life - 8.10 Pursuing excellence in the arts & sciences
9. Marking the Phases of Life - 9.7.3 Remembering the dead

STATEMENT OF SIGNIFICANCE

The place is an excellent piece of memorial design, with a well rendered likeness of its subject, set over an Art Deco style base of Donnybrook sandstone and Mahogany Creek granite against a background of Canary Island Palms.
The place commemorates Lieutenant-General Sir J. J. Talbot Hobbs, Western Australia's most distinguished World War One soldier, and a renowned architect.
Since its unveiling in 1940, the place has continuously been the focal point for the annual Perth Anzac Day parade, being the point from which the salute is taken.
The place is significant as one of the major works by sculptor Edward Kohler to a design by well known architect Alex Winning, of Hobbs & Winning.
The place was the first memorial erected in Perth in commemoration of a distinguished soldier and is one of only a few public memorials to an individual erected in the Perth in the first half of the twentieth century.
The place is a rare example of a bust on a tall pedestal in this State, an important example of technical achievement in the World War Two period, and was the first bronze statue of its kind to be cast in Western Australia.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place commemorates Lieutenant-General Sir J. J. Talbot Hobbs, Western Australia's most distinguished World War One soldier, and a renowned architect.
Since its unveiling in 1940, the place has continuously been the focal point for the annual Perth Anzac Day parade, being the point from which the salute is taken.

HISTORY

Supreme Court Gardens comprises the northern forecourt of the Supreme Court building, the land to the west of the building to Barrack Street, and the open space to the south bounded by Riverside Drive, Barrack Street and Governor's Avenue.
A recreational ground was created from reclaimed land between Pier Street and Barrack Street using the piers as walls. An 1891 photograph shows a police and court complex in front of the former Supreme Court building. Supreme Court Gardens was created from reclaimed land in 1903. Little was done to the area, and it consisted of a fenced grassed area. Some trees and plantings were located near the entrance to the Supreme Court building by c1910. In 1919 the gardens around the Supreme Court were all transferred to the State Gardens Board to manage. This included the amalgamation of Stirling Gardens, Government House Gardens and Supreme Court enclosure. Under the State Gardens Board's management, the gardens were greatly developed. Supreme Court Gardens were developed into a grassed area with large planting areas around the perimeter. In the 1930s and 1940s infrastructure such as fences and roads around the building were constructed.

HISTORY

The Weld Club was formed in 1871 as a gentleman's club and was named after the Governor, at the time, His excellency Mr (later Sir) Frederick Weld. Only members of high levels of society were admitted as members and it was a place where they could socialise, discuss politics, play billiards and read the latest newspapers from around the world. The building was constructed in the 1890s and designed by J J Talbot Hobbs in the Federation Queen Anne style. It was built on the corner of Barrack and The Esplanade which was close to the legal and administrative buildings such as Supreme Court, Central Government Offices and Government House. The building was constructed from red brick and corrugated iron. Additions to the building to create more accommodation for country members were built in 1904. Other internal changes to the building were made at

the time. In the 1980s the building was restored, funded by the lease of some of the land for a new office development.

WESTERN AUSTRALIAN HISTORIC THEME

4. Social and civic activities - 407 Cultural activities
4. Social and civic activities - 408 Institutions

AUSTRALIAN HISTORIC THEME

8. Developing Australia's Cultural Life - 8.5.4 Pursuing common leisure interests

STATEMENT OF SIGNIFICANCE

The building is an outstanding example of Federation Queen Anne architecture.
The building is a fine example of the work of the prominent architect Sir J.J. Talbot Hobbs a leading Australian practitioner of the Federation Queen Anne style of architecture
The place is a landmark on the corner of Barrack Street and The Esplanade.
The place has close associations with the exercise of political and social power in the Colony before representative government.
The place houses what is recognised in the general community as being one of the leading private gentlemen's clubs in Western Australia.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The place has close associations with the exercise of political and social power in the Colony before representative government.

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Good
Building Fabric Authenticity	The Weld Club has a high degree of authenticity. The Weld Club has, in over 100 years of occupation, undergone a number of changes to both its external and internal fabric. Restoration and renovation of The Weld Club in 1988/89 has resulted in the removal of earlier unsympathetic work, especially to the facades. The removal in the 1980s, for structural reasons, of the 1925 tiled roof cladding that replaced the original timber shingled roof cladding to the two street elevations of the building, and replacement with corrugated Zincalume sheeting with a red factory-applied finish, has altered the appearance of the place. With the exception of the dining room, which is a well-executed replica, and the new roofing material, which replaced material that had been in place for over half the life of the club.

CLASSIFICATION OF SIGNIFICANCE

Exceptional – Category 1 - Essential to the heritage of the locality. Rare or outstanding example.

Physical Description	

The Supreme Court is a two storey, symmetrically composed building in the Federation Academic Classical Style. The building is constructed in red brick with stucco detailing; the iron roof is concealed by a parapet with balustrading and an impressive ionic portico marks the main entrance. It is sited between Stirling Gardens and the Supreme Court Gardens and makes skilful use of the change in level between them caused by the siting of the original embankment of the Swan River. The foyer is in a two-storey volume with a domed ceiling. The main court room is extensively panelled.

Other Associations	

HISTORY

The Supreme Court was officially opened in 1903 and has been the principal Court in Western Australia since that time. It represents the almost continuous association of the Supreme Court with the site. The building was designed by Chief Architect of the Public Works Department John Grainger. The same builders who had constructed Government House Ballroom also constructed the Supreme Court. As a result of its construction the former commissariat store which was located on the property was demolished.

7. Governing - 7.6.4 Dispensing Justice

STATEMENT OF SIGNIFICANCE

The place is of aesthetic significance as an excellent example of the work of John Grainger and as an example of the Federation Academic Classical architectural style used in the major public buildings in the early 1900's.
The place is of scientific value since its construction was a major technical design achievement on the edge of the river in the early 1900's.
The place is of social significance representing the highest court in the City and the State.
The Supreme Court is a unique and a rare example of a large public building designed in the Federation Academic Classical style in the early 20th century in Perth which has remained used for its initial purpose since that time.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The Supreme Court is a unique and a rare example of a large public building designed in the Federation Academic Classical style in the early 20th century in Perth which has remained used for its initial purpose since that time.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

The place is of scientific value since its construction was a major technical design achievement on the edge of the river in the early 1900's.

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

The place is of social significance representing the highest court in the City and the State.

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place is of aesthetic significance as an excellent example of the work of John Grainger and as an example of the Federation Academic Classical architectural style used in the major public buildings in the early 1900's.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision-making body is relevant

CONDITION AND AUTHENTICITY

HISTORY

The building was erected on the banks of the Swan River as a Court House between 1836-1837 at a cost of 736 pounds when many of the colony's population still lived in wattle and daub huts. The designer was the colony's first civil engineer Mr. Henry Willey Reveley.
Besides usual court proceedings, classes were held there from 1847 to 1850 as the first Perth Boys School until they moved to St Georges Terrace. Christians went to church there until St. George's' Church was completed in 1842 and the colony's first public concert was held in the Court House in 1845. In 1867, the Court House had deteriorated measurably, but it remained a court venue until 1879, after which it was used for 16 years as a government store, then again as a reserve Supreme Court. From 1905-1965 it was the Arbitration Court. It has been the offices of the Law Society of W.A. In 1987 the Francis Burt legal education centre was established in the building and it is open to the public as a museum.

Architectural Style 2 General	Federation (c.1890-c.1915)
Architectural Style 2 Specific	Free Classical
Archaeology	
Physical Description	

A complex of government offices fronting Cathedral Ave and St. George's Tce constructed between 1874 & 1905. The first two floors of the west and east wings of the treasury building were designed by RR Jewell in the Victorian Georgian Style. The southern wing (GPO) the Lands and Surveys Building and the third floors of the east and west wings of the treasury were designed by Poole, Grainger and Beasley in the Victorian Second Empire Style. The Titles Office (north wing) designed by Poole in the Federation Free Classical style breaks continuity of the Victorian Second Empire style used throughout the rest of the complex.

HISTORY

The Central Government Offices are a complex of Victorian public buildings erected from 1874 to c 1905. The northern half of the west wing was commenced in 1874, and in 1882 the lower two storeys of the east wing were built. Two sections were designed by the contemporary government architect, R.R Jewell. The section linking these two wings was built from 1887 to 1890 to designs by G T Poole and was at that time used for the General Post Office. The third storey was added in 1896, 1903 and 1905. The north-eastern section of the complex was built in 1896, also under Poole's supervision The present imposing complex is a unified group in the Victorian Second Empire style (except for the north-eastern section which is in a Federation Free Classical style) with

mellow brickwork, elaborate stuccoed decoration and projecting pilasters. This group of early civic buildings occupies nearly an entire city block.
The location of Central Government offices was one of the first locations to be developed after the colony was granted Representative Government in 1890. The first buildings to be built were for government use including a barracks and armoury. After this, a post office was established on the site and the Town Hall was constructed between 1867 and 1870. The Treasury building construction started in 1874 with a southern wing added in 1889. The Lands Department building was constructed in 1893 and the Titles office was built in 1897 to accommodate the staff who were surveying land and providing titles for it as a result of the Gold Boom when more land was being developed. All three buildings were designed by George Temple Poole. The buildings were all altered in the early twentieth century to provide more office space for these departments. In the second half of the twentieth century Government departments moved from the building for new buildings and the site was vacant for twenty years. In 2011 works began on the site's redevelopment for a luxury hotel and Government offices in a new tower, restaurant and retail spaces on the ground floor. These works resulted in the demolition of some of the original parts of the buildings

HISTORY

Barrack Street was so named because it is located adjacent to the parade ground and barracks set aside for the original planning of Perth for officers and soldiers. This area extended from St. George's Terrace to Hay Street and from Barrack Street to Pier Street. The barrack ground formed the buffer in the original plan for Perth between the western commercial area and the eastern administrative part of town. The area became the site for various government buildings including the Town Hall in 1867. Barrack Street was subdivided in the 1890's. Many lots with narrow frontages were created but Many investors bought adjacent lots to develop larger buildings.
Example of a commercial building constructed in Perth during the period of expansion and development that followed the gold rush of the 1890's.Before the gold boom, the area of Barrack Street between Hay Street and St Georges Terrace belonged to Lionel Samson, one of Perth's most prominent merchants. In 1895, his family sold and subdivided the lot and it became a new and fashionable space for business chambers.
In 1898, the building was occupied by architects, surveyors, engineers, solicitors, barristers, accountants and mine agents. The building became known as Yates Chambers in the 1920s when it was occupied by Yates Optician. Other uses at that time included Australian Feature Films.

WESTERN AUSTRALIAN HISTORIC THEME

HISTORY

Barrack Street was so named because it is located adjacent to the parade ground and barracks set aside in the original planning of Perth for officers and soldiers. This area extended from St. George's Terrace to Hay St and from Barrack St to Pier St. The barrack ground formed the buffer in the original plan for Perth between the western commercial area and the eastern administrative part of town. The area later became the site for various government buildings including the Town Hall in 1867. Barrack St was subdivided in the 1890's. A number of lots with narrow frontages were created but a number of investors bought adjacent lots to develop larger buildings. Until the 1880's, the town centre was characterised by the establishment of small cottages, shops and small businesses and was rural in character. The expansion of commerce following the discovery of gold in the 1890's put pressure on land in the centre of Perth with the result that most residential uses were displaced in favour of commercial development. During the 1890's and early 19900's the centre of Perth was substantially rebuilt. The period of expansion in Perth coincided with a period of economic depression in the eastern states, in particular Victoria. As a result, there was substantial migration from Victoria to W.A. This migration included businessmen, architects and builders, all of whom had a considerable influence on the development of the city. Example of a commercial building from the period of expansion and economic affluence and development that occurred in Perth after the gold rush. Built in c.1903, its original use was offices. Before the gold boom, the area of Barrack Street between Hay Street and St Georges Terrace belonged to Lionel Samson, one of Perth's most prominent merchants. In 1895, his family sold and subdivided the lot and it became a new and fashionable

space for business chambers.
In 1908 the building was occupied by the National Fire and Marine Insurance Company of New Zealand. The company remained until the 1920s.

The barrack ground formed the buffer in the original plan for Perth between the western commercial area and the eastern administrative part of town.
The area became the site for various government buildings including the Town Hall in 1867. Barrack Street was subdivided in the 1890s. A number of lots with narrow frontages were created but a number of investors bought adjacent lots to develop larger buildings.
Numerous businesses have occupied the multiple outlets within the building over the course of its history. It is difficult to determine the date of construction without deeper research, as there have been shops in this location since before 1893. It was typical in the late 1890s economic boom for buildings to be demolished and rebuilt, and also refurbished with a modern style in the Inter-War years.
The building at Nos. 63-75 was originally Nos. 101-113, and for a long time (c. 1920s to at least 1949) the ground floor (Nos. 63-69) was occupied Cecil Brothers Shoe Stores.

HISTORY

Barrack Street was so named because it is located adjacent to the parade ground and barracks set aside for the original planning of Perth for offices and soldiers. This area extended from St. Georges Terrace to Hay Street and from Barrack Street to Pier Street. The barrack ground formed the buffer in the original plan for Perth between the western commercial area and the eastern administrative part of town. The area became the site for various government buildings including the Town Hall in 1867. Barrack Street was subdivided in the 1890s. A number of lots with narrow frontages were created but a number of investors bought adjacent lots to develop larger buildings. Numerous businesses have occupied the multiple outlets within the building over the course of its history. It is difficult to determine the date of construction without deeper research, as there have been shops in this location since before 1893. It was typical in the late 1890s economic boom for buildings to be demolished and rebuilt, and also refurbished with a modern style in the Inter-War years. Backtracking through Post Office Directories, it can be deduced that buildings in some form was erected on this location by 1897, including one called Chancery Chambers (off 121). Numbering changed in 1908 from 115-121 to No. 77-85, and the occupants include a cigar manufacturer (No. 77), dentist (79), Chancery Chambers (81) with a decorator/contractor and carpenter, Levison & Sons, jewellers (83) and Greenham and Evans, photographers (85). From c. 1915, No. 79 was ‘Lafeyette Studios’. Levison and Sons, jewellers expanded into the adjacent building and occupied up to No. 89, until 1925.In 1927 the building is reinvented as Lafayette Chambers, occupied by Lafayette Studios (photographers), and numerous other outlets such as a dentist, tailor, tea rooms,

bookseller, silk merchant, dress maker, accountant and a billiard saloon. The Metropolitan Water Supply Survey plan dated 1930 shows it is a large brick building with a basement. Lafayette Studio photographers remained in the building until at least 1949.The Post-War migration of many Europeans to Western Australia created a demand for connections to their home land. In 1954, the architectural firm Krantz and Sheldon was engaged to transform 81 Barrack Street into an intimate, contemporary cinema with the express purpose of screening foreign language, primarily European, films. Liberty Cinema was Perth's first art house cinema, opening on 4 March with a charity screening of 'Rigoletto.' The building was gutted by fire in February 1961. It reopened in June 1961 with a garden lounge added.
As a speciality art house cinema Liberty lasted less than a decade but continued as a cinema. In 1967 the film, 'To Sir With Love' screened for well over two years. By the 1990s the cinema was called Kimberley Theatre and showed martial arts films. The cinema closed in October 1997 and is currently mostly vacant, with some ground floor outlets used for retail.

The barrack ground formed the buffer in the original plan for Perth between the western commercial area and the eastern administrative part of town. The area became the site for various government buildings including the Town Hall in 1867. Barrack Street was subdivided in the 1890's. A number of lots with narrow frontages were created but a number of investors bought adjacent lots to develop larger buildings.
In 1884 company Bon Marche was going to open three drapery businesses in Perth. There was a building on the site known as Stein's Buildings in the late 1890s which was redeveloped by William Brookman after he purchased the property in 1899. In 1900 the building approval for additions to the building. From 1901 the building was known as Brookman's Buildings. It was a landmark in Barrack Street due to its design and height compared to other buildings around it. The building was known as Bon Marche Building in the 1920s. The building was used for many different purposes including professional offices, jewellers and retail on the ground floor.

HISTORY

Barrack Street was a famous area for its restaurants and Jazz music clubs. Built c.1897, the building was occupied by Nicholson's music store from the 1930s. The business was well known for the sale of musical instruments as well as tuition. The building was occupied by an electrical store in the 1960s.
Since the 1960s the building has been extensively altered and the original façade removed or concealed behind a metal screen.

Barrack Street was so named because it is located adjacent to the parade ground and barracks set aside for the original planning of Perth for offices and soldiers. This area extended from St. Georges Terrace to Hay Street and from Barrack Street to Pier Street. The barrack ground formed the buffer in the original plan for Perth between the western commercial area and the eastern administrative part of town. The area became the site for various government buildings including the Town Hall in 1867. Barrack Street was subdivided in the 1890s. A number of lots with narrow frontages were created but a number of investors bought adjacent lots to develop larger buildings.
Numerous businesses have occupied the multiple outlets within the building over the course of its history. It is difficult to determine the date of construction without deeper research, as there have been shops in this location since before 1893. It was typical in the late 1890s economic boom for buildings to be demolished and rebuilt, and also refurbished with a modern style in the Inter-War years.
No. 87 through to No. 93 Barrack Street (three shopfronts at street level) was originally Nos. 123-129. Numbering changed in 1908. The shop at No. 93 (previously No. 127) was occupied by Albany Bell, confectioner, from 1902 to c. 1930. Peter Albany Bell was an important manufacturer and philanthropist in the early years of the twentieth century. He arrived in Western Australia in 1887 and worked at a variety of jobs before opening a small shop in Hay Street, Perth, in 1894 making and selling confectionery and lemon squash. The one shop expanded and developed into an established tea room business, with two more premises on

Barrack Street. No. 93 became Café de Monte Carlo which was still there in 1949. Other tenants in this row of shops at 1949 included Adelaide Tailoring Co, (87-89) and George Norvell, pawnbroker (No. 95).
At 2022, there are three food outlets on the ground floor. From the street, the building presents as a two storied, stucco and rendered building with arched windows (11) with lion-head motifs and classical columns with decorative capitals. The stepped suspended awnings are not original and detract from the visual unity of the buildings. There are various accretions in the upper floor (air conditioners in window openings for example).

HISTORY

Barrack Street was so named because it is located adjacent to the parade ground and barracks set aside for the original planning of Perth for offices and soldiers. This area extended from St. Georges Terrace to Hay Street and from Barrack Street to Pier Street. The barrack ground formed the buffer in the original plan for Perth between the western commercial area and the eastern administrative part of town. The area became the site for various government buildings including the Town Hall in 1867. Barrack Street was subdivided in the 1890s.
A number of lots with narrow frontages were created but a number of investors bought adjacent lots to develop larger buildings. During the gold boom a large number of hotels or 'pubs' were built in Perth, the outskirts of the city and in country towns. They provided accommodation and refreshment to travellers and the large number of immigrants arriving in the state, including the large proportion of working men from Victoria.
Typically, the hotel was constructed on a corner with the entrance to the public bar addressing the corner and the entrance for residents on one of the streets. There was often a tower or other feature on the corner and a verandah with elaborate cast iron decoration along the street facades. Perth Hotel dates from the period of commercial expansion in Perth following the gold rush of the 1890s. There was a hotel on this site from before 1893 called the Grand Hotel. The first Post Office Directory in 1893 lists J. P. T. Caulfield as proprietor.
From 1897 it has a street number of 133-135 Barrack Street and was run by Edward Ingram. From 1911 the name changed to Hotel Perth. (It may have been a new building. It was typical in the late 1890s economic boom for buildings to be demolished and rebuilt, and also refurbished with a modern style in the Inter-War years.

Deeper research is required.) The 1919 Metropolitan Water Supply survey plan shows 'The Perth Hotel' as No. 101 Barrack Street.
Since c. 1970 part of the ground floor has been Doogue's Newsagent and Lottery; 'Doogues' is known statewide as a 'lucky' place for purchasing lottery tickets. The business claims to be Perth's oldest lottery outlet.

HISTORY

Barrack Street was so named because it is located adjacent to the parade ground and barracks set aside for the original planning of Perth for offices and soldiers. This area extended from St. Georges Terrace to Hay Street and from Barrack Street to Pier Street. The barrack ground formed the buffer in the original plan for Perth between the western commercial area and the eastern administrative part of town. The area became the site for various government buildings including the Town Hall in 1867. Barrack Street was subdivided in the 1890s. A number of lots with narrow frontages were created but a number of investors bought adjacent lots to develop larger buildings.
Numerous businesses have occupied the multiple outlets within the building over the course of its history. It is difficult to determine the date of construction without deeper research, as there have been shops in this location since before 1895. It was typical in the late 1890s economic boom for buildings to be demolished and rebuilt, and also refurbished with a modern style in the Inter-War years.

The Post Office Directory first lists Queen's Chambers was No. 151 in 1897; then No 147, before numbering changed to 111 in 1908. The Metropolitan Water Supply Survey plan (1943) shows No. 111 as a long narrow building with a passage on the northern side, possibly an access way to the upstairs premises.
The building was originally three shops at ground floor level each with a basement. The first floor was occupied by a boarding house. In 1954 a company named Buhlers took over the building when their premises (adjacent) were taken over by Boans. The building was gutted at ground floor level to create one showroom and a mezzanine office. The basements were made into one. A number of lathe and plaster walls were removed at first floor level at this time. Circa 1967 the building was bought by Mitchell's City discounters, an electrical appliance company.
In 2018 the facade was restored with paint to the face brick and the stucco surrounds removed. At 2022 the building presents to the street as three-storeys with shops at street level and a basement. Windows at first floor level have arched openings with square headed openings to third floor windows. The ground floor shop fronts are new. A real estate ad in March 2022 offering the building for sale together with the adjacent 115-117 Barrack Street shows that the interiors are mostly open spaces on all levels.

HISTORY

118-120 Barrack Street appears in Wise's Post Office Directory in 1913 as Kalaf Bros. Refreshment Rooms. From the early 1920s until the 1940s it is identified as the premises of the Australian Tailoring Co. as well as others commercial uses. The date of construction of the existing building is not known; however it was probably built c.1920 and has undergone extensive alterations.

HISTORY

Barrack Street was so named because it is located adjacent to the parade ground and barracks set aside for the original planning of Perth for offices and soldiers. This area extended from St. Georges Terrace to Hay Street and from Barrack Street to Pier Street. The barrack ground formed the buffer in the original plan for Perth between the western commercial area and the eastern administrative part of town. The area became the site for various government buildings including the Town Hall in 1867. Barrack Street was subdivided in the 1890s. A number of lots with narrow frontages were created but a number of investors bought adjacent lots to develop larger buildings.
Numerous businesses have occupied the multiple outlets within the building over the course of its history. It is difficult to determine the date of construction without deeper research, as there have been shops in this location since before 1895. It was typical in the late 1890s economic boom for buildings to be demolished and rebuilt, and also refurbished with a modern style in the Inter-War years.
Albany Bell confectioners had occupied the location since 1903. It was originally No. 153-155. Numbering changed in 1908 to No. 115, then later 119-121. In 1930, 'ABC Ltd', confectioners and tea rooms, was in the

basement of the building. Peter Albany Bell was an important manufacturer and philanthropist in the early years of the twentieth century. He arrived in Western Australia in 1887 and worked at a variety of jobs before opening a small shop in Hay Street, Perth, in 1894 making and selling confectionery and lemon squash. The one shop expanded and developed into an established tea room business, with two more premises on Barrack Street. The building at 119-121 Barrack Street was called 'Albany Chambers' from 1915 in the post office directory.

HISTORY

Barrack Street was so named because it is located adjacent to the parade ground and barracks set aside for the original planning of Perth for offices and soldiers. This area extended from St. Georges Terrace to Hay Street and from Barrack Street to Pier Street. The barrack ground formed the buffer in the original plan for Perth between the western commercial area and the eastern administrative part of town. The area became the site for various government buildings including the Town Hall in 1867. Barrack Street was subdivided in the 1890s.
A number of lots with narrow frontages were created but a number of investors bought adjacent lots to develop larger buildings.
The location at 125-127 Barrack Street was originally No. 159-161. Numbering changed in 1908. Numerous businesses have occupied the multiple outlets within the building over the course of its history. It is difficult to determine the date of construction without deeper research, as there have been shops in this location since before 1895. It was typical in the late 1890s economic boom for buildings to be demolished and rebuilt, and also refurbished with a modern style in the Inter-War years. The 1920s in Perth was characterised by economic prosperity and consolidation. There was continued commercial development including the construction or arcades, hotels and commercial buildings.

The building presents as a two-storey commercial building comprising two shop fronts. The upper level has simple detail to the parapet. One pair of the upper floor sash windows is extant; the other pair is not original. The shop fronts are new and the pressed metal lining to awning is probably not original.

WESTERN AUSTRALIAN HISTORIC THEME

HISTORY

Example of a commercial building from the period of expansion and economic affluence and development that occurred in Perth after the gold rush. Built in c.1898, its original use was a grocer's shop and during the inter-war years it was a butcher's shop. Barrack Street between Wellington and Murray Streets was informally known as "Belly St" for the high concentration of restaurants and retailers of foodstuffs.

HISTORY

A series of commercial buildings from the period of expansion and economic affluence and development that occurred in Perth after the gold rush. Built circa 1896, their original use was retail shops. Barrack Street between Wellington and Murray Streets was then informally called “Belly St” for the high concentration of restaurants and retailers of foodstuffs. This group of buildings was occupied by fishmongers, butchers, jewellers, a pharmacy, a bootmaker and a grocer in the 1920s. By the 1940s there were two cafes in the group, a green grocer, butcher and fishmonger.

STATEMENT OF SIGNIFICANCE

The facade is of aesthetic significance for its commanding presence in the Barrack Street streetscape. Its central position, outstanding decoration and height make it a critical unifying element in the group of buildings in which it sits.
The design of the facade is attributed to the architects Porter and Thomas, who are significant in the history of

architecture in Western Australia as the designers of the Palace Hotel.
The facade represents a rare example of its stylistic type in Perth.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The facade represents a rare example of its stylistic type in Perth.

HISTORY

The building is of architectural interest in terms of its approach to achieving a functional design on a very narrow site. It is illustrative of how the business classes worked and lived in late nineteenth century Perth. Previously known as Seeligson's building and at one time, a pawn shop. COP Heritage Places File 1.34/143. Barrack Street was so named because it is located adjacent to the parade ground and barracks set aside in the original planning of Perth for officers and soldiers. This area extended from S. George's Terrace to Hay S. and from Barrack St to Pier St. The barrack ground formed the buffer in the original plan for Perth between the western commercial area and the eastern administrative part of town. The area later became the site for various government buildings including the Town Hall in 1867. Barrack St was subdivided in the 1890's. A number of lots with narrow frontages were created but a number of investors bought adjacent lots in order to develop larger buildings. (Extracted from G. Seddon & D. Ravine; A City and Its Setting; Fremantle 1986) Until the 1880's, the town centre was characterised by the establishment of small cottages, shops and small businesses and was rural in character. The expansion of commerce following the discovery of gold in the 1890's put pressure on land

in the centre of Perth with the result that most residential uses were displaced in favour of commercial development. During the 1890's and early 19900's the centre of Perth was substantially rebuilt. The period of expansion in Perth coincided with a period of economic depression in the eastern states, in particular Victoria. As a result, there was substantial migration from Victoria to W.A. This migration included businessmen, architects and builders, all of whom had a considerable influence on the development of the city.
Phineas Seeligson became a pawnbroker in 1887 and had a business on Murray Street. Pawnbrokers were used frequently by working families to meet their living needs which weren't covered by wages. This building was the second branch of his business and was opened on c1894 and was purpose built for Seeligson. It was designed by architect Henry (Harry Stirling Trigg who was the first architect born and trained in WA. The business was sold to Albert T Jones in 1898 who operated it from the building until 1930. The building contained living accommodation upstairs. Phineas Seeligson owned the building during this time and trustees owned it 30 years after his death as stipulated in his will. Seeligson was part of the Jewish community and made many bequeaths to community groups in his will. After Jones moved his business to Beaufort Street the building was used as a Chinese restaurant in 1930, then a smallgoods shop which opened in 1931. From then it has had many different uses including retail shops, pawnbroker, ANZ bank and barber shop.

HISTORY

Barrack Street was so named because it is located adjacent to the parade ground and barracks set aside for the original planning of Perth for offices and soldiers. This area extended from St. Georges Terrace to Hay Street and from Barrack Street to Pier Street. The barrack ground formed the buffer in the original plan for Perth between the western commercial area and the eastern administrative part of town. The area became the site for various government buildings including the Town Hall in 1867. Barrack Street was subdivided in the 1890s. A number of lots with narrow frontages were created but a number of investors bought adjacent lots to develop larger buildings. The location at 145-151 Barrack Street was originally No. 179-185. Numbering changed in 1908. Numerous businesses have occupied the multiple outlets within the building over the course of its history. It is difficult to determine the date of construction without deeper research, as there have been shops in this location since before 1895.

The corner premises was a chemist since c. 1897. It was originally Swan Pharmacy and Drug Co. From 1915 to at least 1949 the business was Alexander Trouchet, chemist.

From the street the building presents as a two-storey commercial corner building with a battlement parapet and prominent, moulded cornice. There are Romanesque style relief columns on the corner and between the paired windows. The verandah and original detail at ground floor has been lost. Some of the upper windows are not original, and an air con unit is intrusive. The building has been vacant since c. 2015. In 2022 the ground floor shop fronts are being refurbished.

HISTORY

Barrack Square was established in 1905-07 by reclamation of land from the Swan River. The Square was part of systematic programme of reclamation to provide a fringe of parkland around the Swan River.
Refer to HCWA Assessment 1999

WESTERN AUSTRALIAN HISTORIC THEME

Heritage Place Record Form

For Adoption

STATEMENT OF SIGNIFICANCE

The place displays Paradise style of plantings with mature introduced tree species which reflects the idealised landscapes desired by Western Society in the late 19th and 20th century.
The place makes a landmark contribution to the foreshore through the presence of tall mature trees.
The place was formally designed as a public space was laid out in 1905 based on the Union Jack design. The place together with the Narrows Interchange, Esplanade Reserve, Supreme Court Gardens and Langley Park define the southern edge of the city and provide contrasting features in the stretch of open space adjacent to the river.
The place is part of a major work of land reclamation carried out along the river foreshore. The place has been associated with river transport since 1845 as there has been a jetty located at the end of Barrack Street since that time.
The place has been the location of a river port since 1905- 1907, when river transport was booming due to the huge increase in population brought about by the gold boom, and reflects the shift in the role of the river from general transport to recreation following the construction of the Fremantle Guildford railway.
The place, including the Bell Tower, makes a landmark contribution to the foreshore, with the Tower, a prominent unique contemporary structure and the focal point of the square.
The place contributes significantly to the Perth's sense of place, as a point of departure and return for river transport and recreational activities.
The place is significant in linking the centre of the city to the river.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

HISTORY

In 1992, ownership of Court Hotel was transferred to Rodney John Kelly. From around this time, the Hotel shifted its focus to cater for a gay and lesbian clientele. Since then, Court Hotel has become a place of great importance to these communities in Perth, being the venue of choice for a wide range of gay and lesbian social functions and activities, although it was neither the first nor the only such venue.

WESTERN AUSTRALIAN HISTORIC THEME

3. Occupations - 311 Hospitality industry and tourism

AUSTRALIAN HISTORIC THEME

3. Developing Local, Regional and National Economies - 3.19 Marketing and retailing

STATEMENT OF SIGNIFICANCE

The place is a rare and early example of a hotel within the City of Perth that has been continually used for its original purpose since its construction in 1888.
The place is an important element of the predominantly late nineteenth and early twentieth century streetscape vista north along Beaufort Street as viewed from the James Street Mall. Its massing and scale complement the landmark buildings on the west side of Beaufort Street, including the Old Police Courts, the Western Australian Museum, and the Swan Barracks.
The place was owned from c.1905 by B. C. O'Brien, the first Labor member of the Western Australian Legislative Council, who served in Parliament from 1901 to 1904 and again from 1908 to 1914. He was publican of the hotel from 1905 to 1938, and the hotel continued to be owned by the O'Brien's family after his death until c.1950.
The place was used by the Western Australian Trade Union movement as an informal meeting place for most of the twentieth century.
The place contributes to the community's sense of place as a well- known building in the vicinity of the Perth Cultural Centre.

NATURE OF SIGNIFICANCE

HISTORY

Perth Trades Hall (1912) was designed as an office building for the state executive of the Australian Labor Party. It comprises 3 levels, 2 storeys above ground level and one lower ground level, and was the first purpose-built headquarters for the then Metropolitan District Council of the Australian Labor Federation (MDC).The building was constructed in 1911 as the office for the state executive of the Australian Labor Party. It was the first purpose-built headquarters of the then Metropolitan District Council of the Australian Labor Federation. This organisation represented the interests if the all the unions members in Perth and undertake administrative roles. The Trades Hall building was also to be used for lectures and as a meeting place for union members. The foundation stone was laid by the then Prime Minister Right Hon. Andrew Fisher PC in 1911 and was officially opened in 1912. The building was extended in 1923 with the official opening of the Unity Hall/Theatre which was used for official functions and social uses.
A rear extension from 1934 was demolished for the high rise building Curtin House. During the 1980s the unions and Labor Party sold the building and the Delaney Gallery bought the building for use as an art gallery and office space. In 2013 the building was purchased by the Construction Forestry Mining and Energy Union of Workers (CFMEU) and was again used for its original purpose.

HISTORY

Example of a commercial building constructed in Perth during the period of expansion and development that followed the gold rush of the 1890's. In the early years of the Swan River colony the area to the north of Perth (now known as Northbridge) was low lying and swampy was therefore settled more slowly than the better land closer to the river. It was also further from the river port and the main means of transport.
A 1948 sewer plan show all three buildings in place, with a verandah along the east face of no. 84, and outbuildings along the southern boundary that have since been removed, together with a further outbuilding towards the rear of the lot on the northern boundary. No. 86 has a small brick addition to the rear that has since been removed. No. 88 has a small rear verandah and two additions to the rear on the southern boundary, with a path leading to a closet at the rear of the lot.84 Beaufort Street In the early nineteenth century many friendly societies were strongly associated with individual pubs or drinking dens, which in many towns were often the only venues where a substantial body (of men) could meet. The association of society with venue could be so

strong that Foresters, Gardeners, Carters and others were still remembered in some public house names at the end of the twentieth century. In fact, one strand of thought held that friendly societies arose directly from 'harmonious clubs' promoted at the end of the eighteenth century by the proprietors of public houses or inns themselves. These clubs, otherwise, simply existing to facilitate drinking, organised welfare by 'passing the hat'. In time members paid a regular subscription in return for welfare protection. From these clubs developed the affiliated orders - Oddfellows, Buffaloes, Foresters, Shepherds, Druids and others. Many of these societies were represented in Western Australia.
However, as ideas about temperance spread in the 19th century, some activists saw that there was an advantage in linking temperance with mutual aid. Subscriptions could be lower when the effects of alcohol were removed from the benefit equation. The International Order of Rechabites was one of the prominent temperance friendly societies in Australia and Western Australia.
On the southern side of no. 84's front elevation, there is a foundation stone that records "Erected by the Metropolitan United Friendly Societies Dispensary and Association Trustees, T.L. Beauchamp, J.R. Bolt, H. Hall, H.W. Knight, Building Committee H. Bromley, T.H. Quill, R.J. Dickson, H.J. Rex, J. O'Donoghue, J.H. Wright and A.H. Tillotson, President, F.A. Woodman Secretary. 1911. Wright Powell & Cameron Architects. Chapman & First Contractors".
On 8 August in the same year, the foundation stone for the first section of the new Trades Hall (later the Delaney Gallery) at 74 Beaufort Street was laid by the then Prime Minister and leader of the Australian Labor Party, the Right Hon. Andrew Fisher PC. The Australian Labor Party gradually acquired the intervening properties and then 84-88 Beaufort Street, disposing of its interest in the mid 1980s.In about 1994, the Androvski family acquired the place and in 1999 the owners were given consent to use the first floor of the southern two buildings as offices.
No. 84 was fitted out as the Court Wine Bar in the 1980s.No 86Prior to 2009, no. 86 was used as Coffex and prior to that, a white goods business trading as Turnbulls.No.88 Ferguson Building
No. 88 is first recorded in rate books in 1906 with the owner recorded as Duncan Ferguson, Newsagent. He is also recorded as occupier until the 1913 Wise's Post Office Directories, when Owen Bros Newsagents are recorded as occupying the place, and Owen Bros continue to be recorded at the address until at lease 1926.In 2009, No. 88 is run as Beaufort News, continuing a long tradition, and the entire first floor functions as offices for K2 Technology, which includes all three buildings.

WESTERN AUSTRALIAN HISTORIC THEME

HISTORY

The area to the north of Perth (now known as Northbridge) was valued by the Whadjuk Nyoongar for its low lying and swampy lakes system, which provided abundant resources. After colonisation, this land was not settled as quickly as drier areas on the ridge of Perth. In 1854 some of the swampy land to the north of Perth was drained producing fertile land for farming. As the population grew during the convict era of the 1850s the land was subdivided into allotments circa 1860 and taken up by discharged soldiers, artisans and small landholders. The area at this period was characterised by small cottages and businesses.
In 1873 the lakes were drained and in the late 1870s work began on the Fremantle to Guildford railway line with the Perth railway station constructed on the drained site of Lake Kingsford. In 1881 the railway from Fremantle to Guildford was opened and became the main transport route. From that period commerce and trade tended to focus on smaller commercial enterprises and manufacturing to the north. The street numbering on Beaufort Street changed a few times up to 1909, but prior to this, the location was part of a vet surgeons, established by H. H. Edwards in 1897, with the street number 108. To the rear was another business, Dunlop and Co, mattress manufacturers. These businesses were gone after 1907.
The building at No. 96 was most likely built in 1908. It was first occupied by Millen and Sons, , wheelwright and blacksmiths. A random selection of uses of the building over time are: Efficiency Motor School (1925); Federal Bus Service Ltd (1930); Mildwaters Motor Garage (1949). At 2022, the place is Jackson's Drawing Supplies.

HISTORY

Example of a commercial building in Perth during the period of expansion and development that followed the gold rush of the 1880's. In the early years of the Swan River colony the area to the north of Perth (now known as Northbridge) was low lying and swampy and was therefore settled more slowly than the better land closer to the river. It was also further from the river port and the main means of transport. Northbridge is an inner suburban area, named because it is just north of Perth across the railway bridge. It was approved as a suburb name in 1982. In 1854 some of the swampy land to the north of Perth was drained producing some fertile land for farming and later subdivision. The land was subdivided into allotments circa 1860. Land in the area was taken up by discharged soldiers, artisans and small landholders. The area at this period was characterised by small cottages and businesses. In 1881, the railway from Fremantle to Guildford was opened and became the main transport route. From that period commerce and trade tended to focus more fashionable with smaller commercial enterprises and manufacturing to the north. It was less fashionable to live north of the railway line, however the area was close to the city and during the 1890's and early 1900's was substantially redeveloped with further subdivision of lots and mixed residential and commercial development. Many trade and community organisations had their origins in the area at this time. Over the years the population of the area changed as

people relocated to suburban areas of the city. As a result, Northbridge became the home for successive migrant communities. For example, communities including Greek, Italian, Chinese and more recently Vietnamese migrants have settled here as property remained relatively cheap and had the advantage of being close to the city. These communities have over the years given this area a distinctive character, generally recycling the existing buildings rather than redeveloping the area.
The c1895 water map of the City of Perth suggests this section of Beaufort Street between Aberdeen and Newcastle Streets contained several buildings. The site was either vacant or a residence during the first years of the twentieth century. In 1909, a Mrs Alice Lawrence resided at No. 149. By 1935-36 there were established businesses in the building; in No. 147 Mrs Nott, a dressmaker and in No. 149 Mr W. Gill a grocer, who was still there in 1949. In 1949 Mr L. Baster dyer and cleaner, was listed for No. 147.

HISTORY

Example of a commercial building in Perth during the period of expansion and development that followed the gold rush of the 1880's. In the early years of the Swan River colony the area to the north of Perth (now known as Northbridge) was low lying and swampy and was therefore settled more slowly than the better land closer to the river. It was also further from the river port and the main means of transport. Northbridge is an inner suburban area, named because it is just north of Perth across the railway bridge. It was approved as a suburb name in 1982. In 1854 some of the swampy land to the north of Perth was drained producing some fertile land for

farming and later subdivision. The land was subdivided into allotments circa 1860. Land in the area was taken up by discharged soldiers, artisans and small landholders. The area at this period was characterised by small cottages and businesses. In 1881, the railway from Fremantle to Guildford was opened and became the main transport route. From that period commerce and trade tended to focus more fashionable with smaller commercial enterprises and manufacturing to the north. It was less fashionable to live north of the railway line, however the area was close to the city and during the 1890's and early 1900's was substantially redeveloped with further subdivision of lots and mixed residential and commercial development. A number of trade and community organisations had their origins in the area at this time. Over the years the population of the area changed as people relocated to suburban areas of the city. As a result, Northbridge became the home for successive migrant communities. For example, communities including Greek, Italian, Chinese and more recently Vietnamese migrants have settled here as property remained relatively cheap and had the advantage of being close to the city. These communities have over the years given this area a distinctive character, generally recycling the existing buildings rather than redeveloping the area.
The building was designed by Charles Oldham ad were built in 1903. Many shops and residences were built in the area north of the train line in the 1890s. The location of the current shops and residences was formerly the site of timber cottages. The property was to be an investment for Dr Daniel Kenny who was one of many doctors at the time who invested in property during the Gold Boom. Each shop had a residence with bathroom facilities in the rear. A variety of businesses were located in the tenancies during the twentieth century. The building changed owners in the 1940s with Margaret Anketell recorded as the owner from 1956 to 1963. The property was transferred to the Metropolitan Regional Planning Authority in 1973.

HISTORY

The Protestant Alliance Friendly Society originated in Ballarat in the 1860s and was set up to provide for members' families if the member couldn't work. Members were mostly working class including miners, carpenters or miners. Friendly Societies were brought across to WA from the eastern states during the Gold Boom of the 1890s. The land the building was built was owned by a group of men who were associated with the Society which changed over time. The building was recorded in the 1902 rates book. In 1913 women were able to join the Society. Up to World War Two most working class people belonged to a Friendly Society. The shops at the front had multiple tenants during the 1940s and 1950s. Friendly Societies weren't as important, and membership declined after the Government provided social services and healthcare.

STATEMENT OF SIGNIFICANCE

The place is a fine and relatively intact example of a two storey brick, stucco, and iron building, with very fine interior spaces, in the Federation Free style.
The place provides evidence of the medical services and health insurance activities provided on a voluntary basis by Friendly Societies.
The place is rare as an extant two-storey Federation-period hall designed to include shops.
The relief of William of Orange is an unusual feature in the façade of a Western Australian building and contributes to the place's distinctive appearance.
The place is rare as a surviving example of a hall built for a formerly dominant social phenomenon, the Friendly Society.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The place is rare as a surviving example of a hall built for a formerly dominant social phenomenon, the Friendly Society.

HISTORY

The area to the north of Perth (now known as Northbridge) was valued by the Whadjuk Nyoongar for its low lying and swampy lakes system, which provided abundant resources. After colonisation, this land was not settled as quickly as drier areas on the ridge of Perth. In 1854 some of the swampy land to the north of Perth was drained producing fertile land for farming. As the population grew during the convict era of the 1850s the land was subdivided into allotments circa 1860 and taken up by discharged soldiers, artisans and small landholders. The area at this period was characterised by small cottages and businesses.
In 1873 the lakes were drained and in the late 1870s work began on the Fremantle to Guildford railway line with the Perth railway station constructed on the drained site of Lake Kingsford. In 1881 the railway from Fremantle to Guildford was opened and became the main transport route. From that period commerce and trade tended to focus on smaller commercial enterprises and manufacturing to the north. The Post Office Directory first lists the ground floor shops and houses above on the corner of Newcastle and Beaufort Streets in 1900, as a stationer and a grocer. Numbering changed in 1908 and was previously Nos. 184-186.

The corner store was a butcher for many years (1919 to 1949, possibly later). The Metropolitan Water Supply Survey plan (1948) shows a verandah that continues to the front of No. 162 and 160. No. 166 has a truncated corner. The building has lost its verandahs and ground floor shop fronts. The corner upper floor window has been bricked in. At 2022 it is a bicycle shop.

WESTERN AUSTRALIAN HISTORIC THEME

STATEMENT OF SIGNIFICANCE

The place has some aesthetic significance as an example of a commercial building constructed during the period of economic affluence and increased development that followed the gold boom.
It has historic significance for representing the expansion and development of commerce and trade in the City of Perth in the early years of the twentieth century.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

It has historic significance for representing the expansion and development of commerce and trade in the City of Perth in the early years of the twentieth century.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place has some aesthetic significance as an example of a commercial building constructed during the period of economic affluence and increased development that followed the gold boom.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision-making body is relevant

CONDITION AND AUTHENTICITY

Condition	Fair
Building Fabric Authenticity	Medium. Inappropriate decoration of the facade reduces the integrity of the building.

CLASSIFICATION OF SIGNIFICANCE

Some/moderate – Category 3 - Contributes to the heritage of the locality.

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
Bellevue Terrace developed as an extension of Mount Street. It contains a number of large residential buildings dating from the early 1900s and includes a number of Inter-War and Post-WWII residences and apartment buildings. Views over the city have always made this a prestigious address. The apartment block at No. 14 Bellevue Terrace represents the development of medium density apartment blocks in West Perth in the late Twentieth century. It won a Royal Australian Institute Award of Merit in 1994.
The architects were Perth-based Overman & Zuideveld, est. 1992, known as Zuideveld Marchant Hur Architects (ZMH) since 2009.

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system. The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway. Bellevue Terrace developed as an extension of Mount Street. It contains a number of large residential buildings dating from the early 1900s and includes a number of Inter-War and Post-WWII residences and apartment buildings. Views over the city have always made this a prestigious address. The Post Office Directory lists a New building (Flats) at No. 16 Bellevue Terrace in 1928. It was originally three stories. It featured a large central curved wall and colonnaded loggia, built in the Inter-War Mediterranean style with elements of Functionalism. It was built for Mrs Freddie Piesse on land that was originally supposed to be part of Kings Park, that she purchased in 1927. It had two self-contained apartments. A newspaper article in 1928 show the building as it was originally constructed. (Sunday Times, 25 Nov 1928, p 10)
The property changed hands in 1950, by which time it contained seven flats. The buyer was Mr. H. Butcher, of Boolathana station, Carnarvon, who paid £26,000. (West Australian, 2 Sept 1950, p. 8) The Metropolitan Water

Supply Survey plan dated 1953 shows that the asymmetrical frontage had three garages on the right. Aerial photos show the building was redeveloped in 2001, including with additional levels. From the street view it appears substantially altered from its 1928 style of architecture. There are still seven strata titles to the building.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement and mobility - 107 Settlements
3. Occupations - 306 Domestic activities
5. Outside influences - 504 Depression and boom

AUSTRALIAN HISTORIC THEME

4. Building Perth (Settlements & Cities) - 4.1.3 Learning to live with property booms & busts
4. Building Perth (Settlements & Cities) - 4.6 Remembering significant phases in the development of settlements, towns & cities
8. Developing Perth's Cultural Life - 8.13 Living in cities & suburbs

STATEMENT OF SIGNIFICANCE

The place, built in 1928, altered in c.1945 and redeveloped in 2001, reflects the period of affluence and optimism following the end of World War I.
The increase in construction of flats and apartments in inner city areas was in response to the demand for housing in the Inter-War period.
The flats are a representative example of residential development and redevelopment in response to changes in lifestyle. The redevelopment has not interrupted the continuity of use.

HISTORY

Mount Street appeared on the first statutory plan of Perth prepared by A. Hillman and signed by Governor John Hunt in 1845, however, it was not established and settled until much later. West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status associated with addresses in Mount Street and access to the city's piped water system.
Mount Street was characterised by large, often architect designed, mansions. Some of these were converted to flats in the 1950s -1970s, and there were also a number of apartment blocks constructed in this period. Mount Street has always been an extremely prestigious address and has included embassies and homes of prominent families and notable individuals in the context of the history of the city and the state.
Prior to the Mt Eliza Apartments, there was a property which held a street address of 71 Mount Street. For a time in the early 1900s it was called ‘Urella’ and occupied by various people including consuls and members of Parliament. From the 1940s there was also Restormel Flats listed here.

The Metropolitan Water Supply Survey plan dated 1965 shows the footprint of a fifteen storey, circular 'Mt Eliza Flats', a unique design by architects Krantz and Sheldon. It is made of reinforced concrete with projecting fins, glazed curtain walls and decorative element to the top. It soon became and still remains a landmark on the horizon of Mt Eliza. It has a colloquial name 'The Thermos Flask" due to its appearance.

HISTORY

Until the 1880s the town centre was characterised by the establishment of small cottages, shops and small businesses and was rural in character. The expansion of commerce following the discovery of gold in the 1890s put pressure on land in the centre of Perth with the result that most residential uses were displaced in favour of commercial development. During the 1890s and early 1900s the centre of Perth was substantially rebuilt. The house at Bennett Street was built in 1904. [It was originally No. 37, then No. 65 in c. 1907.] James Port was the first occupant. Mrs James Port was listed from 1908.The Metropolitan Water Supply Survey plan dated c. 1948 shows a different footprint for a property here. Aerial photos (Landgate) show that c. 1982 the front portion of the house including a wrap-around verandah were removed. The property has survived development pressures around it, particularly since the 1980s, when most of Bennett Street changed from residential to commercial use. As at 2021, the former house is used as an office for a car rental business adjacent on Adelaide Terrace. The original chimney is evident.

HISTORY

The homes built in Perth in the 1890's and early 1900's were generally larger and more elaborately detailed than the earlier simple cottages they replaced. Although influence in their design by homes of Victoria in particular , due to the influx of migrants from the eastern states, houses in Perth tended to be constructed as single detached, or sometimes pairs of attached, houses, rather than the extensive rows of terraced houses found in eastern Australia. Houses were generally single storey brick with corrugated iron roofs. Some more prestigious homes had slate or tiled roofs. Stucco decoration was popular as was wrought iron lace and timber fretwork. 17) Although East Perth was included on the plan for Perth from earliest surveys, the area remained substantially undeveloped until the period of expansion that accompanied the gold rush. Part of the area had been designated for cemetery purposes which probably detracted from its attractiveness for settlement. In 1884 East Perth has a population of 600 in 112 houses set amongst fruit and vegetable gardens and paddocks. By 1894 the population had more than doubled to 1300 residents and 245 houses and by 1904 it had increased to 600 occupants' of 1066 houses. The East Perth Primary School was planned in 1894 as a response to the needs of the growing population. [Ian Kelly; 'The Development of Housing in Perth (1890-1915)'. Unpub. Thesis UWA 1992; p 96] East Perth developed as an industrial area. In the mid nineteenth century brickworks were

established in the area. Later an abattoir and the gas works were amongst the industries established in the area. The presence of industries provided employment but also reduced the general attractiveness of the area for residential purposes. Despite this some grander homes were built in prominent locations in the area. Like Northbridge, the character of the area changed though the twentieth century as the population varied as a result, of migration.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement and mobility - 107 Settlements

AUSTRALIAN HISTORIC THEME

4. Building Settlements, Town and Cities - 4.1.1 Selecting township sites

STATEMENT OF SIGNIFICANCE

The place is of aesthetic significance as an example of a residential building dating from the period around the turn of the century. The increasing affluence of the community following the gold boom is reflected in the increased use of decoration.
The place is of aesthetic significance for the contribution it makes to the quality of its setting.
The place is of aesthetic significance for its landmark qualities.
The place is of aesthetic significance for its contribution to the north vista of Bennett Street. The place is of historic significance because it reflects the way of life of the wealthier residents of Perth in the late nineteenth and early twentieth century.
The place has historic significance because it reflects the changing character of the Perth community from the post gold rush settlement period to the period of settlement by various ethnic communities to the present. The place is rare as the only two-storey former residence building constructed in the Federation Arts and Craft style in East Perth.
The place is representative as a residential property in Perth dating from the late nineteenth to early twentieth century.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place is of historic significance because it reflects the way of life of the wealthier residents of Perth in the late nineteenth and early twentieth century. The place has historic significance because it reflects the changing character of the Perth community from the post gold rush settlement period to the period of settlement by various ethnic communities to the present.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The place is rare as the only two-storey former residence building constructed in the Federation Arts and Craft style in East Perth.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The place is representative as a residential property in Perth dating from the late nineteenth to early twentieth century.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place is of aesthetic significance as an example of a residential building dating from the period around the turn of the century. Architectural Style 1 General	Victorian (c.1840-c.1890)
Architectural Style 1 Specific	
Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

Single storey residential building with hipped roof and corbelled chimneys. The rendered brick has an ash like effect with a rusticated quoining effect to the corners and a central arch to the entry. The front verandah has been enclosed with fibrous (asbestos) cement panels with aluminium framed windows. The original house remains largely intact behind the facade. Former stable building to the rear has been altered over the history of the building and is in poor condition.
The interior of the building comprises a large central space with rooms on either side. The central area is the approximate width of two corridors however appears to have been constructed in this manner. The pressed metal ceiling with elaborate detailing appears from inspection to date from the time of construction of the building. Other details of the place are similar to adjacent Nos 54 and 56.
One of a diminishing number of residential buildings dating from the late nineteenth and early twentieth century in the Bennett Street/ /Goderich Street area.

HISTORY

Demolished 2003. Prior to the 1890s central Perth was characterised by numerous small shops and businesses located in amongst residential premises which included boarding houses and cottages. Following the gold boom of the 1890s there was substantial redevelopment of the centre of the city with the result that very few cottages

or other small buildings from the earlier period remain extant. The homes built in Perth in the 1890s and early 1900s were generally larger and more elaborately detailed than the earlier simple cottages they replaced. Although influence in their design by homes of Victoria in particular , due to the influx of migrants from the eastern states, houses in Perth tended to be constructed as single detached, or sometimes pairs of attached houses, rather than the extensive rows of terraced houses found in eastern Australia. Houses were generally single storey brick with corrugated iron roofs. Some more prestigious homes had slate or tiled roofs. Stucco decoration was popular as was wrought iron lace and timber fretwork. A group of Victorian residences at 52-58 Bennett Street dated from c. 1897. No. 58 was demolished in the late 1980s. No. 52 and semi-detached pair No. 54-56 were included on the 1999 draft local heritage survey. Aerial photos show that they were demolished in 2003.52 Bennett Street was built in 1898. [It was originally number 48, then 68, then 82, then 52 in c1907.] This building is believed to have been used for a boarding house for many years. The first resident was Charles Book, followed by Mrs Ellen Archibald [widow] from 1899 to c1905. Then c1907 long-term owners and residents, the Sloss family, resided there. Mr Othel Sloss was a sanitary contractor in the goldfields prior to moving to Perth. Relative Wilhelmina Sloss was a pioneer woman of the goldfields. Another relative, Moses Sloss, married the daughter of William Chipper, a likely relative of Don Chipper, undertaker, and Stephen Chipper, original owners of Lot E17 and portion of Lot E18, the location of 52 Bennett Street. This connection is likely how the land came to be transferred to Othel Sloss in 1905.
Othel's widowed wife Eliza Jane lived at No. 52 from 1908 to c1925. The place was then occupied by Miss Kate Davidson until c1936. New owner from 1946, Lewis J Polak operated the place as 'apartments' c. 1949, which could be interpreted as a boarding house. No. 54-56 Bennett Street is believed to have been used as a brothel during one period of its history. Both uses are likely. This part of East Perth was mostly rental accommodation, and around 1900 there were eleven boarding houses on Goderich, Hay and Bennett Streets alone, plus others on Wittenoom and Wellington Streets. East Perth in the 1980s was characterised by a newly arrived migrant population and low-income earners. It continued to have a large proportion of boarding houses and hostels and earned a reputation as an area for the homeless, derelict houses and industrial wasteland.

HISTORY

The homes built in Perth in the 1890s and early 1900s were generally larger and more elaborately detailed than the earlier simple cottages they replaced. Although influenced in their design by homes of Victoria in particular, due to the influx of migrants from the eastern states, houses in Perth tended to be constructed as single detached, or sometimes pairs of attached, houses, rather than the extensive rows of terraced houses found in eastern Australia. Houses were generally single storey brick with corrugated iron roofs. Some more prestigious homes had slate or tiled roofs. Stucco decoration was popular as was wrought iron lace and timber fretwork. Although East Perth was included on the plan for Perth from the earliest surveys, the area remained substantially undeveloped until the period of expansion that accompanied the gold rush. Part of the area had been designated for cemetery purposes which probably detracted from its attractiveness for settlement. In 1884 East Perth had a population of 600 in 112 houses set amongst fruit and vegetable gardens and paddocks. By 1894 the population had more than doubled to 1,300 residents and 245 houses and by 1904 it had increased to 6,000 occupants of 1,066 houses. The East Perth Primary School was planned in 1894 as a response to the needs of the growing population. (Ian Kelly; 'The Development of Housing in Perth (1890~1915)'; Unpub. Thesis UWA 1992; p96.) East Perth developed as an industrial area. In the mid nineteenth century brickworks were established in the area. Later an abattoir and the gas works were amongst the industries established in the

area. The presence of industries provided employment but also reduced the general attractiveness of the area for residential purposes. Despite this some grander homes were built in prominent locations in the area. Like Northbridge, the character of the area changed through the twentieth century as the population varied. As a result, of migration. The building was demolished in 2011.

HISTORY

Parkside Hotel was built in 1960. It replaced a row of six almost identical houses at Nos. 148, 150, 152, 154, 156 and 158 Bennett Street, and a single building at No. 160, that was on the corner of Bennett and Wickham Streets with no set back. It is a two-storey motel complex, with parking at the rear, surrounded by three wings of rooms in a C-shape. Built opposite Wellington Square it was named Parkside.
It is now Bailey's Hotel Motel. There is a restaurant 'Bellavista' that addresses the corner. The place is opposite Wellington Square, a Registered Aboriginal Site (ID 37452), also called the Old Recreation Reserve, Bunjie Park.
This location has social significance to Aboriginal people, who gather there and have done so for many years. The Wellington Square Cultural Heritage Assessment (Moodjar Consultancy, 2017) includes an ethnographic survey and a recorded childhood memory associated with the place was: "As kids we used to use the swimming pool in the motel on the corner of Wickham and Bennett Street.

Physical Description	

A two storey brick building in the Inter War Art Deco style with shopfronts on the ground floor. Doors open to a colonade on the first floor.

Walls 1 Material	Brick - Rendered
Walls 2 Material	Brick
Roof Material	Metal - Corrugated Iron
Architect	William G. Bennett
Builder	Frank A. Hann
Other Associations	

HISTORY

Architect William G. Bennett ARIBA (London), ARIA (WA), and the builder Frank A. Hann were Freemasons. Sir John Winthrop Hackett was a Grand Master of the Order. The building was consecrated by the most worshipful Grand Master Bro F. A. McMullen on 26 November 1935. The building has a distinctive Egyptian Art Deco façade with traditional Masonic columns, and the internal Art Deco features. Nedlands Park Masonic served as a meeting place for many different suburban lodges, particularly the University of WA lodge which used the building from the 1940s up to 2002. The design incorporated two shops on the ground floor that could be leased out to raise revenue for the Lodge. The public hall could also be made available for community use.
Nedlands Park Lodge amalgamated with the Lodge of Dalkeith and Light No 176 WAC on 30 June 1987 under the name of The Nedlands Dalkeith Lodge No. 115 WAC.
The property was sold to the University of WA on 27 September 1997.

AUSTRALIAN HISTORIC THEME

8. Developing Australia's Cultural Life - 8.5 Forming associations

STATEMENT OF SIGNIFICANCE

The place is rare as a fine example of an intact, two storied Art Deco style Masonic Hall incorporating retail shops on the ground floor for lease to the public.
The place is a landmark as a two storey building with a dominant and distinctive street façade in a prominent location close to the intersection of a main highway.
The place contributes significantly to the urban fabric of Broadway, in particular association with the two buildings adjacent to the south at numbers 10 and 28 Broadway and is an important element of the commercial development in the street.
The place has been important to the development of Freemasonry in Western Australia, having concurrently served as a meeting place for many different suburban Masonic lodges, since its construction in 1935.The place is a good example of the architectural design work of William G. Bennett, who designed many fine Art Deco style buildings in the State.
The place has social value for the Nedlands community and for Freemasonry in that locality, particularly the University Lodge who used the place from the 1940s until 2002.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place has been important to the development of Freemasonry in Western Australia, having concurrently served as a meeting place for many different suburban Masonic lodges, since its construction in 1935.

The place has social value for the Nedlands community and for Freemasonry in that locality, particularly the University Lodge who used the place from the 1940s until 2002.

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place is a landmark as a two storey building with a dominant and distinctive street façade in a prominent location close to the intersection of a main highway. The place contributes significantly to the urban fabric of Broadway, in particular association with the two buildings adjacent to the south at numbers 10 and 28 Broadway, and is an important element of the commercial development in the street.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The place is a good example of the architectural design work of William G. Bennett, who designed many fine Art Deco style buildings in the State.

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Very Good
Building Fabric Authenticity	High.

CLASSIFICATION OF SIGNIFICANCE

Exceptional – Category 1 - Essential to the heritage of the locality. Rare or outstanding example.

Archaeology	
Physical Description	

The cemetery comprises of a number of formerly separated denominational burial grounds dating from 1829 and a mortuary chapel in the Church of England Cemetery later used as a Parish Church. The site is now designated Disused Burial Ground.

Walls 1 Material	Brick - Common
Walls 2 Material	
Roof Material	Timber - Shingle
Architect	
Builder	
Other Associations	

HISTORY

In 1842 the property was allocated to be used as a burial site. The cemetery was open to Church of England initially, then was open to Roman Catholic, Congregational, Wesley churches, then Jewish community. In 1871

the chapel was designed by Richard Roach Jewell and located in the Church of England section. In 1897 Karrakatta cemetery was allocated as an alternative to East Perth which people were concerned about as a health hazard. By 1899 East Perth cemetery was designated as a disused cemetery. Approximately 10,000 people were buried there, with only 800 headstones remaining. In 1910 some of the disused area of the cemetery had been sold for housing. There was public concern that the cemetery was in a bad state of repair and two local residents lobbied for fundraising to maintain the cemetery. St Bartholomew's Church was still in use into the 1970s even though it was deteriorating during this time. In the 1950s some of the land from the Presbyterian, Jewish and Chinese sections was given to the Education Department for use by Perth Girls School.
In the 1990s a fence was erected around the perimeter, a memorial to the Chinese people buried in the cemetery was placed inside the grounds and the Jewish cemetery was set aside as a reserve. Restored headstones were placed in this area. The whole cemetery is vested with the National Trust. A small portion is a park and is vested to the City of Perth.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement and mobility - 107 Settlements
4. Social and civic activities - 404 Community services and utilities
4. Social and civic activities - 406 Religion6. People - 602 Early settlers

AUSTRALIAN HISTORIC THEME

4. Building Settlements, Town and Cities - 4.1 Planning urban settlements
8. Developing Australia's Cultural Life - 8.6.2 Maintaining religious traditions and ceremonies
9. Marking the Phases of Life - 9.7 Dying
9. Marking the Phases of Life - 9.7.1 Dealing with human remains
9. Marking the Phases of Life - 9.7.2 Mourning the dead
9. Marking the Phases of Life - 9.7.3 Remembering the dead

STATEMENT OF SIGNIFICANCE

The place is rare as a group of intact colonial cemeteries located within the central business district of an Australian capital city.
The place has important associations with early colonial settlers from the 1830s to the 1890s, including government administrators, well-known families, religious leaders and other prominent people involved in the development of colonial Perth.
The place contains a wide range of memorials, which reflect the traditions, and trends of different religious denominations until the late nineteenth century, including particularly fine examples that demonstrate the skill, artistry and craftsmanship of their time.
The place has the potential to yield information, through archaeological investigation, relating to the population of the State, such as life expectancy, family size, religious affiliation, ethnicity, and genealogy.
St Bartholomew's Church is the only example of a mortuary chapel constructed in Western Australia, which was later converted for use as a parish church.
The place contributes to the community's sense of place as a tangible reminder of the contribution of early settlers to the development of Perth.
The place has landmark quality on a hill top site, and its dry, 'rural style' landscape setting offers an experience of isolation and tranquillity that is unique in an area now surrounded by urban development.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place contributes to the community's sense of place as a tangible reminder of the contribution of early settlers to the development of Perth.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The place is rare as a group of intact colonial cemeteries located within the central business district of an

Australian capital city. St Bartholomew's Church is the only example of a mortuary chapel constructed in Western Australia, which was later converted for use as a parish church.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

The place has the potential to yield information, through archaeological investigation, relating to the population of the State, such as life expectancy, family size, religious affiliation, ethnicity, and genealogy.

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place contains a wide range of memorials, which reflect the traditions, and trends of different religious denominations until the late nineteenth century, including particularly fine examples that demonstrate the skill, artistry and craftsmanship of their time. The place has landmark quality on a hill top site, and its dry, 'rural style' landscape setting offers an experience of isolation and tranquillity that is unique in an area now surrounded by urban development.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The place has important associations with early colonial settlers from the 1830s to the 1890s, including government administrators, well-known families, religious leaders and other prominent people involved in the development of colonial Perth.

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Good
Building Fabric Authenticity	The place has a high level of authenticity.

CLASSIFICATION OF SIGNIFICANCE

Exceptional – Category 1 - Essential to the heritage of the locality. Rare or outstanding example.

HISTORY

Although East Perth was included on the plan for Perth from earliest surveys, the area remained substantially undeveloped until the period of expansion that accompanied the gold rush. Part of the area had been designated for cemetery purposes which probably detracted from its attractiveness for settlement. In 1884 East Perth has a population of 600 in 112 houses set amongst fruit and vegetable gardens and paddocks. By 1894 the population had more than doubled to 1300 residents and 245 houses and by 1904 it had increased to 6000 occupants' of 1066 houses.
East Perth developed as an industrial area in the mid-late nineteenth century when brickworks were established in the area. Later an abattoir and the gas works were amongst the industries established. The presence of industries provided employment but also reduced the general attractiveness of the area for residential purposes. Despite this some grander homes were built in prominent locations in the area. Like Northbridge, the character of the area changed though the twentieth century as the population varied as a result of migration. The small, single room-width house at No. 77 Brown Street is one of a few remaining houses on the street. It is a vernacular style, built in 1913. The first occupant listed in the Post Office Directories was William Nimmo. The 1948 Metropolitan Water Supply Survey plan shows that there are factories and houses along the south side of Brown Street between Glyde Street and Jewell Street. Correlation with the Post Office Directory of 1949 shows that Mrs Ratcliffe, Optometrist, lived at No. 77, and adjacent was Mrs I Ratcliffe, Fuel Dealer, (the plan labels this a Wood Yard), with Mr Charles Ratcliffe living at No. 81. West of this was a factory, Western Hat Manufacturing Co. and to the east of No. 77 was another factory, Modern Furnishing Co. The north side of

Brown Street in this block was all residences. In the 1990s No. 77 was a lunch bar. It was named 'Food Fair on Brown Street' in April 2016. A real estate advertisement in May 2021 advertising the place for sale has internal photos which shows it has no original internal form as a house. In 2022, there is a roller door in place of the door.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement and mobility - 111 Depression and boom
3. Occupations - 306 Domestic activities

AUSTRALIAN HISTORIC THEME

4. Building Perth (Settlements & Cities) - 4.6 Remembering significant phases in the development of settlements, towns & cities

STATEMENT OF SIGNIFICANCE

The place has historic significance as a surviving example of a worker's cottage in an area that became increasingly industrial after the 1890s.
It represents the way of life of the working class of Perth in the late nineteenth and early twentieth century.
The place is recognisable as a former house but has been heavily modified.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place has historic significance as a surviving example of a worker's cottage in an area that became increasingly industrial after the 1890s.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HISTORY

Although East Perth was included on the plan for Perth from earliest surveys, the area remained substantially undeveloped until the period of expansion that accompanied the gold rush. Part of the area had been designated for cemetery purposes which probably detracted from its attractiveness for settlement. In 1884 East Perth has a population of 600 in 112 houses set amongst fruit and vegetable gardens and paddocks. By 1894 the population had more than doubled to 1300 residents and 245 houses and by 1904 it had increased to 6000 occupants' of 1066 houses.
The East Perth Primary School was planned in 1894 as a response to the needs of the growing population. East Perth developed as an industrial area in the mid-late nineteenth century when brickworks were established in the area. Later an abattoir and the gas works were amongst the industries established. The presence of industries provided employment but also reduced the general attractiveness of the area for residential purposes. Despite this some grander homes were built in prominent locations in the area. Like Northbridge, the character of the area changed though the twentieth century as the population varied as a result of migration.
The 1948 Metropolitan Water Supply Survey plan shows that there is a combination of factories and houses along the south side of Brown Street between Glyde Street and Jewell Street. The building at No. 87 has 1927 in the gable façade, suggesting its date of construction. From 1935 the Post Office Directory lists the place as Western Hat Manufacturing Co. (Then No. 83.) The business was still operating in 1949.
State Records Office catalogue search suggests it was a State operated company, and their archives will reveal more history on this company and the building. It was possibly a government-run industry established to provide

employment during the 1930s Depression, similar to the State Saw Mills, and other ventures. More research is required.
It is a two-storey red brick and iron, double gabled factory built in the Inter-War Stripped Classical/Functionalist style, with small paned steel framed windows and a pediment brick parapet to the street façade. A 2017 real estate advertisement online shows internal features remain such as a timber staircase, and office spaces on the upper floor.

WESTERN AUSTRALIAN HISTORIC THEME

1. Settlement & mobility - 104 Land allocation and subdivision
2. Transport & communication - 202 Rail and light rail transport
3. Occupations - 308 Commercial services and industries

HISTORY

Although East Perth was included on the plan for Perth from earliest surveys, the area remained substantially undeveloped until the period of expansion that accompanied the gold rush. Part of the area had been designated for cemetery purposes which probably detracted from its attractiveness for settlement.
In 1884 East Perth has a population of 600 in 112 houses set amongst fruit and vegetable gardens and paddocks. By 1894 the population had more than doubled to 1300 residents and 245 houses and by 1904 it had increased to 6000 occupants' of 1066 houses.
The East Perth Primary School was planned in 1894 as a response to the needs of the growing population.
East Perth developed as an industrial area. In the mid nineteenth century brickworks were established in the area. Later an abattoir and the gas works were amongst the industries established in the area.
The presence of industries provided employment but also reduced the general attractiveness of the area for residential purposes.
Despite this some grander homes were built in prominent locations in the area. Like Northbridge, the character of the area changed through the twentieth century as the population varied as a result of migration.

WESTERN AUSTRALIAN HISTORIC THEME

3. Occupations - 308 Commercial services and industries
3. Occupations - 302 Rural industry and market gardening

AUSTRALIAN HISTORIC THEME

3. Developing Local, Regional and National Economies - 3.13 Developing an Australian manufacturing capacity

STATEMENT OF SIGNIFICANCE

The place is of aesthetic significance as an example of a commercial building constructed during the inter war period.
The place is of historic significance because it reflects the way of life of the working people of Perth in the late nineteenth and early twentieth century.
The place is of rarity value as an example of an industrial building in East Perth dating from the inter war period. It has achieved social value as City Farm.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place is of historic significance because it reflects the way of life of the working people of Perth in the late nineteenth and early twentieth century.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The place is of rarity value as an example of an industrial building in East Perth dating from the inter war period.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

It has achieved social value as City Farm.

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place is of aesthetic significance as an example of a commercial building constructed during the inter war period.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision-making body is relevant

CONDITION AND AUTHENTICITY

Condition	Fair
Building Fabric Authenticity	Largely as originally constructed with detail intact.

CLASSIFICATION OF SIGNIFICANCE

Considerable – Category 2 - Very important to the heritage of the locality.

HISTORY

The existing structure replaces an earlier timber stair structure. According to Mrs Vera McLean of Colin Grove, the jarrah stairway joining Mount Street and Mounts Bay Road was named by the late David Carmichael of Bellevue Terrace. Mr Carmichael who lived with his wife in a cabin below the Mount had more reason than most to be grateful for its construction. Possibly remembering the long walk round the foot of Mount Eliza and up to Kings Park Mrs McLean said, he remarked to my father when it was being built that it really was a Jacob's ladder to heaven (taken from Genesis).
The stairway was 141 feet long with 221 steps and built in 1909 by the West Perth firm Joseph Huck and Sons for 171/1 pounds. Plans were drawn by the City Engineer Henry Thomas Haynes. The Perth City Council undertook repairs in 1937 and again in 1947. (West Australian 6 Oct 1964 Alex Harris). It is understood that the timber stairs burnt down and were replaced with the current concrete stairs in 1970.

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working-class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
The only houses remaining in Clive Street from the early 1900s are Nos. 2, 12, 16, 18, 28 and 30. Nos. 12 and 16 are substantially altered from their original form.
By 1905 there were a few houses on Clive Street, including Nos. 16 and 18 which are still extant. Nos. 2, 28 and 30 were built in 1930. No. 2 was run as a boarding house. Clive Street runs from Outram Street to Colin Street in a dog leg arrangement. In the late 1960s street alignments were adjusted to extend Murray Street and by the late 1970s, Murray Street ran from Thomas Street all the way through to the east to connect with its earlier termination at Havelock Street. This changed Clive Street into a one-sided street for the first part with its houses on the north side retained, but the houses on the south side (Nos. 17-29) demolished. The eastern part remained untouched.

This area has been transformed from residential to commercial use since the 1980s. The former house at No. 2 has been recently reroofed.

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system. The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working-class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway. The portion of Colin Grove that runs from Ord Street and southwards was formerly called Pine Street but changed in 1928. Post Office Directories show that No. 2 was originally No. 11 Pine Street and was built in 1897. George Letch was the occupant and the house was called ‘Abner Cottage’. Aerial photos show No. 2 was reroofed between 1985 (red tiles) and 1995 (corrugated steel).

The portion of Colin Grove that runs from Ord Street and southwards was formerly called Pine Street but changed in 1928. Post Office Directories show that the attached pair at Nos. 6-8 was originally Nos. 5-7 Pine Street and was built c. 1902.
Aerial photos show Nos. 6-8 was reroofed between 1983 (red tiles) and 1985 (corrugated steel), and large additions were added to the rear. The original part of the house has the roof painted red. By 1995 it appears that No. 6-8 was adjoined in ownership with the adjacent No. 10-12 and physically altered to be one property with a street address of No. 8.
Most recently in the mid-2000s to 2020 the properties were occupied by Peter Hunt Architects.

The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working-class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
The portion of Colin Grove from Colin Street towards the east was first built on in 1903. By 1905 there are four houses, one possibly being No. 15, but numbers were not allocated until 1908. Post Office Directories show that No. 15 was originally No. 13 and was built in c. 1905. The Metropolitan Water Supply Survey plan dated 1953 indicates a brick house with a wraparound verandah to the west side.
At 2021, the house appears to be reasonably intact when viewed from the street as a Federation Queen Anne style house.

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system. The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working-class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
Post Office directories show that No. 1 was earlier No. 5 (1907) and before that No. 7. The place has a Victorian Georgian style, suggesting its date of construction was before 1900. There was a house called ‘Surrey Lodge,’ the first on the west side after Kings Park Rd (then Brooking St), from 1899, and ‘Park Cottage’ next to it from 1900. The house may be one of those. From 1912-1920s it was occupied by Edwin and Ellen Rooke. In the 1940s the occupant was Basil Oldmeadow.
The Metropolitan Water Supply Survey plan (1953) shows there was a side verandah on the south as well as the full length along the front of the house. Aerial photos show that the three dormer windows were evident in 1948, but unlikely to be original. At 2022 the place is a residence.

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working-class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
Post Office Directories show that the flats at No. 11 Colin Street were built in 1943.The Metropolitan Water Supply Survey plan dated 1953 indicates the building has three parts, stepped back from the street; a circular tower towards the front of the lot, a two storey flats block behind, and a brick building on the rear lane, possibly a garage.
Aerial photos show that the carport on Colin Street was added in the late 1990s, which detracts from the street view appearance.
As at 2021, the distinct Functionalist style is apparent, with the curved brick boundary wall and curved tower landmark with ‘No. 11’ in wrought iron attractive features.

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
Post Office directories show that the house was allocated a street number in 1900 (No. 15) which changed to No. 13 in 1908. The house was first listed in 1898, occupied by Thomas Duff, and had the name ‘Birnam’. A birth notice in February 1897 indicates he and his wife were already living there at that time, and in August 1899 a second child was born at Birnam. In April 1900 the contents of Birnam were put up for auction, suggesting the Duff family moved on. From 1902 to c. 1920 the occupant was George A. S. Bolger. The Metropolitan Water Supply Survey plan (1953) shows a house with a projecting bay and front and north side verandah. The side was at that time enclosed. There was a weatherboard attached room at the back, and beyond that a large area

marked ‘Trellis’. There was another weatherboard outbuilding along the rear lane. Aerial photos show a rear addition (flat roofed) from c. 1980. There is a carport accessed from the rear lane.
A 2018 real estate advertisement shows the interior of the 1898 house retains many original features, including floorboards, fireplace surrounds and mantles, picture rails, moulded arches to passageways, decorative cornices, pressed tin ceilings, and timber framed windows with coloured glass top lights, and door top and sidelights. At 2022 the place is used for commercial/office purposes.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement and mobility - 104 Land allocation and subdivision
3. Occupations - 306 Domestic activities

AUSTRALIAN HISTORIC THEME

4. Building Settlements, Town and Cities - 4.1.2 Making suburbs

STATEMENT OF SIGNIFICANCE

The place has aesthetic significance as a fine intact example of a Federation Queen Anne building dating from 1896.
It makes a significant contribution to the streetscape.
The place has historic significance because it reflects the way of life of the wealthier residents of Perth in the late nineteenth and early twentieth century.
It is a representative example of a residential property in West Perth that has undergone a change of use to commercial/professional offices with the change and growth of the City.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth’s history

The place has historic significance because it reflects the way of life of the wealthier residents of Perth in the late nineteenth and early twentieth century.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth’s history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

It is a representative example of a residential property in West Perth that has undergone a change of use to commercial/professional offices with the change and growth of the City.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place has aesthetic significance as a fine intact example of a Federation Queen Anne building dating from 1896.

It makes a significant contribution to the streetscape.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Excellent
Building Fabric Authenticity	High. Largely as originally constructed with detail intact.

CLASSIFICATION OF SIGNIFICANCE

Considerable – Category 2 - Very important to the heritage of the locality.

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
Post Office directories show that the house was first listed in 1900 and allocated a street number (No. 19) which changed to No. 15 in 1908. The house was first occupied by John Shadwick, who was there up to 1919. Shadwick was a chemist, with his business at 160 William Street in 1900; later at 703 Hay Street. The next occupant was David R. Davies, 1919-1941. The Metropolitan Water Supply Survey plan (1953) shows a large footprint with various outbuildings along the entire rear boundary. There is a brick garage, accessed from a driveway off Colin Street on the south side of the house. The house has a timber second storey at the rear of the original house with a tiled roof, which was built between 1995 and 2000. From the street the front of the original house appears intact, and the second story is visible behind. A real estate advertisement in 2019 shows the

interior of the original house has many intact features including elaborate fireplace mantles, high ceilings with decorative cornices, ceiling roses, bay window alcoves, stained glass windows and door lights, and timber framed windows. At 2022 it is used for commercial purposes.

The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
Post Office directories show that the house was first listed in 1899 and allocated a street number (No. 21) which changed to No. 17 in 1908. The house was first occupied by Francis R. Meredith. The next occupant was C. H. Higgs (1900), followed by Henry A. Leschen, a medical practitioner (1907). The Metropolitan Water Supply Survey plan (1953) shows a brick house with a verandah on the front and south side, and a full length verandah at the rear.
From the street the house is obscured by dense vegetation. The brick walls are painted and there appears to be modifications to the rear. At 2022 the house is used for health/medical consulting rooms.

Roof Material	Tile - Terracotta
Architect	Michael Cavanagh; Robert Oswald Law
Builder	Michael Cavanagh; Robert Oswald Law
Other Associations	

HISTORY

The building is one of the four remaining grand residences in West Perth. Its original lot remains intact. It was built during 1911/12 as a family home by Robert Oswald Law who was a builder also responsible for the Perth Mint and Perth Technical College. Robert Law joined his father's business and they were engaged to build jetties, bridges and railway lines. The Law family lived in the house until 1954. They sold it to the State Government, and it was used as the Government School of Nursing where student nurses from country areas could be trained and live at the property. The house was altered to suit this use and a building was constructed for training, as well as a three-storey residential building.
In 1975 the property was used as a hostel for intellectually impaired people and called Lawton Hostel. The property was sold in 1990 and the lecture building was demolished. Part of the property, the teaching block and nurses residential building was used by the Father Brian Crisis Care Centre in 2003. The house wasn't occupied at the time. The garden is also significant. It is formally laid out and includes rose gardens, a sunken pond, pergola, shade house, a summer house, brick woodshed and double brick boundary wall with capped piers and mouldings.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement and mobility - 104 Land allocation and subdivision
4. Social and civic activities - 402 Education and science

AUSTRALIAN HISTORIC THEME

3. Developing Local, Regional and National Economies - 3.14 Developing an Australian engineering and construction industry
6. Educating - 6.3 Training people for the workplace
8. Developing Australia's Cultural Life - 8.13 Living in cities and suburbs

STATEMENT OF SIGNIFICANCE

The place is an excellent example of a grand two storey brick, stucco and tile roof construction villa in the Federation Free style, with a pavilion, external garden walls and a restrained informal landscape setting.
The place is a substantial architectural statement and has landmark value as one of the most substantial residences remaining in West Perth.
The place is a very fine example of the work of the architectural work of Cavanagh, Cavanagh and Parry, prominent architects in practice in Perth during the first three decades of the twentieth century.
The place was built for Robert Law, a prominent builder and entrepreneur in the late nineteenth and early twentieth centuries who in partnership with William Atkins, was responsible for the construction of a number of prominent buildings and structures.
The place served as the West Australian Government School of Nursing for the Country Training School between 1955 and 1975.

HISTORY

Demolished 2021. West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
Post Office directories show that the house was first listed in 1910, occupied by J. Wigg.
A long term resident was the Burnett family (1930 to at least 1949). The Metropolitan Water Supply Survey plan (1953) shows a large house with a projecting bay to each side of the main porch entry. From the street (Google streetview 2007-2020) the house was a two-storey, red brick and iron residence with rendered bands, and arched window heads. There were c. 1970 single storey additions to the rear. The house was demolished in December 2021.

HISTORY

Demolished 2014-2020.
An Italian cuisine restaurant, Chianti on Colins, was established in 1991 at 21-23 Colins Street.
On 27 May 2014 a fire at the disused former restaurant destroyed the heritage building.
The City approved demolition in 2015.
By 2021 the building was demolished.

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
Post Office directories show that the house was first listed in 1897 and allocated a street number (No. 24), which changed to No. 28, then No. 32, then No, 28, and finally back to No. 24 in 1908. The house was first occupied by James P. Walton, Chief Inspector of Schools, and the house was named ‘Allestree’. The Metropolitan Water Supply Survey plan (1953) shows the house with a corner multifaceted bay, a verandah that wraps around three sides, and to the rear, a two storey block of flats. The flats are not listed in the 1949 post office directory, and are not visible in the November 1953 aerial, but are clearly visible in the 1965 aerial. The Water Supply Survey plan was revised in 1956, and shows the flats, therefore dating the construction at c. 1954.Aerial photos show that the main house was reroofed between 1985 and 1995. A real estate advertisement in 2013 shows that the house retains many original features such as the floorboards, timber-framed sash windows, skirting, high

ceilings, cornices and ceiling roses. From the street a modern flat roofed carport is evident adjacent to the house, and another one to the rear. The block of four flats at the rear is accessed from the south side of the house along a pathway. At 2022 the former house is used for medical consulting rooms.

WESTERN AUSTRALIAN HISTORIC THEME

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
The house at No. 25 was not listed prior to 1921, indicating it was constructed 1920. It was first occupied by Arthur Ventris, ISO, VM (Imperial Service Order/ Victorian Medal) and his wife Emily Ventris, from 1921 to 1940. He was the Superintendent of the Royal Mint from the late 1890s. Arthur Ventris died in 1940. In 1941, Mrs Ventris, aged 84, married Sir John A. Northmore, Chief Justice, age 76. It appears they occupied the same house. In 1944, Lady Emily Agnes Northmore died and bequeathed a considerable sum of her wealth to the Church of England and other diocesan related causes. The house is now separated into two, with access from Ord Street and Colin Street.

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
Post Office directories show that the house was first listed in 1904 and allocated a street number (No. 33) which changed to No. 37 in 1908. The house was first occupied by Ernest Castieau.
The Metropolitan Water Supply Survey plan (1954) shows a house that takes up most of the lot, with a projecting bay to the street, a half -length front and rear verandah, a basement at the rear, and rear steps. It had rear lane access.
At 2022 the house is used for offices.

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
Post Office directories show that the house was first listed in c.1905 and allocated a street number (No. 45) which changed to No. 49 in 1908. The house was first occupied by Alex F. Pearse. The Metropolitan Water Supply Survey plan (1954) shows an unusually large design in which there is a corner verandah as well as another frontage with verandah to Richardson Street. The house had a cellar, and there was a garage with lane access to the east side of the lot. There was a small square projecting verandah to the rear of the house.
A real estate advertisement in 2020 shows that internally there is little original fabric, and most internal walls have been removed or openings made in them. At 2022 the place is offices. From the street the corner has been obscured by a new glazed frontage, but the original roof is visible behind.

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
The building at 58-60 Colin Street was originally a semi-detached pair, built c. 1900. The Metropolitan Water Supply Survey plan (1954) shows the verandah along the front and wrapping around the corner of No. 60 on the north side. The rear formations are a mirror image with a full verandah, pathways to the rear WC on the back lane, and weatherboard outbuildings on the inner boundary fence.
From the street the house appears as one, however the double gable indicates it was once two. The entrances have been modified. At 2022 the place is used for offices.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place has aesthetic significance as an example of a Federation Queen Anne pair dating from c. 1900 that contributes to the streetscape.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The place is a representative example of a residential property in West Perth that has undergone a change of use to commercial/professional offices with the change and growth of the City.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
The former power station has been restored and adapted for commercial/residential use. It has a brick facade with window openings only at upper level, stucco decorations, and a Colorbond roof.
When electricity was first supplied to the City of Perth area in the early 1900s a number of electricity sub stations were constructed to service the local area. When services became more sophisticated these buildings were no longer required. The Electric Substation at 98 Colin Street was built in 1914. It is No. 3 Substation of a non-adjacent group of four two-storey red brick buildings with stucco detailing, in the Federation Warehouse style,

constructed to a standard plan that was modified to suit the location of each building. The buildings are all sited within central Perth, between one and 1.5 kilometres from each other. They were constructed for Mertz and McLellan in 1914 and 1915, designed by Jack Ochiltree and constructed by Todd Brothers.

WESTERN AUSTRALIAN HISTORIC THEME

3. Occupations - 309 Technology and technological change
5. Outside influences - 507 Water, power, major transport routes
6. People - 605 Famous and infamous people

AUSTRALIAN HISTORIC THEME

4. Building Settlements, Town and Cities - 4.2 Supplying urban services
4.Building Perth (Settlements & Cities) - 4.1.2 Making suburbs
4.Building Perth (Settlements & Cities) - 4.6 Remembering significant phases in the development of settlements, town & cities

STATEMENT OF SIGNIFICANCE

The four buildings were constructed by Perth City Council to operate as the main line substations in conjunction with the State Government's East Perth Power Station (1916), the first centralised electricity supply in Perth, and one (No.4 Substation, Stuart Street) continued to operate as an electricity substation into the twenty-first century.
The four buildings are a rare example of a complete set of early twentieth-century electricity substations relating to the initial development of an electricity network in Western Australia.
The four buildings are good examples of utilitarian structures designed in the Federation Warehouse style to fit within city streetscapes, an approach to constructing and siting industrial buildings that is no longer practised.
Construction of the substations and installation of the plant was supervised by international company Merz & McLellan, especially Charles McLellan, who advised the City of Perth and State Government regarding electricity production and was influential in the decision to centralise and to switch from direct to alternating current.
The buildings were designed by prominent and prolific Western Australian architect Jack Learmonth Ochiltree and are a good example of his design approach to functional buildings.
The four buildings have high scientific value for their ability to contribute to the understanding of the development of power to the metropolitan region of Perth, especially No.4 Substation, Stuart Street, which retains much of its transformers and other machinery.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
Post Office directories show that the house was first listed in 1898 and was first occupied by Charles L. von Bibra. The house was called ‘Sunnyside’. The number was originally 98, then 102, and changed to No. 100 in 1908. The Metropolitan Water Supply Survey plan (1953) shows a house with a projecting bay to the south side and a half-length from verandah. It has a small footprint.
A real estate advertisement in 2019 describes the former house as having four rooms. At 2022 the place is used for offices.

HISTORY

Originally industrial buildings. In 1915, 166 Colin Street was a Sheet metal manufacturers, Armstrong Ltd. By 1949, 162-166 Colin St was Berger & Sons and Sherwin-Williams, paint manufacturers. The establishment of parks was closely linked to wealth with the result that Perth did not begin to develop a comprehensive system of parks until after the goldrushes of the 1890's.
Public debate on the lack of park land in Perth was voiced in editorials in the newspapers between 1875 and 1886. The provision of a network of parklands in central Perth and around the river were the themes central to these concerns.
The Daily News 12 Feb 1938 reported that City of Perth Councillors were suggesting name changes for some reserves. The Committee recommended Arthur Street reserve be known as Totterdell Park and the foreshore of reclaimed land from the Causeway to Victoria Avenue be known as Langley Park. Cr Totterdell and Langley were on the committee.

HISTORY

Although East Perth was included on the plan for Perth from earliest colonial surveys, the area remained substantially undeveloped until the period of expansion that accompanied the gold rush. Part of the area had been designated for cemetery purposes which probably detracted from its attractiveness for settlement. In the 1870s East Perth developed as a residential area, as the city population gradually increased. However, it underwent tremendous growth during the late-nineteenth century, which was a result of the gold boom. The increase in wealth encouraged speculative development of housing in Perth, Fremantle and other new areas close to these centres such as Subiaco, East Perth and North Perth. While detached houses remained the most popular form, semi-detached houses and terraces were not uncommon in these areas. In 1884 East Perth had a population of 600 in 112 houses set amongst fruit and vegetable gardens and paddocks. By 1894 the population had more than doubled and by 1904 it had increased to 6,000 occupants of 1066 houses. Areas which had previously had a scattering of houses and vacant sites were quickly developed with primarily rental accommodation. This relatively short burst of activity played a major role in establishing the late nineteenth century character of the area. In general, East Perth acquired a respectable working-class character by the turn of the century: ‘a middle-class-come-skilled working man’s suburb.
House, 7 Constitution Street was built in c. 1905, in this era of development. It is a simple Federation Bungalow with a hipped gable roof, and red face brick.
The Metropolitan Water Supply Survey plan (date unknown) shows an asymmetrical brick house as a part of a row of other similar, modest sized houses.

This area of East Perth was part of the East Perth redevelopment project, and No. 7 is one of a few original houses that remain from the early 1900s era, when East Perth was a working class suburb.

HISTORY

In 1900 the Perth City Council serviced residences with a pan collection system for outside toilets. in 1903 plans were developed by the State Government to form a deep sewerage system for Perth. One problem with this system was the creation of hydrogen sulphide gases in the pipes which needed to be vented so oxygen could enter the pipes. In 1911 the ventilating shaft was built on Cook Street, Arthur Street and Royal Street. The disconnection of the sewer vents is unknown, however in the opinion of Water Corporation the changes to the system between the 1950s and 1970s led to many vents being unnecessary.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement and mobility - 112 Technology and technological change
4. Social and civic activities - 404 Community services and utilities
5. Outside influences - 507 Water, power, major transport routes

Heritage Place Record Form

AUSTRALIAN HISTORIC THEME

3. Developing Local, Regional and National Economies - 3.26 Providing health services
4. Building Settlements, Town and Cities - 4.2 Supplying urban services
8. Developing Australia's Cultural Life - 8.13 Living in cities and suburbs

STATEMENT OF SIGNIFICANCE

The place provides rare evidence of the earliest establishment of a deep sewerage system for Perth (operational from 1911), a significant milestone in the development of Perth as a modern city.
The place is a surviving c.1911-1930 sewerage ventilation shaft, a once-common piece of infrastructure that appears to have largely been removed and/or forgotten across the country.
The place is a representative example of the standard natural ventilation shafts erected for the Perth and Fremantle sewerage systems from 1911 to 1930, when decorative but functional cast iron work was used for these items of public infrastructure.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place is a surviving c.1911-1930 sewerage ventilation shaft, a once-common piece of infrastructure that appears to have largely been removed and/or forgotten across the country.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The place provides rare evidence of the earliest establishment of a deep sewerage system for Perth (operational from 1911), a significant milestone in the development of Perth as a modern city.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The place is a representative example of the standard natural ventilation shafts erected for the Perth and Fremantle sewerage systems from 1911 to 1930, when decorative but functional cast iron work was used for these items of public infrastructure.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Good
Building Fabric Authenticity	Metropolitan Sewerage Vents has a moderate level of authenticity. Most of the original fabric of the individual vents appears to remain, although the cowl at the apex of the vent appears to have been removed from each vent, with the exception of the Cook Street vent. It is possible that some upper segments of the pipes have also been removed. Some corrosion has been observed, but this has been managed by the repainting of the cast iron bases.

CLASSIFICATION OF SIGNIFICANCE

Exceptional – Category 1 - Essential to the heritage of the locality. Rare or outstanding example.

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working-class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
No. 4 Cook Street was first listed in the Post Office Directory in 1920. The Metropolitan Water Supply Survey plan dated 1953 shows an asymmetrical brick house with a wrap-around verandah to the east side, and multiple asbestos and brick rear attachments and outbuildings. At 2021, the house is used as an office.

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working-class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
Douro Place was listed as Douro Park in 1893. The house at No. 12 was first listed in 1894, occupied by Robert Salter. It was originally No. 26; numbering changed in 1908.The Metropolitan Water Supply Survey plan (1953) shows No. 12 as a brick house with a full-length front verandah.
The house is a single storey, red brick, double fronted building, with a hipped corrugated iron roof with tall, corbelled chimney.
The verandah is under a separate corrugated iron roof with timber posts. There are timber sash windows and a timber panelled front door. Aerial photos show the house was extended to the rear c. 1990 and reroofed in 2018.

A 2018 real estate advertisement online shows that the interior has many original features such as high ceilings with the original picture rails and decorative cornices, fireplace and mantlepiece, with a new addition to the rear. The floor plan shows that the house was originally four or six rooms with a central passage.

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status associated with addresses in Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and priced accordingly. Less prestigious areas also developed in lower parts of the area and adjacent to the railway. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working-class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway. Emerald Terrace was originally called Emerald Hill Terrace. Numbers were not allocated to housing until 1908, but tracing back occupancy, it is evident that No. 8 was built by 1905/06.Aerial photos show that between 1995 and 2000 the domestic front garden was removed. The place now has a high brick wall to the front, such that it is not recognised as a former house, excepting the roof form is visible. There is a hipped and gable tiled roof, and a tall chimney towards the rear. The house on the north side (No. 10 was demolished in c. 1970 and is now a car park. The side of No. 8 shows the building as still domestic in scale and design from that view.

HISTORY

West Perth developed as suburban residential area in the late 1890's. From its inception it had the characteristics of a quality neighbourhood.
Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location which provided healthy site drainage as well as cooling breezes and views over the city and hills.
The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system. The area was subdivided into large residential lots for development and proceed accordingly. Less prestigious areas also developed in lower parts of the area and adjacent to the railway.
The homes built in West Perth from the early 1900's included prestigious mansions built in prominent locations and smaller working-class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.

Architect	Cavanagh & Cavanagh
Builder	
Other Associations	

HISTORY

St. Brigid's Church located adjacent to St. Brigid's School was built in 1904 and designed by prominent architects Cavanagh & Cavanagh. In 1957, the building was extended to the west to include a new alter. The building features the 1905 pipe organ in the gallery, mahogany mews and large religious sculptures. Northbridge is an inner suburban area, named because it is just north of Perth across the railway bridge. It was approved as a suburb name in 1982.

4. Building Settlements, Town and Cities - 4.1.5 Developing city centres
6. Educating - 6.2 Establishing schools
8. Developing Australia's Cultural Life - 8.6 Worshipping

STATEMENT OF SIGNIFICANCE

The place is a long-standing landmark in the district as a fine collection of buildings constructed at the end of the nineteenth and beginning of the twentieth that collectively form an important historic group of places that is visually complex and harmonious.
The place is a restrained and well executed example of a Federation Gothic style church.
The place provides important evidence of the development of the Perth and West Perth district, its class and religious demographic, and the development of Catholic primary and more latterly secondary education in the State.
The place is an early example of the work of the Sisters of Mercy who came to Western Australia in the 1800s to educate and mission, and established convent schools in a number of suburban and regional areas in the late 1800s and into the 1900s.
The place is valued by the local and wider Catholic community for its continuing associations with the Catholic Church in general and the Sisters of Mercy in particular.
The principal buildings at the place were designed by prominent Western Australian architects: Parish Hall (original primary school building) designed by J J Talbot Hobbs; Convent and Church designed by Cavanagh and Cavanagh; and, Convent School designed by R Dennehy.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place provides important evidence of the development of the Perth and West Perth district, its class and religious demographic, and the development of Catholic primary and more latterly secondary education in the State.

HISTORY

The Sisters of Mercy established a school on the place in 1888 using existing buildings which were replaced with purpose built buildings including St Brigid's Convent built 1896/7, c. 1915, St Brigid's Parish Hall built 1889, the former St Brigid's Convent School built 1921, St Brigid's Church built 1904 and Presbytery built c. 1902.
St Brigid's Primary School closed in 1976 and the building was used for Perth Technical College Department of Art and Design until 1988.
In 1998 the Sisters returned to the site after moving to another site in Craigie in 1974. The St Brigid's High School was built in 1901 and held classes in the convent. The school buildings were expanded over the twentieth century to accommodate more students. The St Brigid's High School was closed in 1972 due to declining numbers and the changes occurring in the area.

In 1978, the steel framed structure referred to as 'the Annexe' was built for the Ceramics Department of the Perth Technical College Department of Arts and Design.
Some of the buildings have been used for community purposes, as well as the church and presbytery in use by the Catholic Church. Northbridge is an inner suburban area, named because it is just north of Perth across the railway bridge. It was approved as a suburb name in 1982. It now accommodates offices occupied by agencies working for the Catholic Church.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement and mobility - 104 Land allocation and subdivision
4. Social and civic activities - 402 Education and science
4. Social and civic activities - 406 Religion

AUSTRALIAN HISTORIC THEME

2. Peopling Australia - 2.4 Migrating
4. Building Settlements, Town and Cities - 4.1.5 Developing city centres
6. Educating - 6.2 Establishing schools

STATEMENT OF SIGNIFICANCE

The place is a long-standing landmark in the district as a fine collection of buildings constructed at the end of the nineteenth and beginning of the twentieth that collectively form an important historic group of places that is visually complex and harmonious.
In external appearance and with its principal internal spaces, St Brigid's Convent School is a good, simple example of a two storey school building in the Federation Arts and Crafts style.
The place provides important evidence of the development of the Perth and West Perth district, its class and religious demographic, and the development of Catholic primary and more latterly secondary education in the State.
The place is an early example of the work of the Sisters of Mercy who came to Western Australia in the 1800s to educate and mission, and established convent schools in a number of suburban and regional areas in the late 1800s and into the 1900s.
The place was used as a school by the Sisters of Mercy from the late 1880s, at a time before government sponsored primary schooling was widely accessible in Western Australia, and operated as a school until the mid-1970s.
The place is valued by the local and wider Catholic community for its continuing associations with the Catholic Church in general and the Sisters of Mercy in particular.
The principal buildings at the place were designed by prominent Western Australian architects: Parish Hall (original primary school building) designed by J J Talbot Hobbs; Convent and Church designed by Cavanagh and Cavanagh; and, Convent School designed by R Dennehy.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place provides important evidence of the development of the Perth and West Perth district, its class and religious demographic, and the development of Catholic primary and more latterly secondary education in the State.
The place is an early example of the work of the Sisters of Mercy who came to Western Australia in the 1800s to educate and mission, and established convent schools in a number of suburban and regional areas in the late 1800s and into the 1900s.
The place was used as a school by the Sisters of Mercy from the late 1880s, at a time before government sponsored primary schooling was widely accessible in Western Australia, and operated as a school until the mid-1970s.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

The place is valued by the local and wider Catholic community for its continuing associations with the Catholic Church in general and the Sisters of Mercy in particular.

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place is a long-standing landmark in the district as a fine collection of buildings constructed at the end of the nineteenth and beginning of the twentieth that collectively form an important historic group of places that is visually complex and harmonious.
In external appearance and with its principal internal spaces, St Brigid's Convent School is a good, simple example of a two storey school building in the Federation Arts and Crafts style.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The principal buildings at the place were designed by prominent Western Australian architects: Parish Hall (original primary school building) designed by J J Talbot Hobbs; Convent and Church designed by Cavanagh and Cavanagh; and, Convent School designed by R Dennehy.

HISTORY

Cemetery Road (renamed Forrest Avenue in 1895) was surveyed circa 1850 and constructed diagonally from the intersection of Bennett and Howick Streets (renamed Hay in 1896) in a north easterly direction to the East Perth cemetery and St Bartholomew's Church. Housing was concentrated east and south of this area until the turn of the century, and the population growth forced development to push further east of the town centre.
From the 1930s, development pressure was seen along the river and southern region of East Perth, when a trend towards inner-city flat development gained momentum. By the 1950s, southern East Perth continued as a desirable and popular place for high-density, inner-city residences. The Langley Park flats, built along Terrace Road to cater to young office workers, are a prime example of the post-war investment in flat construction that occurred after the lifting of wartime housing controls. There was a total of 21 blocks of flats in Goderich, Forrest and Hill Streets, Burt Way and Terrace Drive by the early to mid-fifties. The Post Office Directory first lists Wyreema Flats in 1939. Prior to that were individual houses, Nos. 11 and 13 which had been constructed in the late 1890s.The Metropolitan Water Supply Survey plan (date unknown) shows the two storey block of flats with two lots of rear stairs, and one central stairs at the front. There is a central verandah and a masonry wall marked on the plan.
At 2021 the former flats are serviced apartments called 'Forestville'. Online advertisements show that there are original internal features such as the timber framed multi-paned windows, glazed external doors, mantle pieces,

and timber floors. The outdoor brick laundry building is also extant. The steel stairs with balustrades are also extant.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement and mobility - 107 Settlements
3. Occupations - 306 Domestic activities

HISTORY

Cemetery Road (renamed Forrest Avenue in 1895) was surveyed circa 1850 and constructed diagonally from the intersection of Bennett and Howick Streets (renamed Hay in 1896) in a north easterly direction to the East Perth cemetery and St Bartholomew's Church. Housing was concentrated east and south of this area until the turn of the century, and the population growth forced development to push further east of the town centre.
The Post Office Directory (State Library of WA) lists the first occupant of No. 61 Forrest Avenue as Walter H. Bourne (1917) giving this as a fair indication of the year of construction. The Metropolitan Water Supply Survey plan dated 1950 (Cons 4156/38 State Records Office of WA) shows a brick house with a verandah to Forrest Avenue, and an adjoined shop at the rear which fronts Wellington Street. The fact that the shop and house are adjoined and on the same lot suggests the house and shop had the same owner. The shop is listed Post Office Directory as a new shop, still vacant in 1935. The following year it is being operated by Mrs Ethel Grigo. The occupant of 61 Forrest Avenue in 1949 is Michael E McSweeney, and the shop on Wellington Street is listed as

a Mixed Business at No. 19, operated by Richard G. Grigo.
Aerial photographs show the shop was demolished in 2000 for a new, four storey apartment building at 19 Wellington Street. The house and four apartments are now strata titled. The house footprint remains as it was originally built. It has survived rapid redevelopment in this area since the mid-1980s, with much of East Perth being given over to high-rise apartments. The adjacent house at No. 63 is also extant and was built in the same year.

Physical Description	

Building constructed by the Commonwealth Government. Design features classical details and monumental scale. The GPO is 7 storeys to Forrest Place plus a basement. It has a concrete encased steel frame faced with brick and stone. The colonnading of the east elevation is faced with Granite Mahogany Creek with Donnybrook Sandstone above that. Paired ionic columns rise through three upper storeys. Red brick walls trimmed with stone are set back above the cornice, between stone towers and from the side and back walls. The interior have large spans creating open spaces on each floor.
The central two-storey postal hall has large roof lights which emphasise the sense of space.

HISTORY

In 1835 a General Post Office was established with other offices in Fremantle, Albany and Guildford. In 1871 the colonial government took control of the telegraph lines between Perth and Fremantle and Guildford which had been put up privately. Further poles were put up during the 1890s Gold Boom and after 1901 the Commonwealth Government took over the control of telegraph lines across Australia.
The General Post Office was relocated to Forrest Place as a larger building was required than the offices located in the Central Government Offices on St Georges Terrace and Barrack Street. This was also part of an idea to locate Federal Government buildings together. Construction on the building started in 1914.Between 1916-1920 a steel embargo prevented construction. In 1921 a new contract was signed on 4th July to complete GPO, including another 2 floors previously omitted from contract.
The GPO was completed in 1923 and was used as the Head Post of Office of WA.

WESTERN AUSTRALIAN HISTORIC THEME

2. Transport and communications - 206 Mail services
4. Social and civic activities - 401 Government and politics
4. Social and civic activities - 404 Community services and utilities

AUSTRALIAN HISTORIC THEME

3. Developing Local, Regional and National Economies - 3.7.1 Establishing postal services
4. Building Settlements, Town and Cities - 4.1.5 Developing city centres

STATEMENT OF SIGNIFICANCE

The most vital element in the Forrest Place Precinct and perhaps the best example of monumental civic architecture in Perth.
Perth GPO is of representative significance due to its Forrest Place location, which is a major civic space.
Aesthetically the GPO combines well with the Commonwealth Bank and the Railway Station which is important in establishing the identity of the City of Perth.
The place is significant as a rare example in Australia of large building in the Beaux-Arts style. This style is demonstrated well in both the exterior and interior of the building. The two-storey high postal hall with its large roof lights emphasise the sense of space in this public area.
The historical significance of Perth GPO is its association with architect J S Murdoch who, as a Commonwealth Architect was responsible for many important Commonwealth buildings throughout Australia. The Perth GPO with the Commonwealth Bank and Forrest Place constitute an historically important civic construction undertaken by the Commonwealth Government. The design reflecting a new sense of importance and civic pride in Perth at the time. Its use since 1923 as the State's principal postal facility is of considerable historical and continued social significance. The use of the GPO to accommodate other Commonwealth departments for part of its history is partly important because it led to the addition of the attic storey to the original design.

Architectural Style 2 Specific	Warehouse
Archaeology	
Physical Description	

Swan Barracks is a complex of former army buildings comprising the Drill Hall; Administration Building; Ordinance Stores; East and West Wings; North-East Wing and Ablution Block. The central stone building in Francis Street forms the entrance to Swan Barracks. Constructed as the Administration Offices in the Federation Romanesque style, it is of rock face limestone in squared rubble course. Its rusticated appearance, reminiscent of a fortress, has a dramatic presence in the Francis Street streetscape. The Drill Hall is a fine example of late nineteenth century industrial architecture. Using lightweight materials and structure in an economic way, it has a curved truss roof system creating a dynamic space. The Ordinance Store buildings are a competent example of the Federation warehouse style having a rusticated stone base with red face brick work and cement dressings to the upper floors. The East and West wings flanking the central Administration Offices have a number of stylistic features in common with other military buildings in metropolitan Perth and associated with the beginnings of the Modern Movement in WA. There is a sophisticated use of brickwork producing a distinctive and pleasing texture to the building surface. The Toilet and Ablution Block is a strictly utilitarian building.

Walls 1 Material	Brick - Face
Walls 2 Material	Stone - Limestone
Roof Material	Metal - Corrugated Iron
Architect	George Temple Poole, Hillson Beasley, M. Finlayson, J.J. Talbot Hobbs
Builder	
Other Associations	Commonwealth of Australia- Former owner

HISTORY

Development of Swan Barracks commenced in 1896 with the construction of a Volunteer Drill Hall, facing Francis Street. In the following year the two storey central stone building was built in front of the Drill Hall

forming an entrance from Francis Street and administration offices. Plans for the Administration Building were prepared while George Temple Poole was Chief Architect of the Public Works Department, and the building was constructed by Holman and Cousten who had also built the Drill Hall. In 1905 an L-shaped Ordinance Store was constructed in the north-west corner of the site. This was added to in 1910 at the same time as a third storey was added to the Administration Building while Hillson Beasley was chief architect. Planning for substantial development at the place occurred in the lead up to the Second World War with an East Wing and North-East Wing constructed c. 1939-41.A further wing, the West Wing was added to the place c. 1955 and the overall development of the site then resembled an E-shape with wings parallel to Museum Street and a central spine along Francis Street. The three-storey Administration Building remained a focal point of the place. Originally built as a training centre for the local militia, the place was later incorporated into the Australian Army following Federation. The Barracks was used as the Fifth Military District Headquarters up until 1993 after which the Australian defence forces no longer required the Swan Barracks and vacated the place which was subsequently sold in 1995.

WESTERN AUSTRALIAN HISTORIC THEME

5. Outside influences - 501 World wars and other wars

AUSTRALIAN HISTORIC THEME

7. Governing - 7.7.2 Providing for the common defence

STATEMENT OF SIGNIFICANCE

The place has significance as an important landmark in the Northbridge/Perth Cultural Centre locality and demonstrates good examples of a range of building types, styles and building technology.
The Administration Offices and Ordnance Store Building is significant for its architectural qualities and demonstration of building skill.
Although interior spaces have been somewhat compromised.
The place has historic associations with the development of Australia's defence forces and the projection of national identity associated with the formation of the Commonwealth.
As a complex the Swan Barracks has considerable significance for its demonstration of the range of building types, architectural styles, building technology and development of military functions over a ninety-year period.
The place has social significance for the many soldiers who either drilled and served at the Barracks or have set out from there to various conflicts since 1896.
The Drill Hall is significant for its innovation and excellence in engineering, and demonstration in drill hall planning.
Swan Barracks has cultural significance as evidence of social and military practice and as a demonstration of a way of life.
The place is rare for comprising a diverse complex of army barracks buildings still extant in Western Australia.
The place is representative of the evolution of a military way of life and styles of architecture throughout the twentieth century and the disposal process of such facilities for alternative uses.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place has historic associations with the development of Australia's defence forces and the projection of national identity associated with the formation of the Commonwealth.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The place is rare for comprising a diverse complex of army barracks buildings still extant in Western Australia.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

As a complex the Swan Barracks has considerable significance for its demonstration of the range of building types, architectural styles, building technology and development of military functions over a ninety-year period. The Drill Hall is significant for its innovation and excellence in engineering, and demonstration in drill hall planning.

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The place is representative of the evolution of a military way of life and styles of architecture throughout the twentieth century and the disposal process of such facilities for alternative uses.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

The place has social significance for the many soldiers who either drilled and served at the Barracks or have set out from there to various conflicts since 1896.Swan Barracks has cultural significance as evidence of social and military practice and as a demonstration of a way of life.

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place has significance as an important landmark in the Northbridge/Perth Cultural Centre locality and demonstrates good examples of a range of building types, styles and building technology.
The Administration Offices and Ordnance Store Building is significant for its architectural qualities and demonstration of building skill. Although interior spaces have been somewhat compromised.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Fair
Building Fabric Authenticity	High level of authenticity.

CLASSIFICATION OF SIGNIFICANCE

Exceptional – Category 1 - Essential to the heritage of the locality. Rare or outstanding example.

HISTORY

The area to the north of Perth (now known as Northbridge) was valued by the Whadjuk Nyoongar for its low lying and swampy lakes system, which provided abundant resources. After colonisation, this land was not settled as quickly as drier areas on the ridge of Perth. In 1854 some of the swampy land to the north of Perth was drained producing fertile land for farming. As the population grew during the convict era of the 1850s the land was subdivided into allotments circa 1860 and taken up by discharged soldiers, artisans and small landholders. The area at this period was characterised by small cottages and businesses.
In 1881 the railway from Fremantle to Guildford was opened and became the main transport route. From that period commerce and trade tended to focus on smaller commercial enterprises and manufacturing to the north. It was less fashionable to live north of the railway line, however the area was close to the city and during the 1890s and early 1900s was substantially redeveloped with further subdivision of lots and mixed residential and commercial development. This was an immediate response to the tripling of the State's population in the recent decade due to the gold boom, and a pressing demand for affordable accommodation.
A number of trade and community organisations had their origins in the area at this time.

Over the years the population of the area changed as people relocated to suburban areas of the city. As a result, Northbridge became the home for successive migrant communities. for example, communities including Greek, Italian, Chinese and more recently Vietnamese migrants have settled here as property remained relatively cheap and had the advantage of being close to the city. These communities have over the years given this area a distinctive character, generally recycling the existing buildings rather than redeveloping the area. Northbridge, named because it is just north of Perth across the railway bridge, was approved as a suburb name in 1982.The property is a single-storey semi-detached dwelling built in 1897. The Post Office Directory 1898 lists the pair as Nos. 30-32 under George Dibdin. In 1900 numbering changed to 68-70. Numbering changed a third time in 1905 to Nos. 42-44. Francis Street was fully developed by this time.
The Metropolitan Water Supply Survey plan dated 1950 shows a semi-detached pair, of brick construction, with verandahs to the street. The whole area is still residential at this time.
By 1981, a two storey Chinese restaurant was at No. 40 to the east (1981 State Library of WA Photo 312945PD). A photo in 1990 (State Library of WA Photo 315732PD) shows Nos. 42-44 as a painted brick pair with scalloped timber valances to the mirrored gables and a low brick wall to the street. Much of Francis Street has changed in character with any remaining residences converted into restaurants and the like, and much new development.
As 2021 the property is being operated as hostel accommodation. Online photographs show some original internal fabric remains, such as the leadlight fan and top lights to the doorways, moulded timber arches in the hallway, timber mantles around the fireplace, and timber framed skirtings, architraves and double hung sash windows. The street view is hidden behind a high brick wall and entrance gate.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement and mobility - 104 Land allocation and subdivision
3. Occupations - 306 Domestic activities
3. Occupations - 308 Commercial services and industries
5. Outside influences - 504 Depression and boom

4. Building Settlements, Town and Cities - 4.1.2 Making suburbs

STATEMENT OF SIGNIFICANCE

The place is of aesthetic significance because it is a recognised landmark in the City of Perth. The place is a good and rare example of a two-storey residence in the Victorian Italianate style.
The place is a good intact example of a substantial boarding house, which operated from 1898 to the 1930s and demonstrates what was considered an acceptable commercial venture or small business operation for single or widowed women in the 19th and 20th centuries.
The place represents the development of substantial buildings north of the City, as a result of the 1890s gold boom.
The place is of historic significance for association with Joseph Clarkson; Pearling Pioneer.
The place is valued by the Greek Orthodox Community and congregation of the Church of Saints Constantine and Helene, as it was purchased by the congregation and used as a rectory from 1952 until 1985, and then as a Greek community language school in the late 1960s.

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working-class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
The Post Office Directory lists many businesses along Gordon Street, West Perth from the early 1900s, such as bootmaker, tobacconist, storekeeper, laundry and carrier. Goodyear was established in the USA in 1898 and opened its first Australian store in Sydney in 1915. The Goodyear Tyre & Rubber Co., located at 67-71 George Street, West Perth was built in 1940, replacing several earlier buildings. Prior to this the company had a premises at 443 Murray Street. The Metropolitan Water Supply Survey plan (1953) shows a large complex with a driveway entrance penetrating the building, with curved parapets, as it remains today.

4. Building Perth (Settlements & Cities) - 4.1.5 Developing city centres

STATEMENT OF SIGNIFICANCE

The place has historical significance for its associations with the Goodyear company, and is a representative example of an industrial/manufacturing plant dating from 1940.
The place has the potential to be restored and reinstate its aesthetic value.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The place is a representative example of an industrial/manufacturing plant dating from 1940.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place has the potential to be restored and reinstate its aesthetic value.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The place has historical significance for its associations with the Goodyear company

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Fair
Building Fabric Authenticity	Low.

CLASSIFICATION OF SIGNIFICANCE

Little – Category 4 - Has elements or values worth noting for community interest but otherwise makes little contribution.

HISTORY

Boans Furniture Factory constructed circa 1930. During the inter-war period furniture was made locally and sold through the prominent Boans Department Store in Wellington Street. During this period, East Perth was characterised as the industrial and manufacturing area of Perth. The building was converted to residential use between the early and mid 1990s.

8. Developing Perth's Cultural Life - 8.13 Living in cities & suburbs

STATEMENT OF SIGNIFICANCE

The place is representative of the time when East Perth incorporated an industrial area in the neighbourhood. The place has rarity value as the last remaining landmark that indicates the industrial history of East Perth. The place is a tangible reminder of the Boans retail chain which was a major contributor to retailing in Western Australia from 1900 onwards and contributes to the community's sense of place and of history. Warehouse A is considered to have greater cultural significance than Warehouse B.

NATURE OF SIGNIFICANCE

HISTORY

In 1923 land for a substation was purchased as a result of the increased demand for electricity in the East Perth area, particularly from the Gas works and Glass works. In 1930 building had started on the walls around the transformer cubicles. Another extension in 1944 added two more transformer rooms. The rooms were separated by a door.
From 1886 gas was used to light streetlamps and buildings located within five miles from the General Post Office. The Perth Gas Company was formed to supply the gas. The Perth City Council purchased the Perth Gas Company between 1912 and 1915 and increased the supply to houses and streetlamps. A new power station was built by the Government in 1915 to supply electricity to the substations which were run by the Perth City Council. The substation allowed more development in East Perth as capacity increased.

PHYSICAL DESCRIPTION

Architectural Style 1 General	Victorian (c.1840-c.1890)
Architectural Style 1 Specific	Georgian
Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

External - 51 Goderich Street is a single storey, free-standing, brick house. It features a symmetrical façade set under a hipped roof, which has an east-west ridgeline and is clad with short-sheet corrugated iron. The Heritage Council's Assessment Documentation for 51-53 Goderich Street, dated 23 July 2004, states that the roof was originally covered with shingles and that some original shingles were still in-situ at that time. Evidence of this continues to be visible to parts of the verandah. Two chimneys remain towards the rear of the west elevation. Each of these was constructed of face-brick (now painted), with a single-course projecting string, a two-course stepped cap, and an arched brick chimney cowl.

The verandah, which extends across the main frontage and returns along the eastern side of the house, has a dropped, hipped roof, with a small gable over the central entrance. The floor is clad with timber boards and a timber lattice privacy screen partially encloses the western end. Each of the square timber verandah posts has a plain plinth, stop chamfered corners, a slender cornice, and a simple drop detail to the upper face. Above the cornice, the posts are linked by shallow arched solid timber valance panels, with boxed projecting eaves over.

The north and west façades are finished with tuck-pointed face-brick in Flemish bond, with a rendered base course. The main (north) facade features a large semicircular arch over the front door and segmental arches over the windows. The western wall has been painted.

The central entrance is fitted with a three-panel door. The upper half is fitted with a stained glass panel with a ribbon and vase design. Above the door, the semi-circular highlight is fitted with stained glass in a complementary style. Each of the front rooms (flanking the entrance hall) has a wide double hung window with six-panes to each sash. These have plain, square profile rendered sills. Along the eastern elevation, two sets of French doors open onto the side verandah.

The house is set slightly above the level of the street and two steps link the front gate and the verandah. The front boundary is defined by a face brick plinth and posts, with rendered capping and spear topped metal rod infill panels. On the eastern side of the house a modern double carport and garden shed have been constructed with detailing reflecting that of the house.

Along the eastern (Forrest Avenue) frontage there is an early Flemish bond brick fence that may date from the same time as the house. This has an 11-course plinth capped by a triangular profile rendered cap. The length of the fence is divided into panels by 21-course face brick posts with pyramid shaped rendered caps. Spear

topped metal rod infill panels link the posts above the plinth. Internal - The Heritage Council's Assessment Documentation for 51-53 Goderich Street, dated 23 July 2004, includes the following information about the interior of 51 Goderich Street:
The floor plan of No. 51 is typical of a slightly more substantial nineteenth century cottage ……[The place has] two front rooms located off a centrally located hallway, which extends the depth of the main building and a further two rooms behind. The kitchen is located under the skillion verandah across the back of the building. The two front windows have double hung six pane sash windows. The back verandah has been enclosed at a later date to accommodate bathroom and laundry and a verandah on the eastern side has been partially enclosed, and the enclosed face brickwork has been painted …. Internally, walls are generally in good condition with some minor cracking in the plaster. Floor timbers are mostly original wide butt jointed boards with some patching and are generally in very good condition. Ceilings in both houses are lathe and plaster ….. [and in No 51 these] are generally in fair condition. In the front two rooms and entrance hall of Number 51 are intact cornices, ceiling roses and plaster mouldings in the style of the late Georgian period. Other internal details are largely intact, including original windows and doors with original hardware.
An internal site inspection in June 2017 confirmed that the both the living and dining rooms have elaborate plaster mouldings to the ceiling, featuring recessed panels with egg and dart detailing. There is a wide heavily moulded archway between the living and dining rooms, and more restrained archway between the front and rear sections of the entrance hall. In the hallway and four main rooms, clear evidence remains of original floorboards, skirtings, architraves, plaster detailing and wall vents. The form of the skillion roof of the rear portion of the house is still clearly evident, but this area has been renovated with a new kitchen, bathroom and laundry. Major renovations have been undertaken throughout and the interior is in good condition (with minor cracking noted over the front door).

Walls 1 Material	Brick - Pointed
Walls 2 Material	
Roof Material	Metal - Corrugated Iron
Architect	
Builder	
Other Associations	James C. Fleming, Superintendent of Telegraphs (owner/developer)

HISTORY

This lot is located on part of original Town Lot E18. When street numbers were first allocated in c1897, this house was No. 328. It changed the following year to No. 133. Then from 1900 it was No 41, before being given No. 51 from 1908 onwards.
Perth Council Rate Collection Book (1879) lists the dwelling now known as No 53 and notes that a dwelling at No. 51 was under construction, with both houses (on part Town Lot E18) owned by James C. Fleming (who held the post of Superintendent of Telegraphs for Western Australia from 1869 until his death in 1885).Newspapers record Fleming asking for improvements to the street in 1881:A letter from Mr. Fleming, which was received and read at a previous meeting, was again referred to by the Mayor, asking the Council to make a footpath in front of his newly-erected houses in Goderich Street. (The Inquirer and Commercial News 6 July 1881 p 3)Fleming resided in one house and rented the other, but which house he lived in and which he rented has not been determined (although it seems likely that he would have moved into the more substantial property at No. 51). In 1884 Fleming, by now Superintendent of Telegraphs, held a public auction to sell his household furniture, and sold both properties to George Taylor, a builder.
Electoral Rolls, Rate Books and Post Office Directories suggest No. 51 was used as a rental property by George Taylor, as occupancy changed often. Tenants included Richard G Pratt (engineer) 1895-1898; Cecil Thomas 1899; O C Thomas 1900; C J Alford 1901; Sheepshank 1902 and John Flanagan (clerk) 1903-1907.George Taylor died in 1908, after which ownership of the property passed to his son, Walter, a salesman, who moved into the house with his new wife, Rita (nee McNally, from NSW). Apart from short periods in c.1917-1922 (whereabouts not determined) and c.1924-1925 (53 Goderich Street), Walter and Rita appear to have remained at 51 Goderich Street for most of their lives. In a newspaper notice in 1950, Walter Taylor was described as a "sports outfitter". He died in 1966, aged approx. 84 years. The 1954 sewerage plan shows the house with a verandah along the full length of the street and east side of the house, and the wc at the rear fence line (Forrest Avenue). Aerial photos from 1948 show there was also a dropped verandah roof running along the length of the

south side. Over the years there have been no major changes to the roof form or size of the house. As at 1985 (SLWA Photo 313908PD) the house had red painted short sheet corrugated iron to the main hipped roof and verandahs. Part of the east verandah had been enclosed to form a room which had a door opening to the north verandah, and two mismatched windows on the east elevation (this enclosure has since been removed). The windows under the front verandah were six pane double hung timber sashes. Walls were brick, unpainted. There was no boundary fence to Goderich Street, (or perhaps a very low random course wall). The Forrest Avenue boundary is not visible.
Between March 2001 and February 2002, the red painted corrugated iron roof was replaced and a free-standing car port was built on the east side of the house. In c. 2003, the rear of the lot (along with the rear of No 53) was subdivided and a new two storey development was built at 21 Forrest Avenue.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement and mobility - 104 Land allocation and subdivision

AUSTRALIAN HISTORIC THEME

4. Building Settlements, Town and Cities - 4.1.2 Making suburbs

STATEMENT OF SIGNIFICANCE

The place is a rare intact example of vernacular Victorian Georgian architecture constructed in Perth in the 1870s and 1880.
The place is a very significant example of workers housing in the City of Perth.
The place demonstrates the typical rental accommodation available to average urban residents in Perth in the 1870s and 1880s.
The place is significant for its contribution to the Goderich Street streetscape and because it is the style which has guided the design of new development in the area.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place is a very significant example of workers housing in the City of Perth. The place demonstrates the typical rental accommodation available to average urban residents in Perth in the 1870s and 1880s.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The place is a rare intact example of vernacular Victorian Georgian architecture constructed in Perth in the 1870s and 1880.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place is significant for its contribution to the Goderich Street streetscape and because it is the style which has guided the design of new development in the area.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Good to Very Good
Building Fabric Authenticity	High level of authenticity. Despite some changes over time, the house retains its original form and layout and the internal details and finishes are evident in the principal rooms.

CLASSIFICATION OF SIGNIFICANCE

Exceptional – Category 1 - Essential to the heritage of the locality. Rare or outstanding example.

HISTORY

A study of East Perth using the rateable value of housing and occupations listed in Perth Rate Books as at 1904 defined that section of Goderich Street between Forrest Avenue and Bennett Street as middle class, as opposed to an ‘overwhelmingly’ working class area around Claisebrook, and the ‘Elite and Upper Middle Class’ that fronted the river, especially along exclusive Adelaide Terrace.
Much of the north side of the street was developed between 1890 and 1900, with six relatively modest free-standing houses built at 44 to 58 Goderich Street. Sir Edward Albert Stone (c.1844-1920) had previously built five cottages c1897 on Lot E30; including 56 and 58 Goderich Street. Stone was an eminent citizen: Clerk of the Legislative Assembly from 1870-1874; appointed to the Supreme Court Bench in 1884; Chief Justice of WA from 1901-1906, during which time he was knighted; and Lieutenant-Governor from 1906 to 1920.No. 50 is located on the eastern part of original Town Lot E31. When street numbers were first allocated in c1897, this house was known as No. 333. It changed the following year to No. 136. Then from 1900 it was No 40, before being given number 50 from 1908 onwards. By 1897, the Rate Books identified Mrs J. H Cooper as the owner of two

houses on Goderich Street. The readily available evidence indicates that Mrs Cooper lived at what was later known as No 48 on Town Lot E32 from c.1890.
The smaller second house on Town Lot E31 (which appears to have been constructed c.1896) can be traced through street numbers as the adjacent No 50. Miss Annie L Eliot (musician) was the first occupant from 1897-1899 and preliminary research suggests that this was probably Mrs Cooper's sister. The occupants then changed frequently, but one longer-term tenant was Arthur Johnson (carpenter), 1910-1916. In 1916 Mrs J H Cooper advertised her properties for sale (Note: lot details are incorrect for No 50 which is on Lot E31): "BRICK RESIDENCES Nos. 48 and 50, GODERICH STREET (near corner Forrest-avenue), EAST PERTH. CHAS. SOMMERS has been favoured with instructions from the Mortgagees to SELL as above ….
A.-The western moiety of Subdivision 6 of Perth Town Lot E 32, together with r.o.c. way, and having a frontage of 50 links to Goderich-street by a depth of 289k links, upon which is erected a double fronted brick villa (No. 50), of 4 rooms, verandahs front and back.
B.-The eastern moiety of Subdivision 6 of Perth Town Lot E 32, together with r.o.c. way, and having a frontage of 50 links to Goderich-street by a depth of 289½ links, and upon which are erected a double fronted brick villa (No. 48), of 4 main rooms, vestibule, maid's room, and. kitchen; also two detached brick rooms, 18 x15 and 15 x 12, with pantry and brick laundry, galvanised iron tank on stand.
These properties occupy a first-class position in good letting locality; a few minutes from tram and within ten minutes of Town Hall." (The West Australian, 29 January 1916, p. 2. http://nla.gov.au/nla.news-article26970134)Two houses on the north side of Goderich Street (Nos. 54 and 56) were the first to be demolished in favour of industry. Between 1955 and 1965 a large double gabled building with glass shop front windows was erected. This was demolished in the late 1990s and became the entrance driveway and car park for The Stamford, a multi-story residential tower. The houses at Nos. 50 and 58 were incorporated into this development.

STATEMENT OF SIGNIFICANCE

The place helps to illustrate rapid development of East Perth with rental accommodation in the mid-1890s, in response to the rapid population growth arising from the gold boom.
It is one of thirteen late 19th century houses along Goderich Street, between Bennett Street and Forrest Avenue, which form a relatively rare collection of places that help to illustrate the pattern of settlement that saw the establishment and consolidation of East Perth as a residential suburb in the lead-up to and during the gold boom.
Collectively, these places contribute to the community's sense of place through the retention of significant physical evidence illustrating the development of East Perth in the late 19th century – a value that is emphasised by the extensive redevelopment of much of the surrounding parts of East Perth since the 1980s.
Through interpretation of the diverse housing stock, this collection of places provides the opportunity to articulate the nineteenth century residential development of East Perth with a mixture of free-standing houses, semi-detached houses and terrace houses, catering to a range of occupants from owner-occupiers, to upper and middle-class tenants, to working-class tenants.
The changing ownership and occupancy of the properties, and the redevelopment of some sites within this area, reflects population growth, population movement and changing attitudes towards inner-city housing over time.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place helps to illustrate rapid development of East Perth with rental accommodation in the mid-1890s, in response to the rapid population growth arising from the gold boom. HISTORY

A study of East Perth using the rateable value of housing and occupations listed in Perth Rate Books as at 1904 defined that section of Goderich Street between Forrest Avenue and Bennett Street as middle class, as opposed to an 'overwhelmingly' working class area around Claisebrook, and the 'Elite and Upper Middle Class' that fronted the river, especially along exclusive Adelaide Terrace.
In the 1884 Rate Books the owner and occupier of Town Lot E30 was John Costello. There was only one cottage on this site, and this addressed both Goderich and Wellington Streets. It has not been determined if this was the place now known as 58 Goderich Street.
Ownership of Town Lot E30 changed to E. A. Stone in c.1888 and it continued to be occupied by one cottage until 1896. By 1897 Town Lot 30 had five cottages owned by Stone; two fronting Goderich Street (later known as Nos. 56 and 58) and three fronting Wellington Street (three attached houses at No. 51, 53 and 55 Wellington Street, demolished c.1996). It is possible (but not verified) that the original cottage on Town Lot E30 may have been demolished to accommodate five new houses at that time.
In 1898, the three houses on Wellington Street were valued at £150 each. 130 Goderich Street (now known as 58 Goderich Street) was valued at £200 and was occupied by A J Cantor (traveller). The other house on

Goderich Street was also valued at £200 and occupied by a tenant. At the time of his death in 1920, Stone also owned the terrace at 66 & 68 Goderich Street.
A long-term tenant of 58 Goderich Street was John J Flanagan (clerk), who rented the property from c.1908-1922. Following his death, it continued to be occupied by his sister, Margaret Flanagan, until c.1925. Sir Edward Albert Stone (c.1844-1920) was Clerk of the Legislative Assembly from 1870-1874; was appointed to the Supreme Court Bench in 1884; was Chief Justice of WA from 1901-1906, during which time he was knighted; and was Lieutenant-Governor from 1906 to 1920.
In September 1920, 56 and 58 Goderich Street were described as follows: “Nos. 56 and 58 GODERICH-ST. Town Lot E30 66ft. 1x 200ft. with two brick houses one containing 5 rooms and kitchen, back and front verandahs, conveniences, sewered, and the other 4 rooms and conveniences, sewered, well situated within easy walking distance of the Town Hall.” (The West Australian, 11 September 1920, p. 2 http://nla.gov.au/nla.news-article27786086). Two houses on the north side of Goderich Street (Nos. 54 and 56) were the first to be demolished in favour of industry. Between 1955 and 1965 a large double gabled building with glass shop front windows was erected. This was demolished in the late 1990s and became the entrance driveway and car park for The Stamford, a multi-story residential tower. The houses at Nos. 50 and 58 were incorporated into this development.

Physical Description	

External - The Conservation Management Plan for 55-59 Goderich Street, East Perth (prepared by Greenward Consulting for Chris Maher, March 2016) described these as follows: The main façade was constructed with tuck-pointed Flemish bond brickwork (now painted with a rendered skirt), while the end walls were constructed with a mixture of stretcher bond and Colonial bond brickwork.
The gabled roof is clad with Zincalume sheeting (previously short-sheet corrugated iron sheeting). Unlike many terrace developments, the party walls extend only to the underside of the roof sheeting and the roofline is continuous. At either end of the building, a parapet wall extends up above the roofline, in the form of a triangular pediment with a rendered cap. Two original chimneys project up from the ridgeline, one serving #s 55 and 57 and the other serving #59.The raked verandah roof springs from immediately below the eaves line of the main roof and extends out over the footpath.
Each house has a central door opening onto the entrance hall, flanked by a single double hung window to each of the two front rooms. The front façade has been painted (with different colour schemes for each house) and a concrete rendered skirt has been applied up to window sill height. The verandah has been fully reconstructed and features a rendered masonry balustrade, which supports fluted concrete columns that frame each entrance and align with the party walls. Pipe frame gates with wrought iron detailing and wire mesh infill are located at each entrance. Half-height masonry walls divide the verandah into separate areas for each house. To accommodate the slope across the site, the terrace was designed to be elevated above the ground level at Goderich Street and at grade at the rear boundary. As the verandahs have been built up to the front boundary, this means that the concrete access steps start on the footpath and then cut back into the verandah space, with a small landing at the front entrance.55 Goderich Street is accessed via two steep narrow steps that are accommodated within the building line. The main variation between the main façade of 55 Goderich Street and the other houses in the row is the addition of fixed shutter panels as a modern decorative element to the window openings.
Internal - The Conservation Management Plan for 55-59 Goderich Street, East Perth (prepared by Greenward Consulting for Chris Maher, March 2016) provides the following information about the interiors (supported by detailed photographic evidence):All of the houses have been refurbished over time. However, they still retain clear evidence of the original layouts and a considerable amount of original detailing is still insitu.
The typical finishes and details are summarised below:

• Original floors are finished with 5” butt-jointed jarrah boards, which have been revealed in #57 and variously carpeted or tiled in #s 55 and 59.
• Walls are smooth plastered, with decorative wall vents to the front rooms.
• The visual inspection suggests that all of the original ceilings have been replaced.
• Some of the existing ceilings are panel and batten which is consistent with refurbishment during the inter-war era, while most of the others are flush panel with simple coved cornices, which is consistent with refurbishment in the mid-late twentieth century.
• In #55 all of the main rooms have been refurbished with decorative plaster cornices and ceiling roses. This detailing is of a period style but its application is not consistent with the style and era of the terrace.
• A single type of skirting has been used for all of the rooms under the main roof and the evidence indicates that this is original fabric (with the exception of small sections where repairs or alterations have been undertaken).
• A single type of architrave has been used for all of the original internal single door openings under the main roof, and the evidence indicates that this is original fabric.
• The internal single leaf doors are all low-waisted with four panels, and the evidence indicates that this is original fabric. Door hardware has been replaced in various styles.
• The low-waisted four-panel door to the front entrance of #59 appears to be original, inclusive of the hinges. However, the facing of the architrave around this door has been altered. The other front doors have been replaced, but retain their original architraves (which match the detailing to the architraves of the internal single leaf doors).
• The highlight windows above the front doors retain their original frames and architraves, but were originally horizontally pivoting (and would have been fitted with hardware to enable them to be easily opened).
• The original windows are all double hung with a single pane of glass to each sash. They have narrow bull-nosed sills and architraves that complement those to the doors. All hardware has been replaced.
• Each house had two formal fireplaces with timber mantles and surrounds. Only one of these has been removed and the opening plastered over (living room to #59). There is no visible evidence of the treatment of the original fire-grates and hearth surrounds.
• Note: some of this fabric has little ‘patina of age’ suggesting extensive renovations or replacement.
• Each house was also designed with a double bi-fold door between the front parlour and the living/dining room.

Walls 1 Material	Brick - Pointed
Walls 2 Material	Brick - Painted
Roof Material	Metal - Zincalume
Architect	
Builder	
Other Associations	Alice and George Simpson (owner/developers)

HISTORY

This property is located on part of original Town Lot E18 and was constructed as one of three attached houses. When street numbers were first allocated in c.1897, the terraces were numbered from east to west No. 324-322-320. In 1898 numbering changed to 129-127-125. Then from 1900 it was No 45-47-49, before being given the current numbers of 55-57-59 from 1908 onwards. From 1890, the Perth Rate Books had listed George Simpson as the occupier (and later owner/occupier) of a cottage on Part Town Lot E18, with a frontage to Cemetery Road. By 1896 the Simpson family were living at ‘Araluen’, 53 Forrest Ave, between Goderich and Wellington Streets. Tenders had been called for that house in September 1895 (The Inquirer and Commercial News, 6 Sep 1895, p 15), which indicates that the development of what is now known as 55-59 was intended as an investment. Various advertisements for tradesmen were placed in the West Australian in late 1895 for work at a location ‘opposite the Star and Garter.’ This was a hotel at 60-64 Goderich Street, directly opposite Simpson’s land. The terraces at 55-59 Goderich Street were built in a fairly typical style, with a simple rectangular plan form and gabled roof. The front facade was originally tuck-pointed.
The roof was short sheet corrugated iron, which had recently become available in the colony.
Advertisements from January 1896 in the West Australian show that the terraces were given names, which was likely due to no street numbers being allocated until later that year. No. 55 was ‘Como’, No. 57 was ‘Wollowra’ and No. 59 was ‘Moyne.’ When street numbers were first allocated in c.1897, the terraces were numbered from east to west No. 324-322-320. In 1898 numbering changed to 129-127-125. Then from 1900 it was No 45-47-

49, before being given the current numbers of 55-57-59 from 1908 onwards. The first resident at No 55 was M. J. Fitzgerald. There were many tenants over the years. Some of the longer term tenants include: Simeon Rintel (saddler), his wife Bertha nee Waterman and daughter, Grace (1903-16); Joseph Harris, wireman, and Jessie Harris, home duties (1925-1944) and Norman Henry Wilson, labourer, and Edna Elsie Wilson, home duties (1945-c.1954).On 28 January 1898, Alice Simpson sold the terrace of three houses to Eliza Godolphin Merritt Oats (the wife of Captain William Oats). Eliza Oats then retained ownership until her death on 2 February 1911. The terraces were offered for sale in 1912:In the Estate of the Late Captain Oats.LEARMONTH, DUFFY & CO have been favored with instructions from the WA Trustee, Executor, and Agency Co, Ltd. (Administrators of the Estate of the late Captain Oats and the Estate of Mrs. E. G. Oats), to OFFER by PUBLIC AUCTION in their Rooms, Emanuel Buildings, St. George's-terrace, on above date.
Part of Perth Building Lot E18, with 141 links frontage to Goderich street and 102 links to Forrest-avenue by a depth on one side of 162.4 links and on the other of 245 links with a brick residence on the Forrest-avenue frontage, let at 16/per week on a weekly tenancy, and three brick semi-detached Cottages in Goderich-street, let at 16/- per week on weekly tenancies. (Sunday Times, 14 July 1912, p 8) The 1954 sewerage plan shows the terraces and surrounding houses. Unlike houses either side, the terraces have bath and kitchen wings under the main roof, with a rear verandah running in between. Beyond the kitchen is a wash house, with the copper. Many of the surrounding houses show the copper being outside, or in a shelter away from the house, making the design for the terraces quite modern for the time.
No. 59 has a galvanized iron shed between the washhouse and brick toilet. No. 57 has a brick shed and brick toilet. No. 55 has a wooden shed, and wc at one side, and it appears to also have a brick toilet in the opposite corner of the rear yard. The sewerage plan also records two dry wells in the yard of No. 55. In between Nos. 55 and 57 is marked ‘brick gully’ which is the drain for the back to back wash houses. On the street front, the alignment of 55-59 Goderich Street is closer to the pavement than the houses on either side. An aerial photograph taken 11 March 1965 shows kitchen wings and rear attached buildings.
A photograph of the terraces dated 1970 (51882P, SLWA) shows a concrete balustrade extending the length of the three houses. The verandah posts are concrete pillars. The main roof at this time is short sheet corrugated iron. It seems that the verandah roof is newer. It is a separate raked roof. It appears that the façade is mostly unpainted; possibly rendered or painted up to window sill height. Windows are timber framed double hung sashes.
On 11 March 1974 the properties were bought by Ermano Steffe, Company Director, and his wife Albina Steffe, of 9 Second Ave, Rossmoyne. On 17 July 1978 Ermano and Albina Steffe applied successfully for a Strata Plan, and the three properties were then sold into separate ownership, and remain so as at 2017. Aerial photographs are in black and white until 1981, after which the roof appears red. This was painted corrugated iron. Circa 1984 the roof was replaced. A photograph dated 1985 (313909PD, SLWA) shows that front façade has been painted. The side walls and chimneys remain unpainted red face brick, with rendered capping.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement and mobility - 107 Settlements

AUSTRALIAN HISTORIC THEME

4. Building Settlements, Town and Cities - 4.1.2 Making suburbs

STATEMENT OF SIGNIFICANCE

The place has aesthetic significance as an example of an early cottage dating from the nineteenth century, prior to the period of commercial expansion that followed the gold rush.
The place has aesthetic significance as an integral component of a group of residential buildings representing the pattern of settlement in Perth from the late nineteenth century, prior to the period of commercial expansion that followed the gold rush.
The place has historic significance because it reflects the way of life of the working people of Perth in the late nineteenth and early twentieth century.
The place is a representative example of a residential property in Perth dating from the late nineteenth to early twentieth century. The place represents the changing character of the Perth community from the gold rush settlement period to the period of settlement by various ethnic communities, to the present.

Heritage Place Record Form

For Adoption

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place has historic significance because it reflects the way of life of the working people of Perth in the late nineteenth and early twentieth century.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The place is a representative example of a residential property in Perth dating from the late nineteenth to early twentieth century. The place represents the changing character of the Perth community from the gold rush settlement period to the period of settlement by various ethnic communities, to the present.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place has aesthetic significance as an example of an early cottage dating from the nineteenth century, prior to the period of commercial expansion that followed the gold rush.
The place has aesthetic significance as an integral component of a group of residential buildings representing the pattern of settlement in Perth from the late nineteenth century, prior to the period of commercial expansion that followed the gold rush.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Good
Building Fabric Authenticity	The main façade and building envelope of 55-59 Goderich Street has a medium degree of authenticity, but the verandah component is of low authenticity. Internally the plan form under the main roof retains a high degree of authenticity (comprising four rooms and a separate entrance hall), as does the joinery, while the ceilings have a low degree of authenticity. The rear wings have all been completely redesigned and/or rebuilt.

CLASSIFICATION OF SIGNIFICANCE

Considerable – Category 2 - Very important to the heritage of the locality.

Archaeology	
Physical Description	

External - 65 Goderich Street is a single storey, free-standing, brick house. It features a simple symmetrical façade set under a hipped roof, which has a short east-west ridgeline and is clad with corrugated metal sheeting. One chimney remains along the western side of the house. This is constructed of face-brick, with a single-course projecting string, and a four-course stepped cap, topped by a terracotta pot. The verandah extends across the main façade and returns along the western side of the house (with the side verandah screened from the street by a lattice panel). It has a raked roof, which extends in a continuous alignment from the main roof. The square stop chamfered verandah posts are set on the top of limestone piers, which form part of the front boundary fence. The verandah floor is finished with limestone pavers. The main façade is finished with painted tuck-pointed brick in Flemish bond (with various areas of rendered patching and repairs). The three openings to the main face all have plain segmental arches. The central entrance is fitted with a low-waisted four-panel door, with a plain highlight divided into three vertically proportioned panes. Each of the front rooms has a double-hung window, with each sash divided into 6-panes. The slim-line projecting window sills have a plain square profile.
The house is set above the level of the street with two steps linking the front gate to the verandah. The front boundary is defined by a mid-height limestone block wall (approx. 1.2m) framed by taller limestone block piers (approx. 1.8m). The front gate has a pipe frame, wrought iron detailing and wire mesh infill.Internal - Internal access not obtained as part of the Heritage Area Assessment (2017)

HISTORY

A study of East Perth using the rateable value of housing and occupations listed in Perth Rate Books as at 1904 defined that section of Goderich Street between Forrest Avenue and Bennett Street as middle class, as opposed to an 'overwhelmingly' working class area around Claisebrook, and the 'Elite and Upper Middle Class' that fronted the river, especially along exclusive Adelaide Terrace.
An analysis of entries in the Perth Council Rate Collection Books confirms that this house was constructed prior to 1884. This property is located on part of original Town Lot E18. When street numbers were first allocated in c.1897, it was known as No. 123. Then from 1900 it was No 51, before being given No. 65 from 1908 onwards.
In 1884, Robert Smith was identified as the owner and occupier of a cottage on part Town Lot E18. He retained ownership until c.1898, but after 1886 he rented the property out. In 1899, it was reported in the West Australian newspaper that bankruptcy proceedings were in progress against Robert Smith, who owned saddlery and tannery businesses. Facing increasing financial difficulties in the mid-late 1890s, Smith had obtained a loan from Rogers & Medelssohn (at an interest rate of 60%). In settlement of various debts, Rogers & Medelssohn subsequently entered into an agreement to purchase the whole of Smith's stock, lands, debts and other property, with the transfer being completed in September 1898. (The West Australian 13 September 1899 p 7).
The house was advertised for sale in November 1903 as "containing 4 rooms, kitchen, bathroom, verandah, outhouses, etc., land 42ft. by a good depth, rental, 18s. weekly." (The Daily News 4 November 1903 p 5). It was then purchased by Amelia McDonald who retained ownership until c.1922 and continued to use it as a rental property.
During this initial period, there were many residents at 65 Goderich Street, most staying for only a year or two. Their occupations, including builder, brickmaker, surveyor, clerk, mason, caterer, motor car proprietor and manager, suggest the place was targeted at the middle-class rental market. In 1922 ownership was transferred to Australian Homes Ltd, then to William Frederick Glover in 1923, who had recently acquired the licence to the Carlton Hotel directly opposite. William remained here until the time of his death in May 1951.
In 1922 ownership was transferred to Australian Homes Ltd, then to William Frederick Glover in 1923, who had recently acquired the licence to the Carlton Hotel directly opposite. William remained here until the time of his death in May 1951. His wife, Gladys Emily Glover, was still listed at this address in the Electoral Rolls of 1954.
The 1948 aerial photo shows the house with a simple hipped roof with a tall face brick chimney on the west side. There are some outbuildings along the rear fence line. The 1954 sewerage plan shows that the house has a large timber bathroom, separate to the main house, and a brick toilet behind. There are two long galvanised iron outbuildings in the yard, oriented in a north-south direction.
Two 1985 photographs (313909PD and 313911PD SLWA) show No. 65 with a hipped roof that extends over the verandah in a continuous alignment from the main roof. It is red painted, short sheet corrugated iron and has a tall face brick chimney with a terracotta chimney pot on the west side. There are square, stop chamfered verandah posts set on top of masonry piers, which form part of the front boundary fence. The main façade seems to be painted or rendered. The house is set above the level of the street with five steps from the street level up to the verandah.
The front boundary is a painted brick wall with a piped balustrade above. There is a pipe frame gate with wrought iron detailing and wire mesh infill. By 1995 the roof was replaced with the current corrugated metal sheeting. Aerial photos show that between 2002 and 2006 the roof was extended to the rear with a wing running north-south.

8. Developing Perth (Australia's) Cultural Life – 8.12 Living in & around Australian homes

STATEMENT OF SIGNIFICANCE

The place helps to illustrate rapid development of East Perth with rental accommodation in the mid-1890s, in response to the rapid population growth arising from the gold boom.
It is one of thirteen late 19th century houses along Goderich Street, between Bennett Street and Forrest Avenue, which form a relatively rare collection of places that help to illustrate the pattern of settlement that saw the establishment and consolidation of East Perth as a residential suburb in the lead-up to and during the gold boom.
Collectively, these places contribute to the community's sense of place through the retention of significant physical evidence illustrating the development of East Perth in the late 19th century – a value that is emphasised by the extensive redevelopment of much of the surrounding parts of East Perth since the 1980s. Through interpretation of the diverse housing stock, this collection of places provides the opportunity to articulate the nineteenth century residential development of East Perth with a mixture of free-standing houses, semi-detached houses and terrace houses, catering to a range of occupants from owner-occupiers, to upper and middle-class tenants, to working-class tenants.
The changing ownership and occupancy of the properties, and the redevelopment of some sites within this area, reflects population growth, population movement and changing attitudes towards inner-city housing over time.

NATURE OF SIGNIFICANCE

HERCON Value A – Its importance in demonstrating the evolution or pattern of Perth's history

The place helps to illustrate rapid development of East Perth with rental accommodation in the mid-1890s, in response to the rapid population growth arising from the gold boom.
It is one of thirteen late 19th century houses along Goderich Street, between Bennett Street and Forrest Avenue, which form a relatively rare collection of places that help to illustrate the pattern of settlement that saw the establishment and consolidation of East Perth as a residential suburb in the lead-up to and during the gold boom.

HERCON Value B – Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C – Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D – Its importance in demonstrating the characteristics of a broader class of places

Through interpretation of the diverse housing stock, this collection of places provides the opportunity to articulate the nineteenth century residential development of East Perth with a mixture of free-standing houses, semi-detached houses and terrace houses, catering to a range of occupants from owner-occupiers, to upper and middle-class tenants, to working-class tenants.
The changing ownership and occupancy of the properties, and the redevelopment of some sites within this area, reflects population movement and changing attitudes towards inner-city housing over time.

HERCON Value E – Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F – Its importance in exhibiting particular aesthetic characteristics valued by any group or community

Collectively, these places contribute to the community's sense of place through the retention of significant physical evidence illustrating the development of East Perth in the late 19th century – a value that is emphasised by the extensive redevelopment of much of the surrounding parts of East Perth since the 1980s.

HERCON Value G – Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H – Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I – Any HERCON Value I – Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Good
Building Fabric Authenticity	The painting of the main façade has to some degree altered the character of this place. However, the original design and nature of the place can still be readily understood.

CLASSIFICATION OF SIGNIFICANCE

Considerable – Category 2 – Very important to the heritage of the locality.

Physical Description	

67 Goderich Street forms part of a single storey semi-detached terrace at 67-69 Goderich Street. The roof has an east-west ridgeline to the street frontage and extends to the rear as an 'M' shaped hipped roof with a central box gutter over the party wall. There is no external evidence of chimneys. The frontages of the two houses were designed as a mirror image. At ground floor level, each house has a main entrance near the party wall. Each of these is now fitted with a single door with no highlight or sidelights. The front room of each frontage has a triple casement window with eight panes to each panel. The projecting sills have a simple square profile. A dropped bull-nosed verandah extends across the main façade, supported on turned timber posts.
The main façade is fully rendered with no visible evidence of the original finish, except for a small section of vermiculated quoining at the top of the north-eastern corner. The house is set above the level of the street with 8 steps linking the front gate to the verandah. The front boundary is defined by a rendered masonry wall (approx. 1.7m high) framed by taller limestone block piers linked by wrought iron infill panels (overall height approx. 2.4m). The front gate has wrought iron detailing to match the infill panels to the fence.

HISTORY

A study of East Perth using the rateable value of housing and occupations listed in Perth Rate Books as at 1904 defined that section of Goderich Street between Forrest Avenue and Bennett Street as middle class, as opposed

to an 'overwhelmingly' working class area around Claisebrook, and the 'Elite and Upper Middle Class' that fronted the river, especially along exclusive Adelaide Terrace.
In c.1895-1896 there was a flurry of building activity and eight new houses were constructed along the southern side of Goderich Street, between Forest Avenue and Bennett Street, adding to the three existing houses and largely completing the development of this frontage of Town Lots E17 and E18. The home of a local developer/landlord, Thomas Elliott, was a large two storey house on the corner of Goderich and Bennett Street (facing Bennett Street). In c.1895, Town Lot E17 was acquired by Thomas Elliott, and information in the Rate Books indicates that he immediately set about developing this with several houses along the Goderich and Bennett Street frontages. This was all occupied as rental accommodation, with the new buildings including the row of three terraces at 55-59 Goderich Street, plus two pairs of semi-detached houses (67-69 and 71-73). When street numbers were first allocated in c.1897, this pair of houses was known as 123-121 (numbered east to west). From 1900 they were known as No 53-55, before being given No. 67-69 from 1908 onwards. The first known occupant of No. 67 was William H Ranking, a traveller, but the occupants changed regularly through until at least 1940, with tenants typically remaining for 1-3 years. Elliott retained ownership of these properties until c.1904, when it was reported that he was selling at least some of his Perth properties in anticipation of a move to Kalgoorlie. At that time Town Lot E17 included eleven houses - two pairs of semi-detached brick houses fronting Bennett Street; one double fronted brick and stone villa fronting Bennett; one brick and stone two storey residence on the corner of Bennett and Goderich Streets (Elliott's house); and a double fronted brick and stone villa and two pairs of semi-detached brick houses fronting Goderich Street. The last of these included the semi-detached houses now known as 67-69 Goderich Street. An advertisement stated that each of these contained five rooms, with wide hall, pantry, bathroom, etc,… Now let at 22s. 6d. per week each. (Sunday Times 25 September 1904 p 8)
In 1906, the Rate Books identified the owner of the houses 67-75 Goderich Street (plus Elliott's former home on the corner of Bennett) as Othel Sloss. He was a contractor of Kalgoorlie and Coolgardie, with five sons and one daughter: Moses (born c.1899), Samuel (c.1891), Thomas (c.1893), Joseph (c.1895), Esther (c.1901) and Othel, jnr (c.1901). Electoral Rolls show that various members of the Sloss family, including Othel's parents Moses and Elizabeth, and his sister Clara, lived in a detached villa at 75 Goderich Street. The properties stayed in the family after Othel Sloss died in 1907, passing to his sons Joseph and Moses who retained ownership until c.1929. After this, ownership of 67-69 Goderich Street transferred to George Henry Maxwell. Subsequent owners included Nicholas and Mary Francis (1937-1938), and Dorothy May Boyd and Gertrude Mary Hayes (1939). One long-term resident at 69 was Bernard John Miller, a tram conductor, who lived here from c.1909-1931. Another was Frederick James Thomas and wife Teresa Agnes Mary Thomas (nee Warner) who lived there from 1942 until at least 1949 (when post office directory records cease). In a newspaper report in 1942, Frederick Thomas was described as an investigator employed with the Special Bureau CIB, attached to Military intelligence. He is later described as a nurseryman. The 1954 sewerage plan shows 67-69 and 71-73 as matching pairs of stone, semi-detached houses. The verandahs extend along the full length of the street front. There are also verandahs at the rear and sides and compared to the footprint of the adjacent houses at 65-51 Goderich Street, they are quite substantial in size. The rear yard shows separate laundry rooms (identified as Cop for copper), and brick toilets are located on the south boundary fence. No. 69 also has a galvanised iron outbuilding in the south west corner of the lot against the boundary fence. Aerial photos show that between 1965 and 1974, the roof of 67-69 was replaced (it changes from a darker colour, probably painted red corrugated iron to a light colour). When aerials become coloured from 1981, the roof is white as opposed to the red roofs adjacent at 71-73 Goderich Street. A 1985 photograph (313911PD, SLWA, Photograph A.9) shows a dropped bull-nosed verandah roof profile.
On the southern side of Goderich Street a modern residential row of terraces at 71-77 Goderich Street called Queensgate Terraces was built in c. 1990. For this development, one of the matching semi-detached cottages at 71-73 was demolished, while Nos 67-69 remains extant.

Other Associations	Thomas Elliott (owner/developer)

HISTORY

This property, which is located on part of original Town Lot E17, was designed as one of a pair of semi-detached houses. When street numbers were first allocated in c.1897, this pair of houses was known as 123-121

(numbered east to west). From 1900 they were known as No 53-55, before being given No. 67-69 from 1908 onwards.
In c.1895, Town Lot E17 was acquired by Thomas Elliott, and information in the Rate Books indicates that he immediately set about developing this with several houses along the Goderich and Bennett Street frontages. This mixed development included the semi-detached terraces now known as 67-69, plus a matching pair at 71-73 Goderich Street (the latter were demolished c.1990). The first occupant of No. 69 was Mrs Sarah Atkinson, who lived here from c.1897-1898.Elliott retained ownership of these properties until c.1904, when it was reported that he was selling at least some of his Perth properties in anticipation of a move to Kalgoorlie. At that time Town Lot E17 included eleven houses - two pairs of semi-detached brick houses fronting Bennett Street; one double fronted brick and stone villa fronting Bennett; one brick and stone two storey residence on the corner of Bennett and Goderich Streets (Elliott's house); and a double fronted brick and stone villa and two pairs of semi-detached brick houses fronting Goderich Street. The last of these included the semi-detached houses now known as 67-69 Goderich Street. An advertisement stated that each of these contained five rooms, with wide hall, pantry, bathroom, etc,… Now let at 22s. 6d. per week each. (Sunday Times 25 September 1904 p 8)
In 1906, the Rate Books identified the owner of the houses 67-75 Goderich Street (plus Elliott's former home on the corner of Bennett) as Othel Sloss. He was a contractor of Kalgoorlie and Coolgardie, with five sons and one daughter: Moses (born c.1899), Samuel (c.1891), Thomas (c.1893), Joseph (c.1895), Esther (c.1901) and Othel, jnr (c.1901). Electoral Rolls show that various members of the Sloss family, including Othel's parents Moses and Elizabeth, and his sister Clara, lived in a detached villa at 75 Goderich Street. The properties stayed in the family after Othel Sloss died in 1907, passing to his sons Joseph and Moses who retained ownership until c.1929. After this, ownership of 67-69 Goderich Street transferred to George Henry Maxwell. Subsequent owners included Nicholas and Mary Francis (1937-1938), and Dorothy May Boyd and Gertrude Mary Hayes (1939).
One long-term resident at 69 was Bernard John Miller, a tram conductor, who lived here from c.1909-1931. Another was Frederick James Thomas and wife Teresa Agnes Mary Thomas (nee Warner) who lived there from 1942 until at least 1949 (when post office directory records cease). In a newspaper report in 1942, Frederick Thomas was described as an investigator employed with the Special Bureau CIB, attached to Military intelligence. He is later described as a nurseryman. The 1954 sewerage plan (Figure A.7) shows 67-69 and 71-73 as matching pairs of stone, semi-detached houses. The verandahs extend along the full length of the street front. There are also verandahs at the rear and sides and compared to the footprint of the adjacent houses at 65-51 Goderich Street, they are quite substantial in size. The rear yard shows separate laundry rooms (identified as Cop for copper), and brick toilets are located on the south boundary fence. No. 69 also has a galvanised iron outbuilding in the south west corner of the lot against the boundary fence.
Aerial photos show that between 1965 and 1974, the roof of 67-69 was replaced (it changes from a darker colour, probably painted red corrugated iron to a light colour). When aerials become coloured from 1981, the roof is white as opposed to the red roofs adjacent at 71-73 Goderich Street.
A 1985 photograph (313911PD, SLWA, Photograph A.9) shows a dropped bull-nosed verandah roof profile.

WESTERN AUSTRALIAN HISTORIC THEME

8. Developing Perth (Australia's) Cultural Life - 8.13 Living in cities & suburbs

STATEMENT OF SIGNIFICANCE

This place helps to illustrate raid development of East Perth with rental accommodation in the mid-1890s, in response to the rapid population growth arising from the gold boom.

It is one of thirteen late 19th century houses along Goderich Street, between Bennett Street and Forrest Avenue, which form a relatively rare collection of places that help to illustrate the pattern of settlement that saw the establishment and consolidation of East Perth as a residential suburb in the lead-up to and during the gold boom.
Collectively, these places contribute to the community's sense of place through the retention of significant physical evidence illustrating the development of East Perth in the late 19th century – a value that is emphasised by the extensive redevelopment of much of the surrounding parts of East Perth since the 1980s.
Through interpretation of the diverse housing stock, this collection of places provides the opportunity to articulate the nineteenth century residential development of East Perth with a mixture of free-standing houses, semi-detached houses and terrace houses, catering to a range of occupants from owner-occupiers, to upper and middle-class tenants, to working-class tenants.
The changing ownership and occupancy of the properties, and the redevelopment of some sites within this area, reflects population growth, population movement and changing attitudes towards inner-city housing over time.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

This place helps to illustrate raid development of East Perth with rental accommodation in the mid-1890s, in response to the rapid population growth arising from the gold boom.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

It is one of thirteen late 19th century houses along Goderich Street, between Bennett Street and Forrest Avenue, which form a relatively rare collection of places that help to illustrate the pattern of settlement that saw the establishment and consolidation of East Perth as a residential suburb in the lead-up to and during the gold boom.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

Through interpretation of the diverse housing stock, this collection of places provides the opportunity to articulate the nineteenth century residential development of East Perth with a mixture of free-standing houses, semi-detached houses and terrace houses, catering to a range of occupants from owner-occupiers, to upper and middle-class tenants, to working-class tenants.
The changing ownership and occupancy of the properties, and the redevelopment of some sites within this area, reflects population growth, population movement and changing attitudes towards inner-city housing over time.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

Collectively, these places contribute to the community's sense of place through the retention of significant physical evidence illustrating the development of East Perth in the late 19th century – a value that is emphasised by the extensive redevelopment of much of the surrounding parts of East Perth since the 1980s.

For Adoption

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Good
Building Fabric Authenticity	The rendering of the façade and replacement of the front windows has altered the character of this place. However, the original form and nature of the semi-detached terrace can still be understood.

CLASSIFICATION OF SIGNIFICANCE

Considerable – Category 2 – very important to the heritage of the locality

PHYSICAL DESCRIPTION

Architectural Style 1 General	Victorian (c.1840-c.1890)
Architectural Style 1 Specific	Georgian
Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

External - 66-68 Goderich Street was designed as a two storey semi-detached terrace, but has been adapted as 4 self-contained flats (now known as units 2, 3, 4 and 5 of 70 Goderich Street).The building features a simple symmetrical main façade faced by a verandah/balcony. The front portion of the building is set under a hipped roof with a short east-west ridgeline, while the attached rear wings are set under a pair of gable roofs (with a lower eaves height). The whole of the roof is clad with Zincalume. There are two large chimneys to the main roofline (set either side of the front ridgeline). Each of these was constructed of face brick (now painted), with a rendered moulded cap. The rear wings each have a smaller plain chimney located towards the northern end.
The balcony to the main façade has a raked roof (springing from the eaves line of the main roof), square timber posts, and a cross-timber balustrade. The balcony floor is finished with timber boards while the soffit over the ground floor is clad with mini-profile corrugated sheeting. At ground floor level, brick paving extends from the front fence to the front wall of the building. The detailing of the balcony suggests that it has been partially or fully reconstructed.
The main façade appears to have been constructed of face-brick in Flemish bond, but has been heavily painted. The other walls were constructed in English bond, now variously rendered or painted. The frontages of the two houses were designed as a mirror image.
At ground floor level, each house had a main entrance abutting the party wall. Each of these is now fitted with a six-panel timber door, set under a tall, two-pane highlight. The front room of each frontage has a double hung window with two vertically proportioned panes to each sash, divided by slender mullions. The projecting sills have a simple square profile. At first floor level each frontage has French doors abutting the party wall, with highlight windows over. The windows align with those to the ground floor and have similar detailing, although with four-panes per sash and some modification to accommodate window mounted air-conditioning. Windows facing north and to the first floor of the rear wings have double hung windows with six-panes per sash. Windows to the ground floor of the rear wing have horizontally sliding sashes (also with six-panes per panel).
The rear wings are set back from the face of the east and west elevations of the front portion of the building. These set backs accommodate single-storey, raked-roofed verandahs, which return in a continuous line along the rear.
The house is set down from the level of the street, with 2 steps to the front yard. The front boundary is defined by a mid-height, flat timber-paling fence (to approx. 1.2m above the footpath), framed by a low face-brick plinth and face brick posts with rendered pyramid caps. Internal - An internal inspection was undertaken of the front room of Unit 2 (the entrance and front room to the original house on the western side), and of the entrance hall

and stairwell for Units 4 and 5 (these occupy the upper floor with access from hallway of the original house on the eastern side). This confirmed that the internal layout has been reconfigured as part of its adaptation as a lodging house (from the late 1920s) and more recently as self contained flats, but that the original layout can still be interpreted. It also confirmed that some important original detailing remains intact and that this helps to illustrate the relatively high status of these houses when they were originally built. In particular, this includes the high ceiling level, deep moulded cornices, and the large and ornate ceiling rose to the front room of Unit 2.
Other original detailing includes the fireplace surround to Unit 2, and the moulded cornices, high timber skirtings, moulded timber architraves and high level cast iron wall vents, which remain to various parts of the ground floor available for inspection. Alterations to the internal layout include the removal of part of the hallway wall and the blocking up of the hall archway in Flat 2. In the original eastern dwelling, the hallway remains, but beyond the hall archway a more recent, larger stairwell has been created by extending this space into what was originally the adjoining house.
Large arched niches and highlight windows remain on the rear wall of this space, but the party wall has been removed and a wide return stair now leads up to Units 4 and 5, which are located across the front portion of the first floor.

Walls 1 Material	Brick - Painted
Walls 2 Material	
Roof Material	Metal - Zincalume
Architect	
Builder	George Taylor (owner/builder)
Other Associations	Sir Edward Albert Stone (owner 1905-1920)

HISTORY

This property is located on part of original Town Lot E28. When street numbers were first allocated in c.1897, the property was known as 122-124 Goderich Street. Then from 1900 it was No 56-54, before being given No. 68-66 from 1908 onwards. It now forms part of a larger residential complex known as 70 Goderich Street.
In the Rate Books of 1886 Perth Town Lots E28 & E29 were described as vacant ground owned by George Taylor, builder. By 1887 the site appears to have been subdivided, with a person by the name of E. Connor shown as the owner of several residential properties along the Wellington Street frontage, and George Taylor as the owner of two houses (on Lot E28) and a hotel (the Star and Garter Hotel, Lot E29) on the Goderich Street frontage.
The rated values indicate that these were both relatively substantial properties and it is almost certain that this was when the large two-storey, semi-detached house was built at what is now known as 66-68 Goderich Street.
[Note: The entries in Rate Books over the next few years are difficult to decipher with numerous amendments to the information regarding lot numbers, occupants and primary street address.]In 1892-1893 one house was occupied by James Thompson (civil engineer), followed by W Weidenbach (merchant). The other house was occupied by M Friedman (dealer), followed by W. Miller (clerk).A look at tenants and their occupations suggests this property was designed to a style and standard suitable for a high-class clientele. For example, in 1903 one resident was a gentleman, Doctor Dixie Paumier Clement, and another long-term tenant was Thomas Stratham, who was the proprietor of the Darling Range Quarries.
At the time of his death in 1918, it was reported that he was the:… proprietor of the Darling Range Quarries and Fire Brick Company … a member of the Perth City Council for three years [councillor for the East ward, c.1903], and a partner in the Wooramel Pastoral Company. (The West Australian 12 March 1918 p 4.)
In 1905, E. A. Stone purchased the two-storey terrace at 66-68 Goderich Street from George Taylor. He had previously built five cottages c.1897 on Lot E30; two fronting Goderich Street (these were Nos. 56 and 58) and three fronting Wellington Street (three attached houses at No. 51, 53 and 55 Wellington Street, demolished c.1996).Sir Edward Albert Stone (c.1844-1920) was Clerk of the Legislative Assembly from 1870-1874; was appointed to the Supreme Court Bench in 1884; was Chief Justice of WA from 1901-1906, during which time he was knighted; and was Lieutenant-Governor from 1906 to 1920. Edward Albert Stone remained the owner of 66-68 Goderich Street until his death in 1920. It was then offered for sale as part of his estate:
Nos. 66 and 68 Goderich-st., Perth. Part of E28 41ft. 6in., by 201ft to r.o.w., with substantial pair S.D. Brick Houses, each 6 rooms, kitchen, bathroom, washhouse, etc., sewered, rentals £117 p.a. A good sound city investment. (The West Australian 1 June 1921 p 2.)

They were sold to Joseph Edmund Whitworth but passed the following year to Bernard Ferstat. Two years later he also bought the adjacent house at No. 70, and retained all properties until 1927, when they were sold to Simeon Epstein.In the mid-1920s, No. 68 began operating as a boarding house, run by Mary Munro. (The West Australian 29 May 1924 p 11.) A few years later, No. 66 was also a lodging house. This continued up to the mid-1950s, as indicated by numerous advertisements placed for rooms in newspapers.
Aerial photos from 1948 show that the front portion of the building had a hipped roof with two chimneys and there were two rear wings under what seemed to be a lower pitch hipped roof, also with two chimneys. The 1954 sewerage plan shows a symmetrical plan. The terraces are a mirror image, with full length front verandahs, a projecting room to the rear (bath), and verandah to each side at the rear, and each residence has a water tank. Brick wc's are at the far north of the lot, against the boundary fence.
A 1985 photograph (313924PD SLWA) shows the building with a rendered front wall, face brick to the west wall, and short sheet corrugated galvanised iron to the roof. Chimneys visible to the front part of the hipped roof are face brick with rendered moulded caps. The upper floor verandah has a raked roof that extends from the eaves line. The balcony is semi-enclosed with what seems to be fibrous cement or timber panelling. Photographs from 1993 (BA1530/5632 & BA1530/5671, SLWA) show that the enclosed balcony has been removed and replaced with a criss-cross timber balustrade. More noticeably, the face brick walls have been painted and the roof replaced with modern, long-sheet corrugated profile roof cladding. Aerial and street photographs show that, between 1986 and 1992, a large public housing development was built, now known as 70 Goderich Street. It comprises a total of 105 units in a variety of buildings ranging from two to eight stories. Demolished for this redevelopment were two houses at 68 and 70 Bennett Street, Chevron Flats on the corner at 72-78 Goderich Street and Virginia Court at 60-62 Goderich Street, (both built in 1938 by architect Harold Krantz) and a house (74 Goderich Street).The c.1885 cottage at the original 70 Goderich Street and the two-storey terrace, 66-68 Goderich Street were retained and incorporated into the public housing complex. While the external form remains largely intact, internally, the terrace was adapted into self-contained flats.

PHYSICAL DESCRIPTION

Architectural Style 1 General	Victorian (c.1840-c.1890)
Architectural Style 1 Specific	Georgian
Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

External - The house features a simple symmetrical façade set under a hipped roof clad with corrugated metal sheeting and oral evidence suggests that an early timber shingled roof remains at least partially intact below the corrugated sheeting. The main roof has an east-west ridgeline and extends with a skillion roof to the rear. A single, squat, rendered chimney with a plain single-course cap is located on the western side of the house. The front verandah has a bull-nose roof, which continues in a broken-back alignment from the main roofline. Other verandah elements include square timber posts (with minimal stop chamfered detailing) and timber panels to the ends of the verandah roof (with saw-tooth detailing to the bottom edge). The verandah floor has been brick paved, extending as a path to the steps leading up to the front gate.
The external walls have been fully rendered and include no decorative finishes or detailing. The central entrance has a shallow arched head and is fitted with a low-waisted four-panel door. Each of the front rooms has a double casement window, with each panel divided into 10 panes. Each of the window openings has a shallow arched head and plain recessed sill. The house is set below the level of the street and garden beds have been established along the southern edge of the small front yard. The front boundary is defined by a mid-height, flat timber-paling fence, backed by a trellis panel and dense planting. Internal - 70 Goderich Street was designed with two front rooms under the main roof, with the front entrance opening directly into the room on the western side. This larger front room has a fireplace on the western wall. To the rear, and directly aligning with the front entrance, a doorway and steps lead down to a short hallway. This leads to the rear door and is flanked by a kitchen on the eastern side and bathroom/utility room on the western side. These spaces are located under a skillion roof and have raked ceilings.
The interior appears to have retained a moderate to high level of authenticity, including timber skirtings, architraves, fireplace mantle, and the internal board and brace doors. Other elements, such as the ceilings, have been replaced over time.

Walls 1 Material	Brick - Rendered
Walls 2 Material	Render - Smooth
Roof Material	Metal - Zincalume
Architect	
Builder	

Other Associations	Michael Benson (early owner of the property)

HISTORY

This property is located on part of original Town Lot E26. When street numbers were first allocated in c.1897, the property was known as No. 317. In 1898, it changed to No. 120. Then from 1900 it was No 58, before being given No. 70 from 1908 onwards.
In 1884, the Rate Books identified the owner of part Town Lots 26 & 27 as Michael Benson. By that time this land had already been developed with two cottages fronting Goderich Street, which were occupied by Michael Benson (homeowner) and John Benson (saddler). From its physical appearance and architectural detailing, it is probable that one of these was the small cottage (No. 70) which remains extant today. A third house was built by 1885, and it is probable that Benson's three houses were located at 70, 74 and 78 Goderich Street. Michael Benson continued to own the site until 1897.
Information from online family trees suggests that this may have been the same Michael Benson who died in Perth in 1897, leaving a wife and at least four children. When his widow, Margaret, died in 1902, it was reported that the late Mr. Michael Benson, arrived in this State in the year 1851, in the ship Pioneer. Mr. Benson held the position of gaoler in Perth and Fremantle for over 30 years, and Mrs. Benson that of matron, both receiving a pension on retiring. (Western Mail 25 January 1902 p 9).Post Office Directories and Rate Book correlation identifies some of the earliest occupants of No. 70 as Robert McAlister, farmer (1885), Henry Lockyer, carter (1888-1891) and Daniel McLachlan, miner (1895-1897).In 1898, Daniel Kenny became the new owner of the section of Town Lot E26 with 3 cottages fronting Goderich Street and he retained ownership of these properties until the time of his death in January 1915. At that time, it was reported that: The late Dr. Kenny was born in 1860, in Gorey, County Wexford, Ireland, and he studied at the Medical School of the Catholic University, where he won the gold medal, and was first prizeman in several subjects. He settled [in Western Australia] in 1885, and during the following year married Miss Kathleen Horgan, second daughter of Mr. John Horgan, solicitor, of Perth.
Dr. Kenny's ability was not restricted to medicine, as he was also an excellent businessman, and his extensive investments in land proved particular fortunate. (Western Mail 22 January 1915 p 31).Rate Books reveal the subsequent ownership of No 70 as follows: The property was passed to Daniel Kenny's son, John, in c.1915, and he retained ownership until c.1922, after which it was transferred to Frank George Lowell Hedges. In 1925-1926 Bernard Ferstat, who was already the owner of 66-68 Goderich Street, purchased No. 70. All three had been sold to Simeon Epstein by 1928, who then retained ownership until 1935. No. 70 was then sold to Frances Catherine ("Fanny") Nelson, who was still listed at this address in the Electoral Rolls of 1972.The 1954 sewerage plan shows a simple square footprint to the house with a full-length verandah at the front and rear.
A 1985 photograph (313924PD SLWA) shows the modest scale of the house in comparison to the large, two-storey terrace adjacent on the east, and even to that of a typical gable roofed house on the west. It is set below the street level, and the verandah roof is at almost a continuous pitch to the main roof. The roof is clad in short sheet corrugated galvanised iron, painted red. The end of the verandah roof has timber panels with saw-tooth detailing to the bottom edge. Verandah posts appear to be a simple square profile. There was a low face brick wall to the front boundary.
Aerial and street photographs show that, between 1986 and 1992, a large public housing development was built, now known as 70 Goderich Street. It comprises a total of 105 units in a variety of buildings ranging from two to eight stories. Demolished for this redevelopment were two houses at 68 and 70 Bennett Street, Chevron Flats on the corner at 72-78 Goderich Street and Virginia Court at 60-62 Goderich Street, (both built in 1938 by architect Harold Krantz) and a house (74 Goderich Street). The original c.1885 cottage at 70 Goderich Street and the adjacent two-storey terrace, 66-68 Goderich Street were retained and incorporated into the public housing complex.
During the time of the redevelopment, the roof of No. 70 has been replaced with modern, long-sheet corrugated profile roof cladding, as seen in photographs dated 1993 (BA1530/5632 & BA1530/5671, SLWA). By this time, the front boundary fence has been replaced with a low picket fence. Anecdotal evidence from the tenant in 2017 says that in c.2010 the ceiling of the house was insulated and the workers discovered original timber shingles under the corrugated sheeting of the roof.

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status already associated with addresses in nearby Mount Street and access to the city's piped water system. The area was subdivided into large residential lots for development and proceed accordingly. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway.
The Post Office Directory first lists No. 20 in 1895. It was originally No. 12 Gordon Street, occupied by Michael Kelly. From 1905, Phil Goatcher was the occupant. Numbering changed in 1908. No. 20 was listed twice from 1910; suggesting that Phil W. Goatcher and Son, painter and sign writer, occupied one premises for his business, and the other (No. 20) was his private residence. Phillip William Goatcher (1851- 1931), signing his work "Phil. W. Goatcher", was an English-born theatre scene painter who had a considerable career in America and Australia. His American-born son James Goatcher followed in his father's footsteps in Sydney, then both relocated to Perth, Western Australia, where in 1904 they set up "Phil W. Goatcher & Son, Art Decorators and General House Painters". Phil Goatcher's best known artwork is the Goatcher Curtain that hangs in the Boulder Town Hall. (RHP 184).

In 1949, No. 20 was Phil W. Goatcher and Son, painter and sign writer, and the house at No. 20 was occupied by Mrs Elizabeth M. Stone. The Metropolitan Water Supply Survey plan (1953) does not indicate a house at No. 20 but the warehouse / industrial building is shown as No. 18. (This is now No. 16.) The former house has a brick parapet shop front, date unknown. It was "Fay's Place" lunch bar in 1983, according to a photograph held at the State Library of WA (312192PD).
At 2021 No. 16 and No. 20 are under the same ownership and the premises is a café/restaurant/lunch bar.

Physical Description	

The original Parliament House building addresses Harvest Terrace. It comprises two storeys and is clad in Donnybrook sandstone. There is a colonnade with arched openings at ground level. The openings have been enclosed with glass. The roof is terracotta Marseilles profile tiles. The 1958 extension addressed the city and is designed to dominate St George's Tce. The view is interrupted only by the Barracks Arch which was originally intended to be demolished.

HISTORY

Parliament House is located on Lot H55, being Reserve 1162 which was published in the Government Gazette, 23.3.1900. The original area of the Reserve was reduced by the widening of Hay Street in 1924, the widening of Malcolm Street in 1933 and the construction of the Mitchell Freeway in 1965. The first stage of the building was constructed in 1902-4, major additions to the eastern frontage in 1958-64, fountains 1969, office space added to the southern side in 1978, visitors bar added 1980, gymnasium 1988, 2004 northern office extention.
Background:
1863 Site surveyed by Chas Evans.
1863 Construction of Barracks commenced.
1870 Barracks comprised accommodation for 60 families in 120 rooms, military hospital, cooking and ablutions sheds, magazine, workshops, canteen, guards' rooms and cells.
1870 July, Constitutional Government. Constitution provided for a Legislative Council of 18 comprising 3 colonists, 3 officials and 12 elected members. Met in the Perth Town Hall.
1880 Military force disbanded, Barracks taken over by the PWD.

1889 Constitution Act provided for the establishment of a lower house known as the Legislative Assembly, which met in the Town Hall and an upper house known as the Legislative Council which met in the Government offices in St George's Terrace.
1896 October, Minister for Mines announced a Commission to consider a new Parliament House. Barracks site chosen over St George's Terrace.
1901 Federation Competition held to design new Parliament House. There were 17 designs submitted, all proved too expensive and the final design was produced by Chief Architect John Grainger. The original intention was that the Barracks would be demolished as part of the completion of the project.
1902 Contract let 9.5.1902 to builder M. Barry. The cost of the first stage was £35,623.3.1. The foundation stone was laid 31.7.1902.
1904 Parliament House opened 28.7.1904. Grounds were laid out by the Government Gardener, D. Feakes under the direction of Grainger.
1950 PWD prepared plans for the completion of Parliament House, but these did not proceed.
1956 Government agreed to construct substantial additions to Parliament House over the next six years.
1964 Parliament House additions opened 23.3.1964. The additions cost $416,500. The style of the addition was Stripped Classical featuring symmetrical massing without classical motifs, repetition of columns, horizontal skyline, symmetrical facade, central entrance and monumental scale.
1966 (March) All the buildings between Parliament House and St George's Terrace were demolished with the exception of the Barracks Arch.
During the 1890s it was recognised that a dedicated Parliament House was required and that the temporary offices in the Government Buildings and Town Hall were not suitable. The current site of Parliament House was chosen in 1900. The Chief Government Architect was appointed to design the building which was opened in 1904.The building has been changed over time to create more office space and to upgrade facilities.

WESTERN AUSTRALIAN HISTORIC THEME

4. Social and civic activities - 401 Government and politics
5. Outside influences - 504 Depression and boom
6. People - 605 Famous and infamous people

AUSTRALIAN HISTORIC THEME

7. Governing - 7.2 Developing institutions of self-government and democracy
7. Governing - 7.6 Administering Australia

STATEMENT OF SIGNIFICANCE

The place is a symbol of democracy in Western Australia and provides a strong sense of historical continuity in its function. It contributes to the community's sense of identity, providing an important physical and symbolic presence, as the centre of democracy and decision making.
The place is an important and well recognised landmark, situated in a prominent and elevated location overlooking the city of Perth and the Swan River. The imposing 1964 eastern façade, with its carefully considered proportions and decommissioned water feature (1971), is clearly visible from a number of major vantage points and is visually linked with Barracks Arch across the Mitchell Freeway.
The 1904 section of the building, comprising the western wing and the two Chambers, expresses the sense of grandeur and pride associated with the establishment of the place through both the external and internal design, finishes and furnishings and by the use of Western Australian building materials. Designed by the Public Works Department, under the direction of Chief Architect J H Grainger, major aspects of the parliamentary system are embodied in the layout and fabric of the building, with the Chambers providing a publicly accessible symbol of the parliamentary process for the people of Western Australia.
The streetscape qualities of the building, when viewed from both Harvest Terrace and Parliament Place, in association with the landscape treatment to these streets, serve to emphasise the status of Parliament House & Grounds and contribute to the community's sense of place.
The well maintained grounds are regarded as a prestigious and symbolic venue for the conduct of important civic ceremonies, as the primary point of contact between the media and parliamentarians, as well as a gathering point for public rallies.
The incomplete construction of the original 1904 building from what was originally planned left the grand eastern elevation unconstructed until 1964 due to a lack of funds, and illustrates the austerity of the Government whose

concerns over expenditure during the subsequent periods of economic depression and wars, placed the need for housing, hospitals and schools above the completion of Parliament House.
The place forms an integral component of the historic civic precinct, which also includes Hale School (fmr) (now The Constitutional Centre of Western Australia and Hale House), the Old Observatory and Dumas House. Marked to the west by Parliament House & Grounds, the buildings of this precinct are set in open landscaped grounds on the rise of the hill to the west of the complex.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

Builder	J J Talbot Hobbs (reported to be Architect); Major Thomas Sherwood; Mr Barry; Womens Service Guild o
Other Associations	

HISTORY

The two storey home was erected for Major Thomas Sherwood's family called Kalmeta. This house was apparently built by a Mr Barry who had won a contract to build Parliament House. The house is believed to have been designed by Perth Architect JJ Talbot Hobbs who was a close family friend.
Harvest Terrace, on which Harvest House is located forms part of the Parliament House precinct in West Perth. In keeping with the original form of terraces, such as St Georges Terrace and Adelaide Terrace in the city which overlook the Swan River, Harvest Terrace had houses erected only on the more elevated side of the street. These homes commanded panoramic views of the city and the large military complex known as The Pensioner Barracks.

STATEMENT OF SIGNIFICANCE

The place is one of four remaining residential buildings on Harvest Terrace that were of a similar scale and built in the period 1890-1915 and is a tangible reminder of the former residential nature of West Perth.
The place was the headquarters of the Women's Services Guild of Western Australia from the 1956 to 1982, a prominent and active women's organisation concerned with education, health, social justice and equal employment opportunity issues.
Despite external modifications the place demonstrates elements of the Victorian Italianate style in both its proportions and internal detailing.
The place was built as a residence for Major Thomas Sherwood and his family.
Sherwood was a prominent member of Perth's business, religious and sporting society.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

HISTORY

Matthew Blagden Hale, the first Anglican Bishop of Western Australia, founded this school in 1858. In 1872 the Bishop, out of pocket had to close it. The master in charge continued to teach the students which finally became the nucleus of a new school set up by the government in 1874 under the name of Perth High School. The school by 1881 was situated at the western end of St. George's Tce and George Street in the Old Imperial Military Hospital. The arrival of F.C. Faulkner as Headmaster in 1880 and the Gold Boom saw the school grow and by 1914 had outgrown the little George Street School and moved to West Perth, at Havelock Street. After WW2 during the Headmastership of Vernon Murphy (1946- 1960), Leslie Craig, the chairman of the board sold Havelock Street to the government and brought in the Anglican Church to participate in the governance of the school. The school then moved to Wembley Downs in 1961. Then the site was handed back to the Government. It was then amalgamated into the adjacent reserve at the Perth Observatory. The buildings were used by the Education Department and more recently by the State Government.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement & mobility - 104 Land allocation & subdivision
4. Social & civic activities - 402 Education & Science
6. People - 603 Early settlers
6. People - 606 Famous & infamous people

AUSTRALIAN HISTORIC THEME

6. Educating - 6.2 Establishing schools
6. Educating - 6.4 Building a system of higher education

STATEMENT OF SIGNIFICANCE

The place is part of the early development of the 'High School' as part of a non-secular secondary education system in the State.
The buildings demonstrate the teaching environs and accommodation of student boarders operating in the early 20th century and although originally a part of the State Government education system the place became the foundation of the private school system in Western Australia.
The School Buildings designed by the Public Works Department in 1913/1914 and the subsequent Memorial Wing are fine examples of the Federation Gothic style.
The association with key architects Hillson Beasley and Herbert Parry make it synonymous with the development of architecture in Western Australia in the early 20th century.
The style of the buildings is relatively unique in Perth, comparing with only two other buildings, Perth Modern School and The Perth Technical School, designed by the Public Works Department at about the same period.
The place has a significant value through its association with Bishop Hale who developed the philosophy of the High School which subsequently led to the formation of the Public Schools Association.
The place is also associated with some of Perth's leading figures of the day; including, Winthrop Hackett, Dr J.S. Battye and Percy Oliver.
The Boarding House building, designed by Herbert Parry, is a notable example of the 1920s Inter War Romanesque style, with references to the Californian Bungalow style, and displays economical yet impressive design.
The place has high townscape values because of the buildings' form and location. This is emphasised by the nature of the openness of the site in relation to the density of the surrounding locality of West Perth.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place is part of the early development of the 'High School' as part of a non-secular secondary education system in the State. The buildings demonstrate the teaching environs and accommodation of student boarders operating in the early 20th century and although originally a part of the State Government education system the place became the foundation of the private school system in Western Australia.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The style of the buildings is relatively unique in Perth, comparing with only two other buildings, Perth Modern School and The Perth Technical School, designed by the Public Works Department at about the same period.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The School Buildings designed by the Public Works Department in 1913/1914 and the subsequent Memorial Wing are fine examples of the Federation Gothic style.
The Boarding House building, designed by Herbert Parry, is a notable example of the 1920s Inter War Romanesque style, with references to the Californian Bungalow style, and displays economical yet impressive design.
The place has high townscape values because of the buildings' form and location. This is emphasised by the nature of the openness of the site in relation to the density of the surrounding locality of West Perth.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The association with key architects Hillson Beasley and Herbert Parry make it synonymous with the development of architecture in Western Australia in the early 20th century.
The place has a significant value through its association with Bishop Hale who developed the philosophy of the High School which subsequently led to the formation of the Public Schools Association.
The place is also associated with some of Perth's leading figures of the day; including, Winthrop Hackett, Dr J.S. Battye and Percy Oliver.

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Good
Building Fabric Authenticity	Medium level of authenticity as there is evidence of restoration.

CLASSIFICATION OF SIGNIFICANCE

Exceptional – Category 1 - Essential to the heritage of the locality. Rare or outstanding example.

Physical Description	

A thirteen storey free-standing curtain wall building. Reinforced concrete floors project beyond the window wall as horizontal hoods. Exposed black granite faced columns penetrate these hoods. Building complemented by open landscaped areas.

Walls 1 Material	Glass
Walls 2 Material	
Roof Material	Metal
Architect	Civil & Civic Pty Ltd; Finn, Van Mens & Maidment
Builder	Civil & Civic Pty Ltd; Finn, Van Mens & Maidment
Other Associations	

HISTORY

The design of this building was the winner of the Australia - wide" Public Offices Building Competition" in 1961. Five buildings were originally designed to create a government complex but only one constructed. At the time of construction Dumas House was seen as a symbol of the growth and prosperity of Western Australia. Planning of the site rose out of the 1955 Stephenson Hepburn Report and the place was the first of five multi storied buildings planned for the site. The remaining four were not built as Parliamentarians felt the other buildings would appear to dominate the landscape and traffic around the site was a problem. In 1978 Dumas House was named after Sir Russell Dumas, who was Director of Works and Buildings, Public Works Department from 1941 to 1953.The building has been the location for numerous State government departments and ministerial offices form the 1960's to the present.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement and mobility - 112 Technology and technological change
4. Social and civic activities - 401 Government and politics
6. People - 605 Famous and infamous people

AUSTRALIAN HISTORIC THEME

4. Building Settlements, Town and Cities - 4.1.4 Creating capital cities
4. Building Settlements, Town and Cities - 4.1.3 Learning to live with property booms and busts
7. Governing - 7.6 Administering Australia

STATEMENT OF SIGNIFICANCE

The place has aesthetic significance as an example of the Post-War International style of architecture detailing from the 1960's.
The place has considerable landmark value and contributes to the Perth community's sense of place.
The tall building is located on a prominent, elevated site, is clearly visible from many points around the city and wider metropolitan area.
Its location at the western edge of the urban skyline enhances the landmark value of the place.
Significant as a rare example of the Post-War International style.
Social Significance for associations with the public service of the WA State Government.
The place was designed by architects Finn, Van Mens and Maidment who won a national competition for the development of the site, having already established a body of work as project architects of the Public Works Department of Western Australia.
The place has been associated with the State Government of Western Australia since its construction in 1966, providing office accommodation for Government departments and Ministers

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

Significant as a rare example of the Post-War International style.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

Social Significance for associations with the public service of the WA State Government.

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place has aesthetic significance as an example of the Post-War International style of architecture detailing from the 1960's.

The place has considerable landmark value and contributes to the Perth community's sense of place.
The tall building is located on a prominent, elevated site, is clearly visible from many points around the city and wider metropolitan area.
Its location at the western edge of the urban skyline enhances the landmark value of the place.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The place was designed by architects Finn, Van Mens and Maidment who won a national competition for the development of the site, having already established a body of work as project architects of the Public Works Department of Western Australia.
The place has been associated with the State Government of Western Australia since its construction in 1966, providing office accommodation for Government departments and Ministers.

Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

Two storey pointed brick and tile building with high brick tower located on the south side and timber verandahs to the south and east sides.
The building was originally designed to serve as an office and residence for the Government Astronomer.
Two entries serve the building one directly under the tower on the south side and the other from the verandah on the east side.
The Oriel room is roofed with a lead lined cupola. The main roof is now roofed with clay Marseille pattern roof tiles. The first floor level fascia of the two storey verandah is lined with timber shingles.

Walls 1 Material	Brick - Pointed
Walls 2 Material	Stone
Roof Material	Tile - Terracotta
Architect	George Temple - Poole
Builder	
Other Associations	

HISTORY

In 1895 Premier John Forrest invited the Government Astronomer from South Australia to advise on a site for an observatory in Perth. The site at Mount Eliza was chosen due to the distance from the city. The building was designed by George Temple Poole which was completed in 1896. The building was used as the office and house for the Government Astronomer. The stars were mapped and accurate positions were recorded to determine the accurate latitude and longitude which helped to calculate the accurate time. The Observatory kept accurate time, with a cannon set up on the site to fire at 1pm every day between 1901 and 1902 and provided this for the ships in Fremantle, public clocks, railway and telegraph. Weather forecasts were also produced from the observatory.
Due to the Stephenson-Hepburn Report which recommended the site as a Government offices complex, the Government Astronomer Hyman Spigl looked for a new site in the early 1960s. A site in Bickley was chosen and land was cleared in 1964. The observatory opened in 1966.
Building is currently used as headquarters for the National Trust of Australia (WA).

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status associated with addresses in Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and priced accordingly. Less prestigious areas also developed in lower parts of the area and adjacent to the railway. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway. Since the 1960s, office blocks have been replacing earlier houses in the area. A three storey office building replaced an earlier house on this location, c. 1970. It had textured concrete walls with few openings. The entrance to the street originally has a cantilevered hood which was brightly coloured. The building has since been refurbished and has a glazed front.

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status associated with addresses in Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and priced accordingly. Less prestigious areas also developed in lower parts of the area and adjacent to the railway. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working-class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway. A house was built in 1910 originally No. 23 and the first occupant was Frederick Mosey. In 1911 the number changed to No. 27, still occupied by Mosey. The Metropolitan Water Supply Survey plan dated 1954 shows the house on a double sized lot. The Post Office Directory lists several tenants over the years.
Between 1995 and 2000 the lot was completed redeveloped around the 1910 house, and the place became Perth Clinic, a private mental health facility, with a street address of 29 Havelock Street. In 2003, two houses on Emerald Street were demolished and this area also redeveloped to become part of Perth Clinic.

8. Developing (Perth) Australia's Cultural Life - 8.10.5 Advancing knowledge in science and technology

STATEMENT OF SIGNIFICANCE

The place has historical and aesthetic significance as a grand, Federation Queen Anne residential building dating from 1910.
The place is of historic significance because it reflects the way of life of the wealthier residents of Perth in the late nineteenth century and early twentieth century.
The place has social significance as Perth Clinic, representing the changing perceptions and approach to the treatment of mental health since the 1990s.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place has historical significance as a grand, Federation Queen Anne residential building dating from 1910.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

The place is of historic significance because it reflects the way of life of the wealthier residents of Perth in the late nineteenth century and early twentieth century.

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place has aesthetic significance as a grand, Federation Queen Anne residential building dating from 1910.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The place has social significance as Perth Clinic, representing the changing perceptions and approach to the treatment of mental health since the 1990s.

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Very Good
Building Fabric Authenticity	High. Has been restored and extended.

CLASSIFICATION OF SIGNIFICANCE

Considerable – Category 2 - Very important to the heritage of the locality.

HISTORY

West Perth developed as suburban residential area in the late 1890s. From its inception it had the characteristics of a quality neighbourhood. Proximity to the city centre and Kings Park (then known as Perth Park), and the elevated location provided healthy site drainage as well as cooling breezes and views over the city and hills. The area had social status associated with addresses in Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and priced accordingly. Less prestigious areas also developed in lower parts of the area and adjacent to the railway. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway. A grand two storey residence was built at 45 Havelock Street in c. 1898, in the Federation Filigree style. Its original number was 69. The original occupant was Frederick Mosey.
A photograph take in 1983 (State Library 312166PD) shows the iron Filigree detail to the verandah balustrades and frieze. This has since been replaced with simple timber posts. The side elevations were originally face brick. At 2021 the house is a skin care clinic.

The area had social status associated with addresses in Mount Street and access to the city's piped water system.
The area was subdivided into large residential lots for development and priced accordingly. Less prestigious areas also developed in lower parts of the area and adjacent to the railway. The homes built in West Perth from the early 1900s included prestigious mansions built in prominent locations and smaller working-class cottages in the narrower back streets and towards the northern end of the area adjacent to the railway. 60 Havelock Street was built c. 1898, a two-storey residence at a prestigious address. Henry Sadler, plumber was the first occupant and lived there until c. 1920. After this the place was operated as a boarding house (1925) and apartments (1930), before becoming a single residence again (1949).

Adjacent No 58 was demolished in 1980 and is now a car park. The rear of the building has an addition (No. 60A). At 2021, 60 Havelock Street has been converted to offices. Inside it retains many original features such as fireplaces, staircase, cornices and skirtings, timber framed windows, and timber floors.

Queen's Gardens as a whole are of exceptional significance, exhibiting aesthetic, historic, social and scientific values. They are rare in Perth as an example of an enclosed public garden in a Paradise/Oasis style in good condition, retaining its original site and principle landscape elements. Queen's Gardens have, since their inception, been highly valued by the community as a place of aesthetic delight and tranquillity and as a preferred venue for important public and private occasions. Queen's Gardens are a landmark within the Perth city and have contributed a sense of place to its citizens and visitors from 1898 to the present.

Builder	
Other Associations	James Brittain, operator of Clayfields Brickworks; Sir George Frampton

HISTORY

Queen's Gardens are situated on a low lying site near the Swan River. The site was used by colonists for duck hunting and horse racing before the discovery of clay suitable for brick making in the mid 1800's. The site was mined for clay and used for production of bricks which went into serval prominent buildings, until c1890 when brick extractions become difficult. At this time the place was known as the Brickfields Reserve.
The abandoned clay pits and brick kilns attracted diverse attention. The City of Perth began filling the pits and fencing the site but by 1894 a grander vision to develop the site into public gardens had evolved. Under the direction of Sydney Landscaper Mr. A. W. Farris who was engaged by the City of Perth for the purposes and the City's head gardener, John Braithwaite, the pits were transformed into ponds. Rustic timber bridges and

limestone grottoes were built and the ground turfed and planted with trees. The place was renamed firstly as East Perth Park and then at the official opening in October 1899, as Queen's Gardens in honour of Queen Victoria.
The Gardens become popular immediately as a venue for picnics, band concerts and garden parties. With their inward focus on the chain of ponds, verdant planting providing a contrast to and respite from what was perceived to be hard, arid surrounding environment, Queen's Gardens successfully embodied the objectives of the Paradise/Oasis landscape style.
The caretaker cottage was constructed in 1906. In 1929 the Rotary Club of Perth presented the statue of Peter Pan as a gift to the children of Western Australia to mark the States centenary. The statue which is one of reportedly five autographed replicas of the original by Sir George Frampton in London's Kensington Gardens, was transferred to its present position in 1933. The Statue has become a widely known and well-loved feature of the Gardens.
The Gardens became a popular tourist spot for local, interstate and international visitors, as well as providing a passive recreational space for the nearby residents and workers in the offices which developed around the site. Queen's Gardens became popular setting for wedding photographs after the Second World War and more recently as a venue for weddings and other ceremonies.

WESTERN AUSTRALIAN HISTORIC THEME

1. Demographic settlement and mobility - 110 Resource exploitation and depletion
3. Occupations - 303 Mining (including mineral processing)
4. Social and civic activities - 405 Sport, recreation and entertainment

AUSTRALIAN HISTORIC THEME

3. Developing Local, Regional and National Economies - 3.3.3 Mining
3. Developing Local, Regional and National Economies - 3.11 Altering the environment
8. Developing Australia's Cultural Life - 8.1.3 Developing public parks and gardens

STATEMENT OF SIGNIFICANCE

The place is an important and representative example of a public park in the Picturesque landscape style with Paradise/Oasis style design and planting elements.
The place is important in the history of the City of Perth because of its early association with the manufacture of bricks in the mid to late 1800s which were used in several prominent buildings, and for its subsequent role in the provision of public parklands in the late nineteenth century.
The Caretaker's Cottage, which forms an integral part of the Gardens, has been occupied by garden caretakers with few interruptions since 1906 and has social significance.
The place is important for its scientific value, arising from its earlier use as a brickworks and for the variety of plants it contains.
The place is a landmark within the City of Perth and have contributed a sense of place to its citizens and visitors from 1898 to the present.
The place has been highly valued by the community as a place of aesthetic delight and tranquillity, and as a preferred venue for important public and private occasions.
The place is rare in Perth as an example, in good condition, of an enclosed public garden in a Paradise/Oasis style retaining its original site and principle landscape elements.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place is important in the history of the City of Perth because of its early association with the manufacture of bricks in the mid to late 1800s which were used in several prominent buildings, and for its subsequent role in the provision of public parklands in the late nineteenth century.

Bronze Sculpture of Peter Pan. A replica of the original Kensington Gardens London by Sir George Frampton RAFSA.

Walls 1 Material	
Walls 2 Material	
Roof Material	
Architect	
Builder	
Other Associations	

HISTORY

In 1929, The Perth Rotary Club presented the Perth City Council with a replica of the famous stature of Peter Pan in Kensington Gardens London. The reproduction produced by the sculpture of the original stature, Sire George Frampton and autographed by the creator of Peter Pan author Sir J Barrie was a gift to the children of Western Australia to mark the centenary of the State. It is reputed to be the only one of five reproductions in the World.
There was considerable controversy surrounding the appropriate location for the statue, some Rotarians favouring Kings Park as the preferred location. Concerns over safety led to the choice of Queen's Gardens. To comply with the donors wish that the statue to be placed in a similar surrounding to the original, changes were made to the layout of the gardens. This included the removal of one of the original grottoes and regarding to create a level space for the statue. In 1933 a special ceremony was held to mark the relocation of Peter Pan to its new position.

HISTORY

Until the 1880s the Perth town centre was characterised by the establishment of small cottages, shops and small businesses and was rural in character. The expansion of commerce following the discovery of gold in the 1890s put pressure on land in the centre of Perth with the result that most residential uses were displaced in favour of commercial development. During the 1890s and early 1900s the centre of Perth was substantially rebuilt. The period of expansion in Perth coincided with a period of economic depression in the eastern states, in particular Victoria. As a result, there was substantial migration from Victoria to WA. This migration included businessmen, architects and builders, all of whom had a considerable influence on the development of the city. Hay Street was established, along with St. Georges Terrace and Murray Street, as one of the main streets of Perth from the time of colonisation in 1829. It remained a major commercial street throughout the twentieth century and for most of that time was characterised by traffic, including trams. The character of the street changed after the section between William and Barrack Streets became a mall in the 1970s. Post Office directories show there was housing in the eastern section of Hay Street in the early 1900s, but in the Inter-War period this area had become individual shops. In 1927 Westralian Hotels Limited built the Carlton Hotel in Hay Street. The design was by Eales and Cohen architects. A parapet and similar shaped pediments in the same Anglo-Dutch style as the Carlton Hotel along the adjacent shopfronts acts as a unifying feature to create 'The Carlton Centre'. More research is required to determine if this was done as part of the 1928 Carlton Hotel project or was a later development.

Aerial photos show that originally the rear of Lot 1 had a house, facing Bennett Street. At the rear of Lot 2 there was a large building (not a house). Both buildings were demolished between 1995 and 2000 and this area is now carparking.
In 2022 The Carlton Centre comprises of various shops.

PHYSICAL DESCRIPTION

Architectural Style 1 General	Inter-War (c.1915-c.1940)
Architectural Style 1 Specific	Mediterranean
Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

The building is a two-storey brick and tile structure which is rendered and painted and has Marseilles profile roof tiles. The building features Dutch gables. Entrance to the ground floor area is through an arched loggia with terrazzo floor, typical of Inter-War Mediterranean style architecture. Original windows small paned casement windows remain on the front and side elevations however some original windows at ground floor level have been replaced. Internally the original jarrah staircase remains intact. The detailing is simple and stylised, typical of the style of architecture and the era. The building is similar in detail to the adjacent group of shops known as the Carlton Centre. This building has a matching pediment.

HISTORY

In the 1920s the Licences Reduction Board was formed under the Licensing Act Amendment Act 1922 which aimed to upgrade hotels to current standards and to separate the bar from accommodation facilities. The hotel was built in 1927 on vacant land, however the company who owned it had previously established a hotel which had been called the Carlton Hotel in 1918, after previous name changes, on another site.
The building was designed in a horseshoe shape and had garages to accommodate people who were travelling by car. Early advertisements note weekly board at 30 shillings per week and the presence of garages. This suggests the place was probably popular with commercial travellers or with people travelling from the country and requiring parking facilities which were not usually provided at this period. The hotel was the first to provide garages for vehicles.
Over time the building has had renovations to reflect the changing needs of the hotel. In 1964 the adjacent lot was purchased and a drive in bottle shop was built in the same style as the hotel.

STATEMENT OF SIGNIFICANCE

The place features an eclectic and unique blend of Inter-War architectural styles, displaying motifs and influences from Art Deco, Anglo-Dutch, Spanish Mission and Mediterranean architectural styles.
The place is significant as a relatively modest residential hotel in the City of Perth in the Inter War period.
The place contributes to the community's sense of place being a striking part of the streetscape.
The place reflects the building boom of the 1920's a response to the influx of post-war immigration and capital from agricultural expansion.
The place is significant for its close association with the prominent architectural firm, Eales and Cohen.
The place, it is believed, was the first hotel constructed in Perth that had garages, thereby recognising the early demand for car parking as a result of changes in the predominant mode of transport.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place reflects the building boom of the 1920's a response to the influx of post-war immigration and capital from agricultural expansion.
The place, it is believed, was the first hotel constructed in Perth that had garages, thereby recognising the early demand for car parking as a result of changes in the predominant mode of transport.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The place is significant as a relatively modest residential hotel in the City of Perth in the Inter War period.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place features an eclectic and unique blend of Inter-War architectural styles, displaying motifs and influences from Art Deco, Anglo-Dutch, Spanish Mission and Mediterranean architectural styles.
The place contributes to the community's sense of place being a striking part of the streetscape.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The place is significant for its close association with the prominent architectural firm, Eales and Cohen.

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Poor
Building Fabric Authenticity	Medium level of authenticity with some alterations at ground floor level including new windows.

PHYSICAL DESCRIPTION

Architectural Style 1 General	Federation (c.1890-c.1915)
Architectural Style 1 Specific	Queen Anne
Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

The site is sloped from south to north and consists of the 1894 two storey terrace with a later addition at the rear, a swimming pool and a two storey accommodation unit built in the 1990s. The remainder of the site is paved and provides localities for the guests to congregate. A grape vine and some more recent planting are evident adjacent to the pool. There is a small service area for a washing line. This report will only describe in detail the 1894 building. This building is constructed of brick with a zincalume roof and demonstrates elements of the Federation Queen Anne style. The roof is hipped and small half-timbered gables are present on each side of the dividing wall. Four chimneys are evident and each has stepped brick corbelling and pots. The front property boundary is marked with a wall of brick and metal railing approx 1800mm high. Enclosed by this wall is an area of brick paving with a strip of planting facing Hay Street.

A small alcove provides an entry to the two original front doors. A double brick wall which formerly divided the two front yards has been modified by the creation of an opening in the wall to link the two sides of the front yard. The Hay Street façade has a timber balcony on the first floor which forms a verandah for the ground floor. The timber balcony is supported on brick piers of recent construction and the metal balustrades are not original. Evidence of the original timber construction can be seen in the decorative verandah posts on the first-floor level. The underside of the verandah is clad in mini orb corrugated cladding and the ceiling of the balcony is timber panelled. The ground floor external doors are original four panel doors with fan lights and the security glass in the top two panels is later addition.

The windows are full length sash on the ground and first floors although the upper windows have been modified. The external finish of the building is painted brick but was originally tuckpointed and bands of cement render are visible under the paint. Cement moulding is present around the heads of the ground floor windows and the entry alcoves although it has not been established if this is original.

The east and west facades of the building are painted brick with no windows and for the full height of the building the chimneys project beyond the wall surface. Internally the building was two separate residences and had a symmetrical design with the two halves separated by a brick dividing wall, the two halves mirror each other around this central axis. The dividing wall has been removed in strategic sections of the interior to enable the two sides of the building to be accessed. The original layout of the building can still be determined from the remaining fabric.

The internal layout of the 1894 building consists of a foyer, office and bedrooms on the ground floor and bedrooms and bathroom on the first floor. Two carpeted timber staircases are present on either side of the dividing wall which lead to a landing and two rooms and another small staircase leading to the rooms fronting the balcony. These staircases are original with decorative timber balustrades partially painted. An archway with decorative moulding is present at the commencement of the stairs.

All the rooms are typically painted render with architraves, skirtings and picture rails that have a range of styles but most appear to date from the original construction. The bathrooms have more recent fittings and fixtures. The timber floors in the 1894 section of the building are carpeted.
The ground floor has two ramps leading to a large common room which stretches across the full width of the building. This ramp was formerly a short flight of stairs as indicated by the remaining stringers on the walls. This room has a later ceiling and cement floors but is likely to have been the location of the former kitchens, scullery and bathrooms.
Beyond this room is a later addition consisting of an industrial kitchen and eating area. This room has glass sliding doors which lead to a covered outdoor area, the pool and the remainder of the accommodation units.

HISTORY

This two-storey terrace of two former residences was built in 1908. The first occupants were Mr Paul Smith (266) and Mrs Annie Taylor (268). Information from the City of Perth Rates books record the owner as John Talbot Hobbs. This was presumably the prestigious architect, Joseph John Talbot Hobbs who was an influential architect in Western Australia. As the owner of this property it is likely that Talbot Hobbs or a member of his design office designed this building.
The homes built in Perth in the 1900s were generally larger and more elaborately detailed than the homes built before the influx of money and people in the late 1890s, which followed the gold discoveries in the colony. The eastern area of the city of Perth was a prestigious residential area close to the centre of the town. The Post Office directories for this period record that this area of Hay Street was primarily residential with a scattered mix of retail and service industries. The Perth Mint did occupy the western end of the block. During the first half of the 20th century the terraces had many occupants recorded suggesting the place was rented accommodation. In 1949, the occupant of 266 was Mrs G. Tune and Mrs Ada J Harrison was the occupant of 268. It is noticeable that many adjacent properties were apartments suggesting that many larger homes had been subdivided into flats. The area is also characterised by many small businesses in adjacent properties demonstrating the changing nature of this area of central Perth from prestigious residential area to a mixed use area for middle income earners.
It has not been established when the place was converted to hostel use. Physical evidence suggests that the block of units in the rear of the lot were built in the 1990s but the existing building may have been used as a hostel prior to that. It is possible that the remaining alterations and additions were undertaken at this time. These would have included the new kitchen and eating area, the removal of the dividing wall in sections and the new ceiling in the common room.

Heritage Place Record Form

For Adoption

STATEMENT OF SIGNIFICANCE

The place is a good and uncommon example of a two-storey residence built in this area in the early 20th century.
The remaining finishes used externally and internally demonstrate the growing affluence of the Perth community at this time and the form illustrates the way of life of the occupants.
The place contributes to the streetscape as its form and scale is representative of the type of building constructed in this area in the early 20th century.
Its continued use as a type of residence contributes to the community's sense of place.
The place was designed and owned by prominent architect Joseph John Talbot Hobbs.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place is a good and uncommon example of a two-storey residence built in this area in the early 20th century.
The remaining finishes used externally and internally demonstrate the growing affluence of the Perth community at this time and the form illustrates the way of life of the occupants.

HISTORY

Until the 1880s the Perth town centre was characterised by the establishment of small cottages, shops and small businesses and was rural in character. The expansion of commerce following the discovery of gold in the 1890s put pressure on land in the centre of Perth with the result that most residential uses were displaced in favour of commercial development. During the 1890s and early 1900s the centre of Perth was substantially rebuilt. The period of expansion in Perth coincided with a period of economic depression in the eastern states, in particular Victoria. As a result, there was substantial migration from Victoria to WA. This migration included businessmen, architects and builders, all of whom had a considerable influence on the development of the city. Hay Street was established, along with St. Georges Terrace and Murray Street, as one of the main streets of Perth from the time of colonisation in 1829. It remained a major commercial street throughout the twentieth century and for most of that time was characterised by traffic, including trams. The character of the street changed after the section between William and Barrack Streets became a mall in the 1970s. Post Office directories show that the house was first listed in 1909 and occupied by Henry Casper.
The Metropolitan Water Supply Survey plan (no date) shows a brick house at this location had a projecting bay on the east side and a half-length front verandah. There is a right of way on the east side and rear lane access. Aerial photos show that between 1953 and 1961 a shopfront was added to the front of the house. The rear yard and garden was cleared and the space used for carparking by 1965.

At 2022 the former house is a restaurant. A review online (Trip Advisor) states that inside it is a 'Big barn of a place' which implies the original floor plan of the house have been lost. Some photos from the same site show that the restaurant is one large open space.

HISTORY

Until the 1880s the Perth town centre was characterised by the establishment of small cottages, shops and small businesses and was rural in character. The expansion of commerce following the discovery of gold in the 1890s put pressure on land in the centre of Perth with the result that most residential uses were displaced in favour of commercial development. During the 1890s and early 1900s the centre of Perth was substantially rebuilt. The period of expansion in Perth coincided with a period of economic depression in the eastern states, in particular Victoria. As a result, there was substantial migration from Victoria to WA. This migration included businessmen, architects and builders, all of whom had a considerable influence on the development of the city. Hay Street was established, along with St. Georges Terrace and Murray Street, as one of the main streets of Perth from the time of colonisation in 1829. It remained a major commercial street throughout the twentieth century and for most of that time was characterised by traffic, including trams. The character of the street changed after the section between William and Barrack Streets became a mall in the 1970s. Post Office directories show that the house was most likely built by 1897, occupied by William J. Letcher, when this part of Hay was called Howick Street. Letcher was listed as living at No. 154 in 1898. The number changed to No. 288 in 1908. From 1900 the house was occupied by the government geologist, Andres Gibb Maitland (known as Gibb). He had come to WA in 1897 to take up the role.
The Metropolitan Water Supply Survey plan (1953) shows a long house with a verandah that wraps around both sides. Aerial photos show that between 1974 and 1979, a large shopfront was added at the front of the house, with no setback from the footpath.

From the street the house cannot be seen; only the glazed shopfront with a parapet.
At 2022 the former house and shopfront is a legal office.

HISTORY

Until the 1880s the Perth town centre was characterised by the establishment of small cottages, shops and small businesses and was rural in character. The expansion of commerce following the discovery of gold in the 1890s put pressure on land in the centre of Perth with the result that most residential uses were displaced in favour of commercial development. During the 1890s and early 1900s the centre of Perth was substantially rebuilt. The period of expansion in Perth coincided with a period of economic depression in the eastern states, in particular Victoria. As a result, there was substantial migration from Victoria to WA. This migration included businessmen, architects and builders, all of whom had a considerable influence on the development of the city. Hay Street was established, along with St. Georges Terrace and Murray Street, as one of the main streets of Perth from the time of colonisation in 1829. It remained a major commercial street throughout the twentieth century and for most of that time was characterised by traffic, including trams. The character of the street changed after the section between William and Barrack Streets became a mall in the 1970s. Post Office directories show that the house was most likely built by 1899. It may have originally been a semi-detached pair. The number changed to No. 288 in 1908.Aerial photos show that between 1953 and 1965, a large two storey shopfront was added at the front, with no setback from the footpath. From the street the house cannot be seen. At 2022 the former residence and shopfront is leased as two separate tenancies.

HISTORY

The house was designed by Joseph John Talbot Hobbs for J C Hills in 1895. At that time East Perth was the location of many wealthy landowners' houses. Hills arrived in Perth from England in 1886 and worked as secretary for HJ Saunders which promoted the first gold mining companies in Kalgoorlie and Coolgardie. In 1920 the ownership changed to F D Good and was occupied by Alfred Freedman and his family during this time. The house was used as a residence until 1946. It was later used as offices. As Perth changed in the twentieth century many residents moved to other areas and many houses were used as boarding houses. The character of the area changed as these properties were later developed and demolished for commercial or retail buildings. In 1992 the building was adapted to accommodate the offices of the Heritage Council of Western Australia.

HISTORY

The Perth Mint was opened in 1899 as a branch of the Royal Mint, London, to refine the gold produced from the WA goldrush (1890-1910) and to mint gold coinage. The Perth Mint was the third branch of the Royal Mint to open in Australia in 1899, after Sydney and Melbourne respectively. The gold discoveries in the 1880s and 1890s led to a need for a mint in Perth so miners could get the correct value of the gold. The Premier Sir John Forrest wrote to the Agent General of the Colony so he could find out from the Colonial Office in London if a mint

could be established in Perth. Approval was granted in 1894 and it was proclaimed as a branch of the Royal Mint in 1897. The building was designed by George Temple Poole and was one of his last designs for the Public Works Department. It was built by Atkins and Law in 1896-98 for 22,199 pounds. The foundation stone was laid by Sir John Forrest on 23 September 1896. The buildings consisted of residences for senior officers, office to receive gold, melting house and processing equipment, coining department and assay office where the value was determined. The mint operated continuously for over ninety years and in that time almost all of the gold produced in WA passed through its furnaces.
In 1989, a new refinery was established at Newburn, until that point operations at the refinery continued basically unchanged since the mint was founded. Coining machinery was principally hand operated and much of the plant and the craftsman's tools were close to original. The original refinery melt house is still intact. The Perth Mint's refinery is accredited by the London Bullion Market Association, the Tokyo Commodities Exchange and the Comex Division of the New York Mercantile Exchange. The identifying 'P' mint mark is unique to The Perth Mint and has been in use since 1899 in its coinage. The Perth Mint is the oldest ex branch of the Royal Mint operating and one of the oldest Mints operating on its original site.

STATEMENT OF SIGNIFICANCE

The place has historic significance as part of the development of Perth and Western Australia and the state's first gold boom, as well as the gold industry for the last hundred years.
The place has exceptional rarity value as it is the most intact and longest lasting of the three nineteenth century Royal Mints established in Australia and the only one to continue in its original use.
It contains substantial evidence of the physical apparatus of an Imperial British branch of the Royal Mint from the period of self-government and Federation.
It has remained in use as a mint from its establishment in 1899 to the present day and is now the oldest branch of the Royal Mint operating in its original premises.
The place was designed by George Temple Poole, Chief Architect of the Public Works Department was his last design in that role.
The place has many associations with significant people in WA Government and the Royal Mint.
The place has aesthetic significance and contributes to the streetscape.

HISTORY

Hotel dating from the period of commercial expansion in Perth following the gold rush of the 1890's. At this period a large number of hotels or 'pubs' were built in Perth, on the outskirts of the city and in country towns. They provided accommodation and refreshment to travellers and the increasing number of immigrants arriving in the state, including the large proportion of working men from Victoria. Typically, the hotel was constructed on a corner with the entrance to the public bar addressing the corner and the entrance for residents on one of the streets. There was often a tower or other feature on the corner and a verandah with elaborate cast iron decoration along the street facades. (Extracted from M. Pitt Morrison and J. White in C.T. Stannage, A New History of Western Australia; U.W.A. 1981) The Grosvenor Hotel exhibits three phases of development. The first (circa 1887) using colonial style with iron lace decoration to verandah posts and balustrades; the second in Federal Gothic style with battlement parapet and pointed arches to window openings. The third stage of development circa 1970 is not significant.
The Grosvenor Hotel has operated on the property since 1886. A two-storey building was designed by architect Francis Bird in 1885/1886 and forms the original part of the hotel. Two new wings to the building were constructed in 1887 and 1898 respectively. In 1888 the hotel was advertised as being located in the most desirable and healthy part of Perth and within easy distance to the Town Hall and was an alternative to the hotels located close to the train line. The hotel had many owners including Mayor of City of Perth Stephen Henry

Parker. Viola Pittman and her family owned the hotel for 40 years from 1923. During the 1950s it was associated with the Perth Football Club which was based at the WA Cricket Ground (WACA) when team members and associates met for drinks and gatherings. Internal renovations have occurred over time which reflected the changes how people used the hotel. For example the need for accommodation decreased as the demand for bigger function spaces increased in the late twentieth century.

WESTERN AUSTRALIAN HISTORIC THEME

3. Occupations - 311 Hospitality industry and tourism
4. Social and civic activities - 405 Sport, recreation and entertainment

AUSTRALIAN HISTORIC THEME

3. Developing Local, Regional and National Economies - 3.12.5 Retailing foods and beverages
8. Developing Australia's Cultural Life - 8.4 Eating and drinking

STATEMENT OF SIGNIFICANCE

The place is one of only three hotels from the 1880s still extant in central Perth, that is the Grosvenor Hotel, the William Street wing of the Royal Hotel and the Globe Hotel in Wellington Street.
The place is rare in metropolitan Perth for its combination of architectural styles, which are Victorian Regency and Victorian Gothic Revival.
The place is significant for its contribution to the streetscape.
The grouping of the Grosvenor Hotel, the Perth Mint, buildings from Mercedes Girls School and the inter war shops on the opposite corner make a positive contribution to the streetscape.
The place represents the principle characteristics of a hotel from the late 19th and early 20th century although the interior layout has been substantially altered from its original form the basic structure of the building can be understood from the remaining fabric.
The place is an uncommon example of a hotel in Perth which performs the same basic functions at the same site for over 120 years.
The place is valued for its association with the hospitality industry since 1886.
The place has been used as a hotel for accommodation and later as a public house and restaurant.
Its evolution of usage represents the changing patterns of use associated with licensed premises in the City of Perth and the state.

HISTORY

The first stage of the building was probably erected around 1900. The City of Perth's heritage files record the original use of the building being a church hall. In the 1950's a programme to screen the entire population of Perth for tuberculosis was undertaken. It is possible that the building was acquired by the Royal Perth Hospital at this time.

STATEMENT OF SIGNIFICANCE

The place is associated with the Public Health Department's successful response to tuberculosis, which was a major cause of mortality across Australia in the 19th century and the first half of the 20th century.
The place is associated with Dr Linley Henzell, who reorganised the way tuberculosis was diagnosed and treated in Western Australia, and Olive Anstey, who initiated, encouraged and supported many innovative programs in various areas of nursing practice, education and administration in Western Australia.
The place is rare as the only dedicated chest clinic in the State.
The place is associated with the development of institutions to serve the Irish community of Western Australia and later the Roman Catholic community, as it served as Cathedral Hall for St. Mary's Cathedral.
The place, in the Federation Free Classical Style, is a fine and intact example of its style and of the community hall building type.
The place, designed by prominent Western Australian architects Cavanagh & Cavanagh, is rare as an intact Hibernian Hall from the early 20th century.
The place makes a strong visual contribution to the Murray Street East Precinct while the Post World War II International Style building demonstrates the further development of the precinct and makes a small contribution to it.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The place is rare as the only dedicated chest clinic in the State.

HISTORY

St. George's Hall was built in 1879 by the legal firm of Stone & Burt and was the first real theatre in Perth. In the 1880's it was well used by visiting and local performers but was very much an institution for the 'respectable classes'. The building was constructed of brick with all the double storey facade designed by Henry G. Prinsep (an early settler) based on the Lyceum Theatre in London and designed to resemble a Greek temple with columns and steps leading up from Hay Street. As other theatres were built, the St Georges hall was too small to function as a theatre and fell into disuse. The building was later used by various government departments including tramways, lithographic, Medical and Child Welfare Departments. The Building was demolished in 1986. The facade remains intact with an area behind the facade being landscaped with a circular alfresco dining area being established.

WESTERN AUSTRALIAN HISTORIC THEME

4. Social and civic activities - 405 Sport, recreation and entertainment

Heritage Place Record Form

For Adoption

AUSTRALIAN HISTORIC THEME

3. Developing Local, Regional and National Economies - 3.21 Entertaining for profit
8. Developing Australia's Cultural Life - 8.1 Organising recreation

STATEMENT OF SIGNIFICANCE

The place was the first purpose-built hall for public entertainment in Perth until the construction of more elaborate venues in the 1890s following Western Australia's Gold Boom.
The Victorian Academic Classical architectural style of the portico is relatively rare in Western Australia.
The place is of aesthetic significance because it is a recognised landmark in the City of Perth.
The construction of the place symbolises the evolution of Perth and Western Australia from a struggling colonial outpost with limited economic resources and population, into one that had become viable through the introduction of convicts and the assisted migration program.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place was the first purpose-built hall for public entertainment in Perth until the construction of more elaborate venues in the 1890s following Western Australia's Gold Boom.
The construction of the place symbolises the evolution of Perth and Western Australia from a struggling colonial outpost with limited economic resources and population, into one that had become viable through the introduction of convicts and the assisted migration program.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The Victorian Academic Classical architectural style of the portico is relatively rare in Western Australia.
The place is of aesthetic significance because it is a recognised landmark in the City of Perth.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision-making body is relevant

CONDITION AND AUTHENTICITY

Condition	Good
Building Fabric Authenticity	Medium level of authenticity as only the facade remains intact and restored.

CLASSIFICATION OF SIGNIFICANCE

Exceptional – Category 1

HISTORY

Until the 1880s the Perth town centre was characterised by the establishment of small cottages, shops and small businesses and was rural in character. The expansion of commerce following the discovery of gold in the 1890s put pressure on land in the centre of Perth with the result that most residential uses were displaced in favour of commercial development. During the 1890s and early 1900s the centre of Perth was substantially rebuilt. The period of expansion in Perth coincided with a period of economic depression in the eastern states, in particular Victoria. As a result, there was substantial migration from Victoria to WA. This migration included businessmen, architects and builders, all of whom had a considerable influence on the development of the city. Hay Street was established, along with St. Georges Terrace and Murray Street, as one of the main streets of Perth from the time of colonisation in 1829. It remained a major commercial street throughout the twentieth century and for most of that time was characterised by traffic, including trams. The character of the street changed after the section between William and Barrack Streets became a mall in the 1970s.
Post Office directories show that the building was originally No. 318 and/or 320. Numbering changed in 1908. The building was first listed in the post office directory in 1898 and occupied by the Perth Savage Club Ltd, which was founded in 1896, and first met in a different location. Dr. Harvey E. Astles (past president of the Melbourne club) was the club's first president. Many cities in Australia had a branch of the Savage Club. It was a social institution, associated with the London Savage Club, named after the poet, Richard Savage. The clubs brought together literary men connected with literature, the arts, sport or science. In 1900 the building was offices of Connor, Doherty and Durack Ltd, Westralian Wallsend Colliery. By 1907, it was a café (presumably

the ground floor) and the Celtic Club (probably upstairs). In 1908 when the number changed to 528, the building was a café, operated by F. Bellotti, and E. J. Rodereda, auctioneer and estate agent.
The Metropolitan Water Supply Survey plan (1953) shows the building abutting the No 534-536 on the west side. There is a passage on the western side to access stairs to the upper floor, which at that time was No. 532. No. 528 had a large cellar at the rear, and steps to the outside back yard.
The State Library of WA holds a photo dated 1973 showing the building as 'Mina Elizabeth Vincent Memorial House' containing the Canton Restaurant and National Bank Hay Street Branch. Another State Library of WA photo dated 1997 shows the building now had Chinese style awnings at first floor level. Aerial photos show that the building was reroofed between 1985 and 1995.
At 2022, the building is two cafe tenancies on the ground floor, and a small bar on the upper floor.

HISTORY

Until the 1880s the Perth town centre was characterised by the establishment of small cottages, shops and small businesses and was rural in character. The expansion of commerce following the discovery of gold in the 1890s put pressure on land in the centre of Perth with the result that most residential uses were displaced in favour of commercial development. During the 1890s and early 1900s the centre of Perth was substantially rebuilt. The period of expansion in Perth coincided with a period of economic depression in the eastern states, in particular Victoria. As a result, there was substantial migration from Victoria to WA. This migration included businessmen, architects and builders, all of whom had a considerable influence on the development of the city. Hay Street was established, along with St. Georges Terrace and Murray Street, as one of the main streets of Perth from the time of colonisation in 1829. It remained a major commercial street throughout the twentieth century and for most of that time was characterised by traffic, including trams. The character of the street changed after the section between William and Barrack Streets became a mall in the 1970s. The building was first listed in the post office directory in 1899 and called Davilak Chambers. It was originally No. 322-326. Numbering changed in 1908 to 534-536 (and 538 upstairs) and 540 (the corner tenancy of Pier Street). In 1899 Davilak Chambers was occupied by Stein and Co, stationers; William Broadhurst, tobacconist; Crown Law Offices (Hon. Richard Pennefather MLC) and Konigstein & CO, importers.
In 1930, Davilak Chambers hosts several different businesses, including a debt collector, cleaning company, tailor, café and more. By 1949 the directory shows that Davilak Chambers is No. 538 and only refer to the

upstairs tenancies. At this time No. 534 was The Thistle, refreshment rooms; No. 536 Luckey White Horse lottery agents; and No. 540 was Deague and Co, electrical engineers and contractors.
At 2022, the ground floor houses a Barber Shop and the corner is a café. Upstairs is legal offices.

The period of expansion in Perth coincided with a period of economic depression in the eastern states, in particular Victoria. As a result, there was substantial migration from Victoria to WA. This migration included businessmen, architects and builders, all of whom had a considerable influence on the development of the city. Hay Street was established, along with St. Georges Terrace and Murray Street, as one of the main streets of Perth from the time of colonisation in 1829. It remained a major commercial street throughout the twentieth century and for most of that time was characterised by traffic, including trams. The character of the street changed after the section between William and Barrack Streets became a mall in the 1970s.
Wood's Building on the corner of Hay and Pier Streets was built in the late 1890s. It was originally No. 330-332 and had various tenants over the years. It is not referred to as Wood's Building in the post office directory until 1927, which suggests it may have had a refurbishment at that time, as the building façade features the name on the corner pediment.
At 2022 the ground floor shopfronts are not original, but the upper level retains its architectural features.

HISTORY

Until the 1880s the Perth town centre was characterised by the establishment of small cottages, shops and small businesses and was rural in character. The expansion of commerce following the discovery of gold in the 1890s put pressure on land in the centre of Perth with the result that most residential uses were displaced in favour of commercial development. During the 1890s and early 1900s the centre of Perth was substantially rebuilt. The period of expansion in Perth coincided with a period of economic depression in the eastern states, in particular Victoria. As a result, there was substantial migration from Victoria to WA. This migration included businessmen, architects and builders, all of whom had a considerable influence on the development of the city. Hay Street was established, along with St. Georges Terrace and Murray Street, as one of the main streets of Perth from the time of colonisation in 1829. It remained a major commercial street throughout the twentieth century and for most of that time was characterised by traffic, including trams. The character of the street changed after the section between William and Barrack Streets became a mall in the 1970s.Post Office directories show that the building was first listed in 1898 and allocated street No. 334-344 which changed to No. 546-556 in 1908. It was the Perth Club chambers (probably upstairs) and had various tenancies on the ground floor. The Perth Club was till there in 1920. In 1925 the place was the Charlie Carters Buildings, and in 1949 when post office directories ceased publication the occupants were Charlie Carters Bulk Store (546-548) the Charlie Carters grocery store (554-556) and various commercial tenancies in between. Upstairs was 'Carters Flats' operated by Mrs R. Mooney. A photo held at the State Library of WA dated 1981 shows that the building was still Charlie Carters supermarket.

At 2022 the building is various commercial/retail outlets.

HISTORY

This hotel replaced the two storey 1878 John Bull Inn which in turn replaced an earlier hotel from 1848 called the John Bull Tavern. At this time John Chipper was the licensee and then owner. In 1885 the John Bull Inn's name was changed to the Criterion Hotel. This hotel was one of the earliest in Perth to have electric light which occurred in 1892. When the 1937 hotel was built it had over 100 rooms as well as public rooms and bars. It was a modern hotel with all the conveniences of the time. The hotel was built for the Swan Brewery Company who held the lease to the hotel on the site since 1892. It was designed by architects Hobbs, Forbes and Partners as J. J. Talbot Hobbs had previously designed the Swan Brewery Company's Brewery and Malthouse. Boans provided all the furniture, carpet, curtains, cutlery and crockery for the fit out. During the 1980s the hotel was

renamed the Regatta Hotel Complex. The hotel was renamed The Criterion in 1996 when it was reopened after refurbishment.

HISTORY

Until the 1880s the Perth town centre was characterised by the establishment of small cottages, shops and small businesses and was rural in character. The expansion of commerce following the discovery of gold in the 1890s put pressure on land in the centre of Perth with the result that most residential uses were displaced in favour of commercial development. During the 1890s and early 1900s the centre of Perth was substantially rebuilt. The period of expansion in Perth coincided with a period of economic depression in the eastern states, in particular Victoria. As a result, there was substantial migration from Victoria to WA. This migration included businessmen, architects and builders, all of whom had a considerable influence on the development of the city. Hay Street was established, along with St. Georges Terrace and Murray Street, as one of the main streets of Perth from the time of colonisation in 1829. It remained a major commercial street throughout the twentieth century and for most of that time was characterised by traffic, including trams. The character of the street changed after the section between William and Barrack Streets became a mall in the 1970s.The library as an institution has a long and illustrious social history focusing on education for the community. Its forerunners include the Swan River Mechanics Institute (1851), later the Perth Literary Institute (1909), and the City of Perth Library from 1957. The latter has been located at Council House (1963-1995), and then in the basement of the

Law Chambers on Hay Street (built 1969) which was demolished to make way for this new building. The library functions were temporarily located in 140 William Street from 2012-2015 while the new building was constructed. The City of Perth Library was opened in March 2016 and is already an architectural icon and landmark building in the City. It is a highlight in Perth of the career of prominent architect Kerry Hill and has won at least four architectural awards, including joint winner of the WA Architecture Awards' George Temple Poole Award in April 2016, and received four design commendations, including an honourable mention in the 2016 Singapore Architects Awards. The library was built by Doric Contractors, and has a circular design with seven floors, glass facades, and stone-clad columns.
In line with contemporary library practice, the City of Perth Library is a core part of the evolution of the Perth community, presenting a wide range of activities and resources for the community.

HISTORY

The first stage of the building was completed in 1896/1897. At that time Hay Street was known as Howick Street. The façade and later major additions were completed in 1901 and between 1913 and 1930 respectively. In 1897 the property was larger and went through to Murray Street and included a theatre, Cremorne Theatre and Cremorne Gardens which was an outdoor cinema. The arcade building included shops on the ground floor and offices on the upper floor. The building was known as Cremorne Lane and had many long term tenants including a music shop. After the 1930 redevelopment the place was known as Cremorne Arcade. In the 1980s the place was redeveloped and fast food tenants were located in the building.

STATEMENT OF SIGNIFICANCE

The remaining authentic fabric of the front façade of the place is a good example of two classically derived building frontages abutting one another in the Federation Free Classical style.
The upper level of the place makes a positive contribution to the streetscape setting.
The place provides evidence of the urban expansion and the intensive building program that occurred in the City of Perth as a result of the State's gold boom from the 1890s up to World War One.

Architectural Style 2 Specific	
Archaeology	
Physical Description	

Perth Town Hall is a longitudinal-shaped building built in Flemish bond brickwork with gabled roof and towers containing staircases in each of its four corners. The storeys are differentiated by decorative treatment. The tower has a feature clock and tourelles in the manner of a Castle Donjou of keep windows which are articulated by shafts. The building at street level is not in original condition. The brickwork has been clad with facing stone.

Walls 1 Material	Brick - Handmade
Walls 2 Material	
Roof Material	Timber - Shingle
Architect	Convict labour; Richard Roach Jewell
Builder	Convict Labour; Richard Roach Jewell

Other Associations	Aboriginal Registered Site (2128)

HISTORY

The site of the Town Hall was known as Koorari and was an important meeting place for Whadjuk Nyoongar people. The Town Hall site was selected in 1867 and a tender for its design was sought. Richard Roach Jewell and James Manning both contributed design ideas to the building. The foundations were laid by free tradesmen and the rest built by convict labour. The clock was an important feature of the building as personal clocks were not common. The clock was built in 1868 by Thwaites and Reid in London. The Town Hall was opened on 1 June 1870. The undercroft was originally used as a food market, however it was later enclosed and was the location of the city's fire engine. Perth City Council also used some of the space for offices. In 1924 the area was divided into shops and awnings attached to the exterior walls. Several changes were made to the building over time including enclosing the south parapet to create a Council Chamber which is now known as the Supper Room. In 1937 leadlight windows were added to the hall. In the 1960s a new Rural and Industries (R&I) Bank tower was built adjacent to the Town Hall which resulted in decorative tourelles which stuck out from the façade were removed so the new building could be attached. This building was demolished in 1994/1995. The Town Hall has been restored and renovated to ensure its continued use.

STATEMENT OF SIGNIFICANCE

The place is of aesthetic significance as a fine example of Victorian Free Gothic architecture.
The building is a rare Australian example of a nineteenth century town hall, built by conflict labour, modelled on fourteenth century European market towns.
The focus of civic and social activities since 1870, the place is a prominent Perth landmark.
It is an integral component of the precinct of public buildings associated with nineteenth century colonial administration.
The building is closely associated with the State's history of penal transportation.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

It is an integral component of the precinct of public buildings associated with nineteenth century colonial administration.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The building is a rare Australian example of a nineteenth century town hall, built by conflict labour, modelled on fourteenth century European market towns.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place is of aesthetic significance as a fine example of Victorian Free Gothic architecture.
The focus of civic and social activities since 1870, the place is a prominent Perth landmark.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The building is closely associated with the State's history of penal transportation.

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Good
Building Fabric Authenticity	High level of authenticity. A number of alterations have occurred to the building, in particular, the structural alterations to the undercroft in 1925 and 1957.

CLASSIFICATION OF SIGNIFICANCE

Exceptional – Category 1 - Essential to the heritage of the locality. Rare or outstanding example.

Archaeology	
Physical Description	

External - Three storey building forming an arcade between Hay and Barrack Streets with decorative pediments over the entrances. Original verandah has been replaced by an awning. Shop fronts modified from the original. The facade features decorative pilasters with stucco work and emphatic entablature, arched windows and decorative parapet and triangular pediments.
Internal - No internal access - shop fitouts all modern

Walls 1 Material	Brick
Walls 2 Material	Brick - Rendered
Roof Material	Metal
Architect	William Wolf
Builder	Cohen and Nicol
Other Associations	Sir Charles McNess (owner)

HISTORY

The land on which this building is located was owned by successful local businessman Charles McNess who erected five galvanised iron shops on this site from which he operated his business as an ironmonger and tinsmith. In 1896 and engaged architect William Wolf to design a substantial commercial premises for this prominent site. The original design was for two stories but an additional floor was added at McNess' request. Builder's Cohen and Nicol were engaged to construct the building and at the opening ceremony by the Lord Mayor of Perth Alexander Forrest, it was noted that the total cost of the building and land was £30,000. The arcade in the building was one of the first formal arcades in Perth and on opening had 17 tenancies on the ground floor. The basement included a dining room and billiard hall. Charles McNess made a significant

contribution to Western Australia as a philanthropist and was knighted for his services. The McNess Royal Arcade has been subject to alterations and additions since construction to suit new uses and occupants. The most significant in 1985 when a false ceiling was inserted in the arcade.

WESTERN AUSTRALIAN HISTORIC THEME

4. Building Perth (Settlements & Cities) - 4.1.5 Developing city centres
4. Building Perth (Settlements & Cities) - 4.6 Remembering significant phases in the development of settlements, towns & cities
8. Developing Australia's Cultural Life - 8.10.4 Designing and building fine buildings

STATEMENT OF SIGNIFICANCE

The Place is of aesthetic significance because it is a recognised landmark in the City of Perth.
The place is of aesthetic significance as an example of a commercial building constructed during the period of economic affluence and increased development that followed the gold boom.
The place is a fine example of Federation Free Classical style.
The place is of historic significance because it reflects the expansion and development of commerce and trade in the City of Perth in the early years of the twentieth century.
The place is a representative example of a commercial building in Perth during the period of development and consolidation following the gold boom.
The place is of aesthetic significance as an example of the work of architecture William Wolf.
The place is of historic significance for associations with Sir Charles McNess.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place is of historic significance because it reflects the expansion and development of commerce and trade in the City of Perth in the early years of the twentieth century.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The place is a representative example of a commercial building in Perth during the period of development and consolidation following the gold boom.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The Place is of aesthetic significance because it is a recognised landmark in the City of Perth.
The place is of aesthetic significance as an example of a commercial building constructed during the period of economic affluence and increased development that followed the gold boom.
The place is a fine example of Federation Free Classical style.
The place is of aesthetic significance as an example of the work of architecture William Wolf.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The place is of historic significance for associations with Sir Charles McNess.

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Good
Building Fabric Authenticity	Medium level of authenticity. Parts of the building fabric at ground floor and in the basement of McNess Royal Arcade have been altered and have a low degree of authenticity. However, with a few exceptions most of the building fabric on the upper floors is intact.

CLASSIFICATION OF SIGNIFICANCE

Exceptional – Category 1 - Essential to the heritage of the locality. Rare or outstanding example.

PHYSICAL DESCRIPTION

Architectural Style 1 General	Federation (c.1890-c.1915)
Architectural Style 1 Specific	Free Classical
Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

External - A building on a prominent corner location with frontages to both Hay Street Mall and Barrack Street, two storeys above ground level plus a basement. The building has a truncated corner facing the intersection and is ornamented with motifs, egg darts, swags and modillions.
The upper floors are divided into bays containing classical pilasters, balustrades and friezes with pediments to the corner and to the end sections of the facades. Advertising over the windows is obscuring evidence of windows on Hay Street Mall, Barrack Street is sashes with some containing AC units.
A metal faced awning extends across both elevations with a pressed metal lining and suspension rods.
There are two small modern shop fronts to both Hay Street Mall and Barrack Street with a larger modern corner shop front with dual street frontages and a corner entrance. The two Hay Street Mall shops have open frontages with concertina doors whilst the jewellers on the corner unit has plate glass full height windows in a more traditional arrangement. Frontages to Barrack Street are altered with full height windows and sliding doors.
Internal - No internal access - shop fitouts all modern.

Walls 1 Material	Brick - Common
Walls 2 Material	Render - Smooth
Roof Material	Metal - Corrugated Iron
Architect	Richard Dennehy (1907)
Builder	Alfred Frederick Lee (1891); James Douglas Sanders (1907)
Other Associations	Timothy Quinlan (owner); Daniel Connor (owner); Theodore Sharp (tenant)

HISTORY

The building known as the Connor Quinlan Buildings was constructed in 1891 following the purchase of the land by Timothy Quinlan in 1890. Quinlan and his father-in-law Daniel Connor were successful investors and one of the largest landholders in central Perth. The architect of the building has not been determined although it is known the builder was Alfred Lee. The first occupiers were recorded as McKernan & Co land agents and auctioneers. In 1892, the building was designated as Swan Buildings and occupants included; Chemist, George

Carrigan; Jeweller; F. Piaggio; and Draper, Gustav Luber. The first-floor offices were known as Swan Chambers. In 1899, the tenancy of the corner retail premises was taken up by tobacconist James Washington and this function has continued until the present day. The name 'Sharpe's' and 'Sharpe's Corner' originates with Theodore Sharp who took over the business in 1910.In 1906-7, architect Richard Dennehy designed an addition on Barrack Street which consisted of a basement, two shops and a photographic studio on the first floor. This structure was built by contractor James Douglas Sanders for £4898. The building has remained largely intact since that program of work apart from ongoing changes to the fit outs at ground level.

Physical Description	

The place is a three-storey building plus a basement, presenting modestly to Hay Street Mall with a set back to the upper level. A replacement boxed awning with tie rods projects out over the shop front with suspended signage below. A large signage feature projects out from the facade extending down the centre of the two upper levels.
At ground level, it has modern shop fronts with large windows and metal framed bi-fold doors allowing for a wide-open entrance. Entry to the main portion of the building is to the east of the main shop frontage.
Partially obscured from view at ground level is the first-floor balcony which is the main architectural feature of the facade. It extends across the full width of the elevation comprising four bays, separated by classically inspired pilasters. The bays are of brick construction with rendered arches incorporating feature key stone and the balustrade is concrete styled in the classical urn fashion. Behind the decorative facade is a simple elevation of painted brick and openings which correspond to the arches of the balcony form.
The upper storey of the building also contains four bays but in a more restrained expression. It has four segmented windows separated by pilasters.
Some original fabric and detailing remain extant within the upper floors.

HISTORY

The building known as Moana Chambers was constructed in 1908 to a design by architect, Richard Joseph Dennehy. The building was built by a group known as the Connor Quinlan Estate linked through connections with Daniel Connor and Timothy Quinlan. Connor was the father-in-law of Quinlan and the pair was large property owners in Perth and Western Australia in the late 19th century.
The building was opened by the Colonial Treasurer in 1908 and was described as a welcome addition to the structured in the main business thoroughfare and that the fit out was in the very best style. It was a fashionable place to dine and hold functions. In 1924 the café size was reduced and only occupied the first floor.
Throughout the 20th century the interior of the building was partitioned as different tenants' occupied different sections of the building. The café reduced its scale to operate only on the first floor in 1924 and tenants Ezywalkin Boot Store took occupancy of the ground floor. 'Ezywalkins' were long term tenants of the ground floor, and for some years the basement, of Moana Chambers. Ezywalkin's Boots and Shoe shop was open until the 1970s. The upper floors were also used for professional offices. In 1961 the verandah was replaced by an awning and when Hay Street mall was created in 1974 the shopfronts were changed.
The upper levels of Moana Chambers have been occupied by a variety of tenants and in the last few years, investigations into the activation of the first floor have been undertaken by architects SpaceMarket. Agency.
The first floor is currently being used as professional offices, gallery and café. The second floor continues to be used for a variety of tenants including artist's workshops and a long-term occupancy by a firm of tailors.

AUSTRALIAN HISTORIC THEME

4. Building Settlements, Town and Cities - 4.1.5 Developing city centres

STATEMENT OF SIGNIFICANCE

The place is a fine example of the Federation Free Classical style applied to a three-storey commercial building.
The place is an important element in the streetscape of the Hay Street mall which is the retail heart of Perth comprising a predominance of late nineteenth and early twentieth century buildings, a small number of Inter-war period buildings and a very small number of late twentieth century buildings which together form a precinct of strong aesthetic value.
The place is representative of the financial strength of Connor and Quinlan, one of the largest landowners in central Perth in this period, which formed part of the Connor Quinlan Estate.
Moana Chambers was an important social venue in the first decades of the 20th century built to serve the affluent members of Western Australia's community including politicians and business leaders.

Other Associations	Edward Sholl (origin of building name)

HISTORY

The building was constructed in 1896 for Edward Sholl (1854-1896), a prominent barrister and solicitor, and the building was known as Sholl's Building. Sholl died before the building was completed. The architect or builder has not been determined however it is noted that in 1897, Fanny Sholl, Edward Sholl's widow, engaged architect Henry Trigg to design a residence in Peppermint Grove for her. The Bohemia Club advertised its occupancy of its new rooms in May 1898. The ground floor of the building was used for retail and office space and other businesses were located on the upper two floors and basement. The ground floor tenancy was occupied during the early 20th century by booksellers and the Book Lovers Library was located on the premises. The ground floor and basement of the building was occupied in the early 1900s by E.J. Norman a picture framer and the upper levels were leased as professional rooms. On the second floor was the Bohemia Club. Some of the other tenants include accountants, solicitor, tailors and dressmakers, dentist and real estate agent. The Sholl family sold the building in 1967. In 1954 the Wilsons leased the building, and bought it in 1967, and established Wilson's Bridal and Dress Fabric store. All floors of the building were used for the business which was very

successful. From the mid 1970s the building was known as Bridal House. The ground floor is used as retail, however the upper floors are not currently occupied.

STATEMENT OF SIGNIFICANCE

The place is a good example of a three-storey commercial building exhibiting the characteristics of the Federation Romanesque style, which was not common in building design in the first decades of the twentieth century.
It is representative of the type and form of commercial building in Perth CBD at that time.
The place is part of a streetscape of landmark buildings mainly late nineteenth century with a small number of inter-war period buildings and a small number of mid twentieth century buildings.
Together his collection of buildings, including Bridal House forms a precinct of strong aesthetic value.
The place has historic value for its close association with many well-known families who significantly contributed to the commercial, cultural and social history and development of the City of Perth as well as the broader Western Australian community including the Sholl, Wilson and Masel families as well as individuals such as Brendah Barrye and businesses such as Perth Book Lovers Library.
The place is associated with Wilson's business that operated out of Bridal House (fmr Sholl's Building) was a well-known and popular destination for the women of Perth and Western Australia and responsible for dressing many of the brides of Perth for over 40 years.
The place is representative of commercial and retail activity in the central Perth CBD on the major retail street for over 100 years, and changes to the ground floor and basement represent changes in retail and activity in the CBD.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place is representative of commercial and retail activity in the central Perth CBD on the major retail street for over 100 years, and changes to the ground floor and basement represent changes in retail and activity in the CBD.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

It is representative of the type and form of commercial building in Perth CBD at that time.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place is a good example of a three-storey commercial building exhibiting the characteristics of the Federation Romanesque style, which was not common in building design in the first decades of the twentieth century.
The place is part of a streetscape of landmark buidings mainly late nineteenth century with a small number of inter-war period buildings and a small number of mid twentieth century buildings. Together his collection of buildings, including Bridal House forms a precinct of strong aesthetic value.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The place has historic value for its close association with many well-known families who significantly contributed to the commercial, cultural and social history and development of the City of Perth as well as the broader Western Australian community including the Sholl, Wilson and Masel families as well as individuals such as Brendah Barrye and businesses such as Perth Book Lovers Library.
The place is associated with Wilson's business that operated out of Bridal House (fmr Sholl's Building) was a well-known and popular destination for the women of Perth and Western Australia and responsible for dressing many of the brides of Perth for over 40 years.

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision-making body is relevant

CONDITION AND AUTHENTICITY

Condition	Fair
Building Fabric Authenticity	Medium level of authenticity.

CLASSIFICATION OF SIGNIFICANCE

Considerable – Category 2 - Very important to the heritage of the locality.

HISTORY

The 1920's in Perth was characterised by economic prosperity and expansion. There was considerable migration from Britain and Europe encouraged by government sponsored settlement schemes leading to a period of consolidation in the city with the continued commercial development including the construction of arcades, hotels and commercial buildings.
The depression of the early 1930's still saw commercial activity including the construction of cinemas.

Physical Description	

External - No access 2017 but previous reports indicate that original fabric and detailing remain extant within the upper floors. The upper floors have been vacant for a number of years and left largely untouched since their last occupation.

Internal - Five storey rendered brick former hotel building in the Federation Free Classical style. The main building has a gabled roof with a mansard roof to Hay Street. Two brick two-storey buildings are constructed to the rear. The façade presents with a heavily rusticated symmetrical facade with an awning at ground level and balconies to the upper levels. The lower balcony has a concrete balustrade and handrail whilst the upper balconies have a decorative cast iron balustrade/handrail. The central section of the facade is flanked by identical end bays with rusticated elements and three windows per floor with classical motifs. Pediment dormer windows punctuate the mansard roof section. The awning above the shops has been altered and the shop frontages are non-original. No other aspects of the exterior were accessed.

HISTORY

Savoy Hotel is a five-storey building containing ground floor retail tenancies, basement storage, former cinema and former hotel. It was constructed in 1914 on a site formerly occupied by The Shamrock Hotel. This hotel was leased from 1848-1851. In 1883 Daniel Connor purchased the hotel which was added to the landholdings in the vicinity. Architects, Hobbs, Smith and Forbes prepared plans for the new hotel in 1905 but it was not until 1914 that the building commenced. Prominent local builder, C. W. Arnott oversaw the construction which featured many modern features of the day. The building included a cinema, retail tenancies on the ground floor and the hotel rooms above.
In 1932, local shoe retailers, Cecil Brothers opened a large store on the ground floor and subsequently purchased the whole property in 1959. During World War Two the Army used the hotel. In 1961, the building underwent major refurbishments which saw the ground floor converted to one tenancy for Cecil Brothers. During the 1970s the profitability of retail businesses declined in central Perth and the cinema and hotel closed in the late 1980s. The Savoy Hotel was included on the State Register in 2001 and underwent external conservation and restoration works in the 2000s.

STATEMENT OF SIGNIFICANCE

The place was one of the largest hotels constructed in Perth at the time and is a tangible reminder of the optimism early in the twentieth century.
The place is an excellent example of the Federation Free Classical style and the work of architects Hobbs, Smith and Forbes.
The place contributes to the community's sense of place through the operation of a hotel on the site from at least 1877 through to the 1990s and shoe store from 1932.The place is significant for its association with the Army during World War Two.
The substantially intact interior spaces above the ground floor are representative of the type of accommodation expected by wealthy travellers early in the twentieth century.

Architectural Style 1 Specific	Free Classical
Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

The place is of three storey construction, plus attic and basement. The ground level is divided into six retail tenancies that have all been upgraded. The upper level of the building is of symmetrical façade divided into seven bays divided by fluted Corinthian styled columns. The second and sixth bays are distinguished by pediments above the entablature and by bays of 4 windows which punctuate the balustrade above. A cantilevered balustrade with wrought iron balustrade extends across the full length of the facade between ground and first floor levels. The central fourth bay marks the point where the two sections of the building meet: the western section is the former Hotel Metropole and the eastern section the former Theatre Royal. There are differences in the roof form of the two sections that cannot be seen from street level. All five retail units at ground level have contemporary fitouts obscuring any original fabric that may remain extant.

HISTORY

This three-storey building, the Theatre Royal was built on the site of a former shooting gallery in 1897 adjacent to, and incorporating the already existing Hotel Metropole (1894). It was built for local businessman and entrepreneur, Thomas George Anstruther Molloy. A number of sources have attributed the building to the

design of William Wolfe although it appears the theatre, at least, was designed by the architect J. S. Jackson, and the contractor was D. Gray.
The theatre which could seat 1000 people was a purpose-built live theatre space which replaced smaller venue such as St Georges Hall. It featured a sliding roof in the auditorium to provide ventilation, an important feature during summer. The theatre also started to screen movies from 1916 which increased its popularity and from the 1930s it became only used as a cinema. In the 1930s the interior was renovated which modernised it and made it more suitable as a cinema. In 1934, the property was transferred to new owners and converted to a cinema to designs by architects Baxter, Cox and Leighton. In 1962, the property was transferred to retail company, Sussans who commissioned architects, Krantz and Sheldon to oversee modifications to the theatre and the retail spaces. In 1977 the Theatre Royal was closed. A fourth cinema was closed in the 1980s and the retail tenancies have been regularly modified.
The Hotel Metropole was constructed with the financial assistance of the then Mayor of Perth, Alexander Forrest. On 8 May 1895, the foundation stone for the theatre was laid by the Mayoress, Mrs Alexander Forrest. The Hotel Metropole was advertised in 1901 as having 50 rooms with many common spaces for reading, billiards and dining room. In 1962 lingerie company Sussan bought the property and extensive internal renovation were undertaken including removing the fit-out for the lounge, saloon bar and public bar on the ground floor to turn them into retail spaces with a central arcade. The rooms on the upper three floors were turned into open spaces. The Hotel Metropole is currently used as retail space on the ground floor and the upper floors are disused.

Architectural Style 1 Specific	Old English
Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

External - London Court consists of basement, ground and three floors at each end with the main arcade section being two storeys and open air to the centre, designed to create the effect of a narrow street. The Hay Street facade presents in a mock Tudor style with rendering and timbered elements to the upper sections, diamond leaded lights and weatherboard detailing. The ground level shop units are of polychromatic brickwork. The dominant feature is the rendered arch and clock ensemble in an off-centre position in the facade. The arch leads into the arcade. The roof line to Hay Street consists of three gables, all with different treatments. Some of the original 55 shops have been combined to make larger retail units but still retain much of their original single unit presentation to the arcade frontage. The windows to the retail units are copper framed. The shops along the arcade are of polychromatic brick construction with fabric awnings and heraldry embellishments. The upper floors are roughcast render with timbered detailing to some sections. Windows are timber framed with square or diamond leaded-style windows. Internal - Original 1930s lifts remain extant with timber lined door, leaded glazing to the small window in the lift door and timber lining within the lift car with skylight and copper detailing. Ornate wrought iron floor indicator above the lift door. Office spaces and shops have all been upgraded but much original fabric remains retaining the essential 1930s character. Some of the office spaces have bay windows with deep window seats. Terrazzo lined floors to the staircase and landings. Ornate ship detailing to detailing to the cornice around ceiling to the ground level of the Hay Street entry statement.

HISTORY

London Court was erected on land purchased, in February 1936, on the site of a collection of back alleys known as 'Gun Alley'. The land was purchased by local businessman and entrepreneur, Claude A. de Bernales for the Australian Machinery and Investment Co. Ltd, for a sum of £75,000.He engaged Melbourne architect, Bernard Evans to design the arcade with local architects, Oldham, Boas and Ednie-Brown. The project was constructed by General Constructions Pty Ltd throughout 1937 and was opened on 29 July 1937 by Lieutenant Governor Sir James Mitchell. The construction of London Court was part of a building boom after the Depression.
The idea of London Court was to contribute to a north south pedestrian access from the train station to the Esplanade, through the new Plaza Arcade. The arcade design was an homage to a Tudor style but the flats and retail tenancies featured modern conveniences for the period. The original arcade comprised fifty three shops, fifty five offices and twenty-four residential flats
In c1952, London Court was sold by de Bernales.

The place is of aesthetic significance as an example of a commercial building constructed during the inter war period.
The place is of aesthetic significance because it contributes to the visual quality of its location.
The place is of historic significance because it represents the expansion of commerce and trade in Perth in the post-World War 1 period and the consequent establishment of a prestigious business district in the St George's Terrace area.
The place is of social significance because it represents a special place for members of the community associated with the development and consolidation following the gold boom.
The richly detailed facade of the place and its distinctive clocks are important tourist attractions.
The place is historically associated with the development of the shopping precinct of Hay Street, and the construction of shopping arcades as a medium for north-south pedestrian movement through the city.
The place has social value as a place for the people of Perth to shop, and for the association of the place with Britain and British history.
The place is closely associated with the entrepreneur and miner, Claude de Bernales.
The place is representative of the Inter-War Old English style of architecture, embodying all the principle elements of the style.
It is a rare example of an open air city arcade.
The place has significance as a rare example of Inter- War Old English architecture in Perth.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place is of historic significance because it represents the expansion of commerce and trade in Perth in the post-World War 1 period and the consequent establishment of a prestigious business district in the St George's Terrace area.

The place is historically associated with the development of the shopping precinct of Hay Street, and the construction of shopping arcades as a medium for north-south pedestrian movement through the city.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

It is a rare example of an open air city arcade.
The place has significance as a rare example of Inter- War Old English architecture in Perth.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

The place is of social significance because it represents a special place for members of the community associated with the development and consolidation following the gold boom.
The place has social value as a place for the people of Perth to shop, and for the association of the place with Britain and British history.

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place is of aesthetic significance because it is a recognised landmark in the City of Perth.
The place is of aesthetic significance as an example of a commercial building constructed during the inter war period.
The place is of aesthetic significance because it contributes to the visual quality of its location.
The richly detailed facade of the place and its distinctive clocks are important tourist attractions.
The place is representative of the Inter-War Old English style of architecture, embodying all the principle elements of the style.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The place is closely associated with the entrepreneur and miner, Claude de Bernales.

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision-making body is relevant

Architectural Style 1 Specific	Art Deco
Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

The Plaza Arcade presents with a striking multi-storey façade to the Hay Street elevation with the façade being described as having a 'symbolic skyscraper effect'. The Hay Street façade consists of three storeys of Art Deco inspired building with a replacement canopy separating the original facade from the modernised retail frontages below. The facade is of painted brick and rendered brick construction with a distinctive vertical emphasis.
The facade is symmetrical with recessed brick wings flanking a central rendered section. The original tapestry brick finish has been painted a monotonous red brick colour. The flanking wings are characterised by the three storey vertical metal windows with brick framing and non-original Art Deco motifs. The central rendered section contains two further vertical windows and the distinctive Art Deco styled signage fin. The east elevation extends along a ROW and is of plain brick construction with large windows to the upper level. The elevation has a patched appearance due to the blocking up of former openings, retaining the original lintels. The original design intent of the arcade remains visible albeit the detail of the finishes and shop frontages has altered. The arcade comprises a central pedestrian walkway with shops either side. The pedestrian walkway has a gentle incline from Murray Street to Hay Street. The interior of the arcade was refurbished in the 1980s which saw much of the original Art Deco detailing removed. Evidence of the original Theatre remains although the finishes and detailing have been compromised as a result of the adaptation to a night club in the 1980s. Evidence of the art deco style are visible in places, especially at the landing area. Part of the tiered seating remains extant.

HISTORY

Prior to the building of the Plaza Arcade and Theatre, the site was the location of the Armstrong Motor and Cycle Agency and Majestic Theatre which was opened in 1916. In 1936, members of the Saw family who owned this site, formed the Perth Arcade Co Ltd to develop the Plaza Arcade and construction commenced in 1937. The company engaged local architect William G. Bennett in collaboration with Melbourne firm, G. A. Soilleux to design the new complex. This Melbourne firm specialised in cinema design and acoustics in the Inter War period. They were likely to have been responsible for the internal design of the cinema whilst W.G. Bennett designed the remainder. The theatre could seat 1,300 people and was completed six months before Piccadilly Theatre and Arcade. The arcade contained 33 shopfronts. In the late 1950s the owners purchased an adjacent landholding and new tenancies were constructed to provide a continuous strip of tenancies on both sides of Hay Street to Murray Street. The cinema was refurbished in 1940 by architect William Leighton. The building was altered in 1963 and renamed the Paris Theatre in the 1970s. It became a discotheque in the 1980s and in 1984, the arcade and cinema underwent major renovations including painting of the Hay Street facade and the installation of a canopy over this entrance. The cinema ceased operating in the late 1990s.

HISTORY

Until the 1880s the Perth town centre was characterised by the establishment of small cottages, shops and small businesses and was rural in character. The expansion of commerce following the discovery of gold in the 1890s put pressure on land in the centre of Perth with the result that most residential uses were displaced in favour of commercial development. During the 1890s and early 1900s the centre of Perth was substantially rebuilt. The period of expansion in Perth coincided with a period of economic depression in the eastern states, in particular Victoria. As a result, there was substantial migration from Victoria to WA. This migration included businessmen, architects and builders, all of whom had a considerable influence on the development of the city. Hay Street was established, along with St. Georges Terrace and Murray Street, as one of the main streets of Perth from the time of colonisation in 1829. It remained a major commercial street throughout the twentieth

century and for most of that time was characterised by traffic, including trams. The character of the street changed after the section between William and Barrack Streets became a mall in the 1970s. In 1928, No 655 was Paris Café. The following year the directory lists this location as vacant; an indication of a new building. This building was constructed in 1929 for the owners, Melbourne jewellers, Dunklings who engaged local architect, F.G. B. Hawkins to design the building. Melbourne builder Raymond Ritchie secured the contract to construct the building. In 1930, Dunklings Ltd, jewellers and watchmakers is at 655 Hay Street, along with Aster Dining Rooms. The original design for 'Diamond House' featured blue glazed bricks on the main elevation and the name of the building depicted in copper letters. (See State Library of WA photo dated 1966, 144261PD). According to the Wise's Post Office Directories, in the 1930s as well as Dunklings, the Aster Dining Rooms was located on the premises. Dunklings continued to operate at the premises during the 1940s. A photo of Hay Street in 1962 shows the business' sign on the awning.
In 2020/21 new owners set about restoring some of the original features of Diamond House, including reinstating the building's unique blue-glazed façade of Wunderlich bricks. At 2022, the proposed use is a cafe and bar on all levels, including the rooftop.

Archaeology	
Physical Description	

Two storey structure that has been substantially remodelled to the exterior removing much of its original inter-war aesthetic. The upper section of the façade has been divided into a grid pattern incorporating blank panels of varying sizes, three small windows and three pairs of casement windows. The edges of the facade appear to be clad in metal. The retail portion of the facade at ground level consists of a deeply recessed door flanked by plate glass display windows. Original timber floors remain extant in storage area. Metal framed casement windows with original hardware to openings at upper level. Does not appear to be any original ornamentation at the upper level accommodation. Open plan shop with contemporary fit out, no evidence of any original details or finishes.

HISTORY

From the available information this building was constructed c1894 and the first occupant was draper, Mrs Knott. Since that time the building has had a variety of occupants and many modifications. A long-term tenant and owner was tobacconist and stationer, John Gleeson who refitted the premises for his occupancy in 1919 and remained there until c1937. Subsequent occupants were Madame Luckey, milliner and Raeme's Vogue Dress shop.
It is probable that the current façade was constructed c1960 when The Forum Coffee Lounge became the occupant.
They occupied the place until c2013.

Other Associations	

HISTORY

From the available information a building was constructed c1895 on this site and the first occupant was George Evans, a tent maker.
The place was occupied by a series of tenants in the early decades of the 20th century. By 1928, the place was occupied by optometrist Mr S. Sainken.
From the 1930s to late 1940s, a long-term tenant and owner were hatters, Grose brothers. The origin of the name 'Optical House' is not established as the occupancy by Sainken in the late 1920s does not appear consistent with the detail of the facade. Advertisements for a receptionist in The West Australian from 1950 refer to Optical House.
In 1967 the current building was constructed by builders Brian and Sons for Elias Ezekiel. The building was the premises for M Ezekiel and Sons optometrists. The upper floor was occupied by Peter Gregory who operated a hairdressing salon.

PHYSICAL DESCRIPTION

Architectural Style 1 General	Federation (c.1890-c.1915)
Architectural Style 1 Specific	Free Classical
Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

The place is a two-storey retail unit displaying classical motifs and detailing to the upper sections of the façade. The Façade has been divided into five bays of windows, separated by rendered brick columns. The outer columns present with rusticated detailing to the majority of their length, incorporating classical detailing to the upper sections. The parapet contains further leaf ornamentation and moulded string courses. The windows to the five bays are three-section ensembles, containing a pair of side hung timber framed casements and a frosted glass fanlight. The roof is a hipped structure clad in zincalume or other corrugated metal.
The awning canopy has been reclad, but the original structure may remain extant underneath the cladding. The shop fronts have been replaced with contemporary glazed displays and openings.
The two retail units have both been refurbished with contemporary fittings. It is unknown whether any of the original detailing remains extant under the newer fitout.
The upper level retains the office fitout with plastered and painted walls, acoustic tile ceiling with integral lighting and AC vents. The floor is carpeted. Evidence of the pressed metal ceiling is evident through the ceiling hatch. Original hardware remains extant on the front windows. The windows to the rear of the upper levels of Unit 662 have been bricked up but the frames remain extant.

Walls 1 Material	Brick - Rendered

HISTORY

From the available information this building was constructed in the early 1900s for the owner Mrs Patton. The first occupant appears to have been tailors and retailers, New Zealand Woollen Mills who occupied the premises until the 1920s.It has been previously noted that the date of construction was 1908, however the City of Perth rates books note that the building was present at this site in the early 1900s.Further research of the Certificate of Titles may resolve this query.
Later long-term occupants were 'Kodak' and 'Hilary's Frocks'. Later modifications have removed the ground floor facade although the upper level facade remains.

WESTERN AUSTRALIAN HISTORIC THEME

3. Occupations - 308 Commercial services and industries

AUSTRALIAN HISTORIC THEME

3. Developing Local, Regional and National Economies - 3.19 Marketing and retailing

STATEMENT OF SIGNIFICANCE

The place has some aesthetic value for the remnant elements of the Federation style on the upper level façade.
The place has historic value for its association with the development of the Hay Street retail precinct in the early 20th century.
The place has social value for the many members of the community for its continuity of function and contribution to the sense of place of the Hay Street mall.
The place is representative of the type of commercial premises in a retail precinct that have grown and changed as occupancies and standards change.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place has historic value for its association with the development of the Hay Street retail precinct in the early 20th century.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The place is representative of the type of commercial premises in a retail precinct that have grown and changed as occupancies and standards change.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

The place has social value for the many members of the community for its continuity of function and contribution to the sense of place of the Hay Street mall.

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place has some aesthetic value for the remnant elements of the Federation style on the upper level façade.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Fair
Building Fabric Authenticity	Medium level of authenticity. Externally the building still presents with a high degree of original fabric and detailing to the upper levels, retaining the classical motifs and detailing. Internally, the place has been fitted out with a contemporary fit out to the retail space at ground level obscuring or removing all original details.The upper level former office space has a false ceiling, but the original pressed metal ceiling lining is visible through the ceiling hatch. The windows to the front office retain the original hardware. The basement storage areas do not display any decorative detailing.

CLASSIFICATION OF SIGNIFICANCE

Considerable – Category 2 - Very important to the heritage of the locality.

HISTORY

The buildings at 661 and 663 Hay Street were constructed c1906 for the owner Arthur E Morgans who owned a number of properties in this section of Hay Street in the early 20th century.
The tenancies on the two floors were occupied by a series of businesses. In the 1910s and 1920s the ground floor was occupied by a succession of cafes.
In c1925, tailors Cogan Brothers purchased the property and engaged architects, Edgar Le B Henderson to design an extension at the rear of the building for additional workrooms.

Physical Description	

External - The place is a three storey building with retail uses to the ground floor and vacant upper levels. The upper levels of the façade present with distinctive classical motifs and detailing and incorporates a distinctive unicorn motif to the pediment. The windows display the typical design variation presented in classical architecture including arched windows at first floor level and square windows to the second-floor openings. The shop frontage has been upgraded replacing the traditional retail frontage with a wide open doorless entry, secured by roller shitter, and flanking side windows/panels. The awning has been reclad, but the original fabric of the structure may remain extant beneath the cladding.
Internal - Contemporary shop fit out obscuring any original detailing if it remains extant. Basement also has contemporary shop fit out. The empty office at first floor level retain the original timber floor. Original timber balustrade to the stairs on the upper level. Upper level spaces vacant.

Walls 1 Material	Brick - Painted
Walls 2 Material	Brick - Rendered

Other Associations	Sands and McDougall (occupants)

HISTORY

From the available information this building was constructed c1898 for the new occupants, printers and stationers Sands and McDougall. At that time the property was owned by Mr Saw. Sands and McDougall had previously occupied premises in St Georges Terrace and in 1928 they relocated to larger premises on the south side of Hay Street. This building and the new premises feature a unicorn in the front facade which together with the motto "Invicta" is the logo of Sands and McDougall. The firm continues to operate throughout Australia.

Architectural Style 1 Specific	Free Classical
Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

Two storey commercial building with a distinctive pediment and classical detailing. Whilst the name of the building has changed, the current name of 'Katies House' is in the same position as the original name and the circular 'Invicta' horse motif has been retained. The regular rhythm of the four original window openings across the facade has been retained albeit the window style has been replaced with louvered openings and smaller multi-paned windows above the louvres on the two outer openings. These changes are reversible.
The awning canopy is the original 1920s canopy incorporating bosses along the fascia. The tenancy branding is minimal and does not detract from the aesthetics of the element. The underside of the canopy is lined with traditional style ripple iron (custom orb) cladding. The shop frontage has been remodelled incorporating full height windows and concertina doors. There are no immediately visible original details remaining extant.
Internal - No internal inspection

Walls 1 Material	Brick - Rendered
Walls 2 Material	
Roof Material	Metal - Corrugated Iron
Architect

HISTORY

From the available information the original structure of this building was c1888 and long term tenants until c1927 were Booksellers, E.S. Wigg & Son.
In c1927, Wigg & Son moved to King Street and these premises were remodelled for the new tenants Sands and McDougalls who were well known printers and stationers.
Sands and McDougalls remodelled the premises for their requirements and it is believed the facade was altered at this time. A feature of the new facade was the distinctive unicorn logo of Sands and McDougall. The building was renamed 'Invicta House' which is an identifying motto of the company. Sands and McDougall occupied the

premises until the 1970s when it was transferred to new owners and occupants fashion retailers 'Katies'. The building has been referred to as Katies House since that time.

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Fair
Building Fabric Authenticity	Medium level of authenticity. The upper level of the façade has retained much of its original detailing from c.1925. The name of the building has been changed from 'Invicta House' to 'Katies House', utilising the same position as the earlier name and retaining the motif. 'Sands & McDougal Pty' which was originally positioned below the cornice has also been lost. The four window openings across the upper level of the facade have been retained but have been adapted to accommodate full height louvres to the two central windows and louvres and multipaned windows to the two outer openings. All other decorative elements have been retained. The verandah canopy appears to be the original, retain the boss at the east end of the canopy with updated tenancy branding. The shop frontage has been upgraded removing all traces of the 1920s frontage.

CLASSIFICATION OF SIGNIFICANCE

Considerable – Category 2 - Very important to the heritage of the locality.

PHYSICAL DESCRIPTION

Architectural Style 1 General	Federation (c.1890-c.1915)
Architectural Style 1 Specific	Free Classical
Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

The place is a two-storey retail unit displaying classical motifs and detailing to the upper sections of the façade including scrolls and dentils. The upper section of the façade has been divided into three bays, divided by pilasters, with each bay containing a window. The windows consists of a central pane, flanked by narrower panes with each section having its own high level window. The two outer windows appear to have modified central panes with solid panels to the lower section. The awning has been reclad. The original shop frontage has been replaced with a predominantly glazed facade incorporating bifold doors and large display window. Pressed metal ceiling remains extant in the rear storage areas together with sections of original cornice. Internal staircase appears to have been removed. Contemporary shop fit out with no evidence of any original detailing remaining visible.

HISTORY

From the available information this building was constructed c1912 for the owners, the Britnell Estate. The first occupant on the ground floor were tailors Cogan Brothers. The property was one of several lots in this portion of Hay Street subsequently owned by Thomas and Charles Britnell, and Mary Dunningham.
It has been previously noted that the date of construction was 1908, however the City of Perth rates books note new buildings at this location in 1912. (Further research of certificate of titles may resolve this question).
During the 1930s this building was occupied by Worth's menswear on the ground floor, a billiard saloon operated by Arthur Thomas and a tea rooms on the upper floor. Archival photographs indicate the place originally featured a more decorative parapet, but this has subsequently been removed.

WESTERN AUSTRALIAN HISTORIC THEME

3. Occupations - 308 Commercial services and industries

AUSTRALIAN HISTORIC THEME

3. Developing Local, Regional and National Economies - 3.19 Marketing and retailing

STATEMENT OF SIGNIFICANCE

The place has aesthetic value for the remnant elements of the Federation style on the upper level façade.
The place has historic value for its association with the development of the Hay Street retail precinct in the early 20th century.
The place has social value for the many members of the community for its continuity of function and contribution to the sense of place of the Hay Street Mall.
The place is representative of the type of commercial premises in a retail precinct that have grown and changed as occupancies and standards change.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place has historic value for its association with the development of the Hay Street retail precinct in the early 20th century.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The place is representative of the type of commercial premises in a retail precinct that have grown and changed as occupancies and standards change.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

The place has social value for the many members of the community for its continuity of function and contribution to the sense of place of the Hay Street Mall.

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place has aesthetic value for the remnant elements of the Federation style on the upper level façade.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Fair
Building Fabric Authenticity	Medium level of integrity. The place demonstrates a medium level of integrity. The ground floor still functions as a retail space but the upper floors are largely unused. Medium level of authenticity. The upper levels of the façade demonstrate a higher level of authenticity due to the extant original fabric and detailing. The ground level retail unit demonstrates a low level of authenticity due to the shop frontage being replaced.

CLASSIFICATION OF SIGNIFICANCE

Considerable – Category 2 - Very important to the heritage of the locality.

Architectural Style 1 Specific	Art Deco
Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

Trinity Arcade and Trinity Buildings presents as a substantial multi-storey building along the south side of Hay Street. The place has retained all original detailing to the upper section of the façade with its art deco motif and classical detailing including a rusticated finish to the entry statement sections and a striking dentil string course underneath the eaves. The facade is essentially a symmetrical arrangement comprising of six central bays, each with four windows and a dividing fin, and two taller end sections with balconies and ornamental pediments. The windows are all timber framed double hung sashes to the upper levels, each being of 6-over-1 pane style. The two rows of windows are separated by art deco motifs. The awning and entry arches are lined with pressed tin and appear to be the original feature. The shop frontages have all been altered and present in contemporary styles.
Trinity Arcade is a long narrow passageway with retail units on either side. A number of the retail units have projecting shop windows with copper framed windows and art deco fascias and recessed doorway entries. The walls are plastered and painted with marble dados. The floors are finished with tessellated tiles. The upper levels of Trinity Buildings appear to be highly intact with high retention of original fabric, detail and internal planning. The upper levels are divided into offices.

Walls 1 Material	Brick
Walls 2 Material	Render - Smooth
Roof Material	Metal - Corrugated Iron
Architect	James Hine (1923)
Builder	E. Allwood (1923)
Other Associations	Congregational Church

HISTORY

This building was constructed in 1923 to a design by architect James Hine for the Trinity Congregational Church who owned the property. The arcade provided access to Trinity Church on St Georges Terrace. Construction of the church was undertaken by contractor E. Allwood.
In 1981, major redevelopment was undertaken to extend the arcade to two levels through to St Georges Terrace which provided more retail tenancies.

3. Occupations - 308 Commercial services and industries
4. Social and civic activities - 407 Cultural activities

AUSTRALIAN HISTORIC THEME

3. Developing Local, Regional and National Economies - 3.19 Marketing and retailing

STATEMENT OF SIGNIFICANCE

The place has aesthetic value as the upper level facade is a good intact example of the Inter War Art Deco style.
The place has historic value for its ongoing association with the provision of commercial services at this site.
The place has historic value for its association with the Trinity Congregational Church.
The place has social value for the many members of the community for its continuity of function and contribution to the sense of place of the Hay Street mall.
The place is representative of the type of commercial premises built in the Inter War period that provided a mix of retail and office premises.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place has historic value for its ongoing association with the provision of commercial services at this site.
The place has historic value for its association with the Trinity Congregational Church.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HISTORY

The first congregational Chapel in Perth was erected in William St. in 1845.
Buildings on the St. George's Tcs site include the church and halls. The Trinity Buildings constructed in 1926 face Hay St.
Hall 1 was opened in August 1872 as the new schoolroom. Two transepts were added in 1890. The eastern transept was demolished, Hall 2 was a former church called the 'Secondary Building' and was constructed in 1864 and opened in 1865. The ceiling was added in 1879.
Trinity Church was dedicated in 1893 as the new church and opened in 1894. It was designed by Henry S Tigg and was aligned to address the street in the manner of the non-conformists in contrast to the siting of St. George's Cathedral (Church of England) which was sited in a green lawn.

8. Developing Perth's Cultural Life - 8.10.5 Advancing knowledge in science & technology

STATEMENT OF SIGNIFICANCE

The place is a landmark in the city. It occupies a strategic position in St. George's Terrace and, with its sculptural facade, makes a major contribution to the streetscape of central Perth.
The place is closely associated with the establishment and growth of religious activity in the State and with the Congregational Church in particular.
The place is representative of the development of religious and architectural practise in Western Australia.
The Schoolroom and Trinity Hall are some of the few remaining buildings by Richard Roach Jewell, an important colonial architect and Trinity Church is an interesting example of Victorian Free Gothic architecture.
The redevelopment of the place has been recognised for its substantial contribution to civic design in the 1980s.

Architectural Style 2 Specific	
Archaeology	
Physical Description	

Distinctive multi-storey building in a corner position, extending over basement, ground and four upper stories. The place is distinctive in the streetscape for its architectural style and is constructed of reinforced concrete. The shop front has been remodelled. The upper floors present as originally constructed with aluminium framed windows creating a regular rhythm to the elevations. The ground floor retail space has a contemporary fitout with suspended ceilings and new floor wall and floor treatments. Evidence of previous retail fitouts remain evident on upper floors. The stairwell has the original timber balustrade. The bathrooms retain the granolithic cubicles. The offices are simple in their presentation with carpeted floors, plastered and painted walls and acoustic tiled ceilings. There is evidence of some alteration to the plan form at upper levels with infill sections.

HISTORY

Until the 1880s the Perth town centre was characterised by the establishment of small cottages, shops and small businesses and was rural in character. The expansion of commerce following the discovery of gold in the 1890s put pressure on land in the centre of Perth with the result that most residential uses were displaced in favour of commercial development. During the 1890s and early 1900s the centre of Perth was substantially rebuilt. The period of expansion in Perth coincided with a period of economic depression in the eastern states, in particular Victoria. As a result, there was substantial migration from Victoria to WA. This migration included businessmen, architects and builders, all of whom had a considerable influence on the development of the city. Hay Street was established, along with St. Georges Terrace and Murray Street, as one of the main streets of Perth from the time of colonisation in 1829. It remained a major commercial street throughout the twentieth century and for most of that time was characterised by traffic, including trams. The character of the street changed after the section between William and Barrack Streets became a mall in the 1970s. Originally Carillon Arcade was two individual arcades known as City Arcade and Carillon City. City Arcade (674-678) was constructed in 1970 and refurbished in 1980. Carillon City was opened in 1982. In 1998, City Arcade was

purchased by the Hawaiian Property Group and Multiplex Property Trust and merged into what is now known as Carillon City. As part of the merger of the two arcades in 1998, extensive refurbishment works were undertaken.

Physical Description	

The façade to Hay Street is a striking three storey feature that makes a positive contribution to the varied streetscape of Hay Street Mall. The place has undergone alteration and adaptation in 2020/2021 but has maintained the key classical features of the façade including the dentil detailing, balcony columns and flanking end sections with rusticated render. The original windows behind the balconies have been replaced with new windows and doors. The shops at ground level have contemporary frontages and awning.
The shops along Hay Street all have contemporary fit outs using both modern and traditional materials including pressed metal. Few original details remain extant in the stores but there is occasional evidence of retained cornice. The upper level Food Podium area has retained original fabric albeit stripped back to its raw state revealing the original brickwork and making a feature of the bay windows. The original second floor has been removed, creating double height voids in places with a new suspended floor inserted in the central area.
The construction of the building began in 2006 and was designed by architects Hames Sharley. It retained the façade of the former Sandover building on the site. Western Australian retailer, Sandovers built these premises in 1908 to replace an earlier building destroyed by fire in 1907. The building was designed by Hobbs Smith and Forbes in 1921. The façade had to be reconstructed in 2020/2021 as it had structural issues caused by the demolition of the building behind it and inadequate protection from the weather while the new building was completed. A survey was taken of the façade to ensure an accurate copy was built.

Walls 1 Material	Brick

HISTORY

Until the 1880s the Perth town centre was characterised by the establishment of small cottages, shops and small businesses and was rural in character. The expansion of commerce following the discovery of gold in the 1890s put pressure on land in the centre of Perth with the result that most residential uses were displaced in

favour of commercial development. During the 1890s and early 1900s the centre of Perth was substantially rebuilt. The period of expansion in Perth coincided with a period of economic depression in the eastern states, in particular Victoria. As a result, there was substantial migration from Victoria to WA. This migration included businessmen, architects and builders, all of whom had a considerable influence on the development of the city. Western Australian retailer, William Sandover and Co, built a new premises at 685-691 Hay Street in 1908 to replace an earlier building destroyed by fire in 1907. It was designed by architects John Talbot Hobbs, Edward H Smith & Walter James Forbes. In 1930, the building was occupied by Sandovers and Harris Scarfe. In 1949 G. J. Coles and Co Ltd was at 683-687, and Harris Scarfe and Sandovers was at 691-699.In 2006 a new development designed by architects Hames Sharley was commenced and completed by 2010. It retained the façade of the former Sandover building on the Hay Street elevation. The new shopping complex, Enex, extends through to 100 St Georges Terrace, adjacent to Trinity Church.

WESTERN AUSTRALIAN HISTORIC THEME

3. Occupations - 308 Commercial services and industries
6. People - 605 Famous and infamous people

AUSTRALIAN HISTORIC THEME

3. Developing Local, Regional and National Economies - 3.19 Marketing and retailing

STATEMENT OF SIGNIFICANCE

Enex is representative of the type of commercial building dating from the early 2000s that provides a mix of retail and office space.
The retention of the 1908 Sandover building façade (Coles) adds aesthetic value to the Hay Street mall and contributes to a sense of place.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place is representative of the type of commercial building dating from the early 2000s that provides a mix of retail and office space.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The retention of the 1908 Sandover building façade (Coles) adds aesthetic value to the Hay Street mall and contributes to a sense of place.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision-making body is relevant

CONDITION AND AUTHENTICITY

Condition	Good
Building Fabric Authenticity	Low level of authenticity. The building behind the façade has undergone demolition, redevelopment and alteration to the original section. The façade has been rebuilt due to structural issues. Internally much so the original fabric and detailing has been lost.

CLASSIFICATION OF SIGNIFICANCE

Some/moderate – Category 3 - Contributes to the heritage of the locality.

HISTORY

These premises were originally part of a parcel owned by Albert Edmund Cockram, pastoralist and businessman. He owned the three lots which became 694, 696 and 698 and leased these properties to tenants. Other family members subsequently took over ownership of the property.
In 1908, this lot (694) was occupied by Peter Albany Bell who established his confectionary and tea rooms business at this site. In 1909 he relocated to the adjacent property at 696/698 Hay Street. It has not been established from the available research whether the upper level facade was part of the original construction in the early 1900s. A long-term tenant of this premises from the 1920s to the 1940s was Alex Kelly's boot store.

Architectural Style 2 Specific	
Archaeology	
Physical Description	

The upper level presents with blind openings across the entire façade. Originally the east section contained a pediment which has been removed impacting on the overall presentation of the place. The remainder of the detailing to the upper section appears to have been retained. A row of windows has been inserted just above the awning which allow natural light into the store. The store frontage has been reconfigured to present with two large display windows and a centrally located recessed entrance.
Large open retail space with plaster finish stripped off to reveal brickwork to the front section of the store. Replacement pressed metal extends around the edge of the ceiling. Contemporary store fit out.

Walls 1 Material	Brick - Rendered
Walls 2 Material	
Roof Material	Metal - Zincalume
Architect	Powell, Cameron and Chisholm (1938 shop front)
Builder	Arcus Ltd (1938)
Other Associations	Albert Edmund Cockram (Owner); Peter Albany Bell Ltd (Occupant)

HISTORY

These premises were originally part of a parcel owned by Albert Edmund Cockram, pastoralist and businessman. He owned the three lots which became 694, 696 and 698 and leased these properties to tenants. Other family members subsequently took over ownership of the property. The date of construction is not confirmed although buildings were on this site in the late 1890s.In 1908, Peter Albany Bell occupied the adjacent premises at 694 where he had established his confectionary and tea rooms business. In 1909, Peter Albany Bell relocated his business to this tenancy (696/698) and operated there until the late 1920s. It is probable that the existing building was remodelled at this time.

It has not been established from the available research whether the upper level facade was part of the original construction of the early 1900s. Archival photographs indicate that a decorative parapet was evident above the 696 Hay Street.
In 1938, the property was acquired by Victorian company, Edments Ltd, who oversaw major additions and modifications of the property designed by architects, Powell, Cameron and Chisholm. It was noted in the local press at the time that a dividing wall between two shop premises was being removed integrating the two premises into one. In recent years the facade has been modified and the original unifying intent of the upper level facade has been lost.

WESTERN AUSTRALIAN HISTORIC THEME

3. Occupations - 308 Commercial services and industries

AUSTRALIAN HISTORIC THEME

3. Developing Local, Regional and National Economies - 3.19 Marketing and retailing

STATEMENT OF SIGNIFICANCE

The place has some aesthetic value for the remnant elements of the Inter War Art Deco style on the upper level façade.
The place has historic value for its association with well-known confectioner and businessman Peter Albany Bell who operated his confectionery and tearoom business at this site in the early 20th century.
The place has historic value for its association with Edments chain stores which occupied this premises from 1938 until the 21st century.
The place has social value for the many members of the community for its continuity of function and contribution to the sense of place of the Hay Street mall.
The place is representative of the type of commercial premises in a retail grouping that have grown and changed as occupancies and standards change.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place has historic value for its association with well-known confectioner and businessman Peter Albany Bell who operated his confectionery and tearoom business at this site in the early 20th century.

Archaeology	
Physical Description	

Piccadilly Theatre and Arcade is a log rise masonry building extending between Hay Street and Murray Street. The retail arcade at street level provides pedestrian access and forms part of the historic pedestrian connections through the city. Retail units are located either side of the mall. The place was constructed in 1938 and substantially refurbished in 1984 with the place demonstrating characteristics of both these periods. The Hay Street end of the Mall contained a prominent entry statement incorporating a glazed barrel vault over the arcade opening with a curtain wall of reflective glazing. 'The Piccadilly' and a bird emblem stand proud of the glazed facade. The flanking masonry sections of the facade are rendered and are of differing appearances: the west section contains twin recessed panels with glass bricks above canopy level whilst the east section contains a single projecting panel and a painted bas relief mask. The Hay Street elevation has a secondary facade set back from the street at the upper level. A curved tower with a central vertical strip window is dominates. The remainder of the facade at this level contains three glass block windows, a wide horizontal coursing in the render, stylised lettering and a frieze along the parapet. Limited internal access to the upper level. The landing and staircase have retained the art deco aesthetic in the walls and balustrade, all paint finishes have been changed. The retail arcade has experienced some alterations to the shop frontages, arcade finishes in terms of new suspended ceiling and replacement floor coverings. The store fronts have tubular framing around the front section of the windows in keeping with the framing that is seen in the glazed entry canopy. The framing to the windows is not an original feature. Art deco detailing to the arches separating the retail units has been retained albeit partially obscured by the false ceiling.
In 2021 major refurbishment works to the arcade and theatre were undertaken, completed in 2022. This work involved redesigning the facade to a more stripped back monochromatic design. The large box awning replaced the curved entry and is replicated on the Murray Street Mall side. Internally the redesign involved taking the Art Deco design back to a more monochromatic colour and design.

Walls 1 Material	Brick - Rendered

Builder	General Construction Co

Other Associations	Claude de Bernales (owner); Hampton Timber & Hardware Pty Ltd (joinery and timber)

HISTORY

Piccadilly Theatre and Arcade was constructed in 1938, in Inter-War Art Deco style. The place was designed by architects Baxter Cox and Leighton for local property owner and businessman, Claude de Bernales, and incorporated part of the buildings already existing on the site. Construction of the building was undertaken by local contractors, General Construction Co and other local suppliers and trades contributed to the prominent project. Notable sculptor, Edward Kohler contributed designs and manufactured elements for the project. Piccadilly Theatre was one of a number of cinemas built during this period influenced by the Art Deco style. The popularity of the cinema in Western Australia during the Inter War period reflected an international trend. In 1984, Piccadilly Theatre and Arcade underwent extensive refurbishment guided by the designs of architect, Ian Tucker. The general decline of cinemas in central Perth lead to the closure of the cinema in 2013.In 2021 major refurbishment works to the arcade and theatre were undertaken, completed in 2022.

WESTERN AUSTRALIAN HISTORIC THEME

3. Occupations - 308 Commercial services and industries
4. Social and civic activities - 405 Sport, recreation and entertainment

AUSTRALIAN HISTORIC THEME

3. Developing Local, Regional and National Economies - 3.19 Marketing and retailing
3. Developing Local, Regional and National Economies - 3.21 Entertaining for profit

STATEMENT OF SIGNIFICANCE

The cinema is a fine example of the Inter-War Functionalist style retaining many of the aesthetic characteristics of this style which was common in the design of cinemas in the 1930s.The construction of the place in 1938 reflected the optimism and the desire for enjoyment and entertainment that prevailed at the end of the Depression and was one of a number of theatres and cinemas constructed in Perth and its suburbs during this period. At the time of its construction, the place was fitted out with the most modern features and was the first cinema in Western Australia to be air conditioned.
The place is associated with 1930s mining entrepreneur Claude de Bernales, cinema architect William Leighton, and sculptor, Edward Kohler.
The place is valued for its associations with entertainment and social activity having been part of the Hay and Murray Street shopping and entertainment areas since 1938 and, as a result, contributes to the Western Australian community's sense of place.
The tower, consistent colour scheme and dominant arcade entry statements make the place a distinctive element and landmark within both the Hay and the Murray Street streetscapes.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

PHYSICAL DESCRIPTION

Architectural Style 1 General	
Architectural Style 1 Specific	
Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

The building presents as a two-storey building with traditional upper section of the façade and remodelled street level façade. The upper section contains two identical window arrangements consisting of three timber framed double hung sashes, the central sash being marginally wider than the flanking sashes. This section of the facade is also divided into two bays by pairs of Tuscan style columns with Corinthian style capitals depicting the traditional acanthus leaf. Ornamental brackets are placed between each window and above the strong course. The building has a parapet wall which obscures the roof form and is characterised by a distinctive dentil styled cornice. The upper section of the facade is divided by a large signboard which creates the impression of the building being a pair of semi-detached units. The shop frontage has been completely remodelled with Dymocks having a completely open frontage secured by retractable screen. The adjoining unit has a divided frontage with aluminium framed double doors leading upstairs and a further set of doors leading into the retail unit.
No access was given to the upper levels of the building.
The Dymock tenancy is a large open plan form, interspersed with columns and beams across the ceiling. The majority of the original detail has been lost but the beams are still clad in decorative pressed metal. The ceiling panels are littered with light boxes. All other finishes are non-original.
The central set of doors at ground level provide direct access to a more recent staircase leading to the upper level offices, with visible skylights in the roof.
The adjoining tenancy is partially encapsulated in an aluminium framed 'glass house' which provides views to the upper level area. The retail unit is in the basement, with steps leading down directly from Hay Street - there does not appear to be any original detailing in this space.

PHYSICAL DESCRIPTION

Architectural Style 1 General	Inter-War (c.1915-c.1940)
Architectural Style 1 Specific	Stripped Classical
Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

Two storey brick building with art deco and classical detailing. The façade is simply expressed though much of the detail is obscured by the large metal modern window awnings.
The ground level frontage has been divided into two units: the east unit has the more usual arrangement of shop display and entrance whilst the adjoining unit is a much narrower space with a concertina door. All original detailing has been removed from this level of the facade.
Long open plan store with evidence of the original ceiling with art deco detailing and ornate cornices. All other original finishes have been lost. Towards the rear of the retail area the space is a double height void which may be indicate that the retractable roof remains extant.
The staircase to the upper rooms has retained the timber panelled balustrade which is now painted rather than the original natural timber. Timber panelling around the lift also remains extant.

Walls 1 Material	Brick - Painted
Walls 2 Material	Render - Smooth
Roof Material	
Architect	F.G.B. Hawkins (1932)
Builder	Todd Bros
Other Associations	Walsh's Menswear

HISTORY

This building was constructed in 1932 for the owners and tenants, menswear retailers Walsh's Ltd. The architect was F.G.B. Hawkins and the builders were Todd Brothers who submitted a successful tender for £5000 to construct the place.
The building originally featured face brickwork and circular motifs in the upper level windows.
Since construction the building has had a variety of tenants and owners.

WESTERN AUSTRALIAN HISTORIC THEME

3. Occupations - 308 Commercial services and industries

Heritage Place Record Form

For Adoption

AUSTRALIAN HISTORIC THEME

3. Developing Local, Regional and National Economies - 3.19 Marketing and retailing

STATEMENT OF SIGNIFICANCE

The place has aesthetic value for the remaining elements of the Inter War style on the upper level façade.
The place has historic value for its association with the development of the Hay Street retail precinct in the 1930s.
The place has historic value for its association with prominent retailer, Walsh's Ltd and architect F.G.B. Hawkins.
The place has social value for the many members of the community for its continuity of function, and contribution to the sense of place of the Hay Street mall.
The place is representative of the type of commercial premises in a retail precinct that have grown and changed as occupancies and standards change.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place has historic value for its association with the development of the Hay Street retail precinct in the 1930s.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The place is representative of the type of commercial premises in a retail precinct that have grown and changed as occupancies and standards change.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place has aesthetic value for the remaining elements of the Inter War style on the upper level façade.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The place has historic value for its association with prominent retailer, Walsh's Ltd and architect F.G.B. Hawkins.

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Good
Building Fabric Authenticity	Medium level of authenticity. The building has undergone a number of transformations from store to picture theatre and remodelled to form a store in the 1930s. An article in the Daily News published on 14 May 1932, states that the retractable roof that formed part of the theatre function was retained at the time the retail use was introduced. It is unknown whether this still remains extant. The upper section of the facade retains the aesthetics of the 1930s art deco classical detailing although much is the detail is now obscured due to the modern window canopies and tenancy branding. The shop frontage has been divided into two units which both have been upgraded removing all traces of the 1930s retail frontage.

CLASSIFICATION OF SIGNIFICANCE

Considerable – Category 2 - Very important to the heritage of the locality.

Architectural Style 1 Specific	Chicagoesque
Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

Sheffield House is a four-storey building with retail use to the ground floor and a uniform appearance above the awning. The three upper levels present with a regular rhythm of columns and windows, with the façade being divided into three bays, each bay containing six windows, with the bays being divided by columns with a tiled finish. Rendered panels horizontally divide each row of windows, each panel containing a projecting rendered panel with four tiles. The windows are large metal framed openings all divided into a number of panes and all with two hop hung openings. The eaves project over the facade and lined with tiles.
'Sheffield House' still remains across the fascia of the building at awning level as well as a projecting vertical sign on the facade. The ground level is dominated by a centrally located large retail unit, flanked by smaller units and the entrance to the upper levels at the east end of the elevation.
No original detail to the ground floor shop units.

Walls 1 Material	Brick - Painted
Walls 2 Material	Tile - Terracotta

HISTORY

This building was constructed through 1925 and 1926 by well known contractor A.W. Arnott. The building was designed by architects George Temple Poole and C.T. Mouritzen for the owners the Levinson family who were prominent jewellers trading under the name City Jewellers.
The building replaced an earlier structure also known as Sheffield House. At the time of construction Sheffield House was built between the Pavilion Theatre and Palladium Theatre.

PHYSICAL DESCRIPTION

Architectural Style 1 General	Inter-War (c.1915-c.1940)
Architectural Style 1 Specific	Art Deco
Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

Substantial and prominent multi-storey building constructed over basement, ground and three original upper levels with a later fourth storey being added. The shop frontages have been altered but present with a high level of coherency along the Hay Street frontage and immediately around to the William Street frontage but beyond the William Street entrance to the upper levels of the building there is more variation in the retail frontages. The awning has been altered but the levels above have retained their distinctive detail. The upper levels of the building presents with a regular rhythm of multi-paned openings at first floor level with colonnades to the second and third storeys. The mass of the facades to both Hay Street and William Street are broken up by three storied arched elements at the corner and centre of the facades, each containing two bay windows and an arched opening to the top section. Each arched section is demarcated by a rusticated frame and arch. The ground level shops all have contemporary fitouts obscuring any original fabric if it remains extant, the original concrete columns remain evident in some units. Escalators lead to the first floor from William Street. Limited access to the upper floors but it appears that original windows and hardware have been retained but the internal planning of the floors has been altered through subdivision, with the tenancies all presenting with contemporary fitouts. The upper level contains glazed atriums and wells with contemporary office fitouts.

Walls 1 Material	Brick
Walls 2 Material	Brick - Rendered
Roof Material	Metal - Corrugated Iron

Builder	C.W. Arnott
Other Associations	Elder Smith & Co (suppliers)

HISTORY

Economic Stores was a commercial enterprise that had a long association with this site. The firm had operated from this site from the 1860s and built new premises in 1907 designed by architects Hobbs, Smith and Forbes. That building was destroyed by fire in January 1921 leading to the decision to construct the extant larger premises. The current building was constructed in 1922/1923. The Economic Stores have been used as retail, office and professional rooms since construction, with the ground floor level occupied in the late 20th century by

Walshes Menswear. In the 1950s, a new floor was added and in 2012 major renovations and refurbishments were completed.

WESTERN AUSTRALIAN HISTORIC THEME

3. Occupations - 308 Commercial services and industries

AUSTRALIAN HISTORIC THEME

3. Developing Local, Regional and National Economies - 3.19 Marketing and retailing

STATEMENT OF SIGNIFICANCE

The place has aesthetic value as a good intact example of the Inter War Art Deco style and as a landmark at the junction of Hay and William Streets at the head of the mall.
The place has historic value for its ongoing association with the provision of commercial services at this site since the 1860s.
The place has historic value for its association with the long standing businesses; Economic Stores and later, Walshes Menswear.
The place has social value for the many members of the community for its continuity of function and contribution to the sense of place of the Hay Street mall.
The place is representative of the type of commercial premises built in the Inter War period that provided a mix of retail and office premises.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place has historic value for its ongoing association with the provision of commercial services at this site since the 1860s.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

Physical Description	

Bacton House is a three-storey building with distinctive façade due to blank central section of the elevation and the ornate pediment. The façade is divided into three bays, each divided by a rendered rusticated column. Originally each bay contained windows, but the four central openings have been blocked up. "Bacton House" remains visible in this section. The window openings in the flanking bays remain extant. A narrow band of small openings extend across the full width of the facade, positioned immediately below the eaves. Each window is separated by a truncated fluted column. The shop units have been remodelled to the frontages. No access to the upper levels. The retail units have all be upgraded with no evidence of any original detailing remaining visible.

Architectural Style 2 Specific	
Archaeology	
Physical Description	

Devon House is a four and five storey commercial building presenting with clearly discernible art deco styling. The building has been finished with a stucco render, creating a smooth finish to the elevations, with steel framed windows and glass block windows. The ground floor shop frontage has been remodelled but every other aspect of the facade retains its original detailing. Immediately above the new awning are a pair of steel framed openings, with a rendered fascia above with "Devon House" attached in art deco styled steel lettering. The remainder of the facade is dominated by rows of steel framed windows and glass block panels.
Contemporary store fit out with no evidence of the 1930s detailing

Walls 1 Material	Brick - Rendered
Walls 2 Material	Metal - Steel
Roof Material	Concrete
Architect	John R Saunders; William T Leighton
Builder	
Other Associations	John Saunders (owner)

HISTORY

This building was constructed in 1937 for the owners John R Saunders, a leading WA menswear chain, for £7245 to a design by architect William Leighton, who had joined, firm Baxter Cox. The building was leased and wasn't used as a Saunders store until the early 1950s. John R Saunders Limited was sold to Roger David Menswear in the early 1980s. A hairdressing salon has been located in the building for over 50 years under different owners.
The Saunders family owned the building until 1999. The original design featured glass bricks from floor to ceiling to enable good natural light. One of the first tenants was tobacconist, B. H. Alston.

Architectural Style 2 General	
Architectural Style 2 Specific	
Archaeology	
Physical Description	

Gledden Building is an eight-storey building creating a distinctive landmark on the corner of Hay and William Streets. The dual frontages are identical separated by a curved wall at the corner. A two-storey tower completes the corner face of the building.
The elevations are dominated by a regular rhythm of windows. All windows are timber framed sashes although those to the first floor have an additional highlight above the sash. Each window is separated from the one above by a fluted concrete panel. The facades are divided into bays, each separated by a full height concrete pilaster. The awning is the original 1930s structure which contains art deco motifs and the words "Gledden Arcade". The underside of the awning is lined with a stripe effect of smooth and roughcast panels. The arcade runs in an 'L' shape behind the corner retail unit., connecting Hay Street to William Street.
A number of the offices on the upper levels have been reconfigured and finishes upgraded. Not much original detailing remains visible. Some original skirtings remain extant, comprising run plaster mouldings with a deep timber skirting below. The internal windows are metal framed and look out over a glazed roof above the arcade. Parquet flooring runs through the public landings. The original metal panelled emergency escape doors remain extant.

Walls 1 Material	Concrete - Reinforced

Architect	Harold Boas
Builder	A.T.Brine
Other Associations	Robert Gledden (donor)

HISTORY

The Gledden Building is named in recognition of Robert Gledden a wealthy local investor who donated a significant sum to the University of WA to promote education in the applied sciences. UWA engaged architect

Harold Boas to design a building on this prominent site in the city. He submitted a design for a rare example of the Inter War Art Deco design in a high-rise building.
The building was constructed in 1937 by contractors A.T. Brine and Co who bid a successful tender of £36845.The UWA Senate organised a competition to include decorative friezes on the theme of Western Australia in the building. Three prize winning designs were included in the finished building. Due to the impact of World War Two it wasn't until 1954 that another high-rise building was built.

WESTERN AUSTRALIAN HISTORIC THEME

STATEMENT OF SIGNIFICANCE

The place demonstrates an innovative response to the architectural and urban issues associated with the concept of a modern commercial building in the late 1930s.The place is the only high rise Inter-War Art Deco office building in Perth.
The place is a rare and innovative combination of multiple functions within a city building, including basement restaurant, two level shopping arcade, office accommodation and roof top lookout.
The building, for many years the highest in the city centre, mirrors the tower form of Perth Town Hall, and together the two landmark buildings visually define the extent of the Hay Street Mall.
The place is an exceptional example of the integration of art and architecture, and demonstrates a contemporary concern for the civic value of public art.
The art works, based on Western Australian themes and an integral part of the building, have aesthetic and historic significance in their own right.
The association with the philanthropy of Robert Gledden, the architectural design of Harold Boas, and the University of Western Australia.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The place is the only high-rise Inter-War Art Deco office building in Perth.
The place is a rare and innovative combination of multiple functions within a city building, including basement restaurant, two level shopping arcade, office accommodation and roof top lookout.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place demonstrates an innovative response to the architectural and urban issues associated with the concept of a modern commercial building in the late 1930s.The building, for many years the highest in the city centre, mirrors the tower form of Perth Town Hall, and together the two landmark buildings visually define the extent of the Hay Street Mall.
The place is an exceptional example of the integration of art and architecture, and demonstrates a contemporary concern for the civic value of public art.
The art works, based on Western Australian themes and an integral part of the building, have aesthetic and historic significance in their own right.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The association with the philanthropy of Robert Gledden, the architectural design of Harold Boas, and the University of Western Australia.

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision-making body is relevant

CONDITION AND AUTHENTICITY

Condition	Good
Building Fabric Authenticity	High level of authenticity. The upper floors and arcade have retained their original Art Deco aesthetic. The shop frontages have been remodelled but are sympathetic to the original retail units. The Chemist unit to the east of the arcade has retained original aspects of the shop frontage.

CLASSIFICATION OF SIGNIFICANCE

Exceptional – Category 1 - Essential to the heritage of the locality. Rare or outstanding example.

HISTORY

Until the 1880s the Perth town centre was characterised by the establishment of small cottages, shops and small businesses and was rural in character. The expansion of commerce following the discovery of gold in the 1890s put pressure on land in the centre of Perth with the result that most residential uses were displaced in favour of commercial development. During the 1890s and early 1900s the centre of Perth was substantially rebuilt. The period of expansion in Perth coincided with a period of economic depression in the eastern states, in particular Victoria. As a result, there was substantial migration from Victoria to WA. This migration included businessmen, architects and builders, all of whom had a considerable influence on the development of the city. Hay Street was established, along with St. Georges Terrace and Murray Street, as one of the main streets of Perth from the time of colonisation in 1829. It remained a major commercial street throughout the twentieth century and for most of that time was characterised by traffic, including trams. The character of the street changed after the section between William and Barrack Streets became a mall in the 1970s. It is difficult to determine an exact date of construction, except to say that in 1895 the building was Nos. 148-152, occupied by Moorhouse & Co, shipping agents, the YMCA and Dowell & Co, manufacturers. The 1894 post office directory lists the YMCA in Hay Street, so the building could date from c. 1894, although it could have been rebuilt at some stage. By 1900 the building was numbered 550-554, occupied by Fowler Ltd, the YMCA, and Dowell & Co. In 1905, Drummond & Co were at No. 550, and by 1910 numbering has changed to 772-776, showing Drummond & Co at No. 772. No. 774 was James King, miller, as well as three off-street tenants (costumeries),

and No. 776 was Goss & Co, acetylene engineers. The earliest aerial (1948) shows another building behind the Hay Street frontage. Over the years various tenants occupied the three tenancies, including sometimes, separate businesses upstairs than downstairs.
One reasonably long term tenant was Adelaide Tailoring Co, and interestingly, tailors, clothing manufacturers and millers appear as tenants in the building for many years. By 1949 the Government Tourist Bureau was in No. 772 with Pellegrini's at No 776. By 1965 the aerial photo shows the building to the west and the back portion of the building were demolished and by 1974 a multistorey hotel had been built. It was originally called the Town Hotel and Town Cinema. The whole two storey building at 772-776 was the WA Government Travel Centre in 1979. State Library of Western Australia holds two photos of the building at that time, which show it had a suspended steel awning over the street. This has since been replaced with a steel and clear curved awning that warps around the east side of the building. In 1999 the building was City Duty Free, and in the 2000s a different duty free shop. When this relocated to Perth airport in 2017 the building became vacant.
At 2022 the building is for lease. The agent describes it as having a Basement: 304sqm, Ground Floor: 306sqm, and First Floor: 305sqm. The basement level has rear access for loading via Wolf Lane. Photos of the interior show that it is largely open space on both levels with little or no original features.

HISTORY

Until the 1880s the Perth town centre was characterised by the establishment of small cottages, shops and small businesses and was rural in character. The expansion of commerce following the discovery of gold in the 1890s put pressure on land in the centre of Perth with the result that most residential uses were displaced in favour of commercial development. During the 1890s and early 1900s the centre of Perth was substantially rebuilt. The period of expansion in Perth coincided with a period of economic depression in the eastern states, in particular Victoria. As a result, there was substantial migration from Victoria to WA. This migration included businessmen, architects and builders, all of whom had a considerable influence on the development of the city. Hay Street was established, along with St. Georges Terrace and Murray Street, as one of the main streets of Perth from the time of colonisation in 1829. It remained a major commercial street throughout the twentieth century and for most of that time was characterised by traffic, including trams. The character of the street changed after the section between William and Barrack Streets became a mall in the 1970s.

Post Office directories show that the building was first listed in 1908 occupied by Sandover and Co ironmongers, although the directory states this is 'temporary premises'. From 1909, No. 790 is the Metropolitan Dental Company, which remained in this location until at least 1949 (when directory publication ceased.) In 1930s, No. 794 was Matthew Goode and Co, a company that had a nationwide chain of stores. In 1999, the building was occupied by the Down to Earth Bookshop.
Business News online in July 2021 described the place colloquially as the Apple Building, as it had recently been occupied by Apple. There was a basement and office space in the first floor. The ground floor has no original fabric. The article stated the building was a rarity due to having front and back tenants. Aerial photos show that a building accessed from the Wolf Lane was erected in 2010. At 2022, this is the Spaniard Bar.

Other Associations	

HISTORY

The building is a unique example of Art Deco architecture with colourful brick panels designed by Edward Summerhayes in 1937. It was built for Nathaniel Harper who redeveloped the shops and warehouse which had previously been built. Harper established several business enterprises in Perth and was involved in gold mining activities in New Zealand and Tasmania before he arrived in WA in the 1890s. Yalumba Wines moved to Perth from Fremantle and established a tasting room in the basement which was an innovation for the time. Yalumba remained a tenant until the 1960s. Other businesses included Maples a furniture shop and Arthur Pigeon a wireless engineer (radios).

AUSTRALIAN HISTORIC THEME

2. Peopling Perth (Australia) - 2.4.2 Migrating to seek opportunity
3. Developing Perth's (Local, Regional & National) Economies - 3.19 Marketing and retailing
4. Building Perth (Settlements & Cities) - 4.6 Remembering significant phases in the development of towns and cities.
8. Developing Australia's Cultural Life - 8.10.4 Designing and building fine buildings

STATEMENT OF SIGNIFICANCE

The place is an excellent example of the Inter-War Functionalist style, which contrasts with the buildings in the immediate vicinity and through its scale and treatments fits comfortably in its streetscape context.
The place makes a significant aesthetic contribution to the streetscape of Hay Street and to the Hay/King Streets precinct, an area of acknowledged cultural heritage significance.
The place is closely associated with Nathaniel Harper, a well-known entrepreneur in Western Australia from the 1890s to 1954, and with architects Edwin Summerhayes, who designed the place (1937), and with Yalumba Wines, for whom the basement was custom designed and built as a tasting room.
The place retains much of its street frontage details above canopy level and principal spaces and therefore retains a high degree of authenticity.
The place is one of several significant buildings constructed in Perth in the period of recovery after the Great Depression and prior to World War Two.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place is one of several significant buildings constructed in Perth in the period of recovery after the Great Depression and prior to World War Two.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place is an excellent example of the Inter-War Functionalist style, which contrasts with the buildings in the immediate vicinity and through its scale and treatments fits comfortably in its streetscape context.
The place makes a significant aesthetic contribution to the streetscape of Hay Street and to the Hay/King Streets precinct, an area of acknowledged cultural heritage significance.
The place retains much of its street frontage details above canopy level and principal spaces and therefore retains a high degree of authenticity.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The place is closely associated with Nathaniel Harper, a well-known entrepreneur in Western Australia from the 1890s to 1954, and with architects Edwin Summerhayes, who designed the place (1937), and with Yalumba Wines, for whom the basement was custom designed and built as a tasting room.

HISTORY

An example of a commercial building constructed in Perth during the period of expansion and development that followed the gold rush of the 1890s.In 1890 Western Australia achieved responsible government. This, combined with the discoveries of gold in the early 1890's, provided the catalyst for development in Perth. King Street was gazetted in 1845 and named after King William IV. Prior to the 1890's the area around King Street was characterised by workers' cottages with shops, coal yards, smithies and foundries located in the adjacent areas of Murray and Hay Street. In the mid 1890's some smaller businesses began to establish themselves in existing cottages and a number of larger enterprises erected substantial new offices and warehouses in the area. Earlier uses primarily served the local population, however this later development was more broadly based and was a direct response to the expansion of the city centre during the gold rush. The period from the 1890's to early decades of the twentieth century was characterised by a vigorous public works and corresponding expansion of commerce and trade. During this period, the character of the area around King Street was established. This area has recently (1990's) undergone a substantial programme of restoration and is now characterised by new uses including cafes, boutiques and professional offices.

Physical Description	

His Majesty's Theatre is a four-storey theatre and hotel building of load- bearing brick with stucco ornamentation in the Federation Free Classical style.

Walls 1 Material	Brick - Rendered
Walls 2 Material	
Roof Material	Metal - Corrugated Iron
Architect	Frederick Liebe; Tom Malloy; William Wolf
Builder	Frederick Liebe; Tom Malloy; William Wolf
Other Associations	

HISTORY

His Majesty's Theatre, built for Tom Malloy in 1904, opened as, and has always remained, a live theatre, except on certain occasions where an epic film was shown. The theatre opened with a production of "The Forty Thieves" on 24 December 1904. It was designed by William Wolf. It can seat 2,584 people in the three tiers of seating.
The domed roof was designed to be opened for ventilation. Unfortunately, the two tiers of balconies were removed in 1947-48, as the supporting pillars were considered a traffic hazard.
By the 1970's the Hotel had become rundown and seedy and the new Concert Hall was the favoured performing venue. There were plans to demolish it, however a public campaign persuaded the State Government to buy and renovate the theatre in order to provide adequate venue for local performing arts companies. The hotel space was given over to administrative and public spaces. In the early 1980s the building was restored.
In 2021 a project by the State Government will reinstate the verandahs.

HISTORY

Until the 1880s the Perth town centre was characterised by the establishment of small cottages, shops and small businesses and was rural in character. The expansion of commerce following the discovery of gold in the 1890s put pressure on land in the centre of Perth with the result that most residential uses were displaced in favour of commercial development. The area around King Street was characterised by workers' cottages with shops, coal yards, smithies and foundries located in the adjacent areas of Murray and Hay Street. In the mid 1890s some smaller businesses began to establish themselves in existing cottages and a number of larger enterprises erected substantial new offices and warehouses in the area. Perth underwent a vigorous public works and corresponding expansion of commerce and trade, and by c. 1910 the centre of Perth was substantially rebuilt. During this period, the character of the area around King Street was established. Hay Street remained a major commercial street throughout the twentieth century and for most of that time was characterised by traffic, including trams. The character of the street changed after the section between William and Barrack Streets became a mall in the 1970s. In the 1990s King Street underwent a substantial programme

of restoration and is now characterised by new uses including cafes, boutiques and professional offices. Post Office directories show that the building on the north west corner of Hay and King Street was originally 606-612, changing numbers in 1908. Businesses have been listed in this location since the post office directory was first published in 1893, but it is difficult to determine in what form. For example, in 1900 there is Hing Lee and Co storekeeper, on the corner, with Joseph Marks, tailor, and Gosney Bros, carpenters adjacent. The WA Sports Club was located at the first-floor level from 1903. This club was founded in 1902 and first met in a Hay Street building 'opposite the Mechanics' Institute' which was on the corner of Hay and Pier Streets. (West Australian, 1 Dec 1902) In 1903 it was reported that "the committee of management of the Perth Amateur Athletic and Sports Club have found it necessary for the extension of the club to obtain larger and well-appointed rooms. It is proposed to take a new suite of rooms opposite the new theatre in Hay-street." (West Australian, 22 June 1903). This is a good indication that the building at 826-834 Hay Street was built in 1902/03. The building style is in keeping with the Federation Free Style typical of commercial buildings constructed during the period of economic affluence and increased development that followed the 1890s gold boom. The former entrance on King Street has a stucco decorative label mould over the doorway that reads 'Amateur Sports Club'. This doorway would have led to stairs to the upstairs space.
The Metropolitan Water Supply Survey plan (1942) shows that Nos. 826 (corner entrance), 828 and 830 are small narrow tenancies, and that No. 832-834 is combined and extends to the full length of the lot. On King Street, there was a brick building (No. 31) which at that time was not joined to the Hay Street building. There was a corrugated iron fence along the street at that time. From the street the ground floor shopfronts of all buildings are not original, but the upper level elevations are intact, except for the window frames. The facade is distinguished by bands of stucco, label moulds and strongly modelled arched windows with fanlights. The 1999 Draft MHI states that behind the façade there is an original residential building, but this needs to be confirmed, as the Water Supply survey plan does not suggest a residence.
The building at 31 King Street was originally a motor garage built in c. 1923. It was first listed in 1924 for E. J. Darley, motor agent. It is a single storey commercial building with a simple parapet and pediment; and a re-entrant door, still extant
.At 2022 there are various modern ground floor shopfronts along Hay and King Streets, with a suspended non-original awning.

WESTERN AUSTRALIAN HISTORIC THEME

STATEMENT OF SIGNIFICANCE

The place has historic significance as a commercial building constructed during the period of economic affluence and increased development that followed the gold boom.
It has aesthetic significance as a Federation Free style commercial building and forms an integral component of the Hay and King streetscapes.
The evolution of the building with the adjoining Inter-War building at 31 King Street represents the expansion and development of commerce and trade in the City of Perth in the early years of the twentieth century.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place has historic significance as a commercial building constructed during the period of economic affluence and increased development that followed the gold boom.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The evolution of the building with the adjoining Inter-War building at 31 King Street represents the expansion and development of commerce and trade in the City of Perth in the early years of the twentieth century.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

It has aesthetic significance as a Federation Free style commercial building and forms an integral component of the Hay and King streetscapes.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision making body is relevant

CONDITION AND AUTHENTICITY

Condition	Good
Building Fabric Authenticity	Medium level of authenticity as it has lost original detail at ground floor level but intact above.

CLASSIFICATION OF SIGNIFICANCE

Considerable – Category 2 - Very important to the heritage of the locality.

HISTORY

Prior to the 1890's the area around King Street was characterised by workers' cottages with shops, coal yards, smithies and foundries located in the adjacent areas of Murray and Hay Street. In the mid 1890's some smaller businesses began to establish themselves in existing cottages and a number of larger enterprises erected substantial new offices and warehouses in the area. Earlier uses primarily served the local population, however this later development was more broadly based and was a direct response to the expansion of the city centre during the gold rush. The period from the 1890's to early decades of the twentieth century was characterised by a vigorous public works and corresponding expansion of commerce and trade. During this period, the character of the area around King Street was established. The property was owned by Stephen James Chipper who operated his coach building business from the Hay Street frontage which had a house and sheds in the 1870s. By the 1890s his son Donald had changed the business to undertaking and operated a business from part of the lot which had been subdivided. The brick building which fronted Hay Street was rented as a shop and boarding house. Many warehouses, importers and merchants were located in this part of Perth due to its close location to

the train line, city markets and the retail areas of the city. In 1916 the ownership changed to Sir James Connolly who further subdivided the lot and a new two storey building was constructed, Durham House. The design has been credited to architect William Arthur Nelson and built by W. Leaster. The building had space for shops on the ground floor, rooms on the upper floor and a warehouse at the rear. The property went through to Murray Street which became a separate listing as Munster House. Shops were located at ground level and Joan Stacey's Dance School above. The building was extended along Munster Place in 1924 and then housed Sharpe's Dining Room. In 1929 the building was developed and a new entrance to the rooms on the upper floor was built, changes to the façade were also completed as designed by architect Fred Upton. In 1995 the property was developed into six residential apartments and further floors were added to the warehouse for new apartments. In 1953 the tenants purchased the property as a syndicate.

WESTERN AUSTRALIAN HISTORIC THEME

1. Settlement & Mobility - 111 Depression and boom
3. Occupations - 308 Commercial services and industries
6. People - 605 Famous and infamous people

AUSTRALIAN HISTORIC THEME

3. Developing Perth's (Local, Regional & National) Economies - 3.19 Marketing & retailing
3. Developing Perth's (Local, Regional & National) Economies - 3.21 Entertaining for profit
4. Building Perth (Settlements & Cities) - 4.1.5 Developing city centres
8. Developing Perth's Cultural Life - 8.10 Pursuing excellence in the arts & sciences
8. Developing Perth's Cultural Life - 8.10.4 Designing and building fine buildings

STATEMENT OF SIGNIFICANCE

The place is a fine example of the Federation Free Classical style and contributes to the King Street Precinct streetscape, which comprises a number of two and three-storey retail and warehouse buildings from the turn of the twentieth century.
The place is representative of a type of two and three-storey commercial building constructed around the turn of the twentieth century in the inner-city area that comprised ground level shops with offices above and featured an associated warehouse.
The place has particularly strong social associations for its occupation by Wrightson's Dance Studio in the post-World War Two years.
The place is associated with Sir James Connolly, a well-known Western Australian businessman and parliamentarian of the early twentieth century, and with the architects William Arthur Nelson and Frederick Upton.
The place is indicative of the development of the inner-city area over the last decades of the twentieth century as former commercial premises were adapted for new uses, including residential premises.

HISTORY

Until the 1880s the Perth town centre was characterised by the establishment of small cottages, shops and small businesses and was rural in character. The expansion of commerce following the discovery of gold in the 1890s put pressure on land in the centre of Perth with the result that most residential uses were displaced in favour of commercial development. The area around King Street was characterised by workers' cottages with shops, coal yards, smithies and foundries located in the adjacent areas of Murray and Hay Street. In the mid 1890s some smaller businesses began to establish themselves in existing cottages and a number of larger enterprises erected substantial new offices and warehouses in the area. Perth underwent a vigorous public works and corresponding expansion of commerce and trade, and by c. 1910 the centre of Perth was substantially rebuilt. Hay Street remained a major commercial street throughout the twentieth century and for most of that time was characterised by traffic, including trams.
The building at 847-851 Hay Street was originally a motor garage for William J. Winterbottom, built in 1911. Above it was ‘Johnston Buildings’ which catered for four tenants; in 1912 there were two dressmakers, an agent and an artist occupying the first floor. By 1930 the name had changed to Metters’ Building, with the ground floor occupied by Metters Ltd, hardware merchants, who were known for their Metters’ stoves. Metters was still there in 1949, listed as ‘stove and windmill manufacturers’ with a business college occupying the first floor.

At 2022 the upper floor is a medical centre, and the ground floor has two tenants. The ground floor has little original fabric. The upper floor has been adapted with several offices for doctors' rooms, but some materiality from the 1911 era remains.

HISTORY

Until the 1880s the Perth town centre was characterised by the establishment of small cottages, shops and small businesses and was rural in character. The expansion of commerce following the discovery of gold in the 1890s put pressure on land in the centre of Perth with the result that most residential uses were displaced in favour of commercial development. The area around King Street was characterised by workers' cottages with shops, coal yards, smithies and foundries located in the adjacent areas of Murray and Hay Street. In the mid 1890s some smaller businesses began to establish themselves in existing cottages and a number of larger enterprises erected substantial new offices and warehouses in the area. Perth underwent a vigorous public works and corresponding expansion of commerce and trade, and by c. 1910 the centre of Perth was substantially rebuilt. Hay Street remained a major commercial street throughout the twentieth century and for most of that time was characterised by traffic, including trams.
This location was the home of the Hon. Sir John Forrest, KCMG, MLA and Lady Forrest. It was built in 1876 by the Wittenoom family and bequeathed to Lady Margaret Forrest by her father, Edward Hamersley. The Forrests called the place “The Bungalow”. The home was by no means a modest bungalow, although it would have

started that way. It was modified over time as Forrest's fortune and status grew and became an extravagant house where the Forrests led a lavish lifestyle. The State Library of WA holds several photographs of the residence. Many garden and tennis parties were held for the elite of society at the time. The home was set amongst extensive gardens with a long driveway and a walled boundary. Forrest resided there when the first Premier of the State after 1900. The house was allocated No. 620, which after 1908 changed to No. 858. The property was large and the adjacent buildings were No. 844 to the east (Donald Chipper and Co, undertakers), and No. 874 to the west. In 1918 Sir John Forrest died. The Bungalow was sold in 1920 and demolished.
For several years there is no development between No. 844 (Chipper and Son) and No. 874. In 1926, a new building, still vacant, is listed at Nos. 864-870, called Bungalow Buildings. This is no doubt in tribute to Sir John Forrest's home that was on the location. The first occupants in 1927 were the Goodyear Tyre Depot and, on the first floor, the UK Native Association. In 1949, in the last published post office directory, the ground floor was the Liquid Fuel Control Board and Craiks furniture manufacturers, and the first floor was Illustrations Ltd, and Arthur Viveash, both photographers.
In 1982 the building was occupied by Dataprint, Sanitarium, and Intrim Fitness Centre, according to a State Library of WA photo (311538PD). This photo shows that the façade was originally unpainted stucco with red brick accents.
At 2022, the building is painted white and displays 'Bungalow Buildings' in the central pediment and has a stepped parapet and simple geometric ornamentation to the street façade. Of the seven windows to the upper floor, only three remain as original. The suspended awning with pressed tin underneath may be original. The ground floor shopfronts are modern. At 2021, 864-866 is vacant and up for lease, and 868-870 is a grocery store.

HISTORY

Until the 1880s the Perth town centre was characterised by the establishment of small cottages, shops and small businesses and was rural in character. The expansion of commerce following the discovery of gold in the 1890s put pressure on land in the centre of Perth with the result that most residential uses were displaced in favour of commercial development. The area around King Street was characterised by workers' cottages with shops, coal yards, smithies and foundries located in the adjacent areas of Murray and Hay Street. In the mid 1890s some smaller businesses began to establish themselves in existing cottages and a number of larger enterprises erected substantial new offices and warehouses in the area. Perth underwent a vigorous public works and corresponding expansion of commerce and trade, and by c. 1910 the centre of Perth was substantially rebuilt. Hay Street remained a major commercial street throughout the twentieth century and for most of that time was characterised by traffic, including trams.
In the 1890s, there was a small Georgian-style residence adjacent to 'The Bungalow', the Forrest family home, on the corner of the lane. It was occupied by S. J. Chipper. Off the lane (known as Chipper Lane) from 1908 was a livery stables run by J. W. Croasdale. In 1915, No. 874 was run as a boarding house by Mrs A. Stanton; and the livery stables were still behind, No. 876, now also a motor garage. By 1920 Croasdale's Motor Garage was advertising 'up-to-date cars, careful drivers day or night, weddings, race work and picnic parties.' In 1924 Perdriau Rubber Co moved in adjacent to Croasdale's and the laneway was named Perdriau Place. The businesses along Perdriau Place providing motor repairs and services. (This is now called Shafto Lane.) The

West Australian, 10 March 1928 reports on the new development, and has a sketch of the front design. The article reads: “The accompanying drawing shows the front design of a building, with two storeys and a basement which is to be constructed on the northern side of Hay-street, between King-street and Milligan-street adjoining Bungalow Buildings, and on the site of the last remaining dwelling house between Barrack-street and Milligan-street. The building will be erected for Mr. Taufik Raad. It will have a frontage of 50ft. by a depth of 143ft., and provision will be made for an additional floor. For a depth of about 63ft. the ground floor will comprise two shops, and the balance will be utilised as warehouse, while the upper storey will comprise offices. The architects, Messrs. Oldham, Boas and Ednie Brown, are now inviting tenders for the work, which is expected to be finished in October.” A later article reports Mr A. F. Toms as the builder.
A photograph of the last remaining house on this part of Hay Street was published in the West Australian, before its demolition. The report stated it was over 70 years old and was where Sir Walter James was born. James was invited to the site to see the house one last time before it was demolished on 13 March 1928. Taufik Raad was referred to as ‘the famous herbalist’ and made a success selling liver tonic and other remedies. He came to Western Australia from India around 1902, and after a year in Waroona practising his profession established a branch in Queen’s Buildings, 274 Murray Street. An article appeared in the 1908 ‘Sunday Times’ which seems to have been published to assure the public of his legitimacy. In part it reads: “Taufik Raad is a University graduate in the science of the nature and use of the component parts of medicine, the medical art, which consists in the collecting, preparing; preserving, and dispensing of medicines theoretically and practically. He has graduated in Physics, Zoology, Botany, Organic, Inorganic, and Analytical Chemistry, and has made a special study of the herbs of Syria, Palestine, and Sinai, from the Taurus to Bas-Muhammed, and from the Mediterranean Sea to the Syrian desert….The above-stated facts, together with the unsolicited testimonials and newspaper , extracts, should, convince the public that Taufik Raad is not a quack, nor an ordinary herbalist, but the sole proprietor of the Registered Standard Remedies…”In 1913 the Medical Board attempted to prosecute Taufik Raad for providing medical advice when not qualified as a doctor but the case was dismissed. He had done nothing more than recommend the use of his Standard Remedies. The State Library of WA holds two photos of ‘Taufik Raad, herbalist’ (1907 and 1928), and the data attached states he was a migrant from India.
In 1929, Raad’s Buildings was first occupied by J. Scadden estate agent (basement); Turvey Bros, furniture manufacturers (ground floor No. 874), No. 876 ground floor was till vacant; and Cresco Fertilisers and Colortype press on the first floor. In 1949, in the last published post office directory, the Raad’s Buildings was still occupied by Colortype Press, along with mantle manufacturer, and a motor cycle accessories store.
The Heritage Council holds a photo dated 1986 that shows the central pediment of the building displaying ‘Lyric House’ in painted lettering. This has since been removed. The upstairs floors were used by the Pentecostal church ‘New Day Ministries’ run by Paster Phil Howell.
At 2022, the building is two café/restaurants on the ground floor. The upper floor detailing is intact. The building displays elements of the Inter-War Stripped Classical style of architecture with a simple geometrical parapet and central pediment. The street facade features pilasters embellished with decorative stucco motifs, prominent classical cornice, multi-paned metal framed windows, and geometric designs in the render. Ground floor shop fronts are modern, and the suspended awning is not original.

STATEMENT OF SIGNIFICANCE

The place has historic significance as an Inter-War commercial building designed by Oldham, Boas and Ednie-Brown.
It has associations with Taufik Raad, Indian migrant who became a successful businessman as a herbalist.
The site is of historic significance as the location of the last remaining residence on this part of Hay Street, demolished in 1928 for Raad’s Buildings.

The building has aesthetic significance as an Inter-War Stripped Classical style and forms an integral component of the Hay Street streetscape.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

HISTORY

Until the 1880s the Perth town centre was characterised by the establishment of small cottages, shops and small businesses and was rural in character. The expansion of commerce following the discovery of gold in the 1890s put pressure on land in the centre of Perth with the result that most residential uses were displaced in favour of commercial development. The area around King Street was characterised by workers' cottages with shops, coal yards, smithies and foundries located in the adjacent areas of Murray and Hay Street. In the mid 1890s some smaller businesses began to establish themselves in existing cottages and a number of larger enterprises erected substantial new offices and warehouses in the area. Perth underwent a vigorous public works and corresponding expansion of commerce and trade, and by c. 1910 the centre of Perth was substantially rebuilt. Hay Street remained a major commercial street throughout the twentieth century and for most of that time was characterised by traffic, including trams. There was no commercial or business listing adjacent to No. 878 Perdriau Rubber (on the corner of Shafto Lane) through the 1920s, although there would have been houses and other businesses there in the 1890s. In 1930, No. 882 was Craiks, furniture manufacturers, with Patersons Printing in the basement. The Metropolitan Water Supply Survey plan (1939) shows this building (one west from the corner of Shafto Lane and east of the Butterworth buildings) as No. 882. At this time, it was occupied by John Lawley Ltd, drapers, with Patersons Printing in the basement, and the upper floor occupied by The Globe Furnishing Co. In 1949, in the last published post office directory, John Lawley Ltd, drapers was still the only tenant.

Aerial photos show that between 1953 and 1965 the building was extended to the full extent of the lot. It was originally only half the size. In 1982 the building was occupied by Coventry Motor Replacements, which also extended into the adjacent No. 876, according to a State Library of WA photo (311536PD).From the street the shopfronts are not original but the upper floor retains the elements of an Inter-War commercial building. It has stucco windowsills, a projected window awning and a central curved pediment. The parapet features an iron balustrade. At 2022 the place is a retail outlet on the ground floor.

HISTORY

Until the 1880s the Perth town centre was characterised by the establishment of small cottages, shops and small businesses and was rural in character. The expansion of commerce following the discovery of gold in the 1890s put pressure on land in the centre of Perth with the result that most residential uses were displaced in favour of commercial development. The area around King Street was characterised by workers' cottages with shops, coal yards, smithies and foundries located in the adjacent areas of Murray and Hay Street. In the mid 1890s some smaller businesses began to establish themselves in existing cottages and a number of larger enterprises erected substantial new offices and warehouses in the area. Perth underwent a vigorous public works and corresponding expansion of commerce and trade, and by c. 1910 the centre of Perth was substantially rebuilt. Hay Street remained a major commercial street throughout the twentieth century and for most of that time was characterised by traffic, including trams.
Perth Town Lot H19 had been in the ownership of Jeremiah Butterworth for many years, and after he died in his 1876 his will stated that it should be used for the benefit of the Perth Wesley Sunday School and the Wesleyan Methodist Society. The lot extended from Hay to Murray Street. Until 1898 this section of Hay Street was all residential. In 1898 the post office directory listed a commercial building at No. 632, Bennie Teare and Co, importers of mining and engineering requisites. In 1908, numbering had changed and the building was Perth Motor House (Winterbottom and Harris, importers of motor cars and marine motors). Businesses related to the motoring industry dominated this part of the city for much of the Inter-War period. The place was occupied by

Stewarts and Lloyds, tubes manufacturer from 1915 into the early 1930s.In 1922 Butterworth's trustees expressed a wish to erect two buildings, one with Hay Street frontage and one with Murray Street frontage (possibly current No. 413) on his lot. At the time the Hay Street frontage contained 'a two storey stone, brick, wood, and iron building, and in the centre some outbuildings, and a wood and iron structure used as a garage.' The trustees' architect and surveyor (Mr. J. L. Ochiltree) advised them it would be necessary to alter and rebuild portion of the premises on the Hay-street front; and estimated the cost of rebuilding at £3,723. (Daily News, 13 Nov 1922, p. 8) The Hay Street façade with 'Butterworth Buildings' written in stucco on the label moulding would most likely have been built at this time to incorporate the new building with the already established one.
A 'Daily News' article in 1934 stated that a new two storey brick warehouse building will be erected at the rear of 886 Hay Street with funds provided by the estate of Jeremiah Butterworth. The Metropolitan Water Supply Survey plan (1939) shows that the entrance leads to a timbered driveway behind. The two buildings either side have basements underneath. The 1948 aerial shows the lot comprised of three buildings. The westernmost extended almost the full length of the lot. There was a central entrance and a small building on the east. There was an open area behind which was later used for carparking, and another building located at the rear along the eastern boundary (this is possibly the 1934 building).In 1982 the building was occupied by Galerie Dusseldorf, the Palm Tree Coffee Lounge (see State Library of WA photo 311536PD) and the side of the building has a painted sign 'Leslie & Co, Oil Engines, Importers of Mining and Engineering Requisites.' Aerial photos show that in 2012 the open space between the buildings was converted into an outdoor area for a new entertainment venue (misleadingly called 'The Stables Bar.') At 2022 the place is mostly occupied by The Stables Bar, upstairs and down and in one of the shopfronts. The central arched former driveway entrance leads to the rear open space and upstairs.

HISTORY

The building façade notes the business Mortlock Brothers was established in 1896.
The business was located in 30 Queen Street in 1900 and in 1907 tenders were called to build a three-storey warehouse with basement in Queen Street. The business imported items such as gun metal and iron, angle and gate valves, horizontal and angle check valves, sole agent and importer of Sheffield cutlery and cycle components.
In 1923 they had moved premises to Hay Street; however, it is not known when the building was constructed.
The business' primary focus seems to be on selling Harley Davidson and Excelsior motorcycles and British Standard motorcars and B S A motor cars. The business supported motorcycle riders in Perth through the Harley Davidson club, holding runs to Parkerville Children's Home and as patron of the WA Car Club during the 1920s and 1930s.
The business also had a car showroom at 1016 Hay Street in the 1930s which continued into the 1950s. They were also a distributing agent for industrial engines in the 1940s.

HISTORY

The building was constructed as a garage for Grave-Dwyer Motor Co in 1912. Comet Motors operated at the property from 1925 into the 1950s. Both companies imported cars such as Ford and Morris, as well as supplying spare parts. In 1927 a reference was made to Harris and Dwyer's car showroom but the length of time this name change was in effect is unknown. The building was purchased by Mortlock Brothers in 1932 who were operating next door, however Comet Motors still operated from the building. There may have been some residences and offices located in the building as in the 1920s and 1930s there were references to the property as an address for a particular person. In 1936 Cumpston's Engraving Services were located on the first floor. It is unknown when the place became known as the Box Building.

HISTORY

Hay Street was established along with St. George's Terrace and Murray Street, as one of the main streets of Perth from the time of settlement in 1829. It remained a major commercial street throughout the twentieth century and for most of that time was characterised by traffic, including trams.
The character of the street changed after it became a mall in the 1970's.
The 1920s in Perth was characterised by economic prosperity and expansion. There was considerable migration from Britain and Europe encouraged by government sponsored settlement schemes. In the City this was a period of consolidation. There was continued commercial development including the construction of arcades, hotels and commercial buildings.
In 1923 the property address was the location of Maples House Furniture. The Bank of New South Wales was listed in 1928 at No. 899. In the 1935-36 Post Office Directory the bank is listed at 899-901 indicating that the building may have been built in this year as other businesses had been previously listed at No. 901.

WESTERN AUSTRALIAN HISTORIC THEME

AUSTRALIAN HISTORIC THEME

3. Developing Local, Regional and National Economies - 3.19 Marketing and retailing

STATEMENT OF SIGNIFICANCE

The place is of aesthetic significance as an example of a commercial building constructed during the Inter-War period.
The place is of aesthetic significance because it contributes to the visual quality of its location.
The place is of historic significance because it reflects the period of affluence and optimism following the end of World War One.
The place is a representative example of a commercial building constructed in Perth during the period following the end of World War One.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place is of historic significance because it reflects the period of affluence and optimism following the end of World War One.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The place is a representative example of a commercial building constructed in Perth during the period following the end of World War One.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place is of aesthetic significance as an example of a commercial building constructed during the Inter-War period.
The place is of aesthetic significance because it contributes to the visual quality of its location.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement
HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision-making body is relevant

CONDITION AND AUTHENTICITY

Condition	Good
Building Fabric Authenticity	Largely as originally constructed with detail intact, but some loss of detail to ground level.

CLASSIFICATION OF SIGNIFICANCE

Some/moderate – Category 3 - Contributes to the heritage of the locality.

HISTORY

John Dynon and Co had established a successful import business since 1898 and were noted as being one of the largest companies in the Australian colonies. They were located in Murray Street for approximately 21 years before moving to the building in Hay Street in 1921. It's unknown when the building was constructed. The advertisement for the business noted the types of stock including china, glass, earthenware, tea sets, dinner sets, toilet sets and fruit sets. By 1932 the building was being sold, but no bids were received. The auction advertisement described the building as exceptionally well-built brick building which contained a basement, two shops and offices on the ground floor and office space on the first floor. It was noted that the building could have a further three stories added.

HISTORY

Gilbert's, who were a car import business specialising in Citroens were located at the building in the early 1920s. They moved to bigger premises in 1925 due to the popularity of the cars. Arthur Clarke and Sons who manufactured springs for cars, did blacksmithing and nickel-plating and silverplating were located at the building from 1925 to 1930. Their slogan was "dependable springs for motorists." In 1929 an advertisement for The Hour Glass Library and Book Store circulating library was located in the building, possibly on the first floor. It is unknown how long the library and bookstore was located in the building.
From 1930 Comet Motors occupied this building as well as 918 Hay Street. In 1934 Oxford Motor Cycle Wreckers sold Japanese motor cycles. It's unknown how long the business was located in the building.

HISTORY

The period of expansion in Perth coincided with a period of economic depression in the eastern states, in particular Victoria. As a result, was substantial migration from Victoria to WA. This migration included businessmen, architects and builders, all of whom had a considerable influence on the development of the city. Hay Street was established along with St. George's Terrace and Murray Street, as one of the main streets of Perth from the time of settlement in 1829. It remained a major commercial street throughout the twentieth century and for most of that time was characterised by traffic, including trams.
The character of the street changed after it became a mall in the 1970's. Example of a commercial building constructed in Perth during the period of expansion and development that followed the gold rush of the 1890's.Alexandra Hostel opened in 1914 which is described as an up to date hostel where the best meals and accommodation can be found. There were 14 double rooms and 14 single rooms. By 1917 all the furniture was being sold by auction. The building had a verandah.

HISTORY

Hay Street was established along with St. George's Terrace and Murray Street, as one of the main streets of Perth from the time of settlement in 1829. It remained a major commercial street throughout the twentieth century and for most of that time was characterised by traffic, including trams. The character of the street changed after it became a mall in the 1970's. The 1920s in Perth was characterised by economic prosperity and expansion. There was considerable migration from Britain and Europe encouraged by government sponsored settlement schemes. In the City this was a period of consolidation. There was continued commercial development including the construction of arcades, hotels and commercial buildings. Although the depression of the early 1930s caused a decline in the building industry, by the late 1930s there was renewed activity including

the construction of cinemas. The English Scottish and Australia Bank (A.S. & A) had been established in the United Kingdom in 1852 as a Chartered Bank.
The E.S. & A was registered in 1893 and began trading in Western Australia in 1897. In 1884 the property was developed by Robert Hester and included three houses and sheds. These buildings were leased over the years and sold. No. 938-940 was a land agency office and the shop operated as a grocery and confectionery shop. A branch was established at 940 Hay Street in 1924 in one of the original buildings on the property. On 25 July 1928 a tender for the purchase and removal of the existing buildings on the north east corner of Milligan and Hay Street was accepted a new building was constructed. The new building was designed by the architects Oldham, Boas, and Ednie-Brown. The first floor was designed as office space and was leased out to the Commonwealth Government in 1930. The Australian Broadcasting Commission (ABC) was located here before they moved to the new studios in Adelaide Terrace in the 1950s. In 1955 the E.S.&A. bank was taken over by the Australian and New Zealand (ANZ) Bank. At this time the building was remodelled. In 1996 the bank sold the building and the ground floor is used for retail purposes.

3. Developing Perth's (Local, Regional & National) Economies - 3.20.2 Broadcasting
4. Building Perth (Settlements & Cities) - 4.1.3 Learning to live with property booms and busts
4. Building Perth (Settlements & Cities) - 4.1.5 Developing city centres
8. Developing Perth's Cultural Life - 8.10.4 Designing and building fine buildings

STATEMENT OF SIGNIFICANCE

The place is representative of Inter-War bank buildings, with its lofty and spacious banking chamber remaining intact.
The place reflects the building boom of the 1920s, particularly in the private sector, which was a response to the influx of post-war immigration and capital from agricultural expansion.
The place is closely associated with one of the early banking institutions in Western Australia, the English, Scottish and Australian bank (later ANZ). The place is an important part of the streetscape, complimenting the Melbourne Hotel (fmr) on the opposite street corner and providing a strong visual focus to both Hay and Milligan streets.
The place is closely associated with prominent Perth architectural firm Oldham, Boas and Ednie-Brown.
The place is a fine and rare example in Perth of a bank designed in the Inter-War Chicagoesque style.
The place is important as the studios and offices of 6WF, Perth's first radio station, from 1930 to 1937.

NATURE OF SIGNIFICANCE

HERCON Value A - Its importance in demonstrating the evolution or pattern of Perth's history

The place reflects the building boom of the 1920s, particularly in the private sector, which was a response to the influx of post-war immigration and capital from agricultural expansion.
The place is important as the studios and offices of 6WF, Perth's first radio station, from 1930 to 1937.

HERCON Value B - Its importance in demonstrating rare, uncommon or endangered aspects of Perth's heritage

The place is a fine and rare example in Perth of a bank designed in the Inter-War Chicagoesque style.

HERCON Value C - Its potential to yield information that will contribute to an understanding of Perth's history

HERCON Value D - Its importance in demonstrating the characteristics of a broader class of places

The place is representative of Inter-War bank buildings, with its lofty and spacious banking chamber remaining intact.

HERCON Value E - Any strong or special meaning it may have for any group or community because of social, cultural or spiritual associations

HERCON Value F - Its importance in exhibiting particular aesthetic characteristics valued by any group or community

The place is an important part of the streetscape, complimenting the Melbourne Hotel (fmr) on the opposite street corner and providing a strong visual focus to both Hay and Milligan streets.

HERCON Value G - Any special association it may have with the life or work of a person, group or organization of importance in Perth's history

The place is closely associated with one of the early banking institutions in Western Australia, the English, Scottish and Australian bank (later ANZ).
The place is closely associated with prominent Perth architectural firm Oldham, Boas and Ednie-Brown
.

HERCON Value H - Its importance in demonstrating a high degree of creative or technical achievement

HERCON Value I - Any HERCON Value I - Any other characteristic it may have that in the opinion of the decision-making body is relevant

CONDITION AND AUTHENTICITY

Condition	Fair
Building Fabric Authenticity	Medium level of authenticity as it has lost some original detail at ground floor level but intact above.

CLASSIFICATION OF SIGNIFICANCE

Exceptional – Category 1 - Essential to the heritage of the locality. Rare or outstanding example.

HISTORY

The building is a fine example of a gold rush hotel of the 1890s, its extravagance and ostentation, which was then new to Perth, is typical of the period. The lavishness of its decoration is demonstrative of the confidence and opulence of the gold rush period. The building is one of the few most elaborate gold rush hotels remaining in Perth. In the 1890s a brewing company was located on the property which became the Melbourne Hotel. In 1897 the property was listed in the rate book as hotel. At this time Milligan Street developed as a residential area. It operated as a hotel and then nightclub until the 1980s. In 1995 the building was used as a private club.

STATEMENT OF SIGNIFICANCE

The place is of aesthetic significance because it is recognised landmark in the City of Perth.
The place is of aesthetic significance as an example of a commercial building constructed during the period of economic affluence and increased development that followed the gold boom.
The place is a good example of Federation Free Classical style with decorative classical elements, which contribute visual and textural qualities to the streetscape.
The place is of historic significance because it reflects the expansion and development of commerce and trade in the City of Perth in the early years of the twentieth century.
The place demonstrates the substantial growth that occurred within Perth during the gold rush period.
The place's almost unchanged external appearance of the place is uncommon.
